Uncommon Recognition

The “common man” was the target of a recent address by Herbert Hoover to the students and faculty of a western American college. His verbal arrows were aimed at the core of what he considers to be an erroneous concept in the minds of the American people. Mr. Hoover declared that “great human advances have been brought about by mediocre men and women.” This statement in itself is startling; the implications of his “common man” theory has been all too willingly accepted. Hoover, in a private interview, has stated that he is not at all disturbed by the criticism of his thinking. In fact, he sees it as a chance to give a new thought to the common man. For it is to be applied to the everyday man of which the real changes and improvements in every area of human development since time began. Great leadership is the faculty of uncommon men and women according to Mr. Hoover. To whom have we looked for leadership? Fortunately, the mere list of their names is too long to mention here. Fortunately, also, we need mention only a few in order to be aware of the debt we owe.

Millions of people revere the name of Jesus Christ and the inspiration of his teachings to the common man; no common man has the power to revolutionize mankind’s thought and way of life. Abraham Lincoln is a name forever engraved on the minds of Americans. Perhaps he came from the midst of the “common people”; but he, himself, was no common man. George Washington rose above man-made barriers to promulgate equality for all. He is a conspicuous example of the common man.

Mr. Hoover advocates in his speech that it is the job and gratifying practice of American colleges to train “uncommon men and women among our people.” Are you a malleable trainee?—G.L.

EXAMINATIONS Give Opportunities for Careers in Gov’t

Specific Educational Requirements Needed by Seniors Applying

The United States Civil Service Commission recently announced its popular junior professional examination for sum and junior agricultural assistant examinations.

This year the 1:00 junior management assistance examination was given. The more able were selected from the examinations offer the attractive beginning salary of $2,000 per year and are located in Washington, D.C., and throughout the United States.

These examinations are particularly sponsored for seniors graduating by June 1949 and offer an opportunity for a promising career in the federal service in their own special field.

International Bill of Rights Might Extend U.S. Democracy

by Mary Meagher

President, the Social, Humanitarian and Cultural Committee of the General Assembly of the United Nations has issued a new bill of rights.

It affords the right to freedom of conscience and religion. and assembly the world over. It affords freedom of speech and assembly to the general public. It is a covenant by the signatories of the UN, it can become the means of realizing a more functional democracy here as well as in the hands of the states and the UN is the means.

The declaration is to be carried out in the United States. Congress can make no laws concerning individual or groups specifically in the UN and assemble the world and the world may order what it may to the UN. But the United Nations is the world and the UN.

Congress has found itself stymied on more than one occasion in attempts to pass legislation on poll taxes and other forms of discrimination in the South, because of the fact that it can make no laws concerning individuals except in relation to its specific duties and powers. The area of individual rights, according to our constitution, is not an area in which the federal government may legislate.

However, according to the constitution, and its interpretation throughout the years, the President has power in foreign affairs. There are no explicit limitations on what he may or may not write into law as a treaty, it is at his discretion.

This creates interesting speculations about the affect of the bill on US foreign policy. If the declaration is adopted, and is signed by the President, it becomes the United States International Bill of Rights law and is enforceable in our courts.

College Legislature To Meet December 13

Miss Park Speaks On Super-Church Needed in Future

Throughout her vespers sermon on the World Council of Churches on Sunday evening, December 5, the Bishop of Chichester, the Most Rev. George Balderston, emphasized the need of the world for a reintegration of Christian principles in a new form, applicable to the confused nations of today.

In August, 1948, Miss Park explained, the World Council of Churches met in Amsterdam; it represented a convention of 190 churches of 43 countries committed to an interpretation of the ultimate meaning of the church today. Missing from this conference were the Ecumenical Council and the National Church of Russia.

Purpose of Meeting
Why did these people meet? Perhaps Miss Park suggested the answer in a statement by the Bishop of Chichester who said that the church is running out of the century and is living in a world too strong for a divided church.

An important principle announced by the Council was the need for cooperation among the churches, or the establishment of a super-church, Vital to the establishment of unity in the church is the question of the order of society. Whether the church or the common man should inspire this is now being asked.

In order to the conference the fact that it brought these differences together and out into the open. Never of these issues or lines of approach that of the Christian world will unite.

That the church must first recognize its own guilt and, second, the differences in national philosophies were the broad conclusions of the conference. The time of all-against-all fighting is over and it must act quickly to fill adequately its vital role toward the solution of the urgent issues proposed by political and economic conclusion.

Axinn, Ober Judge Nation's Symphony

by Caroline Axinn and Rachel O. Axinn

Connecticut college was host to the National Symphony orchestra on Thursday evening, November 25, for the second of its 39 tour concerts. The National Symphony under the direction of Hans Haililey in a group composed largely of young musicians. This group, a three-year-old, obtained an admirably high degree of unified feeling.

They began their program with a Suite by Purcell. In the formal gracefulness, Air, and in the Allegro the antiphonal play between the harp and the violin section was especially lovely. Mr. Angel Reyes was the soloist for the Mendelssohn Violin Concerto in E minor, and though we felt he took him a while to relax we must realize the extreme virtuosity demanded of an artist to perform this work.

The violonist has developed great versatility in bowing techniques, being able to shift with ease that man is accustomed to favoring passages to pizzicato parts.

The second half of the program comprised was selections from Wagner's Tristan and Isolde and the Meistersinger. Wagner's style is such that the individual is more or less forced to interpret it as he sees fit, while always keeping in mind the composer's directions.

UWF Conference at New Haven

Deemed Success by Delegates

Seventeen delegates from Connecticut college attended a conference at UWF at Yale last weekend.

The delegates, who represented colleges over the Eastern Seaboard, gathered Friday night in New London to hear the opening address given by Jack Balder-
ston, atomic scientist, and Edgar A. Mowrer, noted news communi-

ator. Mr. Mowrer, who worked on the Oak Ridge atomic project, spoke from the scientist's point of view on the possibility of world government. He said that the Baruch Plan is the best possible way to protect an "atomic Pearl Harbor," whereas the United Nations system that can prevent war is world government.

War Fosters Patriotism

Mr. Mowrer brought up the fact that war is accustomed to favor

ing war, for war seems to bring out the best in man, or what is known as patriotic fervor. He said that it was necessary to make man overcome this attitude toward war if he is to be set up as a world government.

Phyllis Clarke, president of the campus chapter of UWF, and Mr. Mowrer's speech was impressive in his positive, rational approach.

A report on the findings of this conference will be submitted by February 16. Following the meet-
ing a dance was held for the dele-
gates.

The conference was brought to a close Saturday night, the student UWF chapters in Connecticut met to set up a committee of five, the purpose of which is to study the problem of setting up a state student council. A report on the findings of this committee will be submitted by February 16.
Spanish Club's Party To Have Gifts, Songs
The Spanish club carefully invites everyone to attend its Christmas party, to be held on Monday, Dec. 13, at 7:30 in the gymnasium. Members of the club will lead the singing of some Spanish Christmas carols, and others will entertain by performing some Spanish-American dances. In true Spanish custom, everyone will join in the breaking of the piñata, which is a suspended, decorated jar, containing fruit and surprises.

Cobbledick To See Midwest and South For CC Candidates
Dr. M. Robert Cobbledick, Director of Admissions, left Nov. 7 for a six-week tour of several Spanish-speaking countries and others. He is visiting schools, both public and private, who have, or plan to send girls to Connecticut college.

The purpose of his trip is to speak to the school heads and in some cases the students of these schools about Connecticut. This contact creates a personal relationship that makes it easier to interpret and understand the college. Also, it helps place a candidate correctly.

A similar trip made last year to the West Coast proved successful and it is hoped that it will be possible to continue the practice.

MARY BILL BROOKS
by Olga Krupen

It is a little surprising to meet Mary Bill Brooks, college song leader, for the first time. That is because she is all that you expect of a college leader and, somehow, much more.

Perhaps it is because you discover with surprise that, behind the friendly welcome in her eyes, those blue-gray eyes are serious and contemplative.

Her friends would rise in protest if you were to infer from her sometime philosophical manner that Mary Bill is not a lot of fun. Her popularity with her college mates needs no further proof than her selection as song leader of her class for three years.

"Humman appeal" was the way her friends summarized Mary Bill's personality—her enthusiasm, willingness to help people, sympathetic manner, her love of people. With Mary Bill her "I love people!" was a simple affirmation of her philosophy. She believes that every person has so much to offer anyone who is willing to listen that she spends a great deal of time just talking with people.

A French major because she thinks that it is naturally advantageous, Mary Bill would like to do both that of dean of students: guidance in education counseling, religious education. She is going to continue her training after graduation, perhaps at the New York School of Social Work.

Mary Bill's interest in religion has led her to be an active member of Religious Fellowship, serving as secretary-treasurer in her freshman year. Her enthusiasm for sports, especially hockey and basketball, is indicated by the fact that she is one of ten seniors voted "most valuable." Athletics have been a main extra-curricular activity for Mary Bill. She has been a member of choir and the Glee club for four years and is co-director of the Double Octet.

As college song leader, Mary Bill is responsible for planning all community singing, including Moonlight Sings, Competitions.

As a student of the morphological field of human relations, Mary Bill should be equipped for the work with people she desires and its attendant gratifications.

Miss Heining Gives Research Findings on Iris Hybriddity

Assistant professor Katherine Heining of the botany department have a lecture December 1, on "The Cytological Aspects of Hybriddity."

Miss Heining described the technical aspects of experiments which she had performed concerning the fertility of dwarf iris and tall bearded iris.

Dwarf iris is a very short plant. One flower, bearded iris, on the other hand, is tall, blooms late, and bears more than one flower. When dwarf iris are bred with the tall species, an intermediate hybrid is produced which will have some of the characteristics of the parents.

What particular parental characteristics the hybrid will have is unpredictable. It is hoped that a species may be developed which will bloom later than the dwarf and earlier than the bearded variety, which will be of intermediate height and which will have more than one flower.

Another hoped-for species is a dwarf iris which produces more than one flower. One of the main difficulties in producing such a species is the hybrid which eliminates the possibility of cross breeding. In her experiments Miss Heining waswarned of the cause of the sterility of these iris hybrids and hopes to find a way to eliminate it.

The Winnah

Mr. Strider has again distinguished himself. Several weeks ago, the hero of our story took it upon himself to look into the matter of the weekly Canada Dry football game. Seeing the fine name of Harvard opposing Yale for the coming Saturday, Mr. Strider took pen in hand and staunchly called his alma mater to the career of the blue.

What was his surprise some time later when he heard himself declared owner of the pool! His loot from the victory includes some elegant haberdashery and a pipe that doesn't tip over and spill ashes on the rug.

Pledge Quest

In case you hadn't heard, those demoted males who invaded the dining rooms and peace of mind of our dormitories last Saturday were out proving their worthiness for initiation into the hallowed fraternities of our neighbors back in the hills.

KB was served by one gallant nearly attired in tuxedo and black tie. In his eagerness to be of service, however, our friend forgot his shirt. Another pledge brought a 'female' into the dining room for an illustrated lecture on what the well-groomed young lady needs in the way of cosmetics for a home-party weekend. He bestowed complimentary lipstick, leg paint, hair rinse, and a tube of lip upon the girls of KB.

Middle Weber was approached for an autographed token of recognition. Yet another pledge went home bearing ten different lipstick shades on his brow, as bestowed by the ever-gracious girls of CC.

You Saw Red River?

You read last week's Life? Then you'll understand the reaction of our friends in Freeman to Montgomery Clip's. They wrote him a collective fan letter. But not an ordinary one, they hasten to assure you. It was strictly a congratulatory note on the excellence of his acting.
