Early Study Results Show Educational Efforts Failing; Students Bomb AIDS Test

by Michael O'Skeeffe
College Press Service

As many as three out of every one thousand college students may have AIDS (acquired immune deficiency syndrome), the preliminary results of a nationwide study involving twenty campuses show.

The results, if they hold up when the full study is completed in February, would indicate students are not paying much attention to efforts to get them to change their sex habits and mean a significant portion of the American student body is at risk of catching — and dying from — AIDS, experts say.

"If the figures hold up, there is more concern than we anticipated," said Dr. Roland Zick, director of the University of Colorado health center. "If there is an infection rate in that range then students will simply have to start paying more attention to educating themselves."

At this point, the numbers are so preliminary it's practically meaningless," cautioned Anne Sims of the Center for Disease Control (CDC). Meaningful estimates won't be proper until the study is finished in February.

The CDC, along with the American College Health Association, is gathering and testing 1,000 blood samples drawn from students on twenty campuses for other medical reasons to see how far AIDS has spread.

Few know which twenty campuses are in the study, but Tulane and Rutgers universities as well as the universities of Colorado, Maryland and Georgia have acknowledged that they are participating.

AIDS is caused by a virus which destroys the body's immune system. The virus is most typically contracted by having sex or sharing intravenous needles with an infected person, or by contaminated blood products. There have been more than 76,000 cases reported in the United States since 1981, with 43,000 fatalities.

Campus lifestyles, health administrators believe, leave students especially vulnerable to the disease.

"Students are a sexually active group," said Dr. Florence Winschip of the University of Georgia health center. And because they tend to be young and inexperienced, "they feel immune, even when they know the problem is out there."

Many students objected to the CDC study when it was proposed last spring, noting they would not know if blood samples they gave at the clinic was being tested or if, in the end, they tested positive for the disease.

Still others worried samples could be traced back to the donors. In New Jersey, for example, the American Civil Liberties Union lodged a formal complaint with Rutgers University, charging the school's participation in the survey endangered students' privacy.

Through the work OFC's pert-WDC reviewed the study was worthwhile, Sims contends. "The survey will help us focus our efforts."

About 5,000 of the 20,000 college blood samples tested have been processed Sims said, showing a rate of about three cases per 1,000 students. Sims said she can't know from which campuses the samples came.

"The only thing we can show from these preliminary results is that there is infection on college campuses.

College students are not immune from AIDS," Sims said.

"The figure cited is based on just one-quarter of the sample," added Miguel Garcia-Tanam of the American Symmetry service.

'There are two brands of idiots. One is American and one is Russian.'

by Lisa M. Allegrin
News Editor

David Carsen, former member of the Manhattan Project during World War II, spoke about the past, present and future of the arms race on November 15 in the Ernst Common Room. The lecture was sponsored by Student Nuclear Awareness Project (SNAP).

According to Carsen, the United States currently has 18,000 megatons of nuclear fire power. To use all this power, it would take 240 bombs to destroy Russia, Carsen said. "There are two brands of idiots," he said. "One is the American and one is the Russian." Each, Carsen believes, say that the reason they need more fire power is to defend themselves against each other.

Carsen stressed the fact that both countries, the United States and Russia, have arsenals that are much larger than what is needed to destroy the enemy. Carsen estimated that it would take 240 bombs to wipe out the U.S. and 300 to destroy Russia.

Despite the size of our nuclear weapons arsenal Carsen said, "We are still very quietly producing 8,000 to 10,000 warheads a year."

Referring to some of the newer weapon systems, such as the Trident submarine and the cruise missiles, Carsen said, "The problem with these [systems] is control. The president is no longer the only person who has control over nuclear weapons."

For example, the Trident submarine has twenty-four canisters with ten warheads per canister. The captain of each of the Trident submarines, in times of emergency, has the ability to fire these missiles.

"In times of emergency things can go wrong," said Carsen.

Carsen called Reagan's Star Wars program "a load of crap."

The initial goal of the Strategic Defense Initiative was to "not be proper until the study is finished in February."

See Carsen p.6.

Rolya Club Donates $1,000 to OVCS Budget

by Jacqueline Soteropoulos
The College Voice

The New London Rotary Club awarded the Connecticut College Office of Volunteers for Community Service (OVCS) $1,000 at a luncheon on Thursday, November 10.

The Rotary Club chapter donates money annually to local institutions and charities, and according to Roger Gross, president of the New London Rotary Club, the organization is "primarily looking to help people of New London."

The money was raised from the Rotarians annual spring auction.

The awards this year totaled $13,000, although Gross stated that they received requests in excess of $35,000.

This donation has helped to relieve some of the financial pressure that OVCS was experiencing as a result of a decreasing Federal Action Grant.

OVCS organizes Connecticut College volunteers to work in various local community service organizations. Gross stated that the work OVCS performs is "something the Rotary Club and the Rotarians are very much concerned with."
Like Lemmings We Dive into a Broken Lake: Welcome to the "Real World"

I am always dismayed around the end of a semester, watching juniors and seniors scavenging about like sand crabs trying to make sure that they find something that will tide them over an edge in the real world. "An edge in the real world?" Every individual thinks he or she is so totally unique, so different from others, that he or she will never be a part of the galaxy. We are always quickly recognized and rewarded. While these brief terms of employment provide incremental support after graduation and sometimes even help in avoiding the unemployable, the prospect of eventually being cast into that burning lake, which has been described in its other form as a college student, fills me with anxiety. Why? 

What I have observed of the majority of us will be consigned to worthless mundane corporate jobs or positions of authority in the world of intellect and creativity are supplied by such arduous endeavors as shuffling reams of paper and a hundred other petty, "useful" tasks. In the "Real World," even the level of conversation tumbles from discussions of Marxism and Hegel to what new clothing or cars one has recently bought on credit. It is a sick world, bloated with money and people who are addicted to it like alcohol.

I have remained in communication with many of my alumni friends, and find their tales of compromise and frustration very real and very frightening. Two of my alumni friends, a history and government major respectively, both currently work to escape the student loan world. When they are not working, they read history texts in preparation for exams. The history major works in advertising, trying to convince people to buy things they don't need with money they don't have. The government major is unemployed, and has been since graduating. His pressure-filled days leave him profoundly unsatisfied, but he sees few alternatives. Those who get two or three opportunities are faced with the reality that they will have to sacrifice their identity for jobs that will barely allow them to make rent. The government major has recently begun to examine each other's rings or illuminating what they might be doing. This was his way from under student loans by working as a paralegal. He has admitted that he could always return to the CONNTHOUGHT Editor.

The P.L.O.'s Most Recent Stand: Taking a Step in the Right Direction

On Monday the 16th of November, Yasef Arafa proclaimed the existence of Palestine as an independent state. In addition, the fateful and fateful accord of the palin
cil (P.N.C.) accepted U.N. Resolutions 242 and 338, (which, among other terms, accepted the principle of the inalienable rights of the people of Palestine) and all other U.N. resolutions pertaining to the question of Palestine. The P.L.O. has denounced terrorism and has embraced the idea of an international conference based on U.N. Resolutions 242 and 338 with the assurance of the legitimate national rights of the Palestinian people, first and foremost, their right to self-determination. In addition, Yasef Arafa has repeatedly stated that he is willing to negotiate with Israel as long as the Israeli government. Indeed, the P.L.O. has come a long way up until now, they have successfully negotiated U.N. Resolutions 242, (for that would mean implicit recognition of Israel) or negotiate with members of the United Nations.

The Palestinians' commitment to find a solution to the conflict in the Middle East has been a long process.

Yet, there are many opponents of the P.L.O.'s political program, those who say it is a "solidary" program because it has changed its face at all, but is merely claiming so. Without question, there are others who claim to support the P.L.O.'s program, but to com-

All Factors Should Be Considered in Decision-Making

Last week, in the November 15 issue of The Voice, the President of Connecticut College, Clare Gaudiani, gave us the some insight into how she makes decisions affecting the student body. About the changing of the expulsion sentence in the vandalism incident, Gaudiani said that in order to make a fair decision, she examined the students' petitions and read The Voice. Similarly, in the SGA assembly that week, when questioned about the student letters written to her about the proposed calendar change, Gaudiani revealed that the letters were "on every read." I would have "ill service if I allowed my decision making to be swayed," she said. If someone asks you to make an educational decision on an issue, how do you go about formulating the best solution? Do you ask a few of your friends for their opinions, or try to analyze the facts that are at your immediate disposal, or do you search out all points of view from every visible source in order to study every aspect of the issue at hand? Clearly, the second of these two options provide a decision-maker with much more data through which to sort, additionally making the final result more comprehensive and more educated. If all points of view are examined and considered, the educated decision-maker can dismiss the disas-
tered analyses because they will appear faulty; if a smaller pool of data is gathered, however, the risk of viewing faulty data as valid is greatly increased.

In these two examples, the president of our College admitted that the first presented to her by students at large was neither considered nor examined until the decision had been made. In both of these cases these had a real impact on the student body. Although she was advised by members of the administrative, the formal documents of students' opinions sent to her might just as well not have existed. Gaudiani also stated that she wanted future problems to be addressed in a "non-confrontational" way. "Non-confrontational means not to make petitions, not to inform her of current campus resolutions and opinions on how to address letters to her regarding these issues, are we indeed witnessing a sorry state of affairs.

In an sound decision-making process all facts and opinions need to be investigated, sound and incorporated or excluded from a final end. If student means of submitting opinions and concerns to the president shall be limited to un-documented phone conversations, there might as well be no student input at all. Perhaps the administration only wishes to create an oxvine student body: a group that will baa if asked but dare not speak "controversial.

The "Real World" wants drones, not intellectuals. The "Real World" wants to stop with the money and people who are addicted to it like alcohol. Without question, there are others who claim to support the P.L.O.'s program, but to com-

Only in America: Fans Win Right To Throw Toast, But Not Bagels

(CPS) - Students at University of Pennsylvania football games have won the right to throw toast, but not bagels, from the stands. Security officials infuriated some Penn fans by confiscating toast from them at a fall football game against Bucknell University. Penn students have been throwing toast form their seats onto the field when Penn's band gets to a certain point of the song, "Drink a Highball." The toast throwing began at a 1984 game, when the students decided to respond literally to a line in the song worded, "So here's a toast to dear old Penn," explained Steve Hurbut, Penn's sports information director. "Like fans at the Rocky Horror Picture Show, the students decided to throw a piece of toast instead of raising hands as if they held a glass," Hurbut said.

After security officers took toast from some fans, students began writing protest letters, circulating a petition and even threatening to poll Penn President Sheldon Hackney with toast at future games.

In response William Epstein, Hackney's assistant, finally announced in late October there had been a "communicating failure. We have no intent to try to stop the toast tradition. We intended to stop people from bringing frozen bagels."

Bagels, he said, are heavier and could hurt people. Hurbut agreed, but added the ban should extend beyond bagels to large packages of bread.

"We don't want anyone getting whacked with a whole loaf," he said.

Pita pockets are expected to be the next bread product causing a commotion. Their circular shape and density make them ideal for throwing. Penn students are gradually accepting pita as an acceptable form of toast, suitable for throwing at games.

Epstein said Penn would let security officers at the games confiscate large and/or frozen bread products at their own discretion "if they thought they might pose a safety hazard."

Seniors Sponsor Toys for Tots
by Livia Winston
New London Focus Editor

The Connecticut College senior class is getting into the spirit of giving early this year. They are sponsoring a Toys for Tots program in conjunction with the New London Children's Resources Commission. The idea grew out of the link the senior class has had with other volunteer programs this year in the New London community.

Immediately after Thanksgiving break, they will set up a collection area, marked by poinsettias, on the first floor of the library in the main foyer. During Secret Santa week, they hope for donations of all kinds from faculty, students, and staff. In particular, crayons, dolls, baseballs, and frisbees are all appropriate gifts, along with new and old toys that can be re-painted and repaired.

Doyle Swato, '89, and Mach Aron, '89, social chair-persons of the senior class both hope for a strong show of support from the College community.

"Hopefully, when people hear about it and see it they will realize the good it is doing. It is a way for Conn. to further itself in the community," said Swato.

At the end of the collection period on the evening of December 8, the seniors will have a party to wrap all the presents received. The gifts will then be donated to the New London sponsor of Toys for Tots to be distributed at a party sometime before Christmas.

Aron said that though collections have not yet begun, he has already noted a positive reaction to the program. "Conn. is known for responding really well to programs like this," Aron said.

State Representative Jay Levin Speaks Out on Current Issues
by Steve Alexander
The College Voice

If one were to ask the question, "What are the most important issues facing New London?" many Connecticut College students would probably be at a loss for words. Incumbent Jay Levin, having won re-election as the 40th District (New London) State Representative on November eighth, could educate many a student on what issues concern New London and its residents.

One issue he mentioned which is of great importance to New London is the problem of household and hazardous waste. "It's hard not to connect these local issues to the national election," Levin said emphatically. "... Funding that handles the sewage problem in the Long Island Sound has been cut."

Disposal of waste in New London depends largely on what the state and national governments want to do, since the funding for waste management projects are derived from these two sources. "It's an extremely critical situation—local issues are inevitably connected to state issues," said Levin.

Another issue is the problem of affordable housing in the area. "Southeastern Connecticut is experiencing an economic growth boom, which also renders it a very attractive place to live. It has an excellent quality of life to offer to families," however, Levin said that generally the cost of a home is equivalent to 30 percent of a person's income. This could force some people to look elsewhere for affordable homes.

"Without housing, Southeastern Connecticut will lose its economic growth. National commitment is again required in order to move a project such as affordable housing forward," Levin said.

- On the subject of whether Connecticut College students have shown interest and support in the local election, Levin responded, "In a limited way. This election did not attract a tremendous outpouring of support from the students, though the help we received has been very quality help."

"Frankly, the campaign began with a lot of enthusiasm from Connecticut College, " said Levin. "But during the course of the campaign, there remained only eight to ten really dedicated people who are helping out."

Although Levin ran unopposed for state representative, he campaigned as actively as other candidates.

Connecticut College Mentors Provide Positive Influence in New London Community
by Livia Winston
New London Focus Editor

Last year, the PALS program matched eight women from Connecticut College with eight girls from the Winthrop High-rise project in an attempt to provide social guidance for underprivileged kids. This year PALS has joined forces with the Tripartite Tutorial Program to form the Mentor Program. This project, based on a larger scale, is now co-educational and involves not only social support but educational guidance as well.

The mentors were chosen after an application/interview process. The matches were made in late October. The tutors, who will work with children from the New London Junior High School, are Jeffrey Alexander, '92, Anadi Chiloom, '92, Glenn Dynner, '91, Dan Halpin, '92, Kim Harding, '92, Tappan Heher, '89, Annik Hirshorn, '92, Cecilia Leonardo, '90, Amy Mass, '92, Stacey McFarland, '91, and Warren Wells, '91.

The day after the matches were made there was a sense of great enthusiasm and a feeling that everyone was very happy with the chemistry of each match. Said Barbara Treanor, director of the Office of Volunteers for Community Service, "It's fantastic; it was electric."

There are weekly meetings with the coordinators, Pamela Holmes, '89, and Cecilia Leonardo, '90, to check on progress and problems. Stacey McFarland said of her protégé, "She's great. She has a lot of direction... In listening to her it's fun to see where I've come from, since I was fourteen, and where she is going."

The Japan Exchange and Teaching Program seeks to promote mutual understanding between Japan and the U.S. by inviting young native speakers of English to Japan for a year to teach English at the local junior high and senior high school levels.

Term: One year, August 1, 1989 - July 31, 1990
Eligibility Requirements:
U.S. citizenship
age under 35 as of August 1, 1989
at least a B.A. degree as of August 1, 1989
Applications must be postmarked no later than December 15, 1988. For further information and applications, please contact Elizabeth Schaefer at the Japanese Consulate in Boston (617) 971-0772, or Chris Lucas at the J.E.T. Office at the Embassy in Washington, (302) 339-6779.
The Art Department and the Art Advisory Board sponsored an art auction on Thursday, November 17. The auction, which raised over $1000, will benefit the Gallery Program and the Visiting Artists Program.

Theater Review:
Anything Goes Brings Back Old-Style Musicals to Lincoln Center
by Michael S. Berenson
The College Voice

"Times have changed," the character Reno Sweeney sings during the title song of Anything Goes. Indeed, this quote may be the most apt to describe the two-song-and-dance-filled hours going by the same name, currently playing at the Vivian Beaumont Theater at New York's Lincoln Center. Anything Goes originally opened on Broadway in 1924 with a much different look. As an off-Broadway revival in 1962 the show enjoyed some success, but it is in its present incarnation, with a completely new look and several added songs that it has its greatest success. It boasts a fantastic Cole Porter score, including the classics You're the Top, Friendship, and Blow, Gabriel, Blow. Winning three of its ten Tony Award nominations, including Best Revival, Anything Goes takes off.

The story revolves around Reno Sweeney, played in the 1987 revival by Patii LaPone. LaPone is best remembered for her title role in 1980's Best Musical of the Year, Evita, for which she won the 1980 Tony for Best Actress. LaPone made a name for herself with her rich, powerful singing voice, which re-defined the role of Eva Peron. As the brassy Sweeney, for which she won a 1988 Drama Desk Award, LaPone shines, belting the songs out better than ever. This role rightfully earned LaPone her third Tony Award nomination.

LaPone is a star in the first degree, as evidenced by her rendition of I Got a Kick Out of You, her first of six numbers. In the song, in which Sweeney reveals her love for the male lead, Billy Crocker (played here by Howard McGillin), LaPone has minimal choreography. Quite frankly, she doesn't need it. LaPone's exceptionally charming and strong voice carries her.

Patii LaPone is no wallflower, however. One need only watch the title song or Blow, Gabriel, Blow, the show's biggest and best number, performed to realize LaPone's dancing abilities that went unnoticed in both Evita as Eva Peron and in the original English cast of Les Misérables as Fantine, both decidedly non-dancing roles. LaPone's tap-dancing allows one to understand why this revival of Anything Goes won the Tony for best choreography.

The show, in fact, is carried by the dancing and singing. The plot, while stronger than the 1937 version, is hardly the strongest point of the show. In Anything Goes, which takes place aboard the S.S. American, stow-away Billy Crocker is out to stop the girl he loves, Hope Harcourt (Nancy Opel) from marrying the man her mother wants her to marry to Barry can marry her. Wouldn't you know that Barry is just the Sweeney for Barry? Anything Goes does not need to worry about plot, however, for it is first and foremost a song and dance show.

Howard McGillin as Billy Crocker is the perfect antidote to LaPone's Sweeney. Where Sweeney comes off tough and brassy, Crocker is sensitive. McGillin, in his sweet tenor, offers renditions of All Through The Night and It's De Lelous, two Cole Porter staples.

The only original principal actress no longer in the cast, Kathleen Mahony-Bennett as Hope Harcourt, has been replaced by Nancy Opel, who, coincidentally, starred as Eva Peron in the national tour of Evita. Where LuPone's voice was strong and powerful, Opel sounded like she was singing for the title role of Eva Peron. As the brassy Sweeney, for which she won a 1988 Drama Desk Award, LaPone shines, belting the songs out better than ever. This role rightfully earned LaPone her third Tony Award nomination.

AIDS Study Indicated Students are Infected

(Continued from p.1)

College Health Association. "In that sense it's inconclusive. It's just a number. But what is important is not to fixate on a number, but to deal with the problem on campuses. Students must be aware of this."

"It's not surprising to me," Winship said of the preliminary figure. While the data may be "skewed" and doesn't "provide the full picture," she predicts the final tally won't "be too far off."

If it isn't, many health officials wonder how they would make collegeians respond to the AIDS threat more seriously.

"But in general, they don't consider themselves vulnerable."

In September, the CDC reported the AIDS scare apparently had not markedly changed students' sexual habits, prompting Assistant U.S. Secretary of Health Dr. Robert E. Windom to urge campus officials to try harder to educate their students about the disease.

Windom said that one-fifth of the reported AIDS cases occur among people 20 to 29 years old.

"Since the average incubation period for AIDS is seven years or longer, it's clear that many of the 14,000 patients in this group were in high school or college age at the time of their infection," Windom said.

Moreover, a 1987 survey of college students by Bionico Associates, a New York polling firm, revealed that only 6 percent of men think about AIDS before choosing sexual partners.

Georgia now has a peer counseling program in which students actually spread the word about AIDS, according to Winship. Virtually every campus in the U.S., of course, now has some kind of AIDS program.

Some—the universities of Colorado Springs, Iowa and Texas at El Paso, as well as Michigan State, Southwest Missouri State, Indiana and Pennsylvania State College in New York among them—have supplemented education programs by installing condom dispensers in dormitories and student unions, or by distributing condoms for free.

Critics say condom distribution promotes sexual promiscuity.

The Board of Regents of the Texas State University System, for example, stopped health centers in Angelo State, Sam Houston State, Sul Ross State and Southwest Texas State from distributing condoms earlier this year.

And the University of Washington administration has resisted installing condom machines, preferring educational methods to prevent AIDS instead.

"Students are not mature," said Winship. "They don't plan ahead."

Condom machines, especially in dormitories, "lets them have better access later in the thinking process," just before they have sex, she said. "It's controversial, but it's realistic."

And officials at the universities of Texas and Arizona and Denver's Metropolitan State College have reported that the rates of other sexually transmitted diseases have not declined, suggesting that students are not protecting themselves against AIDS.

"It's a little frustrating," Georgia's Winship said. "Their behavior doesn't go along with their education. We need to do everything we can to transfer that "yes-I-know-about-it" attitude to a change in their behavior."

She believes students simply may be unwilling to listen to "practical figures" like older college health officials. "Students listen to their peers more than folks who look like their parents," Winship said.

NASA would have to at least 75 space shuttle launches per year, according to Carsen, in order to carry the necessary equipment into space. At this time, NASA has five launches planned for 1989 and approximately eleven for 1990.

Carsen received his B.S. degree in civil engineering from the City College of New York and his M.S. from New York University. During World War II, he was assigned to a specialized group of Chief Engineers in Oak Ridge, Tennessee. Currently he is retired but does consulting work for engineering firms.

Carsen is a member of the Union of Concerned Scientists and is the author of two unpublished books and a series of articles published by the Gannett newspaper chain.

Cibes Re-elected as New London State Representative

By Alexandra Staff

Associated New Editor

On Tuesday, November 8, Democrat William Cibes was re-elected to the Connecticut State Legislature for a sixth term. He is the 39th assembly district state representative and a professor of government at Connecticut College.

"This election looked good. People were responsive which is not always the case," said Cibes. He carried 71 percent of the New London vote.

Deputy speaker of the house and co-chairman of the Sceening Committee, Cibes is able to help guide the assembly's agenda. "Four areas need major steps," claimed Cibes. "Affordable housing, but I'm not sure how much more we can get right now; taking care of the garbage stream, because there isn't adequate landfill space and every thing is rapidly filling up; job training and development so people can get back into the work force but here we are losing federal laws and rules; and we need to take a comprehensive look at our drug laws."

Cibes cited the increasing New London drug problems to substantiate his opinion. "Since January of this year, there have been 600 drug-related arrests."

Cibes cited problems that he still exists in his district, along with the need for a bike path to go through to the beach, and the proposed Star Wars system to be operable. The proposed Star Wars system is impossible to engineer for a space shuttle launch.

"There is a intrinsic value in all life," he explained. "Modern man tends to look at the natural world to be valuable only as much as we can "utilize" it. Carsen attempts to draw metaphysics that shows nature to be precious regardless of its utility to man. "(Natural) is good, simply because it is," he said. "It is in caring that I discovered the goodness of the world." Such statements are morally plausible, but Cibes has been accused of being a heathenistic idealist by creating a "soft" philosophy. "I am not a soft philosopher," he said. "Embryos and the Stars was presented in a soft way; however, my statements are well documented," said Cibes. "I am a hard philoso pher in a soft world." Redefining nature as "soft," Cibes' re sponse to a similar question was less academic; smiling, he said, "I see Kobak's.
Students Talk About the Possibility of a Meal Plan
by Michael S. Borowski
The College Voice

Another possibility was a de-
clinimg balance system. In this sys-
tem, students would pay a certain
amount of money, and the price of
a meal would be taken off each time
a student dines. Fay noted the pos-
sibility of hooking the snack shop
and the future campus convenient
store into the system.

Other issues discussed at the Con-
ference Session were the possibil-
ties of a natural foods dining hall,
opening the K.B. Deli another
weeknight, and serving hamburg-
ers at night at J.A.

Regarding a natural foods din-
ing hall, Fay said, "What dorm is
going to give up its dining tradition
and say 'We'll ail means'? What
someone doesn't like it and they
live there?" he asked. Fay further
said, "I'm not saying it can never be
done, but it's not something I see in
the future.

As for opening the Deli an
extra night, Fay said that there were
problems with finding people to
work there, and the possibility of
lowering counts at other dining
halls.

Carla Munroe, president of the
class of 1990, brought up the possi-
bility of serving fast food at J.A.
at night, which it already does during
lunch. "It's already open anyway.
You have the staffing," she said.

Fay claimed, however, that
since there would be "the regular
meal on one side and burgers on
the other, we would need extra staffing
for the burger and fry machines."

Cibes States Hartford Legislative Goals
Continued from p. 6

What are the problems with safety at Connecticut College? At the November 17 Student Government Association (SGA) assembly meeting, Assembly members attempted to answer this question through an open discussion. It was not, however, a focus on Campus Safety, but safety on campus.

1990 Class President Carla Munroe noted that the outdoor lights on campus were not very bright at night. She suggested that higher wattage be used. "When I walk alone at night, I walk fast," she said.

Problems with locking dormitory doors took up a large part of the discussion. Joseph Tollefer, dean of student life, suggested that dorm doors be converted to combination locks rather than using keys.

"Students have a tendency, on the average, to not lock their doors because they would have to bring their keys with them. I'm not trying to use scare tactics, but we have had problems with burglaries, peeping toms, and gloved hands. Lots of schools have the same problems, but having worked on a campus with combination locks, I think it works much better than keys," he said.

Laurrabe House Senator Mike Hartman, '89, suspected looking into key cards.
Several house seniors touched on the fact that many students unlock dorm doors after campus safety officers have secured them for the evening.
Laurus House House Senator John Maggiori, '91, who worked last year on the campus safety student patrol at gate checks, noted that "it would be useful to mobilize a student patrol to go door-to-door to make sure they are locked. It may resolve the problem."

In old Assembly business, despite "positive feedback" on the subject from house governors, according to N. Jansen Calamita, '90, Judiciary Board chair, his proposal to have house governors chair House Council hearings was defeated by a vote of 07. Calamita noted that "regardless of who chairs House Council hearings," in the future it would be beneficial to have a J-Board representative at the hearings acting as a liaison.

Two more club constituions, the Tau Kwon Do Club and The Echo, were ratified by the Assembly. SGA Vice President and Constitution Committee Chair Blair Taylor, '90, referred the club constitutions, the Tae Kwon Do Club constitutions, and the Team constitutions to the full committe, leaving the full committee to consider running for a state-s

The Zenith Data Systems Z-286 LP Desktop PC
40MB Hard Disk & 3.5"
1.44MB Floppy
Suggested retail price: $3999.00
Special Student Price: $2309.00

ZENITH INNOVATES AGAIN WITH THE NEW Z-286 LP
THE AT COMPATIBLE THAT TRANSPORTS YOU FROM CAMPUS TO THE CORNER OFFICE!

If your studies need AT power now, and your career could use MS-OS/2® performance later on, then you really need the new Z-286 LP Desktop PC from Zenith Data Systems — the leading supplier of high-speed AT compatibles.*

As the one desktop computer that can keep pace with your data processing requirements and growing ambition, the Zenith Data Systems Z-286 LP lets you harness 286 speed and power in a surprisingly compact design that won’t crowd you out of your dormroom.

You’ll find the new Z-286 LP compatible with thousands of AT peripherals... and virtually all MS-DOS® software. But that’s not all. The Z-286 LP also gives you the capability to move up to the new MS-OS/2 technology whenever you feel your career path is ready for more advanced performance.

The Zenith Data Systems Z-286 LP also comes complete with 1MB RAM — expandable to 6MB without using an expansion slot. Plus a single 3.5" 1.44MB floppy disk drive that lets you “read” and “write” 720K floppy disks. And a 40MB hard disk to store thousands of pages of information for heavy-duty word processing and spreadsheets... as well as a lot of other software programs that you may need. Either now or in the future.

So transport your success through time with the one desktop computer that can take you all the way from college to career. Get the Zenith Data Systems Z-286 LP today. And think like a true innovator!

THE Z-286 LP IS NOW AVAILABLE AT YOUR NEARBY ZENITH DATA SYSTEMS CAMPUS CONTACT:

Campus Computer Store

Camels Winter Sports Preview

Men's Hockey

by Jeff Darwitz
Associated Sports Editor

For three consecutive seasons the Connecticut College men's hockey team has earned an ECAC tournament birth. In two of the three years they have won their first round games only to be defeated by rival Trinity in the ECAC South finals. Will 1988-89 be the season in which the Camels overcome this final obstacle?

Doug Roberts, head coach of the men's hockey team, entering his tenth season, has high expectations for his team.

"With the experience we have, I think we should be in a position to push AC into the playoffs again. For the season, it's their last chance and they know it."

If the team is to accomplish their goals they will have to overcome the loss of defenseman Dave Torrey, '88, expert penalty killers Randy Berner, '88, and Pete Meir, '88, forward Tim Buono, '88, and all-time leading scorer Mike Mocci, '89.

On defense the Camels have an experienced group of seniors anchored by co-captain Jim Brown. Emerging superstar, Ken Smoak, '91, is expected to have an impact as well.

At forward, returning from last year's first line, Randy Pecknold, '89, and Doug Roberts, Jr., '91, are sure to have an impact. Coach Roberts will look to others for the scoring punch.

"It's surprising how the loss of a key player like Mike (Mocci) makes some people emerge and take over some responsibility. I'm looking for Joe Canone, '90 Jeff Schaffer, '90 and senior Jim Allis to have good seasons."

Incoming freshmen Jeff Legro and Mike Vorderer will see ice time at forward. Roberts likes Legro's speed and will use him to kill penalties.

With senior co-captain Lou Scioletto's injury between the pipes, freshman Ryan Vonder, a Cam goalstopping is as solid as the ice in the north of Alberta during the first week in February.

Backing him up will be Don White, '89.

"We've got some guys who can put the heat in the net, but with the likes of Bowdoin, Trinity, and SMU on our schedule, we have to play a tight game to be successful," Brown said.
