A. KELLY REPRESENTS COLLEGE AT GENEVA

Reports Experiences

This summer at the Student's Union there were about forty students representing the college in different countries; and when one takes into consideration the Zimmerm School of International Relations (which we attended) there were over two hundred students representing about thirty countries; consequently, we had an excellent opportunity to meet and know students from all parts of the world. The purpose of the Union is to foster students from all parts of the world together in order that they may get to understand each other and the world at large, with a view to create a better idea of international friendship and international problems.

Intellectually, our summer consisted of lectures at the Union and at the Zimmerm school; attendance at the Disarmament Conference, and at the League Assembly; and discussion groups among the students. Since the intellectual life at the Union is taken up in chapel at length, I will say that intellectually, the semester was very inspiring and though I think all the students went home with a much broader and more understanding attitude toward many international problems our summer was by no means all on the intellectual side.

Socially, Geneva is wonderful. First, it is in the center of things so that one can take many trips from the city. While I was there I spent two glorious days in Italy, a few exciting days in Paris, and attended) there were over two hundred students representing about thirty countries; consequently, we had an excellent opportunity to meet and know students from all parts of the world. The purpose of the Union is to foster students from all parts of the world together in order that they may get to understand each other and the world at large, with a view to create a better idea of international friendship and international problems.

PROF. PHELPS SPEAKS AT VESPERS

William Lyon Phelps, Lampson Professor of English in Yale University, was the first visiting Vesper speaker of the year. Dr. Phelps has spoken here several times in the past and has been one of the most popular speakers.

The topic of his talk this year was "The Great Poets as Religious Teachers". This subject took the audience into the highest planes of classicism and they listened to the great teachings of Dante in his Divine Comedy, and Virgil in his Aeneid.

Dr. Phelps dwelt on the most beautiful aspects of his two unequalled epics, the Iliad and the Odyssey. He showed that the words of these great poet were as true today as the day that they were written because they spoke of human interests.

Dr. Phelps also pointed out the close comparision between two of America's great poets, Emerson and Poe.

That he knows these poets cannot be denied when he has considered how many of the numberous of honorary degrees Dr. Phelps has reved from different universities.

It is the title of the poet that is given to us on various aspects of English literature, and his three latest books have been on the Bible as a great classic work.

EXCHANGES

The Blue and Grey of Hood College reports a novel tennis tournament in which even the poorest player may win recognition. It goes like this: the losers in the various rounds move to the left while the winners move to the right, the result being that the champion loser and winner are found by the process of elimination. It must feel great to know that you're worst of the worse.

And speaking of championships, we see that the University of Illinois has statistics showing that all freshmen in activities, those in athletics received the lowest grades. Soccer players and wrestlers were at the very bottom. Incidentally, ya aspirants to journalistic fame, those working in school publicaion stood highest in scholastic averages.

And at the University of Maryland all freshmen are required to work on the Student newspaper one day out of each week. Volla!

LIZZIE AND DIZZIE

Dear Lizzie:
If you consider yourself a pal, please produce a friend or relation under five for me to observe for fifteen minutes. This Child Psych, racket is getting me and I firmly believe that a family should be a prerequisite for the course, or else it should be supplied as laboratory equipment.

I had a host of little friends—robbing the cradle, I call it! I think you must consult the tea houses children are going to get worked over from then on.

What do you think about this weather? It looks as if Old Man Winter is arriving a bit ahead of time. I wouldn't be surprised if we all took to our red flannels before very long, and the tennis classes will be hampered by sheepskin jackets and mittens.

Living on campus has its advantages when the wind starts to blow about ten minutes to eight.

You're right about this senior business. It's quite a shock to see all your friends swathed in cap and gown for the first time, not to mention how you feel yourself. The big thrill will come when we sit on the stage at C quiz and say "Spit on the sinners below."

All these senior privileges are something, too. Have you written home your roller skates? There is much speculation as to which is the best pavement for it. Give me the gym any day. Perhaps we could substitute roller skating for Physical Ed.

Well, Dearie, I'll be seeing you at the senior-sophomore DIZZIE.

They should all turn out to be geniuses (or is it genii?)

A student at the University of Alabama received his grades for the first two years of result. He rated thirteen B's and one F. The F was in a course given by the Psychology Department entitled for the "sporting students!" His something's rotten in the State of Denmark! Take the Brown and White of Lehigh University relays this striking example of student temperament. A student at Hampden, Sidney College was asked if it's heads, we'll go to a show; if it's tails, on a date; if it stands on edge, we'll go to bed; if it doesn't come down, we'll study. More...

FREE SPEECH

(The Editors of the Yogs do not hold themselves responsible for the opinions expressed in this or any other column. The Editor in Chief must know the names of contributors.)

Dear Editor:
I have often wondered what would become of a small bearded faculty lion in the stronghold of his or her home. Personally I have never gotten any further than the faculty; they aren't used to calls from us with no ulterior motive.

I would suggest that we start the year right and make a big effort to get to know our faculty. Pick out your favorite and break the ice.

1933.

"Gotta Mop" is the latest fraternity to be established at Beadle University. The membership is restricted to campus janitors.

How about "Sweepa Dirty Floors" or "Pusha Bigga Desk?"

At an Eastern co-ed college twin sisters received an equal grade for the same work done in the same course. One was a senior student, but were elected jointly to the office. Two heads must be better than one.

From Mills College comes word that students at Budapest, Hungary, in order to defray college expenses, are tying for the job of public hangman. We thought only in Chicago killing was so lucrative a profession!

FRANKISH WEEK AGAIN

I am sure that the fashionably dressed was marched back to their barracks.

Friday morning, at sunrise, saw the firing practice for plebes, and then there were the "I put you to my slate for pinning your arms" so that one's work has been found guilty of high treason at the court martial the night before. All day long, saw the playing of "Wrong answers and nothing before the Soph."
NEW FACULTY AND STAFF
(Concluded from last issue)
From 1921 to 1924 she did medical work in the factories of Brooklyn, N. Y., and the following year organized and directed the Centennial Department of Columbia University from 1921 to 1923 respectively. From 1909 until 1918 she was a teacher in the high schools of Pittsburgh and was a research associate at Columbia University from 1920 to 1924 and 1926-1929, going from there to Vassar where she remained until this year. Dr. Kelly is a member of Phi Beta Kappa, Sigma XI, American Chemical Society and American Association for the Advancement of Science.

Miss Westzell graduated from Pennsylvania State College with the degree of Bachelor of Science in 1931. She was graduated in the first honors group. Miss Westzell received her degree of Master of Science in 1933. She is a member of Kappa Delta Pi, Phi Kappa Phi and Sigma XI.

Miss Tomkyns graduated from Barnard College last year. During last summer and the summer preceding she did laboratory and field work under Dr. Stout at the Botanic Botanical Gardens.

Miss Goodsell graduated from the University of Vermont in 1932 with the degree of Teachers College, Columbia University, last June. She has been a teacher in Connecticutville and Pineville, Pennsylvania, and in Proctor, Vt.

Miss Hersey received her Bachelor of Arts degree from the University of Maine in 1923 and her Bachelor of Science degree from Columbia University in 1923.

Miss Holt attended Kenka College, Kenka Park, N. Y., graduating in 1930 and was a student at Pratt Institute Library school last year.

Miss Davis graduated from Wellesley College last June, receiving her Bachelor of Arts degree.

Mlle. de Bouvie was educated in France and in Paris in 1920; her Licence es Lettres, University of Caen in 1927 and her Licence d'Anglais at the University of Paris.

MUSIC AND ART
Music
It has probably been noticed that there has been a great increase in the size of choir this year. It now boasts 75 members and is growing every day. The choir will play a large part in the activities of the campus and it has done in the past. During the months of October and November, the choir will sing at the musical chapel services on the 3rd Friday of each month. On the last Wednesday of each November, December, and January, Miss Baker will take charge of the programs, and on the 2nd Fridays, Dr. R. will conduct a musical service.

On December 7th, in commemoration of the centenary of Haydn's birth, a part of Haydn's Creation will be given. In presenting this oratorio, the choir will be assisted by members of the faculty and people. A recital series has been planned, the numbers of which will be announced later. These numbers will be given for admission to these concerts.

The Music Club is planning an active year, and will hold monthly meetings which are open to all students and members of the faculty.

A recital hour, which was established last year, will be continued this year every weekday afternoon from 5 to 6 in Room 7, and we hope that you will all come and hear your favorite records.

Viking ship was made by Dr. R. H. Keeler, which simply exudes the tantalizing fragrance of adventure with its mellow wood color, decorated with brilliant shield-shapes, and heads of griffins. His "Yarmouth Pinky" is more to my liking, as it has a swimming boat. On the second floor Mr. Selden has a lovely model of the Seminole. These models are excellent, and are truly fine pieces.

You will also see the exhibition of Modern American White Painted Art assembled by the College Art Association. There are the usual confusing so-called impressionistic works. In these days of these very, there are some very nice etchings, lithographs and woodcuts. Rockwell Kent has a very striking piece, which has a powerful and quiet strength. Among the other figures there is a gripping face and a more peaceful face by Julius Bloch. "Rodeo" by Thomas Handforth is executed in that careful simplicity which exudes our present-day realism. A soft and rolling effect is seen in "Rural Free Delivery" by Victoria Hutson. The precarious angularity of this model is as refreshing, as the signal-flags stand out in the foreground. The lithograph,—"Far into the night" by Kenneth Hart, is another beautiful etching showing an old-fashioned soap box posterillion supported by a large and magnificent cologne.

GRISWOLD GIVES SKETCH OF "JUNIOR MONTH" (Concluded from page 5)
Miss Griswold is one of the most enthusiastic of our students and has not lost his self-respect, or joy of living.

Such a contact as the above is not merely a chance occurrence; it could be cited from the experiences of the twelve college Juniors, from twelve eastern colleges. In the weeks of July and New York studying Social Work. Actual case work was supplemented by letter writing by this group. It represents practically every phase of social welfare work, from feeding the deprived, to child placing and adoption, work with underprivileged children, handicapped men and women, crime prevention, tuberculosis, the social control of the feeble-minded, immigration problems, housing, mental hygiene and public aids to education.

Such a new store of knowledge and new experiences as "Junior Month" offered made us all feel that there are "worlds of good" to be accomplished by our generation. We are all anxious to do something to aid in the development of this art of living.

In the words of Miss Tousley, or "Tige" as we know her, is expressed our culminating emotion:
"These girls will never be content to sit back in their colleges and home towns, but will, in my opinion, exert a leadership which every community should have."

In the words of Miss Tousley, or "Tige" as we know her, is expressed our culminating emotion:

The lithograph,—"Far into the night" by Kenneth Hart, is another beautiful etching showing an old-fashioned soap box posterillion supported by a large and magnificent cologne.

FACULTY VACATIONS
(Concluded from last issue)
Miss Catherine Oakes, assistant professor of French, was the guest of the reunion of her class at Wellesley College where she spoke to an audience of alumnae on Advances. She returned later in the summer to Paris and then visited Switzerland and Italy. She returned through Provence and tours by train to embark at Cherbur.

Dr. George S. Avery, professor of botany, spent the summer largely in England. His scientific work started in the south on the development of the cocoa plant in collaboration with Miss Jules Linenger. He also went to Germany to continue this field this column is dedicated to his work on the breeding results of iris as correlated with certain immunological phenomena in collaboration with Robert Foster. Work which he started under the auspices of the National Research Council on tobacco was continued this year in cooperation with the Far Eastern Research Council.

Miss Ruth Stanwood, professor of physical education, enjoyed a special holiday in the Catskill mountains, resting, studying and playing golf.

Dr. Garabed K. Daghlian, professor of physics, took the high spot of his vacation a scientific expedition to Center Conway, N. H., to view the eclipse of the sun on August 31. He spent most of his time here and in New York, doing astronomical work.

Mrs. Bessie B. Wessell, associate professor of Social Science, went to the International Conference of Social Work at Frankfort, Germany, and later to Russia where she spent four weeks.

At the conference she attended especially the meetings of Commission V, dealing with the international problems of migration.

In Russia she visited the large industrial centers, went down the Volga, and was introduced to the conditions of life for the peasant, and into Ukraine. Her special interest was in studying the treatment of minority groups in Russia.

M. Robert Coblachlick, who returns to college after a year's stay in Russia, will be a summer visitor in Youngstown, O., with his and Mrs. Coblachlick's parents, devoting the summer to very careful study and writing in Harvard Library and Boston. His writing included a series of six syndicated newspaper features, editorial campaigns, and work on book manuscripts.

Miss Hannah Roach, associate professor of history, spent the greater part of the summer at her home in Springfield, Mass., with occasional trips to the mountains in New Hampshire. Miss Roach is a student of Eugenics held in New York at the American Home Economics Association at Atlanta, Ga., early in the summer. At this meeting she made a report for the American Eugenics Practices committee of which she is chairman. The greater part of the summer Dr. Chaney spent in Manhattan, Kansas, writing a book for the University at Palo Alto. They also went to Berkeley, Calif., for a visit with her family.

Miss Mildred Burdett, assistant professor of English, was at Camp Whiton, a camp for girls at Cape Cod Bay, as assistant director and dietitian.

Dr. Lawrence Erb, professor of music, and Mrs. Erb went by automobile to the Pacific coast where they were the guests of their son, Donald Erb, professor of physics at Stanford University, at Palo Alto. They made a trip to the southern route and returned by the northern route, stopping at Yellowstone National Park.

Dr. Frank E. Morris, professor of philosophy and psychology, spent his vacation reading, studying, writing at Elk Lake, Pennsylvania.

Miss Ruth Stanwood, professor of physical education, enjoyed a special holiday in the Catskill mountains, resting, studying and playing golf.

Dr. Garabed K. Daghlian, professor of physics, notes as the high spot of his vacation a scientific expedition to Center Conway, N. H., to view the eclipse of the sun on August 31. He spent most of his time here and in New York, doing astronomical work.

SPORTS

On Monday, September 27, A. A. council met with the Physical Education Department to discuss a change in the method of conducting sports at Connecticut. No decisions were made but the department presented ideas involving clubs rather than inter-class teams and games. This would not necessarily eliminate any class competition which the students might desire, but it would give everyone a chance to play their favorite game whether or not she was taking the necessary activity for credit. The views of the student body on such a change are greatly desired and everyone is urged to discuss the matter with members of council or the Physical Ed. Dept.

C. C. O. C. board for this year has been appointed and met for the first time Friday, September 31. The board consists of Dorothy Hamilton, chairwoman, Esther White '33, Alison Rush '34, and Esther Martin '35. A member from the freshman class has not yet been chosen. Miss Wood is the faculty advisor for the board. Plans for the year were discussed and many events are anticipated. Among others, a hay ride in the near future, roller skating at the rink and possibly bowling in the winter, and deep sea fishing in the spring. Any suggestions for outings would be appreciated. All students are advised to watch the bulletin board for notices.

The Bates tennis tournament is under way and should prove very interesting as the freshman class contains some very promising tennis material. All matches must be played off promptly and it is advisable to take advantage of the good weather.

About twenty-five Outing Club enthusiasts opened the fall season for the club with breakfast at the inland last Sunday morning. The appetites produced by a before-breakfast hike were well satisfied with bacon and coffee cooked in the open, as well as rolls and fruit. The trip was very successful but it was hoped that more freshmen would come out for it. Outing Club is planning several activities this fall, all of which should prove very enjoyable to both freshmen and upper classmen.

SENIOR-SOPH. PICNIC

Just to prove the Seniors haven't forgotten them, Sophomores were given a picnic in Bolleswood on Friday night. There were two bonfires over to which toast the hot dogs, and incidentally to keep out the badness. There was plenty more to eat—rolls, pickles, coffee, cream potatoes, pears, and chocolate bars. After supper the group gathered around the fire and sang.

STUDENT TOURS RUSSIA AS CONNECTICUT DELEGATE

(Continued from page 3, column 5) Students in general range in age from sixteen to twenty, but they are at least five years in advance of the American youth of those ages. An interesting fact about the Russian university system is that the students are actually paid to go to school, and an average wage is equal to about $75 a month. The Soviet government considers that the student is doing as much for the state as if he were actually working.

The emphasis of all education in the Soviet Union is on political economy; although everyone has a knowledge of literature, art and music - practically a liberal arts education. The desire for knowledge, moreover, is not confined to the students, but is widespread among the mass of the people. The museums, art galleries and theatres are always filled with crowds of workers and peasants intent on acquiring a little culture.

Even if one does not agree with the theory of Socialism as exemplified in Russia today, one cannot help admiring the social reforms there. There are recreation centers, clinics free to workers, and homes for children, and thousands of new schools.

Probably the most widespread notion prevalent in the United States today is that Soviet Russia is the most immoral country in the world. Family life goes on in Russia today much as it always has, with the exception that the children are being brought up in more healthful surroundings and with better care than was possible in pre-revolutionary days. Nor is there anything immoral in the Soviet idea of marriage; the Russians are simply looking at things from a very sane, healthy point of view.

It would be impossible in one article to attempt a discussion of the present industrial condition in the U. S. S. R. In general opinion industry is going on in such a way as to justify the Russians' cry of the five-year plan in four. Tractorstroi, the great tractor factory outside of Stalingrad, the new Ford factory at Nizhni-Novgorod, the mighty Dnieper-stroi dam, the huge state farm at Verblud, are some of the most marvelous sights to be seen anywhere in the Soviet Union. They seem even more impressive when one considers the lack of equipment, and the Russian's ignorance of machinery. Perhaps most important of all, the difficulties attending the process of collectivization are continually disrupting the Soviet machinery of organization. All this heavy industry is the backbone of the Socialist organization.

The exciting part of the whole affair was finding the way back. Somehow the old path had gathered a good many pitfalls that weren't there before!
CLUB COLUMN

HISTORY CLUB

Ernestine Hermann will speak on her experiences in Russia this summer, at the first meeting of the History and Social Science Club at 7:30 p.m., Thursday evening, Oct. 13, in the Commuter's Room. Everybody come!

POETRY GROUP

The Original Poetry Group held a re-organization meeting, Wednesday at Chapel Hour. From the great numbers of those present it would seem that poetry is going to flourish at Connecticut College this year. It was decided to hold meetings from five to six on alternate Fridays. Because of the informal nature of the group there are no regular officers excepting a secretary. Muriel Schlosberg '33, is to hold this position.

The purpose of the Group is to offer constructive criticism upon the poems read anonymously at each meeting. This necessarily limits it to a small number. If its popularity continues, some method of elimination will be necessary. The first regular meeting will be held on Friday, October 14th. The place of meeting will be announced later.

Freshman Week Again--But Newens Campus

(Concluded from page 2, column 3) mores and their lanuage, as well as before all cars.

At last Saturday, the end of the training period rolled around. The Class was formally made part of the college, and tonight will be entertained by the Sophomores and Seniors, to celebrate the end of the trial.

A. Kelly Represents College at Geneva

(Concluded from page 1, column 1) many week-ends visiting parts of Switzerland. Other students spent their time in Munich and taking trips down the Rhine.

Then, too, as you know, Switzerland is the best place for mountain climbing so we did our bit of that. I never will forget one night when we had a farewell celebration—we started the evening by dancing until two, and finished it by riding our bicycles to the foot of a mountain, climbing it, arriving at the top at about seven, eating a little breakfast, and getting down just in time to attend a meeting at the International Labor Office.

Another time, a crowd of us took an eighty mile bicycle trip to Annecy in southern France. On the way we rode, or rather pushed, our bicycles up an eighteen mile grade; but coming back it was great fun when we came down those same eighteen miles in thirty-six minutes.

It was fun every day to pack our lunches and swimming suits on our bicycles and go out for a few hours swimming and sun-bathing, and then, in the evenings, we would get all dressed up and ride our bicycles to where we were going dancing—it did take a little time getting used to see.
