Men's Soccer Knocks Off Amherst in Must Win Game

by Tim Killenberg
The College Voice

It may have taken the Connecticut College Men's Soccer Team five games to put together a solid 90 minutes of soccer, but it could not have fallen into place at a better time. Coach Bill Lessig's Camels found the groove last Wednesday afternoon and posted a 1-0 "must win" over NESCAC powerhouse Amherst College.

Midway through the second half, midfielder Ken Langevin ('89) connected on a fine cross from fellow sophomore Tim Smith, and headed the ball into the Amherst goal for an impressive CONN victory.

In an early season marked by scoring problems, both Smith and Langevin attributed the increased level of offensive play by the Camels to a new team strategy. Following a lack-luster performance against Wesleyan University last Saturday resulting in a 1-0 CONN loss, Lessig and Assistant Coach Ed Mighen worked with the team on individual creativity. Against Wesleyan, Mighen felt the Camels "lost ideas in the attacking end and began hoping something good would happen."

Gonzalez Talks About Drug Charges

by Hillary Silver
The College Voice

Luz Z. Gonzalez, former director of El Centro de la Comunidad, has been charged with possession of cocaine, intent to distribute cocaine, conspiracy to distribute cocaine and using the telephone to commit a narcotic felony. If convicted, she faces a minimum penalty of five years in prison.

Gonzalez has been directly involved with Connecticut College many times. Last May, she presented at El Centro de la Comunidad a play organized by the Student Department here at Conn. College called La Carreta by the Puerto Rican author Rene Marquez. Conn. College students portrayed all of the characters in the play, and Gonzalez was also part of the cast, having to substitute at the last minute. She also has been to the College numerous times to work with La Unidad, the cultural support group for the Hispanic community of the College.

On October 1, 1987, The Voice visited Gonzalez's home. She was unable to talk about the trial, however, as she was very open when talking about her past. Her feelings towards the country have changed a great deal since she returned from her

N.L. Water Declared Safe to Drink

by M.W. Coffey
The College Voice

The General Assembly of the State of Connecticut in 1871 passed a special act, entitled "an act to provide the City of New London with a supply of pure and wholesome water." According to Debbie Marshall-Baker, the Superintendent of Water for New London, "the water at the latest testing is safe, not carcinogenic, and not mutagenic [harmful to unborn fetuses]."

While many chemicals are present in the water, none of them, except for trihalomethanes exceed EPA, Environmental Protection Agency, or the State of Connecticut Health Services levels according to information published by Eco Science Laboratory. Trihalomethanes result from chlorinated water which has decayed vegetation in it. The most common trihalomethane is chloroform, and only in very high dosages has it given animals cancer.

"Chlorine is necessary for the prevention of many water borne diseases such as typhoid, cholera, and dysentery," Baker explained.

This summer, the people of New London received a Public Notice of Violation from the New London Water Pollution Control Authority, which stated

Conn. is Potential "Ground Zero"

by Lisa Brugos

The area surrounding Connecticut College is estimated to be one of the top 20 targets for a nuclear explosion in the event of a nuclear war with the U.S.S.R., according to New London's Director of Civil Preparedness, Edmund Halley.

Since this area houses Electric Boat, a ship construction company that manufactures submarines, some of which are Trident, capable of launching nuclear missiles, and others which are smaller, faster submarines, designed to attack ships, The presence of the Naval Base also poses some threat since it sometimes houses naval sub-

Renovations cost $175,000

by Liz Michalski
The College Voice

Renovations completed over the summer in Fanning Hall including: painting, new carpeting, and the reorganization of office spaces came to a total of $100,000, according to Robert Hutton, director of operations at the College.

"Much of the work had to be done anyway. When some faculty moved into Blaustein last year, the administration gained some needed space," he said. Hutton added that the reorganization of the Deans' offices located on the first floor. With the exception of the Deans' Offices, located on the

Women's Field Hockey Wins Three
Cigarette Controversy Questioned

To the Editor,

The amount of controversy surrounding the non-issue of whether or not cigarettes should be sold on campus outweighs me with its lack of sense and direction.

The conflict, as it stands, is one between smokers and those who find offense in secondary smoke and only inconveniences those who do smoke. So isn't the proposed ban an attempt to discourage smoking altogether—an act of those who do not smoke imposing their beliefs in health and fitness upon those who do smoke? Would the people supporting the ban also put the school on a low cholesterol diet in that it also discouraged students from being unhealthy? Make us eat bran cereal every day and go jogging at five a.m.? Students' opinions, when outspoken on the behalf of other students, should confine themselves to complaints about infringements upon one's own rights and not venture to infringe upon the rights and conveniences of others. Subjecting the smoking population of this campus to the opinions of vocal non-smokers reeks vaguely of an athletic tyranny.

Richard Peterson,
Class of 1989

The Big Community

In this space we often write about "community," which we have defined as the College Community, up on the hill. We have cited this entity as the facilitator, in a sense, the creator of our education. While stressing the need for Community we have paradoxically ignored the New London Community, which in itself can become another element of our education.

We are fortunate that the College is located in New London. This city is rich in history and entertainment possibilities. But most important is that it is an average American city. This city is not New York or Boston, places where the reality of American life is hidden behind a veil of glitter, a veil which allows us to ignore the not-so-nice aspects of life.

The inward orientation of the College Community is not only unfortunate, but it is also limiting. New London is the place where yuppies, workers, and off-duty sailors frequent the same bars and with a beer in hand find a common ground of conversation. Relating to different people sharing their differences as well as their similarities is an important experience to have.

One Conn student looking at humbly dressed people said, "It's so depressing, let's get out of here." This person missed the point.

The Community out there is replete with a great diversity of people, classes, occupations and aspirations. Diversity at Conn has meant more minority students and staff members. But diversity is more than that. Diversity of experience, of contact with different people in different circumstances than our own is also an important part of our education.

Interacting with the whole community will enrich our little community, increasing our awareness and diminishing our insularity.

Clarification

As reported in the story titled "N.L. Water Declared Safe to Drink" on page 1, despite the presence of relatively high levels of trihalomethanes in the water, the city of New London has declared the water safe to drink. Notices of the E.P.A. violation of trihalomethanes were sent to all permanent New London residents.

However, no amounts of propane, arsenic, cyanide, lead, mercury, or pesticides were detected in the drinking water, as was incorrectly stated in a Commlink opinion column two weeks ago.
Men Suffer Overexposure
by Erik K. Smith

Some friends of mine and I had the most distressing visit to a threat of beasts: the two-shopping trip were innocent, but we found shocking examples of the female posters were boring. We weren't surprised with such a typically female attitude. My open-minded friends and I are now so incensed at this brash blow to men's rights that we are prepared to take action. We, as educated members of our world, need to spread word that a movement of decaffeinated coffee and two pieces of toast with apple butter. "It never varies, and it sounds so boring, but it gets me going." Naomi has not only been working for Conn. since January, 1964. Originally, her title was Housekeeper but after recent changes, her title is now Custodian. Before co-education, she has described to me, dorm life was very different. "Every time a man entered a floor he had to announce himself, whether he was a worker, custodian, or staff person," she said, and dorms used to be easier to maintain because no liquor was allowed at social events. Naomi also admitted that the men hadn't used to get it. Back then there was more of an emphasis on decorations and looks today we worry more about cleaning up messes. But having girls and boys around does make life interesting. I like the atmosphere at this school," I told her. Some custodians, Naomi admits each year that she begins to pay off her husband who will sleep through her business. Naomi Benjarnan, 61 years old, is a custodian at Connecticut College. After years at this job, she explained, her morning routine barely varies. Shortly after waking, she enters the kitchen where she turns on her morning's companion, the little black and white. It's usually set on channel 5 which airs world news from a Boston TV station. Breakfast provides her with the zip that makes her wonder how she can be telling me the truth about her age. Although she's usually had it the day before, she's sometimes in need of that decaffeinated coffee and two pieces of toast with apple butter. It never varies, and it sounds so boring, but it gets me going. An afternoon visit to the Post Office. Where we're complete heroes of the female posters were bor-

Coed Education Enhances Conn. College

by Ed Kania

When Connecticut College first opened its doors to the male student population in 1969, the academic “safer school” naturally diminished. To fill a necessary quota of men, many less qualified applicants were accepted. Now, some 18 years later, many wonder if the scholastic reputation of Conn. has again reached a desired level. The answer above is a definitive no. Not only has Conn. regained its prestige, but by allowing women to attend Conn., it has become an even stronger institution.

Anyone who doubts the academic strength of Conn. need only look around to understand Barron’s Guide to Colleges rating of Conn. College as “highly competitive,” only lower than the infamous Ivys. The student body represents the best and brightest students in the country and in the world. Most undergraduate, especially freshmen, remember the strict requirements necessary to be considered for admission. Conn. College is certainly not one of the less selective, except perhaps for Alex P. Keaton.

When Connecticut College opened its doors to the male student population in 1969, the academic “safety school” naturally diminished. To fill a necessary quota of men, many less qualified applicants were accepted. Now, some 18 years later, many wonder if the scholastic reputation of Conn. has again reached a desired level. The answer above is a definitive no. Not only has Conn. regained its prestige, but by allowing women to attend Conn., it has become an even stronger institution.

Anyone who doubts the academic strength of Conn. need only look around to understand Barron’s Guide to Colleges rating of Conn. College as “highly competitive,” only lower than the infamous Ivys. The student body represents the best and brightest students in the country and in the world. Most underclassmen, especially freshmen, remember the strict requirements necessary to be considered for admission. Conn. College is certainly not one of the less selective, except perhaps for Alex P. Keaton.

The most important change at Conn. due to the creation of a coed campus was the education of students to the fact that the world is not separated into places where men work and where women work. Everything, both sexes must participate in cooperative forms of interaction. While single sex colleges, such as Mt. Holyoke and Smith, have survived, they also serve to distort the view of life given to their women. Coming from an all-male high school, I can vouch for the need to enroll both sexes at any institution of higher learning. Dealing with men in the dining halls, in the dorm rooms, in the classrooms, and both sexes in any type of functional activity is important to the student as learning the causes of a world war. If we can live and learn in a Conn., we can learn to respect each other in the work place.

Conn. College has undergone a definite change in the past 18 years. Some decisions have been incor-
Profile: Tom Havens at Conn. Before Coeducation

by Kathleen Trinler
The College Voice

"The remarkable thing that everybody I know has noted is that there are almost no changes because the transition to coeducation was so relatively smooth," said Tom Havens, Associate Professor of History and Director of the Asian Studies Program at Conn. "The transition was incredibly easy," he added.

Connecticut College went coed in 1969 with a transfer men being accepted at Conn. in the spring semester of that year. "By the time I got back from Japan [in January, 1969] we were already coed; there were men living in Freeman, which was the very first coed location on campus," said Havens.

"The men who started applying and matriculating here were basically the brothers of the women who had always been coming here as well as the sons of alums as well as their daughters," said Havens, who served as one of three faculty advisors to the first group of male freshmen at Conn. That group, according to Havens, "the big year." At this time, other single-sex institutions, such as Wellesley and Princeton, were making the conversion to coeducation. Havens, however, said that "there was no public discussion of [coeducation at Conn. until the summer of 1968]."

It was through the leadership of President Shain and the support of faculty and alumnae that Conn. made the transition to coeducation. The faculty was overwhelmingly supportive of this change. There was... a very strong consensus in the faculty and... everybody was very much aware of [President Shain's] phrase that coeducation was God's plan," said Havens.

In terms of coeducation's effects on Conn., Havens said, "Although coeducation made surprisingly little impact on our curriculum or pool of applicants apart from including men now, it had an important impact on student life. No longer was Conn. a suitcase college, as it had been until 1969; the presence of both sexes transformed extracurricular life in a positive direction."

In comparison to other female schools which made the change to coeducation, Havens said, "it did seem to this college to be very natural for us to educate young men as well as young women,... in the extent to which there's still an image attached to certain institutions as being predominantly female, I think that image is long past for this college.

Here at Conn., Havens is actively involved in the Asian Club, to which he is an advisor. Even with his many interests and responsibilities, Havens finds time to do the research needed to have his writings published. His most recent book, Fire Across the Pacific: The First World War and Japan, 1941-1945, was published this past spring. Havens is currently the editor of the Journal of Asian Studies, a scholarly quarterly that is edited here at Conn. College and published at the University of California Press [that I'm responsible for putting together four times a year," he said. Havens became editor after having been the Japan book review editor of the journal for two years.

"I think Conn. is doing very well with coeducation, and I've been working on my teaching and research and have been following up on the idea by investigating this program which provides opportunities for students to study in various parts of the world. At this time, more and more women are getting into the work world, and I think that Conn. is well situated to give them the best opportunities to get a good start in their careers."

Among the benefits of coeducation Havens lists are the greater awareness of Japan's place in world affairs, and the greater understanding of Japan which will be the third annual Hunger Clean Up and will be held sometime this spring. The Tripartite Tutorial Program is a new program which Marshall herself helped to establish. The original idea was spawned by Andrew Vasey, a graduate of Yale, and Marshall followed up on the idea by instituting this program which provides opportunities for students to learn about the Harvard book review editor of the journal for two years. The program is a new program which provides opportunities for students to learn about the world. At this time, more and more women are getting into the work world, and I think that Conn. is well situated to give them the best opportunities to get a good start in their careers."

The motto of the program is I.A.L.A.C., which stands for "I Am Lovably And Capable," and basically consists of tutoring, counseling, and helping the group primarily for the elementary and high school students of New London. This program is sponsored by the New London Hunger Clean Up is partly funded by the federal action grant.

The Education Department of Conn. is also involved with this program since students who are working on their teaching certificate will have some strong-willed men, since they are more conservative than women. It couldn't have been better, because I don't lower our standards with the men we accepted, which is important." One of the greatest changes on campus after 1969, according to Noyes, was a social life that continued on page 5
Students Tutor New London Children

by Amanda Hathaway

Kerri Morrisey, ’90, and Leanne Costa, ’90, are both newly appointed coordinators for the Kids of the B.P. Learned House, an after school tutorial for underprivileged children of New London. Both began as volunteers in their freshman year and are now looking for more volunteers to help out with this program.

"Most people," said Morrisey, "think of volunteering as putting in so much effort and not getting anything in return. But, in the case of the B.P. Learned House, you get out just as much, if not more." Costa reaffirmed this statement, "The kids get something out of it: school reinforcement, and a chance to be with their friends doing fun things. The volunteers get something out of it, too. It gives [the volunteers] on this campus a sense that there is an outside world; it makes [the volunteers] feel good, you get satisfaction from working there."

Morrisey continued, "These kids [at the house] aren’t bad, they’re just regular kids and they’re trying hard. It gets rough in the streets, so it gives them something to do." Costa added, "It’s something positive which keeps them out of trouble and reinforces their schooling."

Morrisey continued, "These kids [at the house] aren’t bad, they’re just regular kids and they’re trying hard. It gets rough in the streets, so it gives them something to do." Costa added, "It’s something positive which keeps them out of trouble and reinforces their schooling."

The ages of the children range from four to fifteen, but most of them are around nine or ten," explained Costa. "At most, there are around 35 kids and as the weather gets worse, more come. We do school work with them for an hour, and then play for an hour."

Costa added, "The way it makes me feel, I would like to continue to volunteer or work with children. When I’m not working with kids, I feel something is missing. You can get so much out of it."

Morrisey concluded, "I would like to see more volunteers. I think it would be a positive experience to volunteer there."

The B.P. Learned House program is held Monday through Thursdays, from 3:00 to 5:00 p.m. "The average volunteer works one day," said Morrisey.

"There is still room for all ages," Costa said. "We need volunteers. If you are interested, but by having us there, you can make a real difference with kids with problems."

"The kids get something out of it: school reinforcement, and a chance to be with their friends doing fun things. The volunteers get something out of it, too. It gives [the volunteers] on this campus a sense that there is an outside world; it makes [the volunteers] feel good, you get satisfaction from working there."

"Most people," said Morrisey, "think of volunteering as putting in so much effort and not getting anything in return. But, in the case of the B.P. [The children] enjoy it, it’s where their friends are," said Morrisey. "Most of these kids go home to empty houses. With us, they get attention and get to go home to empty houses. With us, they get attention and get to..."
Experts Say Thames River Meets Pollution Standards

by Coast Grecco
The College Voice

There are many industries on the Thames River. According to the Department of Environment Protection (D.E.P.), however, they do not pose a tremendous problem to the river.

In a telephone interview with Mike McCann, Field Inspector for the D.E.P., he said, "Oil spills seem to be the most frequent (accidents) in the Thames River. They occur on the average one every three or four months."

McCann said that the river is actually very well-kept. Whenever there is a spill of any sort, it remains up to the company responsible to call the Coast Guard and to bring in the people for the clean up.

The Coast Guard has to be notified because of the Federal Clean Water Act of 1986. This states that the Coast Guard has to be told about the spill in order that they may monitor the clean up. Licensed contractors are hired to clean up any spills that occur. McCann would not specify which contractors are used by the city of New London.

Ex-Green Beret Trainer Comes to Teach at Conn.
by Lisa Broujos
News Editor

Previously working for the Defense Department in the Pentagon, and helping to train Green Berets in places such as Turkey and Morocco, Professor John McFadden is a visiting assistant professor in the Government Department this year.

McFadden, who is replacing two government professors on sabbatical, currently teaches courses in Middle Eastern Politics, International Relations, and Comparative Politics and will teach a course called Middle Eastern Conflict and U.S. Policy next semester.

"There is a warmth that you find in the Middle East that I've found nowhere else in the world," McFadden said.

After attending college at the University of Missouri, MacFadden was selected for the Defense Department of Defense (DOD) program and received money to attend New York University. From NYU he was sent to the John F. Kennedy Special Warfare School in Ft. Bragg, North Carolina, home of the Green Berets, a U.S. Army Special Forces group. Here he trained Green Berets before they went over to other countries, and many times he would travel with them.

McFadden has travelled to numerous Middle Eastern countries such as Jordan, Saudi Arabia, Turkey, and Morocco. "The Middle East is an exciting piece of the world. European politics are dull. You can predict them," he said.

"I think there are some important things going on in the Middle East, and it is important that Americans know about them," he added.

McFadden said that the principle country of his focus is Turkey and explained that at the time that he signed on with the Defense Department, they needed a Turkish specialist. He also wrote his complete doctorate dissertation in 1985 on the political violence in Turkey. He wrote this dissertation for his Ph.D. degree from George Washington University in D.C.

The DOD program in Florida served as the precursor for his job with the Department of Defense in Washington. "I was set in a program designed to create defense personnel that deal with the military, social, and economic problems on a level that the State Department does," he said.

"It met a lot of interesting, exciting people while I was in D.C., particularly while working with the embassy staff in foreign countries." He also said that it was "fun to sit around and talk with fascinating people."

"His practical experience in international affairs is an asset to his teaching ability, because he's got the personal experience to back up some of his points," said Phillip Hastings, '88, a student in his Middle Eastern Politics class.

"He is a very energetic teacher and very interesting. When you're listening to him, you sometimes forget you have to take notes," said Stacy Larrenaga, '90, also a Middle Eastern Politics student.

McFadden retired from the Defense Department in 1983 and decided to start teaching. He was a professor at George Washington University in D.C. for a few years before coming to Conn. He is not sure of his future plans but stated that he would like to continue teaching if possible.

Is Conn. "Ground Zero"?

continued from page 1

marijuana which carry nuclear warheads, Burlington said William Rose, assistant professor of government who shows an interest in the U.S./Soviet arms race, said that the probable aim of the Soviets in the chance of nuclear war is the area across the river and, contrary to popular rumor, not Fleming. It was believed by many students on campus that Fleming was "Ground Zero" since Conn. is an academic institution and supposedly contributes to the threat of the area as a nuclear target. Yet Rose said that "destroying cities is not a part of Soviet doctrine," but that they would more likely aim at places which hold nuclear war heads.

Burlington explained that Fleming is probably believed to be "Ground Zero" since "nuclear weapons are usually airburst to maximize the destructive power of the blast and blast, and the nearest high ground is Fleming."

Hallisey, the director of civil preparedness, whose job entails writing and maintaining a plan for the city which would necessitate protective action in the event of any natural disaster, or act of an aggressor, said that in the chance of nuclear war an announcement would come over the Public Address System at the New London Police Station, commanding people to evacuate the area. He said that the probable area of evacuation would be in a northerly direction, perhaps Willimantic or those communities ready to accept New London citizens.

A possible disaster that would also cause reason for evacuation would be the malfunctioning or breakdown of Millstone, a nuclear power plant located less than three miles from here. Another nuclear power plant is located in Haddam, Connecticut only about 20 miles away. Yet despite the presence of nuclear energy surrounding the region, Hallisey expressed no worry about the possibility of accidents, and said "I am a firm believer in nuclear energy, and I believe [reactors] are completely safe."

Concerning the rumors on campus that thelex dormitories were shaped in an "H" shape to stand for "hospital," in the event of nuclear war, Burlington said he has never heard anything to corroborate that rumor. No nuclear bomb shelters are located on campus since according to Hallisey there is nothing to protect the college from the effects of a thermoelectric blast. Rose said "That key challenge is to create an environment where the chance of nuclear war is small."
“How can I publish my work?”

The Voice Magazine's philosophy is that quality work should receive a fighting chance to become recognized as such. The magazine offers you, the aspiring writer or poet, such an opportunity. Simply submit your work to the College Voice office in Crozier-Williams (room 212), with your name, post office box number and phone number. Our editors will review your manuscripts, and choose to print them for that month, accept them for future publications, or return them.

On Friday night, October 2, Cummings Arts Center still rang with applause, as Bruce Cummings, a legend in the Freeman dormitory, turned on the lights of Gallery 11, a gallery run by students showing work by members of the Connecticut College community, was opened.

Lee Davis, art major and houseself of Freeman, thought of the idea of a gallery less than two weeks ago. Spring studied at Pratt Institute in New York last fall, where they had end-of-the-semester shows. "Students never get to hang a show, run a gallery and see what other people are doing," said Davis. When he found out that he was houseself of Freeman, he thought of the spare room and the idea of a gallery came to him. Phone calls were made over the summer and the idea started to become a reality.

Terri Bright, '88, an art major and the idea's original source, has been the leader of the project since its early stages. Peter Leibert, Chairman of the Art Department, commented, "It's a wonderful event. The exciting thing about it is that it's student generated. I haven't seen this much enthusiasm in years." He continued, "My big concern is that it's a one-shot and that this space will always be available."

At about 8:15 on Friday, Davis called everyone out of the gallery into the hallway for the official cutting of the ribbon. He expressed how happy he was to see the idea come into shape and explained that the name of the gallery is open eleven hours a week, and so called Gallery 11.

Then Davis' mother, introduced as the "official chairman of the board," cut the ribbon.

Susan Langer, '98, one of the non-art majors in this month's show, expressed, "I think it's important that anyone can contribute. It's a first come, first serve. It's a real democratization of the art world."

"I encourage everyone to come out to rummies. "Our freshman year, we turned the laundry room on the fourth floor of K.B. into a gallery and it sold four.

Throughout the opening, curator with an exhibit was provided by Sara Eddy, '88, who played the piano and Kenny Culver, '90, who played the violin.

Students whose works are being shown in this month's exhibit include seniors Terri Bright, Lee Davis, Marianna Garje, Susan Hall, Melissa Hennessey, Sarah James, Roe Kuczenska, Susan Langer, Tom Laughlin, Elizabeth Lerner, Jennifer Lynch, David Nielsen, Anna Raff, Rob Schuman, Sonia Smyth, Amy Terrel, and Kitty Thorne, and juniors Stuart Eaton and David North. And between Joe Fuschik, James Hopkins, O'Neil, and Philip Rangip there are many more."

The hours for Gallery 11 are Sundays, 5-8 p.m., and Fridays, 2-6 p.m. This show ends October 30. Information about next month's show will be announced soon in The Voice.

COLLABORATIONS III:

by Jackie Whiting
A A F Editor

Connecticut College, the Eugene O'Neill Theatre, and the Moore Closet Gallery are participating in COLLABORATIONS III, which will sponsor a year-long celebration of the works of Eugene O'Neill. COLLABORATIONS III begins October 15 in the Charles E. Shaw Library at Connecticut College. The whole celebration will provide diverse samples of O'Neill's work in theater, dance, music, and lectures.

The events offered by COLLABORATIONS III are organized in conjunction with other observances planned in Connecticut and beyond. The city of New London is sponsoring the unveiling of a seaside statue of O'Neill. Following is a list of the commemorative events planned to take place in Oct. College.

10: Opening Ceremony for COLLABORATIONS III
22: Art Opening, reception 2-4 p.m. Show runs through Dec. 16.
22: College College Chamber Choir with Trinity College Choir, Dana Hall, 4:00 p.m.
25: Concert and Artist Series, Dana Hall, 8:00 p.m.
26: College College Box Office at 445-7610.

Additional events will be announced as they approach. For information on these or any other events, contact the Conn. College Music Department at 445-7610.

Kahn Organizes Fall Festival

by Julie Smith
The College Voice

It is time for all those closet Conn. performers to jump out of the closet and onto the stage this fall. It's the one thing I think this campus needs," said Kahn. "Artists are the stage. This fall, "The Festival of the Arts," will be the stage. The festival will begin on Oct. 23, the first annual Fall Performance Festival will begin around two o'clock in the Conn barbecue pit.

"I'm calling it the "first annual," hopefully there will be a second," said Kahn. The inspiration of the festival. He described it as having a "Folklad fair with all the different aspects of performance that this campus has to offer." He added, "I really want to make it so people who haven't had the opportunity to perform or haven't really been seen on campus."

The performances range from acoustic guitarists, to actors, to students of art. Bill Rettig, who will be performing a comedy act with Jay Gilberg, will also M.C. with Kahn. "We'll be giving away prizes to people who are willing to get up on stage and do something for us," said Mark. with a laugh. "A fantastic" jazz band and a 5-piece rock and roll cover band will lead the day well into the night. With a bunch of dance and one-acts, and some "funky" surprise performances, all areas are touched. Kahn is still open to more acts; especially those with a "theme," he added. "Right now the most important thing is to get people to do it." Kahn said. Kahn has been very inspired by his students. Though he doesn't always use them as the subjects of his paintings, he sometimes finds himself "painting an idea from a student, or a group of students, and working it into a part of a work."

"The Art of Black America" exhibit has raised Hendrick's confidence in his career as an artist. "I responded to that show rapidly, and I would say last year at this time it would have been just a concept."

Still, he is unsure of what his future holds. The principle by which Hendricks lives might well be used by any artist, whether professional or student. "It's not a 'can't' you can't really say what you might be going and what may be offered to you. You can have a lot of plans, and a lot of desires, but you can never tell what they might blossom into. You just have to try your work out there, and see what the feedback might be."
The College Voice
Boston Chamber Music Society

Dazzles Audience

The Connecticut College Concert and Artist Series opened Saturday, February 3, with a dazzling performance by the Boston Chamber Music Society.

The Boston Chamber Music Society was featured at the Boston Conservatory Chamber Players. Since then, the Society has expanded their own series from three to seven concerts and will add an additional series to the calendar in the future, according to the New England Conservatory this year. The Society has toured in France, Korea, Japan, and throughout the United States. The Society is also the chamber ensemble resident at the Tanglewood Educational Forum.

The success of the Boston Chamber Music Society is easily understood. All of the Society's six members have performed in soloists with some of the country's leading orchestras. Between them they have an impressive list of contest medals including the International Paganini Competition at the Maggio Music Festival in Moscow, and the Van Cliburn Piano Competition.

This list of achievements translates into a superb performance. The concert opened with Duo for Violin and Cello (1927) by Bohuslav Martinu. The first movement, Andante Moderato, was extremely lyrical. The two performers, Lynn Chang and Ronald Thomas, gave the movement an amount of depth and richness surprising for a duet. The second movement, a Ron- do, sprang to life with a deluge of triplets. It ended in a coda sometimes omitted by even very accomplished players. The violin remained to the end of the piece to bring it into its close with the same triplet music it began with. This piece is the first movement and vivacious in the second.

The second piece on the program, Antonin Dvorak's Piano Quintet in E Flat Major, Opus 87, was the highlight of the evening. Dvorak takes advantage of the four instruments to create a superb performance. The piece uses two cellos rather than the more common two violas. The piece has the traditional classical form; Sonata-Allegro, a slow movement, a scherzo, and an Allegro finale. Schubert uses this basic structure to create an emotional, involved piece. The Chamber Society approached it as they did all the works on the program: with energy, skill, enthusiasm, and sensitivity.

Upcoming performers in the Concert and Artist Series are the Modern Jazz Quintet on November 5, the Beaux Arts Trio on December 10, the Chicago City Ballet on February 19, the Syndace Symphony Orchestra on March 10, and pianist Emmanuel Ax on April 20. Tickets are available in the box office.

The Firehouse:
New Entertainment in New London

The Firehouse, a new restaurant in New London, is located at 58 Brainerd St. in New London (between Donuts off Broad St.). It may just be one of the best kept secrets within a two mile radius of Connecticut College. The bar at the Firehouse is also one that I would recommend especially if you are looking for a place just to hang out to toss a few back. They offer specials (a Waits trademark), and the Firehouse is very well done, not overdone; Hanging from the ceiling is a signed photograph of Frank Sinatra, and Frank's "Wild One" is the specialty of the house.

The menu here is small, but not disappointing. They offer appetizers which include chicken wings ($3.25) and stuffed mushrooms ($4.50) among other things. The burgers, which include fries, are very reasonably priced ranging from $3.25 to $4.25. Club sandwiches and beginning are also reasonably priced. My dinner consisted of the Firehouse Neopolitan Pizza, which I ordered at the end of the bar. I looked up the word "neopolitan" in Webster's but was unable to find any definitions for this adjective. Nonetheless, neopolitan pizza is very good, especially if you are used to stuffing down a Domino's on a fairly consistent basis. One excellent option is the Firehouse's offering of two person spot, pizza by the slice which goes along nicely with a few drafts. I ordered hamburg and sausage on my pizza. There is a wide variety of toppings, especially anchovy. Pizzas range from $8.95 to $5.95 for the regular size ($10-12 for the large). This is the specialty of the house as is a half pizza, or half of the regular pizza.

The Firehouse is a perfect alternative to campus food and other common off-campus spots. The food is good, and it is a good option for people who don't want to make the Firehouse at the bar and atmosphere reminded me of a smaller and less commercial version of the bar at day's type establishment.

From Boston to the World: The Del Fuegos’ Popularity Grows

by Jackie Whiting
The College Voice

Having just returned from a world tour with Tom Petty and The Georgia Satellites, The Del Fuegos still remember the early days in Boston, MA. “We played anywhere that would take us,” explained Dan Zanes, guitarist and vocalist for the group. “Anywhere” included frat parties, loft parties, and bad clubs. “We even played Walpole State Prison for a maximum security crowd.”

The Tierra Del Fuego, the southernmost point in the world, inspired the group’s name. “We were looking for something as low down as you can get,” Zanes laughed. The group traces its beginnings to 1980 in Boston. At this time, Zanes united with current bassist Tom Lloyd. “We were into the same kind of American music, mostly ‘50s rock heroes and ‘60s soul.” After their first (and unsuccessful) gig at a summer camp, Zanes said that they realized “we were either way ahead of or way behind the scene.” After an icy winter with no food, the first drummer left, but as spring arrived, they began to get work. Zanes reflected on this period in the band’s history and said, “It was kind of fun and a real ordeal at the same time.”

College radio stations in the Boston area began playing The Del Fuegos’ self-produced tapes which served to enhance their reputation as an “up and coming” group. The independent release of the single “I Can’t Sleep” in 1983 sold more than 5,000 copies and opened up a better series of shows. Then, in early 1984, the band signed to the Lotus Land label. Zanes’ brother Warren was recruited as the band’s second drummer on his high school graduation day in June, 1983. Soon after Warren joined the group, their second drummer quit and was replaced by Warren Giessman, formerly of the Embarrassments, with whom The Del Fuegos used to play. The band’s debut album, The Longest Day, was released in July, 1984, and dubbed them as semi-local heroes in Boston.

Their next major engagement was with Miller Beer for the Miller Rock Network campaign. “It’s kind of like where you endorse the beer or the beer endorses you, I’m not sure which,” Zanes admitted.

With the added talent of guitarist Jim Raision, The Del Fuegos began working in late 1985 on their second album. In recognition of the city from which they originate, they entitled the album Boston, Mass. “We really found the sound we were looking for, it’s like we had these great big shoes, and we finally grew into them,” Zanes commented. Their first single and video, “Don’t Run Wild,” employs the keyboard talents ofローン Davis for their live shows.

One such live show will be at The Reducers: New London Natives Going Strong

by Jackie Whiting
& E Editor

“We grew up together in this area, went to school together, learned how to play guitar together. We’ve known each other since we were kids,” said Peter Detmold, vocalist and guitarist for The Reducers. The New London-based band will be performing Wednesday, October 14, at 8:00 p.m. in Palmer Auditorium with the Del Fuegos.

The Reducers, who still boast the four original members, formed almost nine years ago after Detmold and another member spent one week in England “and saw a lot of good rock and roll bands... We saw the Sex Pistols which was pretty mind-blowing, the Clash and Eddie and the Horrors. It was this entire experience, not just one of the bands they saw play, that influenced their decision to form a band of their own. “We’d been playing guitar for years previous to that, but that was a real blatant motivation to do it ourselves.” Detmold said that they realized that the bands they heard play were not “particularly proficient at their instruments. They were just bashing it out and people were really enjoying it; we realized we could do that too.”

This experience was recorded in their song Pub Rockin, but two lines in particular reveal their philosophy as a band: “I thought, man, this is the way it should be/Dancing to a rhythm that was stupidly good.”

Detmold explained this lyric, saying that what appealed to him was “just the idea of playing rock and roll and people dancing.”

Making people want to dance was all they had to do to provoke CMU magazine to label them as “one of the best unsigned bands.” “In fact,” Detmold recalled, “One year I think they voted us as the best unsigned band.” The Reducers, to date, are still unsigned because, Detmold said, “It’s up to them (the recording companies) to make us an offer that we’re willing to accept and so far that hasn’t happened.” Detmold is wary about sacrificing the band’s sound to the tastes of a recording company. “We want to make sure that if we ever did get to that situation that we stay true to ourselves.”

The trip to England also influenced the band’s character; according to Detmold, they have adopted the “punk attitude” although not the punk sound. “I think punk’s most important message was that anyone can play rock and roll. You don’t have to be a musical virtuoso, all you need is the right attitude.” The band also has some of the basic rock influences “cause we’re old enough to remember the Rolling Stones,” Detmold laughed.

The band has released three albums in the nine years that they have been playing together. Detmold is happiest with the second of the three, Let’s Go, which was “probably the best received album... It wasn’t rushed, we got a good sound on it.” Currently the band has plans for a fourth album still in the preliminary stages, but if everything goes as planned, “which is usually doesn’t,” Detmold laughed, they will begin recording this fall. “We are going to try to make this the best one yet.”

Plans to Purify Water
continued from page 1
that the level of trihalomethanes exceeded the maximum allowable level by three percent. Yet the water was designated as safe to drink for up to four years until the new filtration plant for purifying the water is operative.

The City of New London gave an example of the possible risk of danger from drinking the water.

The document said, "If you knew 50,000 people and they all drank water with this level of contamination their entire lives, one to five people over 70 years would die of cancer, that would not have died of cancer, if the water had been clean."

Another example that the department gives is that four times as many people die from animal or insect bites than from the trihalomethanes in the drinking water.

The main focus of recent attention has been the subject of lead in the water that we consume. Lead in drinking water comes mainly from pipes or plumbing joints and is leached into a plumbing system by water which dissolves the lead. New scientific evidence from the State of Connecticut Health Services suggests that very low levels of lead has adverse effects on children.

On our own campus, some people are taking special precautions. In reference to the public notice of violation by the City of New London, Assistant Professor of Child Development and Director of the Children's School, Eugene Goldfield said, "Since I have some reasonable doubt about the water I decide to switch the entire school to bottled water."

He also stressed that while he has "no direct evidence," he said that "when you deal with children there are some special questions that you must ask, and that while I may be overly cautious I do not mind doing that."

Many students have voiced their sentiments over the water issue. Katie Drucker, '91, said, "While we have not been notified that it is hazardous, I think it tastes like mud." Others like Richard Mack, '91, have switched to bottled water. "Twice a week I go to Finast and get a five gallon jug because I am not sure what is in the water, but then again what is one ever sure of?" he said.

According to Baker, more measures to safeguard the water supply are now being instituted. When the New London filtration plant goes on line in 1989, the trihalomethanes will be filtered out. The water department is now investigating a lead preventative program which will help reduce the hazard posed. In fact, a recent mortality chart states that one has a better chance of getting struck by lightning than from the trihalomethanes in drinking water.

Theodore L. Hargrove, director of public relations at Mitchell College, dispelled rumors of Mitchell College students not drinking the water by saying, "When kids get their hands on a piece of information like the notice of public violation, they tend to make up stories."

And for those people who are still concerned about the presence of trihalomethanes in the water, Marshall-Baker said that by the time the water, the trihalomethanes can be ex-}

Intramural Update

In flag football, as Armageddon raised their undefeated streak to nine games, six of which included some very close games, only two of which were decided by overtime shootouts. KB, who won one and lost one this week, tied Abbey 2:2 at the end of regulation play, give KB the win.

"We definitely improve over time," Patton said. "We have a lot of leadership among them," said Steynski said. "It's very game will improve with scoring chances."

Another factor in the Camels' success during the season, their strong defense, was the main reason for the team's success. Sophomore Rich Zeitlin netted the game winner for KB, while Abbey senior Pete Milburn netted the game winner for KB, while Abbey senior Ted Liang tied the game winner for KB, who won one and lost one this week, tied Abbey 2:2 at the end of regulation play, give KB the win.

"We're really looking forward to this game," Patton said. "We don't have enough time to prepare.

"They made us play better than we were originally told," Jill Gruberg ('91) said, "so we didn't have enough time to really get ready to play.'

About the officiating,

Men's Soccer

The Connecticut College Men's Soccer Team has had a strong season, with a 5-1 victory over KB. Morrison is undefeated, and is 8-1 against seven all match long. The Camels did not enjoy an unexpected early starting time that was simply overcome.

The new offensive attack, launched a festive celebration by igniting the growing swarm of communication. Patton is confident that all the work will pay off soon.

"We should definitely improve over time," Patton said. "I have faith that we will.

Another factor in the Camels' disappointing record has been the large proportion of away games that the team has been playing. The hostile crowds at other schools can affect the team's performance.

R.I.C. and other schools have some really obscure fans who make it tough," Patton said.

"It's a lot easier to be at home," Steynski said.

Fortunately for the Camels, the team has a long stretch of home matches ahead of them, including a match with Amherst this Tuesday at 7:00.

Volleyball

Three Tough Losses on the Road

The Connecticut College Women's Volleyball Team dropped three matches in a row this week, putting their record at 5-7, with losses to W.P.I., Wesleyan, and Rhode Island College.

"But they were just a strong team," Conn's efforts against Wesleyan was hindered by an unexpected early starting time and several questionable calls by the officials.

"We played really well," Lynne Steynski ('91) said, "but they were just a strong team.

CONN's efforts against Wesleyan were boosted last week by the addition of sophomore Ed Schauster, a starter the team has a long stretch of home matches ahead of them, including a match with Amherst this Tuesday at 7:00.

Men's X-Country

Best Race of Year

Despite a number of injuries, the Connecticut College Men's Cross Country Team had their best race of the season last Saturday at the Rhode Island College Invitational. The team of Kevin Cuddihy ('90) and Mike Park ('90) clicked in unison.

The Larry's defensive line of the fifth man, and he did it. This is been working hard and we're ready for our competition." Perkins said.

"We have a problem with the number of injuries on the team," Perkins said. "It will be a true test of our runners to keep on doing well, but I believe we can do it.

CONN certainly passed the test last Saturday, although only seven runners were able to compete. Perkins ran his best race of the season, finishing 10th overall with a time of 27:10.

Todd Baring (91) crossed the finish line first for Conn, taking 27th place with a time of 28:07. Andrew Builder ('91) finished right on Bar- ing's heels, earning 35th place.

The Larry's main problems were the addition of sophomore Ed Schauster, a starter the team has a long stretch of home matches ahead of them, including a match with Amherst this Tuesday at 7:00.

Sailing Enjoys More Success
by Jonathon S. Pudney and James Appel

Last weekend was one of the most successful for the season for the Connecticut College Sailing Team. A win in the Carry Price regatta at the University of Michigan was the highlight of the weekend. Adam Wehrbein ('88) and Nancy Burns ('89) sailed excellently to win "A" division, while Curtis Hulst ('91) and Rachel Edge ('90) took third in "B" division. These finishes give the CONN crew a 16-point margin of victory.

The CONN offshore team, headed by team captain Ward Blodgett ('89), went to Navy and did well said "Intramurals."

The McMillan Cup. CONN came away with second place, missing first place by seven points. Student participation is down. CONN's arch-rivals from across Route 32, the Coast Guard, won the event by one point.

"We were all at the prize giving and we didn't know who had won," Brad Carpenter ('89) said. "Then they announced the results in ascending order, kind of like Miss America, and when they named CONN second, all the "Coasties" went wild."

The top-ranked women's team once again showed that they are among the best women sailors in college today, taking an impressive third place, also Navy, The team, consisting of Pam Pemell ('90) with crew Leslie Green ('90), and freshmen standouts Jen Coolidge with crew Lisa Herter ('89) and Jen Brown ('90), were untouchable during the event.

The swoop team, headed by team captain Tonya Carter ('89), competed in a warm-up regatta for their New Englands over Fall break.

The team came away with three wins and one third place result to give them a convincing overall victory.

"We learned a lot and seem to be doing well to the New England's," Johnston said. Dave Ryan ('90) became the fourth CONN sailor to qualify for the United States Naval Academy. This gives CONN a good chance to move up to the Nationals in November.

Rugby Tries to Get it Together
by Jason Stewart

The Connecticut College Rugby Club travels to Rhode Island on October 3 to take on a strong Brown College team, only to be blanked for the second time in two weeks, by the score of 14-0.

CONN started out strong once again by giving up a shaky try, but intercepted lines and, hitting well, keeping Providence to only try points. In the first half, CONN had several chances to score in the first 40 minutes, but couldn't push through the Providence line.

As in the Coast Guard loss, the second half failed CONN's undoing. Providence scored two more tries and one conversion to make the score 14-0.

The Connecticut College Rugby Club traveled to Rhode Island on October 3 to take on a strong Brown College team, only to be blanked for the second time in two weeks, by the score of 14-0.

CONN had numerous chances to score, but did not convert. The team's first chance came when CONN, from a five-yard release, released the ball down the line to Chris Stanley ('89), but unfortunately, instead of pushing the try line by CONN's forwards, Stanley landed on his back and was unable to touch the ball down.

The second big scoring chance of the half for CONN came off a Providence penalty. Mike Hartman ('89) attempted a straight lineout from the five-meter mark, which went wide to the right wide to the CONN's forwards who caused the try line. They then pushed over the try line by CONN's forwards. Stanley landed on his back and was unable to touch the ball down.

"In the second half, we had a few real opportunities to score," Hartman said, "but when we intercepted a pass on our goal line and then carried it the length of the field and scored, it basically killed our spirit."

CONN's serum is beginning to work together fairly well. They're moving, hitting, and supporting more as a unit. After losing some key players from last year's squad, CONN rugby has been going through some tough times rebuilding and finding a solid starting 15 to replace them. The key players are being replaced by fall lineouts, and hitting well, keeping CONN's arch-rivals, aggressive as being at the start of the race did not mean tiring by the middle or at the end of the race.

The top five runners stayed together for the first mile. Then, Betsy Long ('90) began to move. Through the second half of the race, Long gradually worked up to a tenth place finish in a time of 19:33.

Rugby Club Travelled to Rhode Island on October 3 to take on a strong Brown College team, only to be blanked for the second time in two weeks, by the score of 14-0.

"We beat Bryant (fourth place) for the first time ever, and we destroyed the 3.1 mile course in 23:02.

Bishop was extremely pleased with the team's overall finish.

"We beat Bryant (fourth place) for the first time ever, and we destroyed the 3.1 mile course in 23:02."

Next Saturday, the team will travel to Tufts to compete in the NECAC championships. There, they will face tough competition from most of the NECAC schools.

"The first three teams in any order will probably be Bates, Tufts, and Colby," Bishop said.

"Last year, we finished sixth of 11 teams. This year, we look to place higher."

Camel CANNtention Placements: Do intramurals really matter?
by Kieran N. Xanthos

There is no N.C.A.A. championship. There are no Division III playoffs, no uniforms, and no coaches.

Do intramurals fit in at CONN? Is there any student interest? Do intramurals really matter?

An emphatic "yes" comes from Intramural Director Amy Campbell.

"Everything the athletic department offers is important," Campbell said. "Intramurals are no exception. They are just as important as physical education class. They are just as important as physical education class. I want to encourage maximum participation and maximum overall fun," Campbell said.

Other critics of intramurals are hesitant to sign up because of their past experience with the program. Softball is one example of a league which hasn't played a full season in three years.

"Intramural sports are seasonal," Campbell said. "We want to encourage maximum participation and maximum overall fun," Campbell said.

While junior Mike Coffey, captain of the Larry's flag football team, feels that intramurals promote campus unity, some former varsity athletes use intramurals to keep in shape.

"I get really psyched to play," Murphy said. "The competition gets really intense. It's great."

"I think intramurals are just as important as varsity athletics. It is also a way to keep in shape." Senior Kieran N. Xanthos

"I think intramurals are just as important as varsity athletics. It is also a way to keep in shape."

"By the end of the year, people are sick of it. It's just not worth it," Coffey said. "I'm not sure if all the people who come out to intramurals really care about campus unity. How many people are really interested?"

"I get really psyched to play," Murphy said. "The competition gets really intense. It's great."

"I think intramurals are just as important as varsity athletics. It is also a way to keep in shape."

"I think intramurals are just as important as varsity athletics. It is also a way to keep in shape."
**Field Hockey**

**Ready for Trinity after 3 Wins**

by Kieran N. Xanthos
Associate Sports Editor

The Connecticut College Women's Field Hockey Team won three games this week, raising their record to an impressive 5-2, and giving CONN a boost of confidence for their upcoming game against Trinity College.

"We're really psyched to play Trinity," freshman goalie Jen Schuscher said.

Sophomore forward Cindi Lehman agrees.

"After this week, we'll be ready for them," Lehman said. "These three wins helped boost the team's morale."

The victories were posted over Amherst 3-1, Western Connecticut State 2-0, and Smith College 2-0. Over the three games won, CONN allowed only one goal, while scoring seven themselves.

The seven Camel goals this week were scored by six different players. The well-balanced scoring attack began against Amherst. Co-captain Robin Legge ('90) and juniors Jessica Harrigan and Sarah Lingeman scored one a piece. The Amherst win marked CONN's first road victory this year, after losing to Bates and W.P.L. on the road.

With home field advantage, CONN also beat Western Connecticut State. Lingeman and sophomore Jen Thacher netted goals for the Camels.

CONN's second road victory came at Smith last Thursday. Scoring for CONN were Lehman and co-captain Michele Laine ('88).

"Hilary makes a big difference," Schuscher said. "It's a challenge and I am enjoying it." Schuscher added.

"The whole team has played really well over the last three games," Lehman said.

Next stop for the Camels will be Harkness Green on October 13 at 3:00 p.m. versus undefeated Trinity.

**Women's Soccer**

by Beth McKiernan
The College Voice

The Connecticut College Women's Soccer Team once again proved that they are a force to be reckoned with in New England women's soccer. Shunting out each of their opponents for three more wins last week, CONN's victims included Eastern Connecticut State University, Mount Holyoke and Wellesley.

At home last Saturday against Eastern, CONN played their type of match and came out on top 3-0.

"It was a nice game," Coach Ken Klite ('89) said. "We didn't do anything spectacular, just played good soccer."

It was a spectacular day, however, for freshman Jamie O'Connor who netted two of the three goals for the team. Katie Bing ('90) talled the other.

"We dominated most of the game," Juliana Fuller ('90) said.

"But it was a very rocky game, Wellesley has a kick and run style of play. The ball was in the air most of the match. However, 20 minutes into the first half, the ball remained on the ground long enough for Alicia Ching ('89) to complete a through pass to Fuller, who went on to score the goal.

CONN held on to the 1-0 lead throughout the remainder of the game, giving Eva Calahan her third straight shutout.

With records of 4-1 and a four-game winning streak, CONN may start to think about the post-season NCAA tournament as a possible goal.

"No one even thought of it," Fuller said. "Now all of a sudden, it's something to consider; we're good enough."

According to Fuller, the team's success is due to "the combination of having the core of returning players plus the extra lift of the freshmen."

Kline looks to the distribution of scoring as a contributing factor.

"We have a number of people capable of scoring," Klite said.

"The way we're playing we're going to score at least once, but we don't know who will score."

Kline also points to the increasing familiarity with the men's soccer team, the system of play and confidence as reasons for the squad's success.

"Success breeds success," Klite said.

"When we win games, we know how good we are, and we are confident in our ability to play."
