This Article is brought to you for free and open access by the Information Services at Digital Commons @ Connecticut College. It has been accepted for inclusion in Information Services Faculty Guides by an authorized administrator of Digital Commons @ Connecticut College. For more information, please contact bpancier@conncoll.edu. The views expressed in this paper are solely those of the author.
Information Services website: www.conncoll.edu/is/

**Digital Curriculum Center**
439-2093  Lower Level of Shain Library
The DCC provides high-end audio, video and image production equipment and support for the development of digital resources for use in the curriculum. The facility also has the resources for scanning text and images. To use the center at a specific time or for assistance with a project, please contact Mike Dreimiller (x2093), digital media specialist.

**Tempel Summer Institute**
The Tempel Summer Institute is a one-week pedagogy and technology workshop for faculty interested in designing or re-designing a course to incorporate Web-based technologies to enhance student learning. Contact Chris Penniman (x2381), director of instructional technology, for additional information.

**Language and Culture Center**
439-2180  Room 102 of Blaustein Humanities Center
The Language and Culture Center supports foreign language departments and the Toor Cummings Center for International Studies and the Liberal Arts (CISLA) program. Students may use videocassettes, CD-ROMs and DVDs in conjunction with departmental courses or for independent work on listening comprehension and speaking skills. Computer-aided instruction in languages is also supported. For more information, contact Laura Light (x3387), instructional designer/developer.

**Media Services**
439-2693  Room 108 of Blaustein Humanities Center
Media Services provides the Connecticut College community with equipment and technical support to enhance teaching and learning in the classroom. Request for equipment and support require two weeks’ advance notice and are scheduled through the Events Office (x5462). Contact Dave Baratko (x2693), media services senior technician, for additional information.

The following equipment can be requested for classroom support:
- Overhead, slide, film, video and data projectors
- CD, cassette, VHS and DVD players
- Multi-region/format VCR and DVD players

The following equipment can be reserved for individual checkout:
- Digital camcorders
- Cassette tape recorders

Media Services offers video dubbing services (within copyright protection laws) and a basic video-editing suite.

**Academic Software**
A number of software applications are licensed and available to the College community through the Software Library Server. Further information about the Software Library Server is available through the Academic Software section of the IS website under Teaching Support. Contact the IT Service Desk (x4357) for assistance. Funds are available for the purchase of academic software to support teaching and research. Requests for the purchase of academic software should be sent to your Instructional Technology Liaison.

Information Services Computer Classrooms
Shain Library Computer Labs: The computer labs in Shain Library are available for group research, library instruction and classes. Each lab is equipped with an instructor’s workstation with computer projection. All requests for use of the Davis Classroom and for library instruction should be made through your library liaison. Requests for using the PC Electronic Classroom and Neff Lab should be directed to Chris Penniman (x2381), director of instructional technology. If specific software needs to be installed for your class, please give at least two weeks’ notice. These labs are available during regular library hours.

Technology-enabled Classrooms: Computer and video projection systems are available in many classrooms on campus. See www.conncoll.edu/is/classrooms.htm or contact Chris Penniman (x2381) for more information. Classrooms are scheduled by the Office of the Registrar (x2068).

Course Web Pages
Course resources can be delivered online in a password-protected area using Moodle, our Web-based learning management system. For information about using Moodle, please contact Diane Creede (x5145), instructional designer/developer.

CameWeb
CameWeb, the College’s intranet portal, offers secure access to forms, documents and policies as well as current campus information.

Office Computer Replacements and Purchases
The College’s Computer Technology Purchases Policy is available on the IS website under Policies. All faculty and staff computers are on a replacement schedule. Please contact Ruth Seeley (x2090), manager of computer support services, with questions about computer replacement or purchases.

Off-Campus Access
Email: Web access to email is available at http://mail.conncoll.edu. Enter your network username and password for authentication. Contact the IT Service Desk for assistance at 439-4357.

Library resources: Most of the library’s electronic subscription products such as e-journals and indexing databases (JSTOR, Academic Search Premier, etc.) are available from off campus with a valid campus network username and password. You will be prompted to log in when connecting from off campus. Contact the Reference Desk for assistance at x2655.

Lynda.com
All students, faculty and staff have access to lynda.com, an online subscription library that teaches the latest software tools and skills through high-quality instructional videos taught by recognized industry experts. More than 1,400 training videos cover a broad range of subjects, and new courses are added every week. You can access the lynda.com library through CameWeb or from a mobile device.

**Faculty Guide 2013-2014**

Greetings:
We, in Information Services, hope this Faculty Guide will help make you aware of the resources available for your teaching and research efforts. We try to provide innovative, reliable and universal access to our resources and services – and we are always interested in how we can improve our efforts. Let us know how we can assist you.

W. Lee Hole
Vice President for Information Services and Librarian of the College x2650

Section of the IS website under Computer & Technology Resources. The IT Service Desk can be reached at x4357 or through the Computing and Telephone Support service at conncoll.edu. To login with your network user name and password. To submit a service request or report a computer problem, go to http://webhelpdesk.trinitycollege.edu and follow the appropriate instructions.

Library Liaisons
Library liaisons are assigned to departments to be available as a point-of-contact for faculty interested in incorporating technology in the curriculum. IT liaisons can provide guidance in selecting appropriate technologies to address the teaching and research needs of the department’s faculty. Library liaisons work with librarians who provide instruction and develop collections that support the academic and research needs of the department. Library liaisons offer individual and group instruction in the use of the online library catalog and research databases, and provide guidance with research projects. Liaisons can also serve as a resource in developing course assignments with a library research component. Recommendations and requests for new titles for the library’s collection should be directed to the department’s library liaison.

Instructional Technology Liaison Program
The Instructional Technology liaison program is designed to support the teaching and learning goals of the faculty. It is a multidisciplinary program that involves library liaisons, instructional designers, and technology specialists. The program is designed to help faculty integrate technology into their courses, regardless of discipline, are encouraged to contact Carolyn Johnson (x2710), music librarian.

Visual Resources Library
The Visual Resources Library houses slides, video, DVD and digital image collections for academic use. Series available include assistance with scanning, locating images, navigating ARTstor, using Photoshop, or adding images to presentation tools.

Special Collections and College Archives
Faculty members are invited to make use of the primary source materials in Special Collections and the College Archives for classes to support student projects and for their own research. Located in the Linda Lear Center for Special Collections & Archives on the second floor of Shain Library, the collections include over 20,000 rare books, artwork and College history materials, as well as manuscript collections including the Sheaffer-O’Neill Papers on Eugene O’Neill, the William Meredith Papers, the Linda Lear/Rachel Carson Collection, the Conservation and Research Foundation Archive, and the papers of important historical figures such as Prudence Crandall, Belle Moskowitz, Frances Perkins and Lillian Wald. The Lear Center also houses a growing collection of contemporary artists’ books. Consult with Ben Panciera (x2654), director of special collections and archives, about how these materials can be used to enrich your course.

Faculty Publications: The library encourages faculty members who publish to contribute copies of their work to the College Archives for inclusion in the Connecticut College Faculty Authors Collection. Electronic archiving of faculty publications is possible through DigitalCommons@ConnecticutCollege. Contact Ben Panciera (x2654), director of special collections and archives, for details.

Connecticut College Libraries
Library and Instructional Technology Liaison Program
One reference and instruction librarian and one member of the instructional technology team are assigned as liaisons to each academic department to support the teaching and research needs of the department’s faculty. Library liaisons are subject-area librarians who provide instruction and develop collections that support the academic and research needs of the department. Library liaisons offer individual and group instruction in the use of the online library catalog and research databases, and provide guidance with research projects. Liaisons can also serve as a resource in developing course assignments with a library research component. Recommendations and requests for new titles for the library’s collection should be directed to the department’s library liaison.

Instructional Technology liaisons are assigned to departments to be available as a first-point-of-contact for faculty interested in incorporating technology in the curriculum. IT liaisons can provide guidance in selecting appropriate technologies to address curricular needs, provide one-on-one technology training to faculty or group training to students, facilitate selection and purchase of academic software, and make appropriate referrals to other specialists within the Instructional Technology team. For a list of liaisons, please visit www.conncoll.edu/is/library-liaisons.htm.

IT Service Desk
The Information Technology Service Desk provides computer technical support to members of the College community. The IT Service Desk can provide hardware troubleshooting of any College-owned or leased computer equipment and support for all standard software packages used at the College including email applications. To submit a service request or report a computer problem, go to http://webhelpdesk.conncoll.edu and login with your network user name and password. You may also call the IT Service Desk at x4357 or check the Computing and Telephone Support section of the IS website under Computer & Technology Resources. The IT Service Desk is managed by Amy Narducci (x2351) and located on the lower level of the Shain Library.

Faculty Borrowing Privileges
A College ID card is required to check out library items. An account can be obtained at the Circulation Desk in Shain Library during library hours. Books are charged to faculty for the academic year, videos and DVDs for eight days, and CD-ROMs for 28 days. Books not in regular use should be returned at any time during the year and must be returned when requested by another user. All library materials must be returned prior to going on leave. Exceptions may be discussed with James Gelarden (x2662), access services librarian.

Scholarly Communication and Open Access
In keeping with the understanding that knowledge is a public good and should be transmitted as broadly as possible, the faculty of Connecticut College has adopted an Open Access Policy. The policy was modeled on those already in place at leading large research institutions and peer Oberlin Group member colleges. The policy seeks to make scholarship produced by the faculty of the College freely available to all through our institutional repository, Digital Commons® @ Connecticut College (digitalcommons.connoll.edu), unless prohibited by the licensing agreement between the author and publisher. The policy will benefit the faculty, by increasing the potential audience for their scholarship; the College, by enhancing its research reputation; and the broader community, by ensuring that scholars without access to research libraries will still be able to carry out their work. The complete text of the Open Access Policy and an FAQ on Open Access at Connecticut College can be found on the IS Open Access page (http://www.connoll.edu/libraries-and-tecnology/about-is/open-access-). The Open Access movement is enjoying considerable recent momentum, with dozens of colleges and universities adopting new policies and the federal government instituting new rules—most notably the President’s Open Access Directive (http://www.whitehouse.gov/blog/2013/02/22/expanding-public-access-results-federally-funded-research), which is designed to ensure free access to publicly funded research. We are excited to be a part of this movement.

CTW and Interlibrary Loan
The CTW and Interlibrary Loan (ILL) programs are designed to support the teaching and learning goals of the faculty. The CTW library catalog allows you to place requests for books and media items held by Trinity and Wesleyan. For books not available through the CTW catalog, Interlibrary Loan (ILL) requests can be submitted electronically (http://illiad.connoll.edu). All journal article requests should be submitted through ILL. While lending libraries will occasionally impose charges for shipping or photocopying, members of the Connecticut College faculty will not be charged for ILL borrowing. Contact Emily Aylward (x2667), ILL supervisor, for additional information.

Photocopies and Printing
The College has consolidated printing services across campus, providing multi-functional devices throughout campus that enable copying, printing and scanning. There are several of these devices available in Shain Library, on the main, second and lower levels, as well as in the Greer Music Library and in the Language & Culture Center. There is no charge for scanning. Costs for copying and printing are charged to departmental accounts.

Research Instruction
Research librarians at Connecticut College are committed to helping students by providing a variety of services that will enhance classroom learning through group instruction and individual research appointments. Your library liaison can also develop online research guides tailored to the requirements of your course. Faculty interested in incorporating information literacy concepts into their courses should contact their library liaison or Carrie Kent (x2444), director of research support and instruction.
