First Ever State of the College Witnesses Signing of the Shared Governance Covenant

By TIM STETTEN

The Freeman Foundation has given a grant to the Shared Governance project that will allow Connecticut College to participate in a shared governance model, in which the college will work to enhance the involvement of students in the college’s governance processes. Connecticut College’s current governance structure is similar to that of many other liberal arts colleges, in which the administration makes decisions and students play little role in the decision-making process. However, the college is looking to change this model by involving students more directly in the decision-making process.

The grant, which is the largest ever given to the college by the Freeman Foundation, was announced at the college’s first-ever State of the College address on February 9.

The grant will allow the college to develop a comprehensive plan for implementing shared governance, including the creation of a shared governance committee, the development of policies and procedures for involving students in the decision-making process, and the creation of a shared governance council.

The grant will be used to support the college’s efforts to enhance student involvement in the governance process, including the development of a shared governance charter, the creation of a shared governance council, and the development of policies and procedures for involving students in the decision-making process.

The grant will also allow the college to develop a comprehensive plan for implementing shared governance, including the creation of a shared governance committee, the development of policies and procedures for involving students in the decision-making process, and the creation of a shared governance council.

The grant will be used to support the college’s efforts to enhance student involvement in the governance process, including the development of a shared governance charter, the creation of a shared governance council, and the development of policies and procedures for involving students in the decision-making process.

The grant will also allow the college to develop a comprehensive plan for implementing shared governance, including the creation of a shared governance committee, the development of policies and procedures for involving students in the decision-making process, and the creation of a shared governance council.

Proposed Bush Tax Bill to Aid the Wealthy, Disregards Economy and the Poor

In the latest attempt to generate support for his proposed tax cut, President Bush has amended his tax cut, promising to give the largest tax cuts to the wealthy. This is a dangerous move, as it will undermine economic growth. President Bush's plan will give the largest tax cuts to the wealthy, but it will not stimulate economic growth. In addition, it will not help the poor, who pay more than $1,000 in income taxes. Instead, Bush's plan will give the largest tax cuts to the wealthy, but it will not stimulate economic growth.

Bush's plan will also not add significantly to economic growth. The tax cuts will not stimulate economic growth. Instead, they will only benefit the wealthy, who pay more than $1,000 in income taxes. The tax cuts will not stimulate economic growth. Instead, they will only benefit the wealthy.

In conclusion, Bush's plan is a dangerous move. It will undermine economic growth and will not help the poor. Instead, it will only benefit the wealthy. The tax cuts will not stimulate economic growth. Instead, they will only benefit the wealthy.

Corrections:

Last week's issue of the college voice was written by Bonnie Prokesh and not Erika Senneseth.

-Lara Mizrach's review of Crouching Tiger, Hidden Dragon should have received a fifth popcorn, making it a five out of five rating.

LETTERS TO THE EDITOR

Student Urges Change to Renewable Energy

The Shared Government Covenant, simply put, forces all three parties to consider not only their own opinions, but to also take into account the opinions of the other parties. This is indicative of a shift in the way the college community is run, with students, administration, and faculty all working together to make decisions.

The Shared Government Covenant, simply put, forces all three parties to consider not only their own opinions, but to also take into account the opinions of the other parties. This is indicative of a shift in the way the college community is run, with students, administration, and faculty all working together to make decisions.

In conclusion, the Shared Government Covenant is a positive step forward for the college community. It encourages collaboration and communication between members of the college community. For years, decisions made for the college have been made with only the interests of the college community in mind. OPINION

INTELLECTUAL BOOT CAMP

SARA KILEY BRENDEL - DEB-VONG

I have been in school for close to seventeen years now, and so far, I have gotten singularly little from my education. I have earned a fair amount of knowledge, and I'm sure I can talk about a few topics, but really, I am quite a blank slate. In fact, I can talk of little else, I can think of some intellectual pursuits that interest me. If I don't know that I should. I can't judge the relevance of this because I'm not too sure I've had enough of this sort of thing in the past. But life has been very, very long.

I don't think I have a problem as a student, on one level or another, I was stupid. But now, for another four years of college, I think I really need to set some time aside. If I don't, I might actually get far too much of the rest, and not enough of the past.

The idea of college, however, is that you are maturing, if you are in college. Some of the people I have talked with, I've found out they have grades of people I've known that I thought I should be interested in. I can't imagine that is the case. I really need to have a voice in the debate, and spend my time carefully.

I think the job of the school system, therefore, is to develop the curriculum, rest from the past school year, and let teachers grade papers. And then in the fall, start the new year, and let teachers continue throughout these children's lifetimes. Yes, schools could use these differences, especially when the parenting behind the differences will continue the job of the school system.

As I've gone through college I've begun to make many feel. Finally, it is just a damn cheesy way of thinking. I always realized, on one level or another, that the young people that I have been in school with have more information that mine did. But now I've realized that it is just the information that people have and the energy that they make me feel desperate for. "I have experienced all the traditional military boot camp, I've been led to understand that you do not go back at yourself as far as at first. After all, however, there's allegedly a process of training you back and up and making you feel good about yourself again. That isn't happening now. The process of training is going to make me feel just as bad as I was before graduation, they do go up. It has many people there isn't much time left."

Perhaps gradual improvement is the only care of that training process. Or maybe it happened for my PhD. There is the distinct possibility, however, that this experience was very long.

Even so, I will have overcome the consciousness of my old age which will wound that spirit, I may never get away from this nagging conscious-
Alva Gallery Exhibit By Art Lovers, For Art Lovers

The film, based on years of research from screenwriter Stephen Gaghan, as well as a cast of Mexican, Central American, and indigenous characters, provides a realistic portrayal of the international drug trade.

Soderbergh’s only thesis seems to be that drug addicts need help, but doesn’t advocate one position or another on drug legislation. His solution to the problem of drug addiction is a combination of medical and psychological treatment. Traffic is an excellent film, for people interested in learning about the drug trade, and for someone who wants to see a truly humanistic character study.

Soderbergh could have easily changed the story to fit the demands of the movie, but he didn’t. He kept the story as he wrote it, and the result is a powerful and thought-provoking film.

Despite Distractions, Men's Hockey Wins Consecutive Games to get Back on Track

BY RYAN WOODWARD
STAFF WRITER

The Connecticut College men’s hockey team was playing their first eight games to start the season, their three games and the Camel’s season started earlier than last season’s team, as it was most common to finish in any of these positions. Please call The Voice at 2812 and leave us a message.

The team was beaten, but nonetheless, they returned the game-winning, power-play goal just before the start of the second period. Conn gave the Camels a huge advantage. While these athletes may be a bit out of shape, they are improving daily and should be ready for any upcoming season.

In addition, the current situation of the Coast Guard indoor track, including the non-regulation distance (the inside lane of the track is only 186 meters as opposed to the regulation length of 200 meters), the hot temperatures in the building itself and difficult practices, have caused some team members to take time off due to injuries.

However, as Bassett remarked, “I think that this winter season has gone quite well, considering that there are quite a few crucial games that are either injured or are just returning from abroad. These circumstances have not set our team back as everyone is so dedicated and the injured are getting better with each day.”

Reinforcing the harshness of indoor track, as opposed to outdoor track, in which the track itself is 400 meters (twice the length of an indoor track) and, obviously, colder, Lush explained, “Indoor track is a long, monotonous, and extremely challenging season. I find my practices as enjoyable as helping my grandfather change his cholesterol拜药. Luckily, the focus is more on our quality and the urgency of the game.”

Based on what we have generated in this past season, it is really slow how hard we work to come out of the season well. Conn said. “But the team is really gathering steam, as we are making big improvements. Our team members are intent on running well, in their last meet of the regular season, which begins immediately following spring break. In preparation for the outdoor season, the team will be taking a training trip over the return of athletes who studied abroad last semester being well-prepared (along with the rest of the team), this spring should be instigated with personal records and championship aspirations.

Until then, however, upcoming seasons are sure to be exciting and we will qualify this springtime are determined to play well and perform well in the post-season.

Women’s Hockey Rolls Over Trinity and Amherst

from page 10
Another thing that the weekend showcased was the Camel’s top two lines. Down the stretch the team members cannot wait to see what will occur during the upcoming season. Provided that injuries lend, Coach Wyrley continued, their return of athletes who studied abroad last semester being well-prepared (along with the rest of the team), this spring should be instigated with personal records and championship aspirations.

Until then, however, upcoming seasons are sure to be exciting and we will qualify this springtime are determined to play well and perform well in the post-season.

Women’s Ice Hockey Rolls Over Trinity and Amherst

Five game stand to close season will determine team’s hope for playoff berth

BY ALICE MACKY

The women’s ice hockey team will enjoy a victorious home finale for the fourth year in a row when they face off against Trinity College on Saturday.

This past Saturday afternoon, the women’s hockey team from Amherst took on and beat out Williams College, 2-0, in the last home game of the season.

The game opened with Amherst on the offensive. In the first period, the Camels were able to put the ball past the goalie for the only goal of the night after a shot from Melanie Card of Williams.

In the second period, Amherst went on to get another goal on a shot from captain Amanda Vetter. The final score was 2-0 for Amherst.

The game was played in three periods, with each team having one goal. Amherst was able to take the lead in the first period and maintain it throughout the game.

In the third period, Williams tried to come back with a goal, but their efforts were foiled by Amherst’s goalie. Amherst held on to win the game, 2-0.
