Faculty governance committee.
Seeks to effect reform

by RoseEllen Sanfilippo
Last spring the Ad Hoc Committee on Faculty Governance was formed in response to a faculty request for a more effective governing structure. This week the committee chairman, David A. Smalley, who is a professor of art, submitted a proposal at a special meeting of the faculty on Wednesday, Nov. 19. The proposal is aimed at remedying the present committee system which is viewed as "overlarge and confusing."

The proposal allows for the establishing of four new, or revised committees while eliminating seven previously engendered committees. The creation of a Faculty Steering and Conference Committee is the major change proposed.

This steering committee would serve several functions: it would provide "leadership for the faculty as a whole on all matters of college policy"; it would coordinate and direct all committees which deal with "the faculty's business"; and it would represent "the faculty in conference with the Board of Trustees, Students, and the Administration."

If approved, the new committee would not be large, but rather it would be responsible to the faculty and subject to instruction from it. In all faculty matters, the committee would have the power to recommend — not decide; it will meet with the faculty at the beginning of every semester to discuss concerns and priorities.

The six members of the committee will be elected annually, and a maximum of two consecutive terms will be allowed. Twelve nominations for the positions will be obtained from individual caucuses of the ranks of professor, associate professor, assistant professor, instructor, and from the faculty at large.

An Academic and Administrative Procedures Committee has also been proposed. This committee would consider any modifications in the college's course offerings, including the Summer and Evening Session program; alternative degree programs; changes in administrative procedures, and class meetings and hours; and the faculty voting list which is compiled by the President's Office.

In addition, the committee would review all requirement revisions for Individual Study, Honors Study, and Graduation Honors; as well as the grading system; the academic program of Summer and Evening Sessions; and admissions requirements for undergraduates, and return-to-college students.

It will also consider the standards for granting credit for courses not taken at Conn.; for receiving financial aid; and for scheduling courses and exams. In all these matters the committee would submit its recommendations to the faculty.

Consolidation of dining rooms
Being considered by Dev. Cmte.

by RoseEllen Sanfilippo
During the past year the Development Committee has been reviewing all areas of the college budget in an effort to determine what cuts can be made to avoid an imminent deficit. Although the committee, which is chaired by Associate Professor of German Janis V. Gallinek and Bernie McMullen '76, has not yet reached a decision, they have been concentrating on the consolidation of dining services.

The committee, which has been discussing cutting alternative areas such as the college maintenance plan, academic programs, and student services, has been attempting to weigh "monetary and psychological considerations." Realizing that the present system with its separate kitchens offers "the college's attractive features, the committee is reluctant to close those kitchens."

President Ames, however, who is an ex officio member of the committee, has determined that the present system is too costly to maintain at the present room and board rate of $270, which has a maximum occupancy of about 600 people, because the dining hall facilities of the college's 1,440 residents. He feels that the college will have to choose between the options: continuing the present dining system with approximately $100 added onto room and board, building a new facility, or having the entire campus eat at Harris and Smith-Burdick.

The possibility of a meal plan has also been brought up, while left on my budget for emergencies right now," when there is an electrical short or failure in that building, Mr. Knight explained that one cannot afford to worry about the expense of repairs; it is a situation which requires him to act as quickly as possible.

The stage is set for the Return to Forever show

by Mimi Glnott
Because some departments tend to overspend, and this contributed to last year's budget deficit, an all campus spending freeze is presently in effect, and the Academic and Administrative Procedures Committee is the major way to stretch the budget. When Chick Corea, Stanley Clarke, Lenny White and Al DiMeoia begin to play, it will mark the first time in two years that a major popular group has performed at Connecticut College.

This concert climaxes three months of intensive preparation by the Concert Committee under the direction of Keith Ritter and Chuck Ricci. Many details, including the procurement of a double-fudge layer cake for the band, had to be worked out before this important test concert could take place.

"We started work on this show last fall and we probably won't finish it until after Christmas," said Susan Brown, "but all goes well Friday, and there is no reason why it shouldn't, this is only the first of a whole series we've got planned. The administration has cooperated in every way they reasonably could be expected to, and everything is running very smoothly."

The only real worry that remains is the plan placed on smoking and drinking in the hall. Should damage to the hall occur, the restricted use of dorm concerts will again become the rule. However, the promoters feel that everyone will "clean up real nice before we're done with this issue" and obey the no smoking rule.

Tickets for the show are still available and will cost $5 and $6 in advance or $5.50 and $6.50 at the door. There is limited seating available and box office hours are 2:30 to 5:00 p.m. today, and all day tomorrow.

Continued on page twelve
Save us from centralized dining: meals are more than food

Who says that centralized dining is inevitable? The decision to keep our present dining facilities or to switch to a centralized dining system has not been made yet. The misconception about the inevitability of centralized dining is a result of the Administration's and the Development Committee's emphasis on cutting services to balance the budget. Avoiding a deficit is a valid priority. We certainly do not want to have to deal with another budget deficit.

But there is another concern that is just as valid. And this is the nature of our present dining system. The program of separate dining halls has traditionally contributed to the college's distinct social personality. To eliminate it would be to destroy one of the last unique qualities of this campus.

Maintaining the present system at the college treasurer's projected cost of approximately 100 dollars per student increase in room and board - i.e., three cents a day - is insignificant when compared to the disadvantages of centralized dining.

We cannot provide a civilized central dining program with our present facilities which are unable to comfortably and sensibly accommodate the entire student body. And there is no possibility within the next three years, at least, for an expansion of these facilities.

Pundit urges the administration to consider maintaining the present dining system with the minimal increase in room and board. They must recognize the nature of dining on this campus as one of the last means for maintaining community identity in the face of institutionalization.

We also implore the student body to exercise its decision-making role. If the administration is not provided with a clear and cohesive student proposal, they will make this decision without us.

Lazrus doesn't belong in lottery

In April, the dorm selection process and room lottery for school year 1976-77 is expected to include S. Ralph Lazrus House. Lazrus should not be included in the selection system. Its facilities are neither equal nor comparable to those of other dorms on campus.

Formerly one of two cooperative houses on campus, Lazrus was removed from the co-op system last summer because there were not enough students who wanted to live there. Lazrus is a very small dorm, housing only 29 students. The rooms are correspondingly smaller.

Complaints about the size of the rooms and the excessive noise in the dorm are abundant. Regular conversation or the playing of music at normal tones is heard in adjacent rooms. This is due to a minimum of insulation between walls. Privacy is difficult, if not impossible, to achieve.

The small size of the rooms and the lack of privacy make it unrealistic for students to choose Lazrus as their primary residence preference. The assignment of students to Lazrus will become mandatory, in order to fill the dorm. The concept of giving the student an opportunity to express his preferences is ridiculed and made worthless by the inclusion of Lazrus in the dorm choice system, and should not be allowed.
The Lazrus doll house is unfit to Be in the dorm lottery system

by Dave Jordan

The editorial on the preceding page contends that Lazrus House should not be included in the spring dorm lottery system. A large shelf that is permanently attached to the surface of the desk. The curious part is that the shelf itself requires only half the effort to construct and it forms the structure. In other words, there is an extreme example of waste above the surface of the shelf.

The lack of privacy in the dorms is incredible. Standing in one room I could hear the normal conversations going on in the room next door. The smallness of the rooms make gatherings of more than two people impossible. In order to get to some people get together, the Lazrus student must hope that the living room or a hallway. This is an awkward, uncomfortable situation at worst.

Campaign against the B-1 Brought to Conn.

by Selden Pratice

Between now and November, Congress will be considering spending between 45 and 50 billion dollars for the B-1 bomber weapon system. This would be the most expensive weapon system ever paid for by the Federal Government. It is about a citizen of average income would have to pay 4½ weeks of salary taxes.

Frank Halpern of the American Friends Service Committee and coordinator of the "stop B-1 campaign" in Connecticut, gave a slide show Thursday evening on this subject. Approximately 10 people attended the lecture.

General Electric, Boeing Co., and Rockwell International, the three companies vying to build B-1 prototypes, claim that the B-1 is necessary for "national security" and it is "good for our industry." They feel no responsibility for the existence of the B-1 and say that they are only doing their job.

A.F.P.S. argues that it is good for industry only in that the three above mentioned corporations share in the profits that are reaped from the building of the B-1 system. Economists say that dollars spent for civilian uses would bring more money into the economy than those spent for military systems. In fact, the B-1 system can be said to retard job growth by diverting money from the economy.

The slide show gave evidence, that the three corporations are the biggest examplers of that part of the population which is solely concerned with the money that is spent for military purposes. The White House and the people that it is in charge of, are the B-1 is necessary. They have obtained a bill passed in Congress, and they also give large campaign contributions to the Congressmen.

According to A.F.P.S., historical evidence demonstrates that arms races lead to war. An A.F.P.S. pamphlet states that "the U.S. is spending more long-range missile systems.

Campus history:

Odds and ends

compiled by Mimi Gloott

When World War II broke out, Connecticut College for Women was concerned with its role as a community, and as individuals, within the nation. The college's answer to this question was to remain calm and clear-minded; to continue with one's regular work and activities; and to prepare oneself mentally and physically for any responsibilities which may arise in the near future.

On the morning of Tuesday, December 14, President Katherine Brinton delivered an address to the entire student body. The speech began:

"You will all agree that there are three vital things that we must do at this time: do our own work, win the war, and look out for our safety."

In an attempt to look out for our safety, Conn. purchased special fire-fighting equipment. This consisted of a 750 gallon trailer pump equipped with 3,000 feet of hose; 150 gallons of water; 500 buckets of sand to extinguish incendiary bombs; and blue lens flashlights to use during blackouts.

The miseries and joys of exams are peeking around the corner

by Bonnie Greenwald

Though it is not yet Thanksgiving, all too soon, memories of the Thanksgiving dinner or at least a short break from the daily routine will be but a faint and chaos of exam time.

For those who have never experienced the end of a semester at the last minute, there are some telling signs which indicate that exam period, which had seemed so far away, is now upon us.

Meals times will suddenly be stretched out as long as possible — anything to avoid returning to the inevitable. In addition to longer meal times there will be the breaks. Evening snacks which appear every night indicate the administration’s concern with our wellbeing. How long has it been since our minds have worked this hard? Exam time is a great time to meet your neighbors. At unplanned intervals doors will suddenly swing open with the whole hall appearing for an informal get together. On the other hand, some students used to spending every day, who will suddenly disappear until next month.

There is also the fraternity which will develop between a select group who gather every night in the dorm dining hall and together watch the sun rise above the trees in that last footnote or review that last chapter. Don’t be surprised if someone who you didn’t even know was in your class suddenly appear at your door with questions or requesting notes. It’s all part of exam time.

Just remember that all those seniors who live down the hall. As a matter of fact, a senior has been through exam period and are still here to tell, and at times are just as crazy as the other guys.

Because Conn.’s exams are self scheduled, it is important to remember that you should never have finished an exam, this does not mean that you are free to talk about it. This is a breach of the honor code. In order to keep self scheduled exams is it important to be aware of your own responsibilities in upholding the honor code.

In February of 1942, three trial blackouts occurred in the city of New London; two of them were sectional, and the third was an all-city. The students were informed of the procedures for blackout practices and were advised of the "safest place" to go on any part of the campus. In a four-story building, the "safest place" is on the second floor; in any other building it is the first floor. The students were to open all the windows, go outside and bring warm clothing with them to the "safest place." When the alarm signalled at night, they knew that they had five minutes before the blackout.

During the spring semester of 1942 there was an all campus registration held for Defense Committee Services. The line consisted of the air raid wardens; a First Aid corps, comprised of people with medical training; a Police force; a group of A.F.P.S. participants and a Communication group; a corps of volunteers to be used in the event of a Full Scale blackout and brought supplies and hot meals to those in need.

In an attempt to look out for our safety, Conn. purchased special fire-fighting equipment. This consisted of a 500 gallon trailer pump equipped with 3,000 feet of hose; 150 gallons of water; 500 buckets of sand to extinguish incendiary bombs; and blue lens flashlights to use during blackouts.

A total of 1,000 students were involved in the exercise. After the blackout, all students were taken to the Top Campus Gym where they were fed hot meals and hot drinks.

The Campus registration held for Defense Committee Services.
Vokey proposes another,
Better pedestrian mall

by Katharine Hill

Junior Class President Scott Vokey thinks it's time to implement a recommendation made more than two years ago by a college study committee; this recommendation involved a pedestrian mall on campus. He would like to see the area in front of Cro more accessible and green, thereby eliminating cars from central campus.

The green would become the local public area of the entire college community with Cro assuming its place as a strongly identified student center. Access to the green, thereby eliminating cars from central campus.

The green would become the local public area of the entire college community with Cro assuming its place as a strongly identified student center. Access to the green, thereby eliminating cars from central campus.

Vokey sees his proposal as more than the ill-fated Pedestrian Mall previously proposed. He envisions the construction of doors from the cafeteria area of Cro onto a patio cafe. He also suggests the creation of an area which the dance department could use as an outdoor stage to accommodate the cars which will be restricted from the center of the campus. Vokey recommends turning the field behind the rifle range into a North parking lot. He would also like to see the extension of the pedestrian mall to the center of campus.

The extension of the green, Vokey believes, could have been accomplished already and at low cost. Initially the intention was to extend it to the rear of Camp, but this was cut off from the student body by a gate.

Security Log

On Nov. 15, there was electric fire in the basement of Palmer. There is no hint as to how the first got started.

On the 11th, the glass in the front door of Lambdin was broken. There were no suspects and the incident is believed to have occurred between 9:30 - 9:57 p.m.

On the 12th, as a result of students playing football on the second floor of Larabee, a window was shattered.

On the 17th, the coin box on the machines in the laundry room at Burdick were pryed open. There are no known suspects.

On the 18th, someone broke the electric clock in Morrison but left it on the floor. It was discovered by a security guard making his rounds. There are no known suspects.

The store room at Knowlton, which contains costumes, was broken into. Nothing was found to be missing. The room was vandalized by hole smashed in the walls and locks of the lockers were broken into.

On the 13th, at about 10:30 a.m., a prowler was seen hanging around Lambdin. Even with the aid of the dorm's students and housewifery, security could not find the suspect.

On the 19th, a bicycle was reported stolen from the bike rack at Lazarus. The actual theft occurred several days before it was reported to Security.

EB Strike in fifth month;
Pollution laws violated

by Rose Ellen Sanfilippo

Last week W. J. Usery, Jr., director of the Federal Mediation and Conciliation Service, announced that various alternatives to expedite negotiations in the 26-week-old strike against General Dynamics Electric Boat were being considered. The implementation of the Taft-Hartley "back-to-work" order and binding arbitration, said a spokesman for the mediation service, are among the alternatives.

The 10,000 striking members of the Metal Trades Council, according to the Taft-Hartley Act, were ordered back to work by President Ford for an 80-day cooling-off period. During that time negotiations could continue, and binding arbitration on all economic issues could come. Tense negotiations begin top-level union and company officials are being held, though neither side has altered its position since Usery, fearing an impasse on wage and fringe benefits, proposed negotiations on Oct. 18. Formal negotiations, which include the entire bargaining unit, begin, are expected to resume this week.

Usery was quoted in The Day as saying that although both parties "genuinely and sincerely would like to find an end to the problem," both seem ready to make an concessions.

The last union proposal called for a 2% per year wage increase, an end to the "law of one price" (the smallest table ship training) is presently being modified for the purpose of accommodating women.

Moreover, diverse opinions of the delicate issues that agree on the first "formative year" of the entering of women. All seem to agree that the 11th, the glass in the front door of Lambdin was broken.
by Bonnie Greenwald

Though 75 percent of the operating budget of the school comes directly from student tuition, few students know what their money is actually spent. Leroy Knight, treasurer, has helped Pundit to break down the $5,000 tuition and board figure in relation to the school’s budget.

The budget has two main divisions: Instructional, General Expenses and Student Aid and Auxiliary Expenses. The education and general expenses of the college to which the student pays $3,580 include: instruction, organized activities (i.e. children’s school, evening and summer school), sponsored research, other sponsored programs, extra public service, library, student services, physical plant, general administration, and general instruction.

Student tuition money does not go to organized activities, sponsored research, other sponsored programs, or extra public service.

In addition to the money paid towards this area of the budget, $1,420 goes towards auxiliary enterprises. This is basically room and board.

The tuition and board includes all expenses paid for the physical plant. The board is regarded as comprising heats, lights, and water.

The power house, fuel and electricity, $180.44, is the largest part of the board. The school also pays a constant labor to keep the boilers going, which amounts to $60.10. Campus upkeep, keeping the grounds in good condition, is $43.22.

General administration includes salaries and expenses of the administrative departments. General institutional expenses includes a number of miscellaneous items such as: P.O. duplicating, security, telephone and invitations.

The only way the college can become less dependent on student tuition and thereby more flexible with regard to endowment, according to President Ames, the school is working to get in a situation in which the school would come to rely on the uncertain conditions of the stock market.

---

Justice Douglas Resigns

Justice William O. Douglas tendered his resignation to President Ford after 25 years of service on the United States Supreme Court. He stated in his resignation that “inexcusable and demanding pain” made it hard for him to “shoulder my full share of the burden.”

Douglas has been a staunch liberal on the Court, always seeking to protect the individual, the eccentric, and the provocative. He was a defender of the individual in all his Court opinions.

Eldridge Cleaver Returns

Eldridge Cleaver returned to the United States on Nov. 18 after seven years of self-imposed exile. He flew to New York in order to give himself up to the authorities. He had announced his plans at news conference in Paris on the preceding day.

Cleaver is a former leader of the Black Panthers and faces charges of murder in connection with a shootout between the Panthers and Oakland Calif. policemen in April, 1969. He jumped bail, sailed to France, and then returned to prison. He has been in Cuba, Guinea, Algeria, Korea and France.

Cleaver explained his reasons for returning in an Op-ed article in the Nov. 18 issue of the New York Times. He stated that a new creative era had opened up for American democracy and that “with all its faults, the American political system is the freest and most democratic in the world.” He also stated that he hoped to make a positive contribution to improving the system using the established institutions of America.

Quinlan Family Appeals

The parents of Karen Quinlan filed an appeal of the court decision that denied their request to have the respirator that is sustaining their daughter’s life turned off. Upon the filing of their appeal in the Appellate Division of Superior Court the State Supreme Court of New Jersey announced it would take the case directly.

The Supreme Court decided to hear the case because of the broad public interest and the complex medical questions that it involves. The Court also decided to hear the case without a preliminary hearing.

The Quinlan’s lawyer, Paul W. Armstrong said the thrust of the appeal would be to seek a further clarification of the 1971 Supreme Court ruling that stated “there is no constitutional right to die.” Judge Robert Man had used the 1971 decision in his decision, in Superior Court on Nov. 10, prohibiting the removal of the respirator.

The decision is a reversal of the Utah Supreme Court’s decision that stated Mary Ann Turner should work for the repeal of biological laws rather than contesting Utah’s employment law. The decision casts serious doubt on the legality of the unemployment laws in 19 other states.

On Nov. 17 the United States Supreme Court ruled that states may not refuse unemployment benefits to women in the last three months of pregnancy and in the six weeks following delivery because of the presumption that all such women are unable to work.

The Court stated that this presumption was inaccurate noting that many women are fully capable of working during their last trimester of pregnancy and in the six weeks following delivery. The Court further stated that this presumption was a violation of the 14th amendment and that more individualized means for determining a woman’s ability to work must be used.

The decision is a reversal of the Utah Supreme Court’s decision that stated Mary Ann Turner should work for the repeal of biological laws rather than contesting Utah’s employment law. The decision casts serious doubt on the legality of the unemployment laws in 19 other states.

Rumsfeld Confirmed

Donald H. Rumsfeld was confirmed as Secretary of Defense on Nov. 10 following a brief debate in the Senate. The vote was 96-2.

Those voting against the nomination were Jesse Helms, R.N.C., and Richard Stone, D-Fla. They stated that they opposed the nomination of the “scenario” which brought Rumsfeld the nomination.

The confirmation hearings lasted two days. Rumsfeld assured Congress that he was “dedicated to a strong defense posture for the United States.”

Rumsfeld is replacing James R. Schlesinger, who was fired by Mr. Ford in a position designed to rule himself out as a Republican vice-presidential candidate but stated that he was not seeking anything beyond the Pentagon post.
ART SHOW POSTPONED
We need more entries for the Environmental Art Show sponsored by Survival. Therefore the show has been postponed until Sunday December 7 through December 11.

Two first prizes of $25 and two second prizes of $10 gift certificates will be awarded in each of the two categories: Art made with materials from the environment — found objects, native materials; and works which show appreciation or concern for environmental quality — photographs, paintings, drawings.

If you have any questions or entries contact Survival, c/o Linda Stehly, Box No. 1291, Freeman Dorm.

Two good movies coming

Sunday, November 23, "On The Waterfront" will be shown in Dana Hall. The film vividly illustrates a way of life where murder evolves more surprise than a parking violation. Shot entirely on location along the New York docks, the movie has a uniformly excellent cast headed by Marlon Brando, Eva Marie Saint, Karl Malden, Rod Steiger and Lee J. Cobb.

"Seven Samurai" (The Magnificent Seven), is considered one of the greatest epic films ever produced. With the exception of the American western at its best (John Ford's classics), the Japan film evolves, around a small farming village in the 16th century. Year after year bandits raid the community, blundering, burning and stealing the women, the defense, seven samurai are hired to protect the people.

After a long and bitter struggle the town is successfully defended. As the seven samurai ride away, there is the strong feeling that it was the farmers and not these hired men who were the real victors. This epic was directed by Akira Kurosawa and was hailed by Pauline Kael as "the greatest epic since 'Birth of a Nation.'" It will be shown in Dana Hall on Sunday, November 30.

POETRY CONTEST OFFERS

$1500 PRIZE

A $1500 grand prize will be awarded in the current Poetry Contest sponsored by World of Poetry, a monthly newsletter for poets.

Poems of all styles and on any subject are eligible to compete for the grand prize or for 49 other cash or merchandise awards. Second place is $500.

According to contest director, Joseph Mellon, "We are encouraging poetic talent of every kind, and expect our contest to produce exciting discoveries.

Rules and official entry forms are available by writing to: World of Poetry, 801 Portola Dr., Dept. 211, San Francisco 94127.
The National Theatre Institute of the Eugene O'Neill Theater Center in Waterford, Connecticut, will bring its eleventh national Playwrights Conference, composing the music for "WARREN HARDING" in 1972, and "MARCO POLO" during the 1975 season. The National Theatre Institute offers a college-credited program of intensive theater study, and is partially funded by the Rockefeller and the Palmer Faculty as well as numerous guest artists. The students move through an intense exploration of personal theatrical awareness and individuality, developing skills in acting, directing, dance, tumbling, voice, design, and management. The 2,500 mile tour will open here at Conn. and will continue at colleges, prep schools and universities, culminating in New York for two invitational performances at the Manhattan Theater Club.

National Playwrights Conference, 
by Jonathan Krum 
A new show has opened at the Lyman-Allyn Museum, just behind campus on Williams Street. It is a one-woman metal sculpture exhibit featuring the works of Suzanne Benton, who describes herself as a "metal mask and ritual sculptor." The show consists of two types of Ms. Benton's work: large floor pieces and masks. The large pieces are to be seen on the museum's walls, and the masks will be worn by the viewer. Thus, this is a living exhibit, one which invites visitors to become a part of its composition. Ms. Benton is active in many different fields of the Arts. In addition to her sculpture shows, she has participated in well over 60 theater performances and ritual processes. Her book, "The Art of Welded Sculpture," was published in December last year. Ms. Benton feels, however, that that she has gained strength as a human being through transcending its rigidity and weight through the welding torch. The show is very imaginatively installed at the museum, and the viewer can walk completely around the standing pieces. As for the masks, their mountings on stands and tables makes it easy to explore them and put them on. And a mirror at one end of the gallery allows visitors to see themselves as they take on the characters. This exhibit runs through December 15th. The museum is open Tuesday through Sunday, 1 to 5 p.m. and on Saturday, 10 a.m. to 5 p.m.

Vacation is a time to reflect and try on pieces of art in the social milieu of the museum. Ms. Benton feels that a mask is a way of experiencing the other person. She has been interested in ritual masks for many years. The masks are to be the group's own so as to actually distinguish them from the other artists of a similar style? Is there a creative urge about the artist which causes his material to be rich in new ideas? Can the viewer emotionally or is it rock music? How versatile is the artist? Can he create many different moods and adapt to new musical environments or is he limited to one mood? Can the group project a good rapport and establish many subtleties such as the basic feelings of sincerity, thoughtfulness and beauty? Stills with me? Fine. Now, once one has answered these simple opening queries, one can move into the more personal areas such as taste, what the group is playing consistent with the established mood of the lyrics and improvisation, and vice-versa? Does the group practice moderation in using materials and techniques? Does the recording stimulate intellectual energy? Can they hold interest with only the stimulus of their ingenuity? And, finally, is the artist an original? Though they might show that they have absorbed the qualities of other players, there is a considerable amount of material which seems to be the group's own so as to actually distinguish them from the other artists of a similar style.

A demonstration: There is an album out by a band named Back Street Crawler. Fronted by former Free guitarist Paul Kossof, this band tries to capitalize on the interest aroused by the other ex-Free members, especially Bad Company. Unfortunately, this album fails. The production needs work and the group is very limited in its undertakings and accomplishments. Kossof, however, stands out as a guitarist to watch. His technique is excellent and he does some nice things to beef up some rather basic songs.

The Edger Winter Group has released their newest and it is a rock masterpiece. Rick Derringer has never played better and everything about this album is perfect. "Cool Dance" is barely heard any more. Dan Hartman proves that he is for rock music yet. His songs are beautifully evocative and run the gamut from ballad to boogie. He is a fine songwriter and blends well with drummer Chuck Ruff. This is the best E.W.G. album yet and should not be overlooked by anyone. See how simple reviewing is? Have a nice vacation.
Lazarus continued from page two

Complaints about the dorm run the gamut from a poorly-functioning plumbing system to rooms being very cold in the winter months. Last year, students complained that hot water had to be "created" by various means, such as repeatedly flushing the toilets to build up water pressure. Some rooms were also overcrowded, with no remedy to the situation other than another blanket.

The previous statement seems to sum up the whole Lazarus problem. A substantial amount of money and effort would be needed just to upgrade Lazarus into a dorm comparable to the rest of the college. Even more would be needed if Lazarus were to become faculty officer; then, what would become of the 29 current dormitories that were supposed to live in Lazarus? Lazarus presents a definite, serious problem to the College. It is an integral part of the residential program, but placing it without improvements into the dorm lottery is a mistake that should not be repeated.

To the Connecticut College Community: The Admissions staff wishes to express our appreciation for the warm welcome extended to the prospective students who visited us this weekend.

The number attending exceeded our expectations but with your great response our visitors were housed, fed, and entertained.

THANKS
Campaign against B-1 bomber - opposed to the fast

Opposed to the Fast

continued from page three

Campaign against B-1 bomber - with the U.S.S.R. where military confrontation has occurred, as in the Cuban missile crisis and the Berlin crisis, the work of diplomacy saved us from military threats. The more we rely on weapons, the less we rely on diplomacy.

It is obvious then, that these corporations are not fulfilling their roles as military construction corporations.

Other A.F.S.C. criticisms of the B-1 are that "one of its uses would be to support dictatorships abroad which, like the Saigon regime in South Vietnam, need bombers to stay in power. The more We rely on diplomacy, the more we rely on weapons, the less we rely on construction corporations."

Are that "one of its uses would be to support dictatorships abroad which, like the Saigon regime in South Vietnam, need bombers to stay in power. The more we rely on diplomacy, the less we rely on construction corporations."

A.F.S.C. is confident that the B-1 can be stopped. Mass protests in the past have stopped the Anti-Ballistic Missile System and the S.S.T. Individuals can help by writing to their representatives and senators, as well as to Congressman Dodd from this district. Basketball team readies itself
For a tough season of hoop

By Saul Rubin

The soccer season has ended. Now, instead of trying to put white and black balls into a large rectangular net, we will turn our brown basketball through a smaller round rim. And to be successful, this may mean playing at a pace that will closely resemble the 1975-76 edition of the Conn. College basketball team. The hoop season is upon us.

At this point, it is hard to say how successful the team will be. Coach Charles Luce attempted to fill a void left by the departure of two key players from last year's (11-4) team. One of these players, Kevin Copeland, is back, but only in a coaching role. Key returning players include seniors guard Steve Brunetti, and forward, Mike Franklin. Both back for their fourth year, with Jeff Simpson, Jim Litwin, and Delroy Trips, a junior out for their third year.

Coach Luce, a great demands a game of experience to work with. There is also a great deal of new talent on the team, including freshman forward, Lance Land. A fall forward coming to Conn. after playing New York's best high school league.

Coach Luce is working the team hard, preparing for the season opener against U. Conn. at Avery Point, December 1. The team has been in practice for the past two weeks looking to fine tune the game. The offense, which they will stick to as much as possible in game situations. On defense, they will mostly play a man to man full court pressure if the situation demands it. Although all plans do not work out as planned, one thing Coach Luce is positively sure about is the Whaler City Tournament on Saturday and Sunday.

This is the first basketball tournament of it's kind at Conn. and Coach Luce believes it will be a good contest that will involve three other local schools. It promises to be well worth the time to attend.

What kind of season will it be for the Camels? It is too early to tell, but the team does have a height problem that could spell trouble for taller opponents. Because of this, Steve Brunetti thinks the team will have to play in the offensive game, as Coach Luce states he means that the team will play the best offense they can. Conn. will play that just much harder to win with only a great team effort. However, Steve feels that the team has the equipment to win.

The team has the equipment to win. They have sneaker uniforms, and what they will need really; they've got balls.

Gymnastics thrill a packed house

On Saturday, November 14, Connecticut College hosted the Southeastern Connecticut Gymnastics Festival at a steady crowd. The Connecticut College gymnastics team combined forces with the Mystic 5 gymnastics Center, gymnasts and guests from the Coast Guard Academy, and Pomfret to bombard the audience with a two hour extravaganza.

The program consisted of tumbling, routines on all pieces of men's and women's competitive apparatus, and culminated in a quadruple dance and tumbling routine performed by Con. men, Ann Drouillette, Marti Gwatzz, and Sue Polellack from Conn. - College.

The Mystic Community Center team, coached by Nicky Checkers, is nearly fifty strong, with boys and girls ranging from primary school to high school age. From the start, they captured the audience with their vivacity, enthusiasm, and precise skills. The girls performed tumbling passes, and gave routines on the balancing beam. Young Lea Hearnert especially shone in routines that combined aerial stunts with grace and precision.

The Connecticut College women's team performed floor exercise, balance beam, vault, and uneven bars routines. Composed primarily of freshmen and sophomores, the team included Kathy Bradley and Ann Drouillette, who looked like the strongest competitive team ever. Still only a token few, the Con. College men performed on the pommeled horse and high bar. Coach Jeff Zimmern's troupes gave fine routines on the pommeled horse and still rings. His still ring performance, which included a Russian Cross, 7-2 against Lodge, a team in the needed to mentally prepare. The men's and women's team performed on the bars, rings, and high bar.

The evening was consistent in the high quality of gymnastics checking, a major responsibility and possibly a game with bodywork signs and details increases in the 24.1975, 1:15-3:30.

SQUASH LADDER PARTICIPANTS - There will be a meeting of all those who signed up for the squash ladder on MONDAY, NOVEMBER 24, at 4:30 p.m. in Cro Main Lounge.

Spikers romp Brown

Camel icemen are hot
With the puck shot

by Chris Abbot

Connecticut College ice hockey started out in impressive fashion this year winning their first game 7-2 against Lodge, a team in the Wesleyan Intramural League. The team's goals were scored by Chip Benison, Chris Abbott, Mark McCrystal, Martin Lammert, Mark Balch, John Moore, and Paul Sirlend. Connecticut is back, but only in a coaching role. Key returning players included seniors guard Steve Brunetti, and forward, Mike Franklin. Both back for their fourth year, with Jeff Simpson, Jim Litwin, and Delroy Trips, a junior out for their third year.

Dorm basketball set
To dribble on forth

by Steve Paltin

Intramural basketball is off and running despite only six teams making the initial roster deadline. The commissioner was forced to extend the deadline until the Thanksgiving break. Because many women expressed an interest to play in an exclusively women's league last year, women will not be allowed to participate in the men's league as of now. The plays, ed. department is in the process of formulating that league. If for some reason this league does not get off the ground this year, however, then women will be allowed to play in the men's league.

The men will have two leagues this year, an "A" and "B" league. The purpose of this is to separate those interested in playing competitive games, from those who simply enjoy running up and down the court. The "A" league will have only 10 teams and the "B" another are not interested in serious basketball. The rules will vary slightly from league to league, but the program will try to appeal to as many interested students as possible.

The "A" league will be comprised of approximately ten people. As for the "A" league, it will be interesting to see the final results. Dean Evering claimed that half of the freshman class was six feet tall. They should add some even taller than tomorrow, Nov. 21.

Immediately.

Agg. United

SQUASH LADDER PARTICIPANTS - There will be a meeting of all those who signed up for the squash ladder on MONDAY, NOVEMBER 24, at 4:30 p.m. in Cro Main Lounge.

Fencing clinic — Monday, Nov. 24, 1975, 1:15-3:30 p.m., gymnasium, Crozier-Williams Conducted by Mr. Edward Richards; fencing master, Academy of Fencing, Watertown, Mass.; fencing coach, MIT; former men's National Foil Champion.

Participants — current members of the College fencing class, given two free clinics wishing to participate, contact Miss Conklin (ext. 875) immediately. Everyone invited to observe.

To include: instruction in bowing and individual coaching. Demonstrations of electrical scoring in bowing.

Mrs. Wagner: a woman with Amazing energy and enthusiasm

by Debbie Pendleton

Toni Wagner, along with being the mother of nine children all with the polka and the Salty Dog dancing. One of Mrs. Wagner's interests advanced, under the direction of donnfellow physical education department, will "Dave Kelley" Kelley added, "I..." Senior superstar Olive Kelley leads a charge flanked by Kobak and Litwin. She called the P.E. office. If you don't know one step...

Keeping limber when the cold wind blows

by Andy Rodwin

Large amounts of rich food are consumed by young hardbodies over the winter months in order to stave off the aggressive malady of bacterial viruses known to punch upon a body not sufficiently shored up to foster a healthy resistance. There is no natural outlet to release the quantities of fats and carbohydrates, teeming with calories, because the bitter cold of winter inhibits the carefree romping of the students around the campus greens: frisbees have long since been hidden away in bureaus, cobeows adorn the soccer goalposts. There are only layers of dust on the crew wheels, and flag football is at halfmast. Clarke Miller claims, "The action of running, and live to kick a soccer ball off the astro turf and into the net, not on a Thursday, at least."

Soccer ends first NCAA season

by Bear Kobak

Soccer, what can you compare to soccer? "I..." said Clarke Miller. Anyway, as Owen Prange explained, "..." The action this fall was fast and furious, but not much scoring," and it was pretty much the same for the soccer team. The season ended with a 4-7-1 record, very respectable for first season NCAA play, as coach Lessig added, "We..."

Flag football title game

To take place this Saturday

by Steve Price

In a fitting conclusion to the 1975 flag football season, Lambdin and Morrison will meet in the Super Bowl this Saturday at 1:30. Both teams have not lost a game, although Morrison has tied two games and Lambdin one. The title game will be a rematch of last year's match which took place... Robby Roberts led a fourth quarter rally to cut the lead to 28-21 with a few minutes left in the game. House then ended the..."
Winter sports: keeping limber

continued from page eleven

When inebriated, bowling proves extremely rewarding. Although the sober competitor enjoys rolling a high scoring string, his happy-go-lucky opponent usually prefers setting up the pins, often amidst pin shrapnel and rocketing bowling balls.

The pool in Crozier-Williams will be a refuge for those who favor aquatic sports. There is little structure (laps may be swum in either direction). Although water polo and other water games are allowed, canoes and sailboats have not yet been proven to be safe and convenient, and consequently must be left in the locker room.

The gymnastics continues to be popular all season long. Provided you can handle a basketball, a number of exciting variations are possible: one-on-one, Pig Around the World, two-on-two, layup drills, three-on-three, passing drills, foul shooting, four-on-four, and standard full court five-on-five with Pro-Keds, whirlies, and referes. In the face of all these choices, there will be a clan of physical discards who balk at the comfort and shelter of winter sports and who long for the uninhibited romance of fair-weather activity. For these, there is the inevitable cold-weather juggling. The sport is structurally rigid, but, insulated against the cold and wet environment, the runner runs anywhere anytime. Unlike the bush leaguer facetiously hijacking away at Foosball or bowling, the winter runner sharpens his image as the true Romantic hero.

Student government

Dining rooms — continued from page one

application for accommodations for the empty dining halls. Among those have been to use some for Coffeehouses, study areas, or recreational areas by possibly putting in pool tables. Ms. Eleanor Voorhees, Director of Residence Halls, has proposed to continue serving a continental breakfast in these halls; in that case they would remain as dining rooms. The pantry space would then be used for the dorm's entertainment. Cuts in kitchen staff are hoped to be achieved through attrition.

The President has said that he expects an all campus forum to discuss the dining situation would be scheduled in the future, while maintaining that its purpose would not be to present the student body with alternatives on the matter. When commenting on what the student's emotional reaction to centralized dining might be, he concluded that he walked a long way to get his meals when he was a freshman at Harvard — at least as far as J.A. to the complex.

Faculty governance — continued from page one

According to the proposal, a Faculty Budget Committee would "develop a faculty recommendation on Budget matters to be presented to the president and the Board of Trustees." This recommendation would be formulated after the committee met with the Treasurer, and perhaps "jointly with a Student Budget Committee."

One other committee — an Exceptions Committee — which would issue decisions on all petitions from faculty and students that involve a deviation from normal academic policies and programs, has also been proposed. This committee would also "administer academic discipline."

Among those committees to be eliminated by the establishment of the new, or revised committees are: Academic Policy, Administration, Student-Faculty Academic, Development, Trustee-Faculty Liaison, Admissions, and Schedule Committee.

Christian Weekend

continued from page eight

training they received well worth the loss of sleep, the busy schedule, and the registration fee of ten dollars.

Why do college students such as those who attended Level I consider studying the Bible worth their investment of time, money, and energy? One member of the Conn. fellowship summed up her answer: "The Bible is the best place to start to know what God has already said, what God's will is, and what God wants us to do with our lives."

The next Level I weekend in this area will be held in Amherst, Massachusetts, from March 5 through 7, 1976. The Level I weekend, available to those who have attended Level I, will be held in Kingston, Rhode Island (U.R.I. campus), from February 20 through 22, 1976. For more details and registration materials, students should contact Nancy Cahoon in Hartness.

Go home on Allegeny. And save yourself some money. We offer a wide variety of discount travel plans with big savings for groups and individuals.

The Liberty Fare. You can go home and a lot of other places besides, with unlimited travel at one low price. You get a choice of 3 plans, too: 7 days for $129, 14 days for $149 and 21 days for $179. Good everywhere we fly: except Canada.

Group 10. Save up to 33% off roundtrip up to 20% on one way. Groups of 10 ore more save when they purchase tickets 48 hours in advance and take off together. And you can each return separately, if you like. Good everywhere we fly. Reserve by February 10. Save up to 25% roundtrip. Groups of 4 to 9 save when you make reservations 48 hours in advance and fly together to and from selected cities. Stay at least 3 but no more than 30 days.

Leave before noon on weekdays any time on weekends.

Weekend. Save up to 25% on your roundtrip ticket when you go and return on a Saturday or Sunday.

For complete information on all of our money-saving discount travel plans and right reservations, see your Travel Agent or call your local Allegeny Airlines reservations number. And get ready to go home or anywhere else.
