An Annual Community Chest Drive Opens Officials, Nov. 6

Committee Is Led by Betty Dahlgren '45; Dr. McKee Is Adviser

This year the annual Community Chest Drive was opened on an Amalgamation meeting of November 6, 1944, and will end officially on November 12.

The funds will be distributed among five major groups: the World Student Service Fund, which is a world wide organization enabling foreign students to attend college abroad; the Student Friendship Fund, which is a scholarship fund, helping students to attend this college; the National Red Cross, which helps Children and a miscellaneous group, which this year has included such organizations as the Valley YWCA and YMCA, Mission House and others, and the Boy and Girl Scouts.

Printed pledge cards with the names and various organizations included in the drive, will be given out by the Community Chest representatives in each dormitory. It is planned to contribute and have the student distribute the pledge cards. Each dollar received is to be divided equally among the five groups.

The goal this year is $5,000, and from past experience here on campus, it has been ascertained that an average contribution of $250 was received at the goal. The rising "mercury" in the goal thermometer in front of the Administration Building,二楼, will show the progress daily being made.

The members of the committee this year are as follows: Betty Dahlgren, Miss Mary Hopkins '46, assistant chairman; Anne E. Armstrong '45 and Barbara Morris '46, director of public relations; Miss Mary McKee, faculty adviser.

Choir Growing In Popularity And Magnitude

by Margaretta Goe '45

Within the last three years the college choir has become one of the most popular and active organizations on campus.

In view of this it is interesting to note that it was just two years ago that Prof. Arthur C. Cutler was authorized to take charge of the Music department and all its activities. Since then the choir has grown 45 members and sang at the regular Sunday vespers, as well as at several concerts.

The next year, '43-'44, the choir gained twenty new members, and the group was divided according to the voice means of which each person had. Two of the sections reformed, and two new sections were formed, so that the choir now numbers sixty, and operates in all three of the voice means.

This was appreciated by the committee, and was a very good start for the choir. The three exhibit buildings, several of which were attended, were opened in the fall of '44, and the whole section was invited to attend. The rising "mercury" in the goal thermometer in front of the Administration Building,二楼, will show the progress daily being made.

The members of the committee this year are as follows: Betty Dahlgren, Miss Mary Hopkins '45, assistant chairman; Anne E. Armstrong '45 and Barbara Morris '46, director of public relations; Miss Mary McKee, faculty adviser.

Student Forum Speakers

Prof. J. Hromadka From Princeton To Speak at Vespres

The speaker at the 7 o'clock vesper service Sunday in Hancock chapel will be Professor Joseph L. Hromadka, guest professor of English and history in Princeton theological seminary.

Born in Moravia, Dr. Hromadka studied Theology in Vienna, Basle, receiving his Ph.D. from the University of Prague. After spending eight years in Englanders may not realize the Englanders may not realize the...
The Time Is Now

This is an important year in the history of the United States. Not only is it the year in which we hope the war will be won, but it is also the year in which the foundations of peace must be laid.

In both of these objectives the government is of supreme importance, and this year with election rights the college people have an opportunity to influence the character of the government which will win the war and ensure the peace in conjunction with the Allied nations.

We all know that it is the present of the people which sends a president into Washington, and we all know that it is both a privilege and responsibility to make the choice between candidates. In order to make an intelligent choice between candidates one must have an opportunity to see and hear the candidates. We cannot be guided by our emotions, but we must be informed.

There are statements of merit in the platform of both parties. There are statements of objective and idealistic plans. Now is the time to make a thoughtful and careful analysis of the platform material and of the background of the Republican and Democratic parties.

Social Reform Considered

Editor's Note: This article, which is in the last section of the page, is a reminder of the need for continued social reform.

Social reform is a phase of domestic activity which, like education, is essential to the full development of democracy. The social problems of America are not merely those of the passing generation but the generation to come. It is in the interest of the future to give attention to social reform at this time.

We are all aware of the duties which lie before us, to see that the fundamental rights of all are secured, and that the social structure is adjusted to the needs of the time.

The Editor of the "News" do not hold such opinions, but they believe that the opinions expressed in this issue are those of the students who have placed it in the column as an organ for the expression of those opinions. They shall not be regarded as the opinions of the college.

Dear Students:
The sooner we assert our rights, the sooner we can change the political fortunes of the country for the better, and the sooner we shall have a government that will serve the people.

We shall therefore encourage the Free Speech movement and will do all in our power to bring about a reform in the political system of the country.

Sincerely yours,

Jean and Joan '47

1490 On Your Dial
Puerto Rico, Madiera, U.S. Served as Home for Student
by Bryna Samuels '46

"In Puerto Rico boys and girls have it easy. They can dance up a storm with a charabanc," Gatsby thought, isn't it, but Lygia would protest, "I have been to New York with a chaperone." Puerto Ricans don't go dancing always with their parents and come home with their parents. If a boy likes you very much you can invite him in your house and talk to you for a few hours, but mother and dad are always in the room with you too!"

Has Lived in Madiera
Lygia can tell you many things about Portugal and where she has lived there for six years. And if you are interested you can read a book written by a native Puerto Rican. Lygia has so much to tell you about Portugal and what it is like.

You see, Lygia was born in a little island just south of Puerto Rico where they have the same climate and they don't have to worry about the weather. Her parents met and married in Madrid and they lived there for a few years, but they didn't have any children, so they returned to Puerto Rico, where Lygia was born.

During the war, the English influence was strong, and as a result Lygia also learned to speak English. She is fluent in both languages, and today there is not a trace of an accent in her perfect English. Funny part is that in her home town in Forest Hills, L.I. she speaks almost nothing but Puerto Rican. Oh yes, she does speak Spanish with her sister, but her mother won't allow Spanish to be spoken at the dinner table for fear that she and her sister will forget Portuguese, the language of her ancestors.

Lygia was too young to go to school in her native country, but she landed in Puerto Rico her education there began. In her first grade all of her subjects were taught in English, except for her native tongue, which was taught as a native Puerto Rican. Her other teachers were native Puerto Ricans, as well as Spanish pupils who taught her in her second grade.

Puerto Rico is a very festive place, and during the Carnival season, Captain D'Al, a Puerto Rican, says Lygia. Carnival Season comes right before Lent, and at this time the whole island takes place at that time, and the streets are beautifully decorated and it is a very festive season and is celebrated much as it is in the United States.

Life Easier There

Lygia says that life in Puerto Rico is easier than it is in "Lygia" -- Page 3

Trend of Classics Shown at Meeting

Dr. Edwin L. Miner, assistant professor of classics, attended a meeting of the American Classical Association held in conjunction with the New York Classical Club.

"The main speaker at the meeting was Miss Dorothy Thompson, the famous columnist. Miss Thompson emphasized the importance of the study of Latin and she urged that the schools be truly educated with Latin."

French Club Shows Movie For Benefit

Last Thursday evening in Palmer auditorium, many students of French, along with other enthusiasts, assembled to view a sponsored movie series, presented at the showing of "La Marcellina." The movie was sponsored by the French club for the Belgian Student Relief fund.

The sad outcome of the story is that he is wounded and dies in the arms of the girl, during the Nationalist's siege on the king's palace.

Dear Editor,

The students of C.C. are constantly being reminded of the privileges and responsibilities attached to a college education. Many of us fear that this responsibility should be shared more fairly by the faculty, some members of which are deliberately negligent in various ways. We know that tests are given for our own benefit, but that the grades received on these are not supposed to be the ultimate aim. Members of the faculty who delay unnecessarily in returning tests, sometimes even batchering to explain their delay, defeat their own purpose, for if a test is returned after it was taken, the student has lost interest in why she has gotten the mark she has, and never bothers to look over the test. This lack of interest is quite justifiable in such a case.

When sophomores are choosing their major field, they are invited to meet the instructors in that field, and a discussion of major courses at a faculty member's home held. This is an excellent idea, but why should it be dropped when one enters one's junior year? I think if the plan of meetings of majors and faculty were adopted, there would be a very favorable response; certainly a plan of this kind does not stop with the courses of the department, but could be extended to any faculty member to whom the student wishes to speak.

Twenty student volunteers from this college are working on a research project, with such titles as home economics, sociology, government, etc. These students are being supervised by Mrs. Mildred Florence Warner, Miss Marjorie Chaney, and Miss Katie Hill. This group does intend to keep in touch with selected homes in Norwicht.

The volunteer group, which I have heard of about four hours of training for this work, will study the structure of the home and about the house as a dwelling unit.

Dear Editor,

The sophomore class in the Department of Home Economics has decided on all sides of criticism of its desire to modify the curriculum, but not to change.

Granted that CC rings are clothes, and their desirability as a whole is positively overlooked, but the high standards of Connecticut College which are being maintained by the student body are their responsibility too. Let's work together at it.

reform and increased protection for children.

Actually he has endorsed most of the ideas of the Roosevelt domestic policy, but he has added a great deal of his own. He has talked with honesty, with trained and competent men and with faith in the people and in democracy.

What has Mr. Dewey done during his term as governor? There has been legislation to add the re- 
turn of the American boys to change their zach. They were for the most part deeply disappointed when the young men who had been in the military services returned to find that they were no longer on a scale for regular pay and were instead working for the government. This caused a lot of problems and was a source of frustration for many of them.

In labor and industry, there were also efforts to cope with the wartime problems of the Wagner 

The workers' compensations have been liberalized. The social security act was passed in 1935. If that same year, the social security program was set up and has continued to be expanded. The program has helped many workers in New York, and continues to do so. It has also extended to other states.

Caught on Campus

In an attempt to get some feature stories for this week's issue, Beate Wells '45 got an assignment to write up the lobster hatchery in New London. Friday afternoon she beheld the basin to see what was to be seen. Arriving in the mid-afternoon, she thought of her hero, that the roof of the hatchery had caved in due to hurricane! P.S. The hatch didn't hatch!

In the vein of mid-semester tests comes a story from the Saturday section of the physics 1-2 class. The blonde, one Daphghan wouldn't be around Saturday morning to give them their test. In the mad attempt to study they never stopped to wonder who would give them the exam. Saturday morning they walked in and at the sound of the 10 o'clock bell, Tony, Bill hall Junction, arrived on the scene, and passed over the blue books, and tests. After that it was do-or-die.

"This is lovely way to spend a Saturday," someone up on the third floor of Freeman last week, described Tony, who was in for the Henschell, Mary Bassett, and Lole Marshall, all of whom were wrapping a package to send to Clarice Roland, Lynne who brought his leg in the Coast Guard Army hospital.

The package contained everything from a yo-yo toy to crayons and coloring books. To complete the package and to make Rocky feel important they included a purple heart certificate. Returning Service Men to Benefit by New Yale Program

Yale university has completed plans for the establishment of a program of collegiate studies for returning service men, effective immediately.

Preparation of the program culminates months of planning and research, initiated by the desire to make service men feel that the mistakes made in college plans for men back from the war will not be repeated after this war.

The new program provides a one-year intensive course preparing return service men who have never been to college, or who have attended college for less than one year, for entrance into the junior or, in exceptional cases, the sophomore year. Those who have had at least one full year of college, or enough preparation to enter into one of the professional or liberal arts colleges, may receive credit for their senior year.

Special arrangements have been made for students returning at irregular intervals, with each student encouraged to "go as fast as he can to be able to.

In preparation for entrance with advanced standing, the returning service man who has not been to college, or who has attended college for less than one year, will normally take one full year course of study in college.

A typical curriculum to prepare a man for a full year of college in one school would include courses in American history, in either sociology or psychology or literature, in either government, philosophy or logic; and in science.

In preparation for the study of medicine, the curriculum would consist of three courses in chemistry, an elementary and advanced course in biology, and a course in physics together with allied subjects.

Under a general rule covering a large number of returning service men, the appropriate bachelor's degree will be awarded to a man who has had two successful years of college, service in the armed forces, and a year of creditable work under the new program. All men will receive a certificate of work accomplished at the time of application for the degree.

Returning service men will form the major portion of the Yale undergraduate body for several years after the war's end and will receive the privileges at attendant thereto.

New Physician Is Ready With Smile, Advice

by Jane Rutter '46

The oxygen mask, stomach ache, coughs, colds, hay fever, annual malaises and all other campus ailments that eventually find themselves within the inner sanctum of the C.C. infirmary now find themselves being taken care of by a new college physician, Dr. Marion Leonard.

Dr. Leonard took over her new duties July 1 during the 1944 summer session. She came to us from New Haven where she was a member of the faculty at Yale university with the rank of associate professor.

Dr. Leonard received her B.A. degree from Smith in 1926. Since 1932 she received her M.A. from Yale, and it was also from Yale in 1933 that Dr. Leonard received her M.D. degree. The following year, she served on the staffs of the Yale infirmary and the Stanford university hospital in San Francisco. Since 1932 she has been a member of the faculty of Yale.

Dr. Leonard is not the only member of her family who is a doctor. Her husband, Major C. M. Robinson, is a. also a doctor, and he is serving with the Yale medical corps in the Pacific.

Up until this summer, Dr. Leonard has never seen CC's campus except at night. When daylight phone call on her first morning when Dr. Leonard was here, she confessed that she certainly did not know what to expect! Dr. Leonard said that she loves to work with girls and is expecting her stay at Connecti cut to be a pleasant one.

Dr. Leonard is one of those people who seem to inspire good feeling between patient and doctor. She's a far cry from the stern thermometer man whose sole profession in life is to kill or cure. People just can't help liking her, and she has a ready smile and words of advice for those who come for curs. Dr. Lernan in young, of medium height, has a light brown hair and definitely fits into the scheme of things here at CC.

Science Club Officials For Year Are Named

Jayce MacFadyen '46 was elected president of the Science club at a meeting held Thursday, October 26. Other officers include Frances Epa MacMurray, president-elect; and John Al- len '46, treasurer.

The Science club incorporates the efforts of the physics, home economics, chemistry, history, and zoology departments under one organization, thus correlating the scientific activities on campus.

Blood Bank to Have 93 Donors Among Students

Nine-teen students have signed up for the Blood Bank under War Service committee.

The blood bank is going down to the Second Congregational church and will be driven back to the college by members of the Motor Corp. Students are asked not to go on errands afterwards, but to return directly to campus.
