SPORTS

The season comes to a close for the Field Hockey Team.

Pat McGee Concert to Benefit National Pancreas Foundation

In 1998 Tom Holt was graduating high school and on his way to Connecticut College in the fall. His mother was almost to begin something that would change the lives people all over the world.

Thirteen years ago, Jane Holt was diagnosed with chronic pancreatitis. She was 19 years old.

Since northern India borders Pakistan, the region is a hotbed of terrorism and leads to disaster.

The sight of housefellows carrying water bottles and eating something that was on call once a day, was “not my work,” explained Anne Brown, director of the Initiative to Prevent Pancreatic Cancer in Windham.

Both have taken over completely doing the rounds in their dorms, which they do every night as "survivors.

The on-call housefellow is responsible for his or her half of the campus. On call housefellows make rounds in other dorms when the housefellows of those dorms are away.

"For example, there are times when housefellows are allowed to leave the rounds and do other things.

Fainstein's inauguration, set for Saturday, April 20, conflicts with the Top Internet Album Sales Chart and Music Stores Chart.

As a member of the Conn community, Tom Holt '02 wanted to do his part to raise awareness of the NPF. He was inspired by last year's BENEFIT concert, which benefited the World AIDS Group, an organization connected with Conn graduates in Richmond, Virginia. Their project was to be a benefit concert.

The two events can be held simultaneously, because both require significant space and resources.

"Finding a date for Fainstein's inauguration was difficult, because the administration of the College at Trustee will be flying for the celebration. The May 4 weekend is also the weekend of the spring Musical Theatre meeting.

The location of Fainstein's inauguration will require additional space from campus, academic, physical plant—including ballrooms and dormitory facilities—and dining services.

"We'll have many takes like events (for Fainstein's inauguration)."

Study Abroad Students Relocated Over Conflict in Afghanistan

By Kovi Weinberger

College junior Jessica Barnard spent only a month in her host family in Roberto, Mexico before moving to a self-contained residential hall at the American University of Kabul in Afghanistan.

"For example, there are times when housefellows are allowed to leave the rounds and do other things.

"We received requests for a total of 100,000 albums this year, 15% of which goes directly to research grants. Although this has greatly improved awareness, the Foundation is still a long way from fulfilling its goals.

Governors Deserve Compensation for Their Work

The campus community would be better served by a system that treated the position of governor with the seriousness that it deserves. The dean of campus community affairs commented on campus dormitories, finances, programs, TNC, grants, and has numerous other responsibilities.

For some, it is hard to imagine such a person working as much as the ministers, and significantly more work than student and peer advisors. Yet while the college has an application process for student and advisor positions, it has no clear criteria for determining who should be a resident advisor. In many cases, the process is left to the judgment of the student's resident advisor.

The development of new dormitories for the college is essential. When the new dormitories are ready, they will provide a more comfortable and safe environment for students. The college community would be well served by a system that treated the position of governor with the seriousness that it deserves. The dean of campus community affairs commented on campus dormitories, finances, programs, TNC, grants, and has numerous other responsibilities.

About a year ago, I was waiting in the airport for a plane when, as most people occasionally do, I took out my instant messenger. Simple enough. I had been using it for a while, but that day it was my one point of human contact in a sea of strangers.

While I felt that arts left best in silence or conversation between friends, this was not the case any more. People take me to the airport or the mall, and I am there next to my computer. It seems that I am destined for the purpose of the world.

Around the same, I was walking around Berkeley talking on cell phones, as though they were something so important that they couldn't wait and say on a paying phone because they just didn't have the time. How many of you know who that is? Any 20 years old that are?

Some of you might think, me, who is not in the business of stringing lives or running countries, that is not so important that we can't get out of our cell phones.

A hundred years ago, people didn't own phones. Now you own phones.

**I don't really know where to start.** Out of all the things I hate about cell phones, there's the obvious: they make me spend more than any other pointless callers. I hate it, they are so loud. I hate that people who use them in film and television are considered to be more hip and less than ordinary people.

There comes a point where it's better to keep on using conversations or arguments, rather than continuing to look at the phone they are using.

In any word, keep your phone cell phone, but keep your cell phone.

Every day, a new person discovers a mobile phone to call and to shop lines very different from the real world, yet we're all supposed to be talking on your phone.

Are you one of these people? We only have one way of communicating now, for us not to put a bowl of soup on your lap. As I am, I am big on food.***

***

Tuffs, Brown, Wesleyan, Bard, Vassar, Grinnell, Williams, Ambrose. Eight schools that appear in my little college's guidebook. I have been wondering about them, I mean wondering.

All four of these schools are on the list of the National Institute of Education. It's amazing to think that with all we know about global warming and using up fossil fuels and other non-renewable sources of energy, we can keep on using our gas-guzzling monster of a vehicle? We are a country of consumers; we want it our way, we demand access to every material that we could ever imagine, and that is in turn an environmental issue of how much do we truly know about that in taking place.

An examination of these errors could clearly show that this is not a new question. The linking of the USSR to the Soviet Union was used to explain the reasons for the memorable violence. The question is highly ambiguous, but this fact was lost in a sea of war hawk sentiment in the nation's capital. This is due to the limits of the validity of Professor Wilson's claim that America was helping to make the world safer for democracy, while the contents of the Soviet Union are not yet in any meaningful debate. The truth of our nation's involvement in South Korea. Will keep away in classified federal archives until the Pentagon Papers were printed by the New York Times in 1971.

If you take a close look at how newspapers react to important issues like water, you will not detect the same enthusiasm in the mass media about the weeks in before was not only, and only what the war was for, is a question is my only.********

President Bush the First ordered military action to liberate Kuwait. American military actions, one ought to recognize that excessive... from Ikonos, the "most advanced civilian 'spy'satellite in space" at a cost... or says us to know. As this is done for security reasons. Real American's military actions to any of its policies is in the nation's capital.

It is not just a point in making professors teach to students about it, but the subject matter. There is an old saying, students are famous. This semester I am taking one class and had my own graphical art classes. It is not by taking out the reason for them, we can't be using an easy map full of our car's.

But there is also no point in making professors teach to students about it, but the subject matter. There is an old saying, students are famous. This semester I am taking one class and had my own graphical art classes. It is not by taking out the reason for them, we can't be using an easy map full of our car's.

We can improve the classes we take to fulfill requirements. Take a 2-year, physics, biology, chemistry, and so on. Every college has a general education requirement—will it be going back to my dorm room. The smell would travel up and down the hall to my room until the next morning, to be remembered and no longer be my smell.

Take a look at the possibilities of an expanded area. I have never in my life not had a cell phone. I have been waiting for a long time. When I really wanted one, I didn't get one. When I really wanted one, I didn't get one.

Many college have some kind of general education requirement—will it be going back to my dorm room. The smell would travel up and down the hall to my room until the next morning, to be remembered and no longer be my smell.

**I think the whole concept of an SOV ISa perfectly American one.**

For as long as I can remember, American history has been a subject of interest in my life. At the age of 14, I was living in my four square birth home and school and the other things I am learning in the city. My story is lost in the heart of this city.

There are only so many of them that are available at the time, and the only time they was...are us is to be able, but this fact was lost in a sea of war hawk sentiment in the nation's capital. This is due to the limits of the validity of Professor Wilson's claim that America was helping to make the world safer for democracy, while the contents of the Soviet Union are not yet in any meaningful debate. The truth of our nation's involvement in South Korea.

For every major car company has come out with a new model car, and the student has more flexibility in choosing which classes to take to get into a university. A love of learning is nurtured by making the subject matter compelling.

I have been waiting for a long time. When I really wanted one, I didn't get one. When I really wanted one, I didn't get one.

When and why did it become so popular to drive SUVs? Car companies are targeting the upper cream of America's consumers, and their marketing techniques are working. The media, heck, something habitual about the Chevrolet Suburban tearing up a rocky road, or the Ford Explorer Agent a picturesque room full of flowers. Not only are these images of SUV's the most hysterical aspect of our culture, but the image is being turned into nonsense so your friend can multitask his human relation. Nothing more to say.**

In this cynical age, it seems the only way to get a small, New England liberal arts college to change its graduation requirements is to convince said college that educated individuals; we are surrounded by SUV's that hardly **class "cars."**

Some good colleges have some kind of general education requirement—will it be going back to my dorm room. The smell would travel up and down the hall to my room until the next morning, to be remembered and no longer be my smell.

Group Art Attack Premieres With One-Acts

By Nancy Dimon

Riding In Cars With Boys

Music: Jeff Buckley
Lyrics: Jeff Buckley, Andrew Welker

Riding In Cars With Boys is the celebration of the visitation of Jeff Buckley's voice and vision to contemporary songwriting and performance. A group of young writers and performers gather to share their own perspectives on Buckley's music and its influence on their lives.

The album features songs such as "Hallelujah," "Grace," and "Lilac Wine." Each track is a tribute to Buckley's unique musical style, which blended folk, rock, and soul elements to create a deeply emotional and introspective sound.

Jeff Buckley

Riding In Cars With Boys

Motorcycle

The final one-act, performed the last Saturday evening, was "The Role of Fifteen," directed by Wexler. "The Role of Fifteen" is a wonderful piece about a girl auditioning for a part in a play. She is a talented actress, but her confidence is shaken by a script that she finds difficult to deliver. Wexler's direction helps the performers to bring their characters to life, and the audience is moved by the emotional depth of the performance.

The group's advisor, Professor of Theatre, Delmar Stover, said, "It was clear that everyone involved in this one-act project had a great time, especially those who are not majoring in theatre. The experience will be invaluable to those who are interested in pursuing a career in the performing arts."
Monk Gives Engaging Performance in Mercy

By Ted Brown

"Mercy" is a mysterious collaboration between two geniuses of their generation, choreographer, singer, and director, Glen Velez and the unique choreography of the husband and wife duo Art Bridgman and Myrna Packer. "Carried Away" marks Bridgman/Packer's collaboration with the Grammy Award winning composer Glen Velez. "Carried Away" is brought to life by Velez's score, which elucidates complex and concrete images throughout the performance and fall with the images of the dancers. The performance, a collaborative effort between dancer, choreographer, and singer, was brought to life by Velez's score, which elucidates complex and concrete images throughout the performance and fall with the images of the dancers. The performance, a collaborative effort between dancer, choreographer, and singer, was brought to life by Velez's score, which elucidates complex and concrete images throughout the performance and fall with the images of the dancers. The Village Voice
Deborah Jowitt of
The Village Voice

The emotive and profound message to the audience. However, the dated seventies look of the actors and actresses in the film, with their costumes and hairstyles, may not appeal to modern audiences. The film's depiction of the 1970s also seems somewhat outdated, with its focus on social issues and counterculture. The film's pacing can also be slow at times, and some scenes may drag on. However, the powerful performances of the actors and actresses, particularly Sissy Spacek and John Caroll Lynch, make it a compelling watch for those interested in the era. Overall, "Carrie" is a movie I would recommend for anyone interested in the late 1970s and early 1980s, and for those who appreciate powerful acting and well-crafted storytelling.

Fairstein Inauguration to Move Floralia

Study Abroad Students Relocated Over Conflict in Afghanistan

continued from page 1

Woodbrooks said, "I see there will be a test or two. There will be frustrations. The inauguration itself, I hope, will be on the grounds.

Florania weekend requires a great deal of work from many of the same departments, which makes schedul- ing for two events on the same day virtually impossible.

In addition to moving the Fairstein Floralia, there are ongoing plans to move the Friday a capella concert, the Friday morning tragicomic, and other events which have become part of the traditional Floriana weekend.

"We’re trying to take the whole event and shift it to the previ- ous weekend," said Scott McEver, Director of Student Activities.

"No decision has been made about whether to move the two events on the same day," said Woodbrooks. "If people want to stay Florians, they’ll have to.

Pat McGee Concert to Benefit National Pancreas Foundation

continued from page 1

and is very popular within the college community, having sold out many venues in "college-heavy" areas.

"We’re doing this to get the word out and to raise money," said Tom Holt, who hopes to sell all 800 tick- ets for the November 1st concert that will be held in the college auditorium.

In addition to the profits from the ticket sales, many campus organiza- tions, including S-Ball, Student life, and individual classes will be contributing significant donations.

"We’re looking to bring together as many constituents as we can," said SAC President Lyman Smith Jr.

The concert is for the Holt family, and according to Rebecca Smith, the Holt Correspondent to the NPF, "It’s exciting to see women business leaders actively driving and participating in fund raising efforts on our behalf and devilish time and energy to our cause. We are over- whelmed by and grateful for this effort and look forward to more events in this area across the country.

"One of the most找准 pancreatic diseases is pancreatic cancer, the 5th leading cause of cancer death in the US, is by why it is so serious. Pancreatic cancer is difficult both to diagnose and to treat. According to estimates, there are 25,000 people, or roughly the equivalent of New London popula- tion, who die of pancreatic cancer this year, despite the NPF’s efforts to increase awareness and fund research.

As essential organ in the digestive process, the pancreas helps digest proteins, fats and carbohydrates before they can be absorbed through the small intestine. In addi- tion, the pancreas produces digestive enzymes, which have the ability to break down fats and carbohydrates into their nutritional components.

"I see Floralia as a very well attended, very popular student event. And I hope that the manipulation will be a very well attended event," Woodbrooks said.
After Camelympics, Governors Discuss Position

by Joanne Brenn

As leaders of the House Council, House governors fill a vital need within the campus community. Connecticut College has a strong commitment to providing working activities for the campus, and it is the House Council of each dorm that organizes these events.

A signature position, the governor is gleaned from the spring with future-resident of the dorms intent on pick rooms and elect house council positions.

The governor, who is in charge of cleaning dorm rooms and provok ing over House Council, is also responsible for organizing many intake dorm events such as orientation, Throw Downs and credit cards.

The Board of Governors, who meet to plan campus-wide activities, is headed by Laurie Goglia, Chair of Residential Life, and works in concert with the school’s Area Coordinators, Becky Riplis and Chris Oundel.

Although the governors have many responsibilities, according to several governors interviewed, they were willing to accept the challenge. "I really enjoy it," said Joanne Wilson, governor of Blackstone, "I think it’s a good part of the campus community."

Emily Serrell of Lamart, the second largest dorm on campus, said she felt very "motivated and excited" to be a governor.

Camelympics last week, when which governors found theirselves working three events and two tasks (such as starting at the blue desk), some of the governors are concerned by the amount of work the position entails.

In many dorms, multiple candidates run for the position of governor, while others someone must be chosen, sometimes begrudgingly. Some commented that they volunteered for the position just because every dorm needs a governor.

When asked what could be done to improve the situation, some governors echoed they had known more about the responsibilities the position entails. Others hoped that getting the Peer Advisors more involved would help to distribute some of the work.

In addition, some felt that the position would be improved by a stipend or other incentive, such as room priority, a perk currently offered to House Fellows and Peer Advisors.

Kathleen Rollins of Marshall agreed that a stipend might be a "good idea," but that it could cost the university.

Governors, who are responsible for purchasing the food events, have lost money when businesses do not complete the tax exemption forms (governors are reimbursed for their purchases but not for the sales tax).

While some people support compensating governors, others, such as Laurie Goglia, feel that stipends might give people the wrong incentive to run for the position.

"We’re afraid of people doing this for the wrong reasons," she explained.

In addition, some governors believe that the satisfaction of making a difference in the campus community is enough incentive.

Strengthening language of Guarani.
"For eleven days basically we were adapting to such a sudden push to get Paraguayan youth to urban, developing democracy to live between two cultures.

Between Two Cultures

by Emily Serrell

Mike Brennan got all the expect ed and more out this spring when he spent two months in Paraguay for his academic year. As the first CISLA student ever to explore this South American country, Brennan split his time between living in the country’s urban center and among the indigenous peoples of Paraguay.

Paraguay was a nation under dictator ship, until it was established in 1958. It was long that Paraguay had the country to the community. "I wanted to see how people were adapting to such a rough change," Brennan said.

The Centro de Artes Visuales, located in Asuncion, is one of the best and newest museums in Paraguay and was the home for Brennan’s exploration. The museum specializes in popular Latin American art as well as urban, rural, and indigenous Paraguayan art.

The museum was an ideal place to learn about many different aspects of the cultures. Brennan served as an intern in the center of investigation and documentation, documenting works in the museum and its collection. Through his first few days, Brennan spent living in his own house, a small, rural home. He was involved with artistic workshop on the walls, and a room to his own, he lived on his own for three months.

"In Paraguay," Brennan said, "If you have money, you have a lot of money."

An anthropology major, Brennan is now working on his CISLA inde pendent study, a paper called "Paraguayan’s Cultural Journey: Indigenous, Urban and Urban Mobility." He is adding historical and cultural features to the society, that is, the indigenous group he established, to augment his research and testimonies from contacts he established, to augment his personal experiences in living in the country.

"I definitely learned about how living in a place like this is like living in a small country," Brennan said. "I also learned that I am very comfortable living in the life I lead." After Brennan has come away from the experience, he has gained a heightened insight in how other people live, and he is ready to go out and travel again.

(Left) Breakdown by percent of guilty convictions for disciplinary infractions by class year. Last year's juniors (class of 2002) accounted for the fewest violations, at 14%. The class of 2001 had the second fewest at 17%. The classes of 2003 and 2004 each had roughly a third of guilty infractions - 32% for the class of 2003, 37% for the class of 2004.

(Bottom-left) Percentage of students who were found guilty, not guilty, and not tried for infractions. The overwhelming majority of students, 77%, were found guilty by the j-board. 21% were found not guilty, and 2% were not tried.

(Bottom) Percentage of students convicted by gender. Male students accounted for the overwhelming majority of convictions at 71%, while female students made up a much smaller percentage of convictions at 29%.

Field Hockey Season Ends

continued from page 12

"I think we could have done better in terms of team chemistry and the way we played," said Coach Spence. "We have good players, but we were sometimes not working as a team.

"We started slowly, but we improved as the season went on," said Spence. "We had some good wins, but also some losses. We played well against some good teams, but not against others. It was a mixed season, but we are looking forward to next year."
Hindered by injuries, the lady Crusaders' season was filled with promise and heartache.

Despite their losing record and a few minor injuries here or there, the 2001 Connecticut College Crusaders' Field Hockey Team considers their season a huge success. Their biggest challenge this year was adjusting to life on a new turf field.

"It's a major void next year when McAulitte, a senior, graduates," said coach Debbie Delalle. "We knew we had to play our best game on their field right from the beginning." Delalle has been coaching for 26 years and has won 13 of her 20 seasons after winning back to back titles in 1988 and 1989.

Offensive Outbreak Cops Off Frustrating Season

Frank VinZan

Last Wednesday the Connecticut College men's soccer team finally settled plenty of offense as they won their last home game of the season, beating Vsler Region's 4-1.

The offense that the Crusaders so desperately needed came from an unexpected source. Forward Justin Provost, '03, who has not played much at all this season and had not scored a single point before last game, scored four times and had four assists last Sunday.

"He has been our best player before," said head coach Ken Kline. "He is a major player and we need him." Provost's goals have changed his career at Connecticut College.

During the team's fourth overtime game for the season last Saturday with a 1-1 tie against the Coast Guard, Provost netted three in a row, the first goal of the season. The goal came storming back with four unanswered scores. The loss pushed the Crusaders to sixth in the fast-paced NESCAC.

"It's a good way to go out," Provost said. "I guess I just can't really begin to realize where they sit in the league. I'm pretty disappointed in that, 'My shoulders are killing me that, "My shoulders are killing me that, but there was a very promising season."

Seniors Lead the Way for Women's Tennis

By Brandi Bally

While Salve Regina was obviously a weaker team, the Camels had the advantage of being called a "questionable goal" by the officials.

"I am most comfortable on the court. My fearlessness, and her fearless play on the court and her determination," said Provost, "are the best at what they do."

It was a hard game to lose for Provost. The team was in their last four points, but Provost still scored four goals. Provost's goals have been contending for league finals, but now I am thinking about other things."

Provost's goals have given him the team lead with eight points. Provost has been quite the disappointment by trying to help his team win.

"I don't think we could have played a better game in order to feel confident about the following game. We were looking nothing but being called a "questionable goal" by the officials."

While Provost has been the only scoring player, Provost's goals have been the only scoring player for the Connecticut College Crusaders. Provost didn't return the Crusaders well this sea

A huge boost for the Connecticut College Crusaders' season was Provost's four goals. The goals have given him the team lead with eight points. Provost has been quite the disappointment by trying to help his team win.

"I don't think we could have played a better game in order to feel confident about the following game. We were looking nothing but being called a "questionable goal" by the officials."

While Provost has been the only scoring player, Provost's goals have been the only scoring player for the Connecticut College Crusaders. Provost didn't return the Crusaders well this season, as they were defeated 4-1 by Barry who are currently ranked 76th in the Nation's. Last year's leading scorer Darrell Connell was through by scoring his first goal of the season. The goal came early in the match, but Barry came storming back with four unanswered scores. The loss pushed the Crusaders to sixth in the fast-paced NESCAC.

"I'm not sure how much the Crusaders played this season, but I know that they were not the Connecticut College Crusaders," said Provost, "It's a major void next year when McAulitte, a senior, graduates."

"I'm not sure how much the Crusaders played this season, but I know that they were not the Connecticut College Crusaders," said Provost, "It's a major void next year when McAulitte, a senior, graduates."

The offense that the Crusaders so desperately needed came from an unexpected source. Forward Justin Provost, '03, who has not played much at all this season and had not scored a single point before last game, scored four times and had four assists last Sunday.

"He has been our best player before," said head coach Ken Kline. "He is a major player and we need him." Provost's goals have changed his career at Connecticut College.

"I am most comfortable on the court. My fearlessness, and her fearless play on the court and her determination," said Provost, "are the best at what they do."
