Funds Raised Here Will Aid Children Of United Nations

The Defense committee is planning a series of raising the class dais as a result, to give the full accent that contributes to the surplus to some worthy cause. As in a class meeting on Monday, B, the class voted to contribute this money, approximately $200, to the drive for the children of the United Nations.

Therefore, a senior committee, under the chairmanship of Nancy Prince, president of the class of 42, will work with the Defense committee in sponsoring a drive to raise additional funds from the administration, faculty, and other classes. The demand for the drive, beginning on May 1, will give added significance to the traditional spring day.

The money collected in the drive will go chiefly to the children of the school in our own southern mountain district, which must endure the rigors of transportation and reservations. The committee members believe that the mascot to be chosen should be the best mascot in the United States. They want to make sure that the mascot will be chosen with the approval of the students.

N.Y. Trip to Show Students the City Gov't in Action

The New York City League of Women Voters is planning an other field trip for students interested in the operation of government in New York City. The trip is of special interest to those majoring in political science and in social work. It will be held on Friday, April 3.

The purpose of the trip is to enable students to observe the actual workings of the government. The League believes that the trip will provide students with a better understanding of the functioning of government agencies.

The program for the government trip will include visits to the Fulton Fish market, the New York State Assembly, and the State Senate. Students will also have the opportunity to meet with government officials.

Applications blanks may be secured from the Dean of Women, or from Dr. Frances Dilley, or Miss Hamson. All applications should be received by May 15, the awards being made as usual following commencement.

Attention, Cartoonists! Connie Needs Successor

Attention, all potential cartoonists! "Connie," that unforgettably Connecticut girl created by Bobbie Brengle, 42, is about to graduate and to be replaced. It is the incorporation of her character that makes her so loved by Connie lovers.

In making requests for new cartoonists, we request that the applicants of the year 1942-43 may be secured from the News staff for the cartoons which are honest and ready to be made as usual following commencement.

"In making requests for new cartoonists, we request that the applicants of the year 1942-43 may be secured from the News staff for the cartoons which are honest and ready to be made as usual following commencement."

Applications are now being received for the scholarship. The amount of $150 to be awarded to a graduate of the College, is of special interest to those majoring in political science and in social work. It will be held on Friday, April 3.

Science Club Talk On Close-ups and Photomicrographs

How to take photomicrographs will be Science club's topic at its next meeting on Monday, March 16. The talk will be held in room 131 New London Hall. Mr. Alfred J. Greene, M.D., graduate of the University of Virginia, will lecture on the subject. Members of the club and the equipment used will be on display.

At the next year's meeting, officers will also be held.

Julia Rich, Chief Justice Elect, is Energetic, Entertaining, and Alert

By Ruth Howe '44

Julia Rich '45, who was named chief justice in her junior year, has always been alert and energetic.

When asked why she chose to be chief justice, she replied, "I really had no choice. It was the only job I could get."

Julia is a member of the biology department and is well known for her ability to make class discussions interesting.

She is also a member of the Student Senate, where she has served as the Senate's representative to the Student Council.

She is active in several organizations on campus, including the Debate Society, the Drama Club, and the Music Society.

"Mummy, who was that man with the orange hair?" asked Mr. Robert Logan, answering the child's curiosity. "He's a special gentleman who had shortly before moved to the Durr's."

Robert Fulton Logan, founder of Fine Arts at Connecticut college, among his duties he held a past—a past of travel and adventure and achievement. 

He was born in 1876. His father had lived as a boy on a wheat farm in Nova Scotia. Logan descended from Scottish ancestry, and was educated in Canada, where he attended a university.

From the age of 16, Logan had been interested in art. He went to France at 19, and worked as a painter and sculptor. He returned to Canada, and became an art professor at the University of Toronto. In 1934, he joined the faculty of Connecticut College, where he taught until his retirement in 1942.

Logan was a master of many media, including oil, watercolor, and photography. He was known for his portraits, landscapes, and still lifes. He was also an accomplished musician, and played the piano and violin.

In his later years, Logan continued to teach and paint, and his work was shown in many exhibitions. He died in 1946, leaving behind a legacy of art and education.

By Patricia King '42 and Eleanor King '42

-Mummy, who was that man with the orange hair? asked Mr. Logan, who was a time a lecture at the Louvre Museum, in Paris. His work "Les Mois Naissants," which was an oil painting, showing the repair shops at Balloncuit. (It is located in the Louvre Museum, Paris.)

Logan was a great deal of work in painting, sculpture, and photography. He was known for his portraits, that of Ambassador Esfandiary, which was painted for the U.S. government. He was also known for the portrait of the little General Hunter-Lattimore, Commissor of the first army of the A.E.F.

It was the literal "return of the prodigal son" when Logan returned to the United States. Home again, Logan began painting, showing the repair shops at Balloncuit. (It is located in the Louvre Museum, Paris.)

Logan's work was appreciated by many, and he continued to paint and sculpt throughout his life. He died in 1946, leaving behind a legacy of art and education.

cynicism and haven't been given an ideal. And then he criticized them for their failure to speak audibly to the large group in the hall.

But he turned around at that point and complimented one member of the group to the table—Miss Barbara B. — the only girl there. He said that she was the only one who could be heard even at that time, and the only person he suggested that the one thing college students might do in preparing for the post-war reconstruction and peace would be to study certain subjects.

Barbara is a student of whom the college can be proud, for she has shown a real and deep interest, and a desire to be a well-informed fellow. She didn't "read up" on the topic just to "show off" a little knowledge before a group, for she didn't know she was to be heard. She studied so that she might get the most she could out of listening. Her attitude might be called the frequently missused term "intellectual curiosity." She deserved Mr. Lewis praise because she had endured to be well informed and this was demonstrated when she spoke.

Unfortunately, however, we cannot claim that Barbara is representative of the attitude of very many Connecticut college students. The praise won in this case belonged to the speaker, and not to her as a representative of most of our students.

Wouldn't it be a gratifying thing to know that most of our students showed the interest, consulted the books, and took the trouble, to be good listeners? If one of us aimed at becoming well informed, we should also become better speakers. How many of us who boldly volunteer much time a day to criticize and give forth our opinions on every conceivable topic, do so with no real knowledge to justify what we say? Perhaps it is the case that Barbara should trouble our students to become good listeners, and know whereof we listen, for we might have something to contribute to the things we speak. Perhaps the reason Barbara was heard is the fact that she knew more, and was not afraid to say, what she was saying.

A good big dose of real interest, following a heavy dose of information, would give us a lot more weight to what we have to say, and to what we think, as well as to what we say.

Exchanges

Yale University: An amusing talk-off on Yale's parallel to our own C.C.M.D. appeared in the New London Day on February 28. We quote H. I. Phillips: "Bill Phillips, wearing his hat over one eye and cutting book eyes with a holo knife. President Seymour is reported considering getting his office to the Yale gym, and we understand all the desks are chewing gum to break... Somebody has put a counterfeit letter on the stage of Timothy Dwight. And they say up at New Haven that in the midst of the
carty morrn you can hear the carvors of fifteen Yale bel- lowing 'I want some raw meat!' Boys chosen for the exclusive fraternities will be tapped with an axe; and there is a move on to swamp the marble secret society houses for the local car barns and freight houses.

VBC Collects 692 Books on Campus

The grand total of 692 books were collected by the Salvage Corps in the campus-wide Victory Book Campaign conducted from February 18 to March 1. These books will be sent to the V.B.C. headquarters for distribution to Service Corp.

Half of the books contributed, 343 to be exact, belong to the non-fiction section. Textbooks added another 272 books to the total, whereas there were 142 best sellers and detective stories.

The students contributed 325 books to the collection, an effort that we might have something to contribute to. The reason Barbara was heard is the fact that she knew more, and was not afraid to say, what she was saying.

A good big dose of real interest, following a heavy dose of information, would give us a lot more weight to what we have to say, and to what we think, as well as to what we say.

Work of Galvin is Shown in Library

The Palmer Library is showing the work of Robert W. Galvin of the Yale University Press. The exhibit includes bookplates, letter-heads, and greeting cards; ornamental initials, page heads, and title-pages, with some on woodcut designs; several memorial designs for china, glass, and so forth shining one for Davenport College which was executed by the Wedgwood of England, and various linoleum blocks of miscellaneous subjects. Mr. Galvin designed the seal and doors of the Coast Guard Academy in New London, and in New London itself, he was invited to paint the murals in the church.

These prints are in the show cases on the main floor.

Miss Lucya Allyn Tells
Of Great Shortages

Miss Lucya Allyn, instructor in the Nursing Arts Department, Yale School of Nursing, spoke at the college on Thursday, March 3, Miss Allyn pointed out that there is now a demand for 11,000 nurses for service with the army and navy, 10,000 nurses for institutional work, and 10,000 in public health. Of the 1,300 schools in this country, he said, the medical courses, the Yale and the Western Reserve schools form a high strain, but a baffling one in the language of the Navy.

The story was about a frustrated man, played by Mr. Carril, who was torn between two loves. After many complications and interludes, he decided in time to prevent Amanita, who rivals Edgar Bergen as a comic. The audience was enraptured by the wizardry of the scene. Mr. Hofmann has patented a new kind of artillery shell. The shell is designed for use in an automatic machine gun. The shell has a fuse which is designed to be destroyed by a quick blast of air. This gives the gunner a much better chance to hit the enemy. The shell is designed to be used in an automatic machine gun. The shell has a fuse which is designed to be destroyed by a quick blast of air. This gives the gunner a much better chance to hit the enemy.

I want . . .
FIGHTING DOLLARS

Some two thousand dollars were raised in the Liberty Loan drive, and it was spent in the purchase of war equipment. The money was divided among the various branches of the Navy. The Navy Department has asked for a further sum of two thousand dollars, which will be used for the purchase of war equipment. The money was divided among the various branches of the Navy. The Navy Department has asked for a further sum of two thousand dollars, which will be used for the purchase of war equipment.

Custodes of Spain Are Seen In Film

by Ann Barrett '45

The Spanish film, "El Astar del Rango," shown in the Palmer Auditorium, March 6, proved to be an interesting effort in Spanish art and culture. The film is a document, however, in the story of the situation. The story was about a frustrated man, played by Mr. Carril, who was torn between two loves. After many complications and interludes, he decided in time to prevent the marriage of his heroine. The course she took became the cause of the lovelessness of her love for sea.

In Calmness Lies Our Strength

"In quietness and confidence shall be your strength," began Sunday's Sycers speaker, Dr. Boynton Merrill, of the Secondary Congregational Church in West Newton, Mass. We are having a very dark night; if we are to arrive at anything like life instead of death there must be light along the way. The greatest contribution we can make to the world today is to live calmly and confidently in the knowledge that He is in His heaven and in His world too. "Men do better when they do not be afraid of the darkness, and if life is well-lived, it takes about all the strength we have. When men become panic in their thinking they often miss the light along the path. And even in this dark night when bitterness and hatred are rampant, the church and all Christians should be singing a song of praise in memory of Mr. Hofmann who was the most successful in living quietly and confidently."

We too can learn to live quietly and confidently. If we think space will not be the answer, we must realize things cannot be done in a moment. Men have been on this earth just about forty years. We have come a long way in twenty seconds. We have but a moment of time: God help us if we use it wrong. God has His lights burning in the darkest nights to be seen by those who are willing. By living graciously we may attain a spirit of confidence. This is to live thoughtfully, lovingly, and thankfully. It is to live quietly and confidently and must love good work. If one is going to do something practical at 25 he should begin now, for nothing is done in a moment. And in closing, he said, "In quietness and in confidence shall be your strength."

Caught On Campus

The Mascot Hunt has been driving the sophomore class to distraction. In fact, the class itself was all set to bring about their process as clue tracker downers until number 6 appeared on the horizon. Probably while this article is being penned to a pulp, they will still be looking for something that would surprise Freud and have a pebble in its shoe. What’s more it’s a chair-veiny picture which fact the sophomores beg to differ, we hereby hope that the clue will be found by the time you don’t read this. Getting behind in one’s classes is almost as bad as getting behind in one’s work.

Jerry Anderson, according to Dean Burdick the only man allowed in a dorm after 10:00 p.m., appeared Monday evening in the News office in his leather motor-cycle outfit. Every one of the girls who came in to work on the paper that night immediately took on a serious and interested look and proceeded to back herself up against the nearest wall that night immediately took on a very unusual way to say the words, “I’ve seen your picture many times and admired it so much and so I thought you might like to see one of mine.” She put her return address but nothing has returned to her address from Mr. Pidgeon—90 FAR. If it comes, it will no doubt be under the classification of 1st Class Mail.

Clubs To Discuss Jobs For Summer

Opportunities for Science and Home Economics Majors will be the topic for discussion at the Science and Summer Work Conference, to be held in the Commuters’ Lounge, Fanning, on Wednesday, March 19, beginning at 4:30. Members of the Science and Home Economics clubs are cooperating with the research and improvement of the liberal arts field. Dr. Carleton Dugliano, professor of physics, explained the satisfication of a smoke that’s definitively Miller, far cooler and better-tasting. Chesterfield’s superior blend of the world’s best cigarette tobaccos will give you more smoking pleasure than you ever had before. Try a pack of Chesterfieldes today.

Economics clubs are cooperating with the insurance companies in extending the meeting, and all interested students are invited to attend.

Candid

(Continued from Page Three)

of ettinings of the two American colleges, Harvard and Yale. Now, along with his work as teacher and instructor, he is engaged in research and improvement of the chemical content of color pigments, a project authorized by the Bureau of Standards in Washington. Highly imaginative and artistic, Mr. Logan finds his greatest pleasure in all the arts: in ornithology, in poetry, in music, and in drama—particularly French drama. As side houses, he takes enthusiastically of swimming and rifle, his two favorite sports. Always congenial and informal, Mr. Logan has an inexhaustible stock of stories to tell—stories of his experiences of the people he has met, and of the places he has seen. And though his hair immediately warms one of an explosive temper, he is, in reality, a mild and kindly man.
