Security Problems
Plague Arboretum

by Susan Black

The Connecticut Arboretum at Connecticut College covers approximately 385 acres of mostly undeveloped land, and practically surrounds the outskirts of the College itself. Many uses are made of this land: naturalists study native plants and animals in a relatively undisturbed environment, art students find natural themes and inspiration, young children from the New London area follow various nature programs at the Thomas Science Center. Connecticut College students and local persons who do not intend to use the Arboretum facilities properlY' must obtain permits for use. Construction of this fence was started last spring, with funds coming from moneys accumulated by the Arboretum Association (not from the Connecticut College budget). According to Chief O'Grady, the system will enable Security to check all persons entering the Arboretum; students with Connecticut College ID's will be allowed to "pass," other persons must permit others for access from the Security Office in Crown Williams. Both Dr. Nearing and Chief O'Grady think that this proposal will help patrol the campus. The "park" is one of the reasons why the Arboretum is being used for too many of its intended purposes. And so, existing Arboretum security is being tightened. A 25-ft. anchor fence, augmenting already existing fencing (which has itself been vandalized), is being put around most of the property off Williams Street, except for the area near the main entrance (soon to be the only entrance), which will have a more decorative wrought-iron fence. Construction of this fence was started last spring, with funds coming from money accumulated by the Arboretum Association (not from the Connecticut College budget).

Poll Suggests Elimination
Of Requirements

by Noel Coletti

A poll of 106 Conn students last week has shown that the majority of those responding favor the complete "elimination of all language and physical education requirements. All but one dorm had submitted results at press time. The Student Government conducted the poll in an effort to gather concrete information on the sentiment for use in arguing for the abolition of the requirements.

The results of the poll are to be given to the Secretary and the Dean of the Faculty, as well as to the two academic committees now considering the elimination of the requirements. It is hoped that the result of the poll will influence the committees in their recommendations. According to Jay Levin, "in the past such polls have had a lot of weight." The numerical results of the poll follow:

Total responses: 1,048.

Question 1. Do you see a necessity for reforming the present system of requirements?

Yes—939 No—94

Question 2. Physical Education requirements should be revised to allow for two years of self-scheduled activities.

Yes—920 No—128

Question 3. "Languages." a. The present language requirement should be maintained. Total: 1,097.

b. The requirement should be changed to two semesters at any level. Total: 107.

c. The requirement should be changed to two semester of either courses in modern or courses dealing with the particular culture. Total: 298.

d. The entire language requirement should be eliminated. Total: 107.

e. Other. Total: 32.

Ed. note: Student Government volunteers will go over student suggestions in the "other" category. Also see the new proposal from the Phys. Ed. Dept. on this page.

New Proposal Comes

At the faculty meeting on October 6, the Department of Physical Education made a proposal which effectively eliminates requirements in the Department while still requiring personnel to teach elective activities.

PROPOSAL FROM THE DEPARTMENT OF PHYSICAL EDUCATION

In view of the present trends in college physical education programs the proposal was referred to the Academic Policy Committee. The APC will draw up its own proposal, based on the one above, and will cooperate with the advice of the Phys. Ed. Department. The APC was instructed to report back to the faculty by December 1, 1971. Faculty rules require a four week waiting period before voting after such a proposal is brought to the floor, so a vote seems likely in January. In any case, the new proposal cannot go into effect until September, 1972.

Students Register to
Vote in New London

by Sharon Greene

On October 5, 6, and 7 a campaign to register students from Conn. College as voters in New London was conducted. Transportation was provided for interested students. The President of the Student Body, Jay Levin, said that interest within the student body resulted in the provision of transportation to City Hall. He also mentioned that transportation would be provided to the polls at Westhigh School on election day.

There will also be information sessions held on campus to acquaint the student with this year's campaign and the basic municipal problems of New London. Jay commented. He then pointed out that Voting in New London is one way that a Conn College student can be involved in the city without spending too much time.

"New London," he remarked, "is one of the largest municipalities in the Congressional district. There will be eight representatives from the city at the state convention for nomination of candidates to the Presidency, this summer. The New London voters have two representatives to the State Legislature and one State Senator. These state positions are important in view of the present Governor's attitudes toward education. Involvement in the general election will help New London as a voter results in involvement in state problems. There is a whole line of political affiliations that affects people directly."

Please attend the meeting TOMORROW NIGHT to discuss and act upon the REVITALIZATION OF CRO 8:00 in the Student Lounge PLEASE ATTEND
Proposition Support

We wish to voice approval of the Proposal of the Physical Education Department, which can be found elsewhere in this volume. As the College becomes larger, and as the number of males on campus increases, it will become necessary for any vacation period to be considered as such because fire engines are unable to pass underneath the Infirmary, severely inhibiting emergency service.

To the Editors:

We certainly do see that the social outcry that has arisen from you and your fellow students, concerning the Junior Class mixer publicity, is not totally without some justification. To those students who felt personally offended by the "propaganda", we must most sincerely and sincerely apologize. There is, however, certain reservations that we have accompanying that apology which we should be made known to all (respective to E, M., I. A.C., M.E., P. and F.R.).

The presence of any social activity on this campus for the past few years has largely been the result of the initiative and organizational work of a very limited number of students. The burden for establishing Conn as a "seven-day-a-week" community, has rested principally on the shoulders of how many really concerned individuals. We feel that must most tend to participate in the weekly EXODUS while struggling off campus as a place where "nothing is going on." Well, why the hell not do something to promote social activity, not at Yale, nor Brown, but Wesleyan.

Concerning the mixer of September 24th, we feel that our intentions were neither "unjust", nor "disregarding", nor "insensitive". Consider the fact that even the first mixer of the year has negative connotations to any vakation period. It was decided that both male AND female, that something unique was in order to succeed. We do not mix "imagine. How many schools send the same typical advertisements to the press, or do we just get automatic rejections?"

Controversy

Zero Growth
By Diane Nettles

So you've registered to vote now what? Would you like an opportunity to exercise your national legislation. But have you paid to get a degree. More cosponsors are developing the necessary stabilizing the population of the United States and coupled with modern technology and standards of living, contributes to the population and degradation of the environment, and

Whereas, it is by its own example that the United States can play a leading role in the fight to curb world population growth which is oblivious to the need for reining in the mass unemployment, and civil strife in the developing countries of Asia, Africa, and Latin America, and

Whereas, it is estimated that a half-century or more may be required by population within the United States to stabilize after a national average of two children per family is achieved, and

Whereas, the longer development of national public policies to reduce the birth rate is delayed, the more difficult and costly it will become to insure that socially undesirable pressures, including an increased death rate, for population stabilization are avoided. Now, therefore, be it,

Resolved, by the Senate and House of Representatives of the United States of America in Congress assembled, that it is the policy of the United States to encourage and develop the environment and of the entire world.

"Groovy Bob" Offers 10 Page For Staying Cool & Acceptable

GROOVY BOB says: "I respect all jive, that's how I stay alive."

(Groovy Bob and Amanda Wonders were not invited to put down any one particular kind of people, but rather to exhibit some of the hypocrisies in our social mores, things that we take for granted. In many social situations where trends are created in order to bring people together, they often have the unhappy consequence of alienating and isolating people who cannot or do not want to conform to these modes, but at the same time enjoy friendship and other people as much as anyone. Do it. It is the hope, therefore, of this article, that we can more realistically appraise ourselves, remembering that others, although of a different conviction or not being able to measure up, should not be ostracized. David Chaffer, The Ten Commandments for Social Success 1. Thou shalt have long hair, the longer the better and the frizzier the better.

2. Thou shalt have the loudest stereo or thy floor.

3. Thou shalt have the most diversified musical tastes on thy stereo in thy dorm.

4. Thou shalt have the greatest technological gizmoids.

5. Thou shalt have the most sophisticated electronic equipment.

6. Thou shalt have the most sophisticated social status.

7. Thou shalt have the most sophisticated social structure.

8. Thou shalt have the most sophisticated social organization.

9. Thou shalt have the most sophisticated social group, in which the dignity of human life is enhanced, and

10. Thou shalt have the greatest and most diversified drug experiences on campus and always in full stock of said commodity with a firm knowledge of what drugs are going around and always using good group terms like Panamanian Red, etc.

5. Thou shalt never use the term girl when chick can be used or any other straight term when a lip term may be used.

6. Thou shalt never speak good of the food at Connecticut College.

7. Thou shalt always have the best put down for someone who is not considered to be part of thy group.

8. Thou shalt never be reliable to thy parents always remembering it is they who have caused thy plight.

9. Thou shalt always call those that thou打仗s, "chauvinist pig, fascist queer, pseudo-liberal, redneck" or if none of the above can be used, a plain asshole or a derivative thereof, remembering at the same time always not "right on" when thou wants to be hip.

10. And lastly and most importantly, thou shalt never speak good of, but always despise, those of short hair, those who do not use drugs, those who do not love rock music, those who dress conventionally or are of conservative political views, or those who, for any other reason exhibit "straight" characteristics.

Poetry Circuit Plans

In February, 1972, the Connecticut Poetry Circuit, an organization which coordinates the visits of selected poets to the campuses of member colleges and universities in the state, is planning to travel with a group of graduate poets around Connecticut.

This is the second year that the Connecticut College was part of the circuit, but Gayl Jones '71 was selected for the first tour in 1970. Connecticut College is now asked to select a candidate for the 1971 circuit. A jury (who are not themselves candidates) and two faculty members will select between 4 and 6 student manuscripts from poems submitted by Wednesday, October 13.

The authors of the chosen manuscripts will then read their poems before a college audience on the night of the event. In addition, an informal "open mic" reading will be held at 7 p.m. in 14 Thames, at which time the audience will select a final group of performers.

The winning poet from this campus will be judged by a jury of poets and students. The winning poet, with the advice of the jury, will select a campus poet to attend the final reading at the state college campus at that time.

The poems of more than five pages of verse may be submitted on or before Wednesday, October 13 to Mr. William Meredith, Box 498, Connecticut College or at Room 211 Thames by any registered undergraduate student of Connecticut College.

Ecology Front

By Lynn Cole

President Shain has announced the formation of the Committee of the Environmental Council, Margaret Shepard '73, will act as chairman. The faculty representatives are Dr. Scott Warren, and Dr. Beth Thomas, botany, and Mrs. Gellis, German. Dr. Dick Ingersoll (Physical Plant), School of Science (Treasurer), and Miss Voorhees (Facilities Management) represent the administration. The student body is represented on the committee by Prince, Robert (Representative) and Lynn Cole. Survival, the campus ecology club, will be the main functionary in carrying out the committee's proposals. President Shain hopes that by involving all sectors of the college community the committee's suggestions will be administered campus-wide.

In its first meeting, the CCEM agreed that its primary job is to educate the campus. Most of the recommendations can be implemented with a minimum of sacrifice if the campus is made aware of the problems and the solutions. They have suggested that Survival hold a meeting in each dorm to alert the students to the committee's suggestions.

This is a chance for a large number of people to become involved in a comprehensive environmental program. The success of the program, however, will depend upon the cooperation of all the people all of the time. I urge everyone to not only be aware of the problems, but also to cooperate with the committee in bringing about their solution.
Present New Library Plans

Perimeter Rd. Planned

A major proposal currently under consideration by the Administration and the Board of Trustees is designed to capture the intrinsic aesthetic beauty of our campus. This plan deals specifically with the prohibition of all motor vehicles from the center of campus. This has been achieved via the construction of a perimeter road. No longer will pedestrians or bicyclists be forced to dodge delivery trucks or students draggers, and much of the noise will be eliminated. Many of the roadways included in the plan are already in use, but it would be necessary to construct links between these roads and install lighting and drainage facilities, as well as a new parking lot. The estimated cost of this endeavor is $300,000.

With the increased amount of traffic on Mohegan Avenue due to proposed roads for the inter-change of the new Grotton bridge, the Williams Street entrance will soon be the Main Entrance. Starting from this point in front of the Chapel, Plan A would utilize the existing drive extending along the south campus dorms, around past Cummings Art Center, and continuing as far as Fanning Hall. The road would then veer toward Mohegan Avenue, passing along the eastern side of male labora-tory, the President's house, and to the faculty housing past the northern complex dorms, forming a loop around the complex.

Also, according to Plan A, the parking lot running alongside the western complex dorms would be included in the perimeter drive, extending the road up the hill behind the squash and tennis courts, in front of L razus, under the Infirmary, and ending at the Williams Street entrance. Parking lots would be constructed on these portions of the drive just north of L razus, east along Mohegan Avenue near Winthrop Hall, and a lot for approximately 150 cars would be built along the north end of the complex behind a stand of trees.

The alternative suggestion, appropriately Plan B, is more recent and includes more of the existing roads, which is to form a more compact pattern. This plan begins at the new Williams Street entrance, and follows the present road around past the south campus dorms and the Arts Center all the way to Hillier Hall. At this point, the road cuts down between L razus and Winthrop, curving westward and utilizing the current access road to the western part of the complex. From the corner of the complex by Wright House, the drive would extend southwest behind Lrazus and the Infirmary, intersecting the present road from behind the Chapel.

Two major considerations must be kept in mind when discussing the library of the stack wing of the old building and the construction of a new building north of the present library, and Scheme "C" of the plan will be used. The firm's report gives a general idea of how the old Palmer Library building would be modified under each scheme, and the size, general arrangement, and cost of a new building or expansion. The three options are explained in greater detail below.

The main level of the new extension called for in Scheme "A" would be built fifteen feet above grade in order to connect with the old building. Users would enter the library from a passageway underneath the main lobby. The new extension would contain the main desks, catalog, reference area, and offices. The main floor of the existing building would contain reserve reading areas, and an all-hours study area. A new language lab, learning resources center, and faculty offices would be built on the upper floor. The extension would be moved to the upper level of the new extension.

Under Scheme "B", a new wing would be built north of the existing building that would house all library facilities except government documents and bound periodicals, which would be placed in the stack wing of the old building. A bridge would connect the wing to the new structure. The main level of the new building would be five feet above grade. The old library building would be remodeled and the new library uses would occupy the entire main level, the post office and duplicating department would be housed in the basement, and the top floor would house offices and classrooms.

The new library proposed in Scheme "C" would not be connected to the old building, and thus offers a greater variety of possibilities for location and design. The most likely site for the new building is the area now occupied by the reservoirs. The five stack levels of the old library wing would be replaced by four floors of offices, with the post office on the first level. The basement of the main part of Palmer Hall would contain the duplicating room, offices, a classroom, and seminar rooms. The bookstore would contain offices and classrooms.

Under Plan C, all the offices and classrooms now located in Thanes and Winthrop would be relocated in Palmer, enabling these buildings to be torn down. This reduces the problem of noise disturbance from Mohegan Avenue, which will become a major thoroughfare in the future. Estimated costs for all three schemes are high. Scheme A, which would take approximately four years and two months from the beginning of the planning stage to completion, will cost $6.26 million. Scheme B will cost $7.290,000, and take four years to complete. It should be noted that the cost estimates are probably low, since construction costs (Continued on Page 6, Col. 5).
Crew Team Mixes Competition And Fun For Coming Season
by Jim Shackford

At 3:30 PM four times a week the rowing crew meets on the harbor. At 3:30 PM they return soaking wet for late supper, with orders to sit with someone new each time they come in. In the meantime, they have been rowing like Vikings, shaping up for their first regatta of the spring. They hope to be a solid group, ready to take on the bigguns.

The rowing crew consists of about 25 women and 15 men, most of whom are new this year. Forty-odd individuals come from a large variety of backgrounds and have diverse personalities, which mixture creates a favorable environment for the experiment that the crew is trying.

The coach is Bart Gulloing, who comes to the College from staff in Simsbury, Conn. High School. He believes that rowing as a sport is too elementary. No single or double sculls, each rower handling two oars. The shells each carry a coxswain who is in charge of the boat and keep the crew rowing together. The “cox” orders when to stop. They like to move in a back wave, and pivot the boat. Good Coxswains are hard to obtain, and the crew is in need of good ones for this season.

Since most members are new, they have had to start from the beginning. Progress has been such, however, that they have started time trials and race strategy. There will be two races locally this fall: Midtown: High School on Oct. 21. Again, and again, and... 

CAMELS HUMP YASSAR, 
Winning Record by Dariela Colette

In its first really big game of the year the Conn varsity soccer team has cleared off by a score of 5-0. Utilizing a full squad and enjoying a small field, Conn opened the scoring in the first quarter.

Peter Vicky cooker kicked a goal driven by John Harvey who banged in a goal from about the eight yard line. After that, the momentum was quickened, John (Gally) Hand playing at right fullback took a shot at midfield which was tipped over the lower right corner by Peter Vicky. Shawne Stone, in the prettiest play of the game, faked out the last fullback and got off a hard shot to the upper right corner of the goal.

Two Bob Balke and Bruce Gansart added to the fun from their efficiencies by their defense.

The opponent’s inability to score leads to the defense with Doris Colette playing point. Mark Geronimo playing fullback, Gally playing right fullback and Bob Balke and Bruce Gansart added to the fun from their efficiencies by their defense.
