Floralia: Conn lets loose

by Donna Handville

If anyone on campus knows how to give a party, it’s Tim Scull. Floralia, his day-long performing arts extravaganza, delighted the large crowd in attendance on Sunday on the library green.

Improvization was integral to the festival, though it has been in the works since last fall. Strains of jazz by the Berklee Percussion Ensemble floated across campus from the fiber glass hand shell constructed on top of a tiered stage.

The Ensemble was accompanied at one point by the dance Improvisation Laboratory who gave a brilliant performance showing the true essence of improv. A child with a balloon wandered up on stage and the dancers took the opportunity to work around him, enfolding him and tapping his balloon.

Later in the afternoon the Ensemble was again accompanied by dancers. Members of the audience, encouraged by the student clowns, danced freely on the stage in a bacchanalian celebration reminiscent of "Hair" and the days of "Peace, Love, Granola!"

Professional puppeteers and magicians were hired for the event and they were almost as interesting to watch as the children who were truly enthralled by their performance.

Plaudit to Tim Scull, producer of the May Day festival named in honor of the Roman goddess Flora. Tim is a sophomore theatre major. Floralia was an interdisciplinary educational T.V. on campus. He added, "I will request the $8000 needed for this project from a local, Connecticut foundation or corporation.

asked about the possibility of bringing educational T.V. to the students, Alice Johnson, Dean of the College, enthusiastically noted that this kind of television will serve as a "valuable educational tool." Dean Johnson added, "It will provide an excellent opportunity for students to view educational television."

Lester Reiss, professor and co-chairman of the Philosophy department, in conjunction with David Penston and Peter Seng, will be offering a Humanities course second semester next year entitled "History of Science."

Television productions pertaining to the course such as the "Nova" series which is broadcast on P.B.S. could be taped off the Beta Max. Mr. Reiss feels that this kind of "visual aid would add tremendously" in courses because it would provide students with a better understanding of the required reading.

If the college obtains the Advent projector, Mr. Brian Rogers, Head Librarian, will publish weekly educational T.V. listings. The library has been the proposed location for the system because of its convenience and security plan.

recommemended courses which includes such diverse subjects as Modern Architecture, Ethnology of Indonesia, Expressions of Afro-American History, Environmental Economics, and Computer Studies. The student may choose courses outside the designated group with the approval of the Urban Affairs Committee.

The major was established at Conn in 1970 in response to student interest for "relevancy" in a college education. An Urban Affairs major is required to spend a semester in municipal agency. This internship is intended to encourage social applicability in the student’s curriculum.

Although the exact nature of the two additional courses has not been released, Dr. Faber noted that "coordination and selection will be given to such possibilities as team teaching, thematic approaches to urban topics, and seminars across different disciplines within the social sciences, humanities and physical sciences."

The additional courses are intended to provide a focus for the major.

The goal of the curriculum," says Faber, "is to give students a multidisciplinary and integrated view of how cities operate and the impact they have on society."

President Oakes Ames said that he will "support" the proposed Advent T.V. project if the school is able to get a Connecticut corporation or foundation to fund the $8000 cost. He felt that it was primarily a question of "priorities" due to the "competing demands for this kind of money."

A demonstration of the Advent was held in Bill Hall, on Wed., Feb. 16, opening the prospect, that students may be able to see educational T.V. in the future. The Advent projector’s seven foot parabolic screen projected an excellent quality color image. This screen bounced the sound back to the audience and had superb clarity.

The Advent T.V. project, which includes a Beta Max - a video tape projector - was first introduced by David Penston, chairman of the Physics department, and Peter Seng, professor of English. Recently, it has aroused great interest on campus among the students, faculty, and administration.

The projector would provide enjoyment of non-commercial programs such as Shakespearean plays, up-to-date news discussions, and sporting events that normally don’t receive much publicity.

Mr. John Detmold, Director of Development, stated that it is "very possible" for Conn. to get funds to support the project.

Space-age screen on Conn

by Daryl Hawk

Educational T.V. on campus. He added, "I will request the $8000 needed for this project from a local, Connecticut foundation or corporation.

 Asked about the possibility of bringing educational T.V. to the students, Alice Johnson, Dean of the College, enthusiastically noted that this kind of television will serve as a "valuable educational tool." Dean Johnson added, "It will provide an excellent opportunity for students to view educational television."

Lester Reiss, professor and co-chairman of the Philosophy department, in conjunction with David Penston and Peter Seng, will be offering a Humanities course second semester next year entitled "History of Science."

Television productions pertaining to the course such as the "Nova" series which is broadcast on P.B.S. could be taped off the Beta Max. Mr. Reiss feels that this kind of "visual aid would add tremendously" in courses because it would provide students with a better understanding of the required reading.

If the college obtains the Advent projector, Mr. Brian Rogers, Head Librarian, will publish weekly educational T.V. listings. The library has been the proposed location for the system because of its convenience and security plan.

What's new with SGA

A proposal for the consolidation of Social Board and Special Events was outlined at the Student Assembly meeting on April 27th.

The proposal was divided into four basic points: (1) the delegation of Student Government duties to Social Board, (2) a student handbook, (3) the establishment of a Social Board and the Finance Sub-committee, respectively.

The publication of a student handbook was also discussed at this Student Assembly meeting. This handbook would be similar to the current "C" book, which includes such information as dormitory regulations, Student Government charters, and other information.

The student handbook is to be a college publication aimed at putting everything the student needs to know in one convenient place.

Urban Affairs proposal to augment program

by Michael Hasse

A proposal to develop a more distinctive curriculum for the Urban Affairs Program has been submitted to the administration by Dr. Bernard Faber, Director of the program.

Dr. Faber’s proposal would establish an introductory urban affairs course and a senior seminar in urban studies to augment the present interdepartmental program. Funding for the proposal would potentially come from the Mellon Grant, a $200,000 endowment given to the college in 1970 to be used over a three year period.

The objective of the grant is stated to be to revitalize the College’s commitment to general education and to fortify our interdisciplinary programs.

The present Urban Affairs major is a multidisciplinary program requiring a B.A. degree and consisting of courses predominantly in the humanities and social sciences.

Of thirteen semester courses required for the major, the student elects six from a core group of 30
Before acting, consult your constituency.

Based on her explanations of the Restructure sub-committee of College Council's unofficial proposal (see Pundit April 21, page 21), SGA President Nancy Heaton, seems to be a victim of political naiveté.

In her platform Ms. Heaton stated that she intended "to make student government the powerful voice it was meant to be," through restructuring the existing system — particularly College Council.

From a student point of view, many thought that this meant a College Council with more teeth, which would move in the direction of an All-Campus Senate when the time and the atmosphere were ripe.

From a faculty point of view, this apparently meant a College Council with little or no teeth. It now seems that the faculty members of the sub-committee have had quite a hand in formulating the unofficial proposal.

This proposal calls for a body with no legislative powers, where no members will have privileged access to the campus in a way that is unfair to all, and is unwilling to delegate any representative voting privileges to their council members.

Instead, the members will sit around casually discussing campus issues, referring them to the appropriate committee or persons for consideration, drinking coffee and eating cookies.

There are some good points to the proposal; the body should become an effective clearinghouse for student initiatives, and Student Assembly will no longer have its legislation overseen by Council.

However, Ms. Heaton has sold out to the faculty perspective of what College Council should be, a body which is structurally unable to even think about challenging faculty and administrative autonomy in decision-making. Her rationales for this decision display political naiveté, based on two lines of reasoning.

First, Heaton feels that by removing Student Assembly from Council's scrutiny House President would be encouraged to take their business more seriously, thus establishing a more effective student voice. Surely Heaton must realize that this change will have few psychological affects on assembly members — the only way to ensure a politically serious and hardworking assembly is through indoctrination.

To the editor:

Because of the success of last year's book sale, we will have a repeat performance next October.

Last fall the sale netted $11,400, which was 30 percent above the 1982 sale. The Library Book Fund, and the library also benefited by adding to its collection 1,600 books valued at $3,800, which were the donations before the sale began. But this is not all. After the three-day sale was over, we opened the doors to charitable organizations, who took what they wished for their shelves at no cost. Among these was such unrelated places as the Seaside Day Nursing Center in Waterford and a college in Balala, India.

The proceeds of the new sale will be devoted entirely to the Library Book Fund, and to make at least the success it was last year — and hopefully more — we ask the support of books, magazines, records, sheet music, posters, postcards, prints, puzzles, games, and library accessories. The library will have a box where you may leave your contributions. In addition, please ask your local bookstores, bookstores, magazines, records sheet music, posters, postcards, prints, puzzles, games, and library accessories. The library will have a box where you may leave your contributions. In addition, please ask your local bookstores, bookstores, bookstores, bookstores, bookstores.
LAST letter from Wright

Dear Conn. College,

Well, Nixon is guilier than ever now, with his David Frost faking questions at him, and with the revelation of the new tapes saying that he knew everything that happened and he tried to stop it all for fear of the break-in. I'd say Nixon is still alive, which we can all feel a little queasy about. The economy is looking better and we can breathe a bit easier, but energy looks bad. Joe.

The problem here lies not with the President; it’s with the Congress. The members, led by that evil blackguard Henry Jackson, are more interested in receiving votes in the next election than helping the country through what Mr. Carter called “the moral equivalent of war.” They will sit and squawk about energy and doing something about it, but they haven’t come up with anything better than the proposals from the White House—and I doubt that they ever could.

The hard facts that I leave you with to contemplate over the summer, is that the United States needs an increase of at least fifty cents, and maybe as much as seventy-five cents, in the price of a gallon of gasoline.

It has been shown in the past, it is true, that the price jump from thirty to sixty-five cents did not stop gasoline consumption; in fact, it increased. But I believe that Zweig who wrote that these three days of gasoline at line at gasoline costing over one dollar per gallon. I know damn well that I would.

I can take a gallon which at least cost a little more than gas. But still I know that if gas cost $1.20 a gallon, you’d better know that I would.

It is my opinion which at least cost a little more than gas. But still I know that if gas cost $1.20 a gallon, you’d better know that I would.

Blue whale population sinks

by Richard C. Newbold

Did you know that the blue whale is the largest creature to ever exist on the face of the earth? It is far larger than the largest dinosaur that ever existed. This whale can grow up to lengths of 98 feet and a third of its weight being a fish, it is as heavy as an elephant and the eye is as large as a fastball. Whaling threats to make the blue whale extinct.

The International Whaling Commission (IWC), which oversees whale whaling, was created after World War II to address the increasing problem of depleted whale stocks in the world's oceans.

The IWC now, however, is ineffective. Members are allowed to establish quotas, and they are not being enforced. This is not only ineffective but also dangerous. In some areas, whale populations have decreased dramatically, and this is likely to continue if the IWC does not take action.

Youth Program grows up

by Patty McGowan

Once again, the Connecticut College student government is making a difference. The Youth Leadership Development Training Program is being offered to high school students from eight Connecticut communities.

The program, which was developed last year by Thelma Waterman, Director of Community Affairs, was introduced to provide high school students with an opportunity to learn leadership skills and participate in activities that will help them adjust to college life.

The program is open to high school students from eight Connecticut communities, and students are selected on the basis of their leadership potential and motivation to participate in this type of program.

The benefits of this sort of training are numerous. For one thing, students get to meet each other and discover that although their backgrounds may be different, they have many of the same problems.

"We try to teach the students the importance of making new friends and the advantages of this sort of training," explained Ms. Waterman.

Through this program, students learn to work together and to realize that they can achieve things by working as a team.

We also find that the students enjoy the college atmosphere, and many who had been interested in attending college now want to go back to high school and graduate early in order to participate in this type of program."

Hendel works for two Conn's.

by Carrie Howe

Think for a minute about the amount of "junk food" you may be including in your diet on a regular basis. Items such as fruit, vegetables, lean meats, whole grains, high-quality, low-calorie, low-fat food are "junk food." But the effects of eating these "junk food" products can be harmful, while the effects of other food can be beneficial to your health.

Another danger of junk food is that it can be harmful, while refined sugar is being blamed as the cause of many of the diseases Americans suffer from, including heart disease, hypoglycemia, certain cancers, tooth decay, and so forth. To ensure a proper diet, take in a more even supply of energy, it is wise to cut out the empty calories and eat more natural and complex foods including fruits, potatoes, protein foods or starches.

One additional factor to remember about junk food and any highly processed foods is that they require a great amount of energy to be produced; they are "energy-intensive." Into the production of nutritionally worthless products goes much energy for processing, packaging, transportation, and in some cases, fertilization or freezing.

Eating foods closer to their source such as potatoes rather than frozen french fries or potato chips, will save nutrients, energy, and money.

Junk food junkies kick the habit

by Patty McGowan

You can tell that it is approaching because nobody does laundry, nobody makes their bed, and there is a lot of garbage from the vacuum cleaner, the sound of typewriters is deafening, and the Tom's machine empties out all the good stuff before you get to the last package of peanut M & Ms.

Finals. And this year you are on Friday the 13th. So it's not just a bad omen. People linger at meals for hours, and by the end of the week, the pool is always crowded.

Last year we could always find things to do like steal Dante, throw our cloths from the windows of Palmer, and open the window of the dorm, and make crank phone calls. "Is this the Lord's house? Oat? Well let us pray." (We are all brothers under the Lord.)

Instead we are reduced to the ultimate humiliation of asking for extensions, or giving them to others. We are condemned to air-conditioned silence, and if you've lost your library card - it's melted in the dryer - well, your reserve reading will just have to wait until next semester.

The semester begins the week before. People stop watering their plants (except for the house fellows). Enormous quantities of coffee are consumed, mugs or no mugs. Everyone has dirty hair and no one complains about the food, they just eat.

Except in August, (or maybe even late July), we decide we miss it and come back to do it all over again.

Rep. Patricia Hendel
Words on black plastic

By Chris Zingg

As I sit listening to the latest album by Little Feat, I find myself in a curious position. Compelled by my respect for this band, I see myself compromising my true opinions toward the new record entitled Time Loves A Hero (Warner Bros.) for something a little less critical. Can't fill... Doln'

The first-rate rock band is finally catching up in sum, though, Time Loves A Hero is very well, Little Feat's reputation as a known for.

There seems to be a conscious realization on the part of the musicians that the time has come to capitalize on their popularity. After three albums produced by slide guitarist, vocalist, and bandleader Lowell George, the group has reverted to its original producer, Ted Templeman, whose work has included great success with bands like the Doobie Brothers. In fact, Templeman employs two of the Doobies, Mike McDonald and Pat Simmons, on "Red Streamliner," Little Feat's fifth or sixth.

As expressed in those songs, the band's favorite subject matter is that of the drifting individual. In the title track of the new album, the singer recounts the story of his uncle who made the choice to wander aimlessly in Puerto Rico rather than "sit in the relatively small club. By the time the band took to the stage, the majority of the audience was feeling rather elated and they responded accordingly.

Without introduction, the group launched into a lengthy set featuring most of their latest album, their previous record, Black Market. Particularly by the experienced American saxophonist Wayne Shorter, who has worked with countless jazz artists including Miles Davis, and the previously mentioned Jaco Pasternack, who saved Joni Mitchell's last album from the lobby of the Cummings Art Center. The show, which will run until May 9, will have works representative of all the courses in the Studio Art Department. This is the only show of the year that has such a comprehensive display of student work and this provides a unique opportunity for one to view the first works of the studio art program in one show.

The selections for the exhibition, which should number around 250, are being chosen this week by the faculty members in the department.

The Cummings heist

Two color silkscreen prints with a combined value of $500 were stolen from the lobby of the Cummings Art Center. The two similar works, which apparently vanished off the walls sometime between Friday, April 15 and Sunday, April 17, were part of a show entitled Contemporary Graphics rented from the Housatonic Museum.

The prints, one entitled "I.S.E." by Josef Allers, the other "Double Squares" by Richard Anskiewicz, were encased in glass with metal frames and were hung on nails.

Orchestra lacking

by Beata Garfinkel

Aside from the festivities which took place on the Noodle Factory's lawn last Sunday during May Day, another type of entertainment was going on in Dana Hall. On a rather different note than the Berkeley Jazz Ensemble, the Connecticut College orchestra was playing a variety of selections from the works of Johann Sebastian Bach, Carl Maria Von Weber, Antonius Joan, and Camille Saint-Saens.

For those who are not familiar with the orchestra, allow me to inform you about the consultant. The Connecticut College orchestra consists of approximately twenty-five to thirty members, many of whom are not students, but rather senior citizens from the community.

It was all too apparent that many of the talented musicians and performers were not even present. The concert seemed to consist of the traditional music of Bach performed on a sort of western funkiness from Copeland's Torch Down, and simple gypsy sounding music from Allegro Apasionata for cello and orchestra.

The revival of classical music is a sure sign of the times, but until then, we will have to watch the popularity contest among musicians. It is unfortunate that the quality of the College Orchestra will have to suffer.

Connecticut College

Pay those dancers!

If by any chance you sponsored a couple for the benefit Dance Marathon, but have not received a notice, please send your donation to the Student Fund-Raising Committee, Box 1140. There have been some problems with the records and not everyone was notified. Supporters of the Dance Marathon: Thank you very much for your generous help. The funds raised will be divided between the Drop-In Learning Center of New London, and a student fund at Conn.

Special thanks to Roger Rose, who unfortunately has taken up temporary residence in the Norwich Hospital.
K.B. fire sparks new precautions

By Delores Lestri

Since the outbreak of fire in Katherine Blunt dormitory last April. Conn College has revamped the entire fire alarm system.

Richard Ingersoll. Director of Physical Plant. said that Conn had always maintained fire systems that exceeded requirements. "It is our intent to constantly extend fire protection. We would always update, even if there had never been a fire."

All the electrical wiring has been installed for the new check system which has been in effect since Sept. Many structural changes have had to be made in buildings to accommodate the sprinkler systems that are being installed during vacations.

The new arrangement is a supervised fire alarm system that will first ring in the Fanning Information Center and the Gatehouse "no matter what happens."

"The old system installed in 1968 was, at that time, the latest state of the art," Ingersoll said. Its failure occurred because the wiring burned out before the system had a chance to sound. Today's wiring is redesigned to withstand much temperatures.

To prevent the future occurrence of any problem the State Fire Marshal inspected the work several times as installation of the new system progressed. "The Fire Marshal came at Conn College's request," said Craig Hancock. Director of Campus Safety. "The college has worked closely with both the state and local fire marshals to see that we have the best system available."

One student admits that he took the course in order to strengthen and improve his writing skills. He commented that he wished there had been more rigid requirements in the course in the way of weekly assignments to be handed in.

Another student, who has taken Song's course and has since had further Journalistic training at a large university, suggested that the classroom time be utilized as an actual newroom situation.

Rather than giving the student an assignment and allowing him to complete it in two days, the professor should assign the story, give the student a time limit in which to complete it, and then collect the finished — or unfinished product — in the same class period.

Other suggestions made were to teach students various "tricks of the trade," as well as the basic techniques involved in writing a new story. Hints on how to get past secretaries and weed out information are considered crucial to a reporter interested in "getting" a story.

Conn.'s sole journalism course, after a semester's suspension, will resume in the spring semester. Song's Journalistic background includes having worked as an editor of a newspaper during his army days. This paper was produced weekly with a circulation of 5,000.

Time to edit Conn. College's journalism course

by Nancy Singer

Connecticut College's only course in Journalism has been canceled for next year's fall semester.

Peter Song, professor of English, and the school's only Journalism instructor, explained that the course has not had as much demand as anticipated. Therefore a decision was made, in conjunction with Dean Swanson, to suspend the course for one semester hoping this would increase enrollment the following semester.

He believes that Conn.'s Journalism course has generated some "real Journalists" as reflected in the Pundit staff.

In discussing the actual structure of the course, one of Song's past and present journalism students offered various criticisms.
Spokes speak out for Cystic Fibrosis

By Nancy Rockett

The Annual Cystic Fibrosis Bike-athon will be held at the “Speed-bowl” in Waterford, Ct., on Sat., May 7. Participants of all ages are welcome to cover any length of the maximum 20 miles around the race track. All proceeds will go to treatment research and towards educating the public.

The event is sponsored by “MacDonald’s” and prizes to participants range from “T” shirts, plane rides, a C.B. radio, to a weekend for two in the Berkshires. All participants will receive MacDonald’s coupons and a free night at the speed bowl. If you need an hour study break between 9 a.m. and 5 p.m., throw some bikes in a car and put your energy to good use. Rain date is the following Sunday.

Cystic Fibrosis is a genetic disease that is inherited by one out of every four children born of two carrier parents (recessive). There are six million children in the U.S. diagnosed to C.F.; it is predicted that there are just as many undiagnosed cases. Therefore research on cures and treatment is equally important in educating the public to the symptoms of the disease.

Cystic Fibrosis was first diagnosed in the 1940’s as a “Fibrocystic disease of the pancreas.” Since then C.F. Centers have been opened in New Haven, and Hartford, providing the edge. If the infant may be diagnosed once he weighs 10 pounds. The major threat of C.F. now, is in the U.S. diagnosed to C.F.; It causes, enzyme, glucagon release, protein transport, and mucose and insulin secretion. The major treatment for C.F. is (recessive). There are six million children exposed, and therefore a common cold have information on Sat. May 7.

LETTER

Dear Editors:
Within the past two weeks Buck Lodge has been broken into twice and one double and two single wicker chairs stolen plus the piano stools and the fireplace accessories. Last year 2 chairs were also stolen. Only 5 chairs remain. These irreplaceable items have been part of the rustic furnishings of the Lodge for some 40 years and enjoyed by countless groups.

Since the last two entries into the Lodge were made with an unauthorized key, we now have new regulations for the use of the Lodge. It is still available to College groups but will be opened and closed by Security personnel. Arrangements should be made by calling the Botany Department Office.

We are most anxious to have the furniture and accessories back because of their sentimental value. If anyone should have any of these items, please contact Campus Security. All information will be held in strict confidence.

Two losses end season.
However, call it successful

by Austin Wicke

The second season of men’s lacrosse at Conn. college ended on two rather sour notes as they fell to Hartford 7-3 and Southern Connecticut 19-3. In the second half, the home squad celebrated their “rain drenched reunion” with Mom and Dad by outscoring B.U. 11 to 0. Utilizing his bench strength to fullest, Coach Jim Courtney got fine performances out of Mike Fishman, John Rochschild and Peter Flint who scored a goal. Three Conn players, Peter Stokes, Peter Musser and David Nightingale had hat tricks in the contest to lead a total of 12 scorers.

However, this being the first year of the new arrangement, all athletes for the year 1976-77 will be paid tribute to on Monday, May 9th at 6:00 p.m. in Harris Refectory. The purpose of these banquets, according to Athletic Director Charles Luce, is to enable members of Conn’s various athletic teams to get to know each other, and to expose individuals and their achievements. Invitations to Monday’s dinner have already been mailed.

by Austin Wicke

The second season of men’s lacrosse at Conn. college ended on two rather sour notes as they fell to Hartford 7-3 and Southern Connecticut 19-3. In the second half, the home squad celebrated their “rain drenched reunion” with Mom and Dad by outscoring B.U. 11 to 0. Utilizing his bench strength to fullest, Coach Jim Courtney got fine performances out of Mike Fishman, John Rochschild and Peter Flint who scored a goal. Three Conn players, Peter Stokes, Peter Musser and David Nightingale had hat tricks in the contest to lead a total of 12 scorers.

However, this being the first year of the new arrangement, all athletes for the year 1976-77 will be paid tribute to on Monday, May 9th at 6:00 p.m. in Harris Refectory. The purpose of these banquets, according to Athletic Director Charles Luce, is to enable members of Conn’s various athletic teams to get to know each other, and to expose individuals and their achievements. Invitations to Monday’s dinner have already been mailed.

Jocks’ banquet Monday

The annual Athletic Department “Roast”-type dinner has been replaced by two dinners, one each semester, as a means of recognizing team and individual athletic achievement. Autumn sports and athletes would have their dinner in the late fall, while winter and spring competitors would be honored at the end of the school year.

However, this being the first year of the new arrangement, all athletes for the year 1976-77 will be paid tribute to on Monday, May 9th at 6:00 p.m. in Harris Refectory. The purpose of these banquets, according to Athletic Director Charles Luce, is to enable members of Conn’s various athletic teams to get to know each other, and to expose individuals and their achievements. Invitations to Monday’s dinner have already been mailed.
