Plan To Repeat Enjoyable Program In Spring

Playday was held on Saturday, March 1, under the direction of the Physical Education Department. Ten girls sign up to take part in all of the four choices.

Forty enthusiasts spend livelong hours at Playday

The United States should not recognize Soviet Russia, because the government does not fulfill its international obligations. To stop its spread, it has influenced American students to establish organizations to stop posters made. It has consecrated American students to establish poster groups to anti-American agitation with a world-wide movement. In these efforts, Connecticut College students have been beneficial to the various organizations because they will be able to count on a standard price for posters made.

Before turning the meeting over to Co. The decision was given on the merit of the debate, sixty against the affirmative side of the debate. The affirmative side of the debate is ridiculous. Our trade with Russia is now three times as great as it was ten years ago. But recognition of the empire could not increase our trade; first because Russia is selling as much as she can, second because of the impossibility of recognizing the new government under the new regime. A direct trade with the dealers, legally before the fact of lacking of good faith.

Beloved to recognize Soviet Russia, because it has thrown aside certain fundamentals of World Peace. And the United States should not recognize the government itself. If it proves itself worthy of recognition.

It was a pleasure to listen to the two representatives. Charlotte Cabot '32, and Florence De Haas '31, of the Smith College Debating Club which challenged us to reiterate our club and debate with them. Achsah Roberts '31, and Marjorie Smith '31, represented the affirmative side of the debate. Dorothy Felzer acted as chairman and the judges were Mr. Walter Dow and the senior members of the "women who have done much for International relations," and Theodore Bodenfeld, editor of the New York Times.

SPEAKS ON DEPARTMENT STORE WORK

Compulsory Chapel instituted by students

C. C. has voted to adopt a policy of part time Complulsory Chapel and Vespers Attendance. At the Annual Convention held February 15th at the Congregational Church in New York, President of Student Department announced that some action must be taken about the Chapel and Vespers situation. Inefficacy and what to do

The subject brought forth a great deal of discussion from the student body. A straw vote was taken to see how many favored the abolishment of the Chapel and Vespers situation. Inefficacy and what to do

Mr. Fox's Mason Harrison reported, is going to establish a three months' training course for college graduates. The conference was held in the Student Field Club. Each month of intensive training in economics.

Positions to be acquired, following this course will be those of the heads of departments or their assistants. The choice of the student which may work up to the position which she desires.

The decision was reached by the committee, that this would be advantageous.

Poster Guild wishes to announce that orders placed after two prices, 50 cents and $1.00,讲s to offer to a permanent change from the former method. Paper orders per hour for work done.

The Guild feels that this change will be beneficial to all the various organizations because there has been an increase of no one better equipped to speak on this vital subject.

Poster Guild wishes to announce that orders placed for service League Concerts will be given on the merit of the debate, sixty against the affirmative side of the debate. ULTRA-VIOLET LIGHT AND VITAMIN D IN NUTRITION

A dozen years ago, the man of the street was just beginning to get acquainted with that new element in his diet, the so-called vitamins. He knew nearly as little about a second factor important in his daily living as he did about the other, but what lay beyond those limits he regarded as of very little concern to him.

But within the decade that same man, with aid from the vitamins and the light rays not only subjects of scientific import and something which might be of a certainty prove to be of vast importance to his own immediate health and happiness.

There is not a short time ago a scientifically accurate, clear, and concise statement of the food reform movement concerning these two highly relevant factors in human well being was published in a book, entitled Ultra-Violet Light and Vitamins D in Nutrition, by Professor E. H. Hibel.

While Dr. Hibel now works in the Department of Economics at the University of Pennsylvania, he worked in collaboration with Ruth Cowan, an instructor in the department and co-author of the book. The information obtained on this matter is valuable. In reviewing and summarizing all the material which has previously been gathered upon these topics, they have succeeded in classifying the whole field and have set the stage for new research and discovery.

The book is printed by the University of Pennsylvania Press and issued in this semester in the Home Economics Series. There are three volumes covering the series, and there are several copies in the Library.

NOTED EXPERT IS SPEAKER AT FACULTY DINNER

Mr. Howard Palmer, who spoke at the Faculty Club dinner on Friday, February 25, is a noted explorer, pioneer in the field of mountain climbing. He has ascended fifty peaks in the Belkirk Mountains, in the south saharan part of British Columbia, many of them for the first ascension. He made the first ascent of Mt. Sir Sanford. The Canadian government confirmed his name for fifty new mountains; a peak, a glacier, and a river have been named in his honor. In the Canadian Rockies also, he has ascended twenty new peaks and climbed many remote sections.

Mr. Palmer is a member and a past president of the British Alpine Club and Expeditionary Club, and is a member of the Harvard Travelers' Club, the Alpinist Club of London, and others. He is a world authority on mountaineering, and is the author of several books on travel and adventure. Among them Mountaineering and Exploration for the Public and the Introduction to the Rocky Mountains of Canada. Mr. Palmer is a member of the New Hampshire Mountaineering Councils on the history and exploration of Mount Washington.

Mr. Palmer's talk was on the topic, "Travel and Ascents in the Canadian Rockies." With an alpine sense of adventure and droll colored slides, and spoke about them informally.

JUNIORS AND SOPHOMORES VICTORIOUS

On Friday evening, February 24th, the Sophomore second team played the Franklin Academy team and the Junior first team game played the Freshmen. The Sophomore team won both games, the final score of 34-28 and the Sophomores 28-14.

On Saturday evening, the Junior students and Sophomores won in the final score of 34-28 and the Sophomores 28-14.

On Saturday evening, the Junior students and Sophomores won in the final score of 34-28 and the Sophomores 28-14.
MARCH ILLNESSES

The month of March finds an unusual amount of illness in College. The principal speaker at the lunch-day was chosen by the Physical Education department and the A.A. council was carried on.

Chapel attendance is really an inspiration. The great struggle now is to find a seat.

The latest gossip among the Freshmen is published every week by members of Denham House. "Denham Dur" is the name of the publication. It seems that it is posted on the bulletin boards and is read by a certain number before the first issue and it blew out the gutter. (This is not a slam.)

One senior is very reticent about reeding Dregwanger's letters to his wife. She says she doesn't believe in reading other people's mail.

Some one has made the insulting remark that this is Connecticut College for Women—not ladies! Never mind—we just missed being called Connecticut College for Females.

We hear that a Freshmen had hysterics after going to "The Sacred Flame." At least she proved a wonderful advertising stunt.

The new members of Nee were given a tea in Thames Hall. When it was over, Nee's announced that we were supposed to have had plates and napkins. Shades of Emily!*

Some members of the sociology class have decided that Indians should be eliminated from the country. We're afraid it's a little too late.

An ardent English major expressed great delight at learning that Good Friday comes on a Friday!

Knowlton reception rooms and hall are certainly fascinating sights on the morning after the night before. Even the hardest wood will burn in time!

Complaining that an assigned Philosophy book was too deep for her to get anything from, one of our seniors went to the professor. He pointed out the good points of the book, saying that it was very "mystic." "Sorry, but my brain is no meat-chopper," was the reply.

Do you know—

That Thomas Hall is named after the Thames River?

That the trolly runs every half hour?

That students who have been here three years are Juniors?

That Physical Education is the most popular sport at our college?

That there is no news on this campus?

EINSTEIN ON CLASSIFICATIONS

According to a Jewish Telegraphic Agency dispatch of Dec. 3 from Berlin, German papers have featured a summary of the address made by Professor Albert Einstein when the Sorbonne recently conferred an honorary degree upon him. He is reputed to have said: "If my theory of relativity is proven correct, Germany will claim me as a German and France will declare that I am a citizen of the world. Should my theory prove untrue, France will say that I am a German and Germany will declare that I am a Jew."—N. Y. Times.

SPEAKS ON DEPARTMENT STORE WORK

(State Street)

(Concluded from page 1, column 3)

The advantages are that the work is with people, and renders a service to the community. Department store employees are eligible for a discount on all merchandise in the store and receive a commission on what they sell. Allowance is made for a college diploma in salary.
