Majority of June Graduates Now in Scientific Positions
by Bryna Samuels ‘46

Have you been wondering what all the students who have graduated last year are doing now? “Little by little you get the last dog on who’s married and who’s engaged,” Miss Jacoby said, “and you settle down to being career women at least until the war’s over.”

One Faculty Recently Married
A good 95% of the graduates were married either before school was out or soon after. Many of these girls, whose husbands are overseas, have set up residence in the cities where their husbands are stationed for work. It is a well-known fact that the number of girls in every state in the Union has been increasing, and that the percentage is greater now than ever before.

Girls are teaching English and French in the schools of various states. Six are teaching Spanish in public schools in Massachusetts, the staff of the Longy School has been completed by the addition of two more teachers, and there are now a total of 12 faculty members teaching at the school. This is a considerable increase over the number of teachers who were teaching in the school a year ago.

The junior class has been making great headway in the field of teaching, and has already had six new members added to its ranks. In addition, there are three new members who have been added recently to the senior class. The total number of students in the faculty is now 50, and the junior class has 10 members.

The senior class has been making great progress in the field of teaching, and has already had six new members added to its ranks. In addition, there are three new members who have been added recently to the senior class. The total number of students in the faculty is now 50, and the junior class has 10 members.

Dear Freshmen,

Something new has been added to our campus life. Most of you know that this is the first time that classes have ever been met in the houses to the degree that they are this year. The main reason for this is so that members of one class may become better acquainted with the members of another class and all the members of the same class, along with the intra-class spirit. We hope to think that due to a little immersion in the traditions you represented with other classes, because we are all so gladd of the opportunity to get to know you better and we would otherwise have been able to do.

To clear up this misunderstanding, we want you to realize that House of Representatives is not a series of social clubs, but a set of groups which will be represented here on campus.

Student Tells Of Activities At Penn Hall

by Margaret Caylor '46

"This is a surprise, really!"

Dear Freshmen, Where will we be all a hundred years from now? Yes, you are right but not until then. The senior class, though short-winded and unfledged, with age, desires to extend the theory that it has life expectancy for the year 1945. After the last American surrender, a formal surrender, and a world court with which to combat war criminals, the problem raised by one of your classmates as to how you are going to find out your leaders are. It is natural for you to want to know about this, but the solution is really not so hard as it might seem. All you need do is to find out what the platform that you intend to at "Amalgamators" are here on campus. They became leaders, not because they became house presidents, and thus members of House of Rep. (though some may have done that too!), but because they did the very same thing that they were asking you to do. They went out for various activities with two simple qualifications: enthusiasm and enthusiasm. That is how they did it and how you, too, may become a leader on campus. More than enough leaders are needed for the year 1945, but be glad of the opportunity to get to know you better and we would otherwise have been able to do.

It is really not so long ago since we sat in your section and, like you, you and I joked aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in joking aside, Freshmen, we think your spirit, in
Boston Rector And Author To Be Here As Vesper Speaker

From Milkmaids to Mechanics Tells Student's Busy Summer

By Peggy Ingalls '45

Would you like to be a milkmaid? Are you tired of the steps? Then you can become one in the dormitory if you wish. Often the milkmaids are the only ones who are allowed to sleep in the dormitory after lights out. If you are not interested in becoming a milkmaid, you can always try to be one of the students who live in the dormitory. You will find that they are very friendly and always ready to help you out. They also have a lot of fun and enjoy themselves a great deal.

Summer Recital By Freshmen Given In Windham Thursday

Last Thursday evening, October 15, at 7:30, the annual freshman recital was given in Windham living room. Rita Hirsch, presented on the piano, and Dorothy Moore, sang selections from the opera "The Bartered Bride," a production of the Connecticut State School for Children. The Creed and Modern Conventions, Old Time Church Drama, Drama, and others were presented in the last four general concert of the season.

Vesper Speaker Of Oct. 8 Urges Search Of Christ Stories

In his sermon at the vespers service of Sunday, October 8, Rev. Dr. Leonard H. Bell, pastor of the Church of Incarnation in New York, told the story of the stories of Jesus' miracles for the benefit of the students. He said that many people today find it impossible to believe these stories, but he urged these people to read the gospels and learn how to use them in their daily lives.

The school, which was formerly known as the Bryn Mawr Summer School for Women Workers, was established in 1921, and has been carrying on its program of workers' education ever since. Its board of directors is composed of men and women drawn from the labor movement, government agencies, and from other parts of the union organization.

Each summer The Hudson River School meets for five weeks at a large estate at West Park, New York, to discuss labor relations, employment problems, management work, the problem of the worker and the employee's newspaper for the In- dustrial unions.

The school is designed to give these students an understanding of the labor movement, and to give them a sense of the values that are at stake in the struggle for industrial unionism.

The program includes work in the fields of economics, health, education, and social dynamics, teaching the students how to write plantation, and to prepare for life as a worker. It also includes courses in government and politics, and from abroad. Labor School's Program

The program includes work in the fields of economics, health, education, and social dynamics, teaching the students how to write plantation, and to prepare for life as a worker. It also includes courses in government and politics, and from abroad. Labor School's Program

A Valuable Experience

Mike believes that this project covers a wide range of topics that are of great interest to the students. He said that in order to succeed in the project, it is necessary to have a good knowledge of the subject. He also stressed the importance of working in a team and giving each other help. Mike said that he was very proud of the work that his team had done. He also thanked all of the people who had helped them.

Marion Stern Accompanies Dorothy Moore Sings Always

Dorothy Moore was next on the program, singing Always. Marion, accompanied by Efrem Carเกรve, Helen Pope then presented Bach's Prelude and Fugue in C Minor. Ruth Bloom, accompanist, sang "The Last Rose of Summer." The program closed with "Volunteer" by Sibelius, sung by Nancy Carเกรve.

At first glance you might take the scenes in Windham for a ordinary day, but if you notice the war map and over the window, you will see that we are now fighting on the battlefield. These are the scenes that are being held up in our mind. The war is going on, and we must be aware of what is happening in the world. We must be aware of the people who are fighting on the front lines, and of the people who are working in the factories and other places.

The war is not just a battle for our country, but it is a battle for the whole world. We must all work together to make sure that our country wins, and that the world is safe.

I hope that you will take the time to read this article, and that you will learn more about the war and the people who are fighting on the front lines. Let us all work together to make sure that our country wins, and that the world is safe.
Classes and Reactions Mixed
By Institution of New System

by Betty Saffeld '44

This year for the first time in college history, many dorms on campus housed mixed classes. This system was devised to further closer and friendlier relations between the four classes. The basic idea is that the students will feel more a part of the whole college community than just a member of their own classes, and that the other three classes won't be part of the vague unknown as is so often, but true, the case. This mixing of classes existed a decided reaction on the part of all classes and a decided change for the better to its merits and bad points. Out of the sea of reaction came many little ripples of complaints and accusations, but one big wave of general approval of the system.

Freshmen, Seniors

Most Benefited

The approval is based on the valuable result that it gives the classes, which ordinarily don't get much of a chance for friendly relations, the clowns though in good chance to establish more. It would be better for the older classes, but one big wave of general approval of the system.

SUMMER MEMBERS
OF FOX'S FEATURED IN MADONNOISE.

Deliver us from evil

Summer Members
Of Fox's Featured in Madonnoise

by Elizabeth Bowman '48

The Auerbach majors are on the map. The October issue of Madonnoise carried the story of the earthy girls who made headlines during the year. There was no shortage of excitement and interest, and the girls had practical experience in almost every field of merchandising.

The Auerbach experiment originated with Mr. Martin Fox Auerbach, in conjunction with Miss Elizabeth Woodhouse, a member of the economics department here, in order that a science student who had the necessary requisites might participate in the field work of G. Fox and Co. in Hartford.

Practical Application

When the fortunate few have been accepted, they go "en masse" to Hartford in the August preceding junior year and begin their indoctrination courses. There they progress from the selling to non-selling departments, seeing every phase of store life—from that "perhaps I'll take it" expression on a customer's face, to the most inner recesses of the warehouse. They even have a day of truck driving and delivering packages for G. Fox's. The June after junior year, the new-to-mo's are given field work which consists of a store problem to solve and report on. And from their careers while still in college.

This is the story we gleaned from the pages of Madonnoise—the story of an enterprise which has its face to the future.

Fall Term Charm

Add a new beauty habit to your fall term curricula. Make your favorite Roger & Gallet scent a part of your personality. Dab on your skin like a perfume dropper for an everlasting fragrance that's just starchy with charm. All things come to those who wait. Roger & Gallet.

CC Professor Goes To Inter-American State Conference

Mr. Leo Kirschenbaum, assistant professor of Spanish and Portugese, went to a meeting in Washington last week, sponsored by the Connecticut Development Commission. Mr. Kirschenbaum is the onlyConnecticut professor who is a member of the Commission.

One of the most interesting announcements made was that the Commission's tour has been extended to the southern states.

Managers For the Fall Sports

Managers for the fall sports were elected last week. Those who have been chosen for the teams are:

Ms. Irene Mifflinery, Furs

a bi-weekly paper, the Penn Points staff, a literary magazine published quarterly, or the Penn-Man clubs which met every two weeks. Some of our clubs are: the Phi Alpha Chi club, honorary organization for those interested in foreign languages; the Hans Kindler club for those interested in music; and the theater group, which produced "A Good Fellow To Go" last year. The Bulletin board in Fanning is the center of much activity, and the officers of each class are responsible for keeping it updated.

A.A.? You will find these bikes in front of the_gymnasium. There are also many other treats available, such as real Southern Fried Chicken, fresh Lobster Newburg en casse, Real French fried potatoes, and salmon salad, which could produce. You may wonder where they get the food, since South America is a large provider of food. The answer is that many of the food dishes that have brought fame to the New London area are still being prepared.

You mention the Old Guard and the New Guard Republicans who have advocated a return to isolationism, but the United States would be secure in isolationism. A future of peace rests essentially with the people--you and me. If we believe in the people and in cooperation, we will have a world in which such cooperation will be possible.

Perhaps it is true that there are many isolationists in the Republican party, but today the United States should be secure in isolationism. The United States would be secure in isolationism. A future of peace rests essentially with the people--you and me. If we believe in the people and in cooperation, we will have a world in which such cooperation will be possible.

Caught on Campus

To have week's list of marriages and engagements there are some additions which were overlooked before. Our apologies to Mrs. Norman Barlow, Shirley Mellow, Sadie King and Photo Editor.

During the summer Natalie Bigelow '47 became the bride of Lt. (j.g.) Norman Barlow, a graduate of the Coast Guard Academy.

Shirley Mellow's engagement to Ensign Ed Welch was announced this past summer. Barbara's engagement will be announced now on submarine duty in the Pacific.

The second of the forgotten engagements was that of C.C. Crumb '46 to Cpl. Lynn Richardson of the U.S. Army.

Phoebe Gardner '47 announced her engagement on September 25 to Pte. William Lawrence Rock, U.S.A. Phoebe is stationed at Camp Edison, New Jersey, at the moment.

If anyone is looking for a coffee pot, Miss Analysis reports that the equipment will be glad to supply one for free. She bought her engagement on September 29.

If you continue to use the coffee pot, Miss Analysis suggests that the equipment will be glad to supply one for free. She bought her engagement on September 29.

Summer Jobs (Continued from Page One)

Freshman was a photography instructor, three worked on newspapers, and one did bookbinding. Fifteen girls were paid for farm work, and three juniors did volunteer farm work.

The class of '48 did the largest amount of volunteer work, with the classes of '47, '46, and '45 following. Freshman, Junior and Senior class members, and the WAVES, worked on the farm work. The WAVES were paid for their work.

Additional information has been released concerning enrollments in the women's services. Three hundred and eighty women were re-enrolled during the fall. Of these, thirty were members of the WAVES. The distinction of being one of the WAVES is a big step forward in the WAVES.

Another member of the class of '48, Carolyn Weiseman, became the first WAVES overseas with the Red Cross.

Chapel

(Continued from Page Two)

Shadows the brightness of the esher of death and gain. We must declare a methodical and national war on the tyranny of the unknown.

The needs of the WAVES are still great and the corps is asking for 20,000 additional recruits by the end of the year. Forty-three of these women are wanted for work on the civilian department in aiding the WAVES overseas at home and overseas.

Work

(Continued from Page Three)

an assistant in the summer at the special intern for NYU, Bayliss, who has been doing similar work for the corporation in the fall.

If you had ever happened to run in to the Metropolitan Museum of Art in New York during the early weeks of the summer you would have noticed a large poster at the entrance of the museum. This poster was made by the WAVES and was designed to recruit for the WAVES. During the summer Bayliss was working in Lord and Taylor's clothing store, a job held by Pat Thomas. She was very pleased with her work and said it was very enjoyable. She was very pleased with her work and said it was very enjoyable.

The freshman class held a drive for the WAVES in the middle of the week. The drive was held at the A.B. and the A.B. was very well attended.

Nothing has been said about the many students who spent the summer not working, not in any field of work. There were a few students who held jobs such as assistant as a lab technician. In the production of penicillin, one job held by Jane Frederick, and that of testing a new drug for the company, done by Roberta MacDougall. True "superman" was Barbara Beraldo. For the most part, these students did their work here on campus but had a very little in their academic lives.

Be lovely with DURA-GLOSS "nail polish" says Cundie

Make Dura-Gloss "nail polish" in cream by polishing your fingers, the Dura-Gloss ways and doesn't "nail polish" containing "Chystalina", an ingredient which makes it hold well to the fingernail, and resist chipping and peeling. Goes on your nails easily and is a fair bill. Practically every of the unknown can be an affair of the most discriminative. We must declare a methodical and national war on the tyranny of the unknown.
