A. KELLY REPRESENTS COLLEGE AT GENEVA

Reports Experiences

This summer at the Student's Union there were about forty students representing many different countries; and when one takes into consideration the Zimmermann School of International Relations (which we attended) there were over two hundred students representing about thirty countries; consequently, we had a great opportunity to meet and know students from all parts of the world. The purpose of the Union is to bring students from all parts of the world together in order that they may get to understand each other and all the problems of the globe, with international relations.

Intellectually, our summer consisted of lectures at the Union and at the Zimmermann school; attendance at the Disarmament Conference and at the League Assembly; and discussion groups among the students. Since the intellectual aspect of a student's life must be taken up in chapel at least, I will say that, intellectually, the summer was very inspiring and thought I think all the students went home with a much broader and more understanding attitude toward many international problems our summer was by no means all on the intellectual side.

So, Geneva is wonderful. First, it is in the center of things so that one can take many trips from the city. While I was there I spent two weeks in Italy, a few exciting days in Paris, and.

President Blunt Speaks On Her Trip Abroad

At chapel on Tuesday, President Blunt spoke on the conference of the International Federation of University Women which she attended in Edinburgh, Scotland, this summer. This Federation is made up of the Associations of University Women from more than one thousand colleges in different countries, with a membership of about fifty-five thousand women. It aims to promote real scholarship and real international understanding. President Blunt said, and for this purpose offers fellowships for study in different countries. At the present time there are over five thousand students in all over the globe, with a membership of about fifty-five thousand women. It aims to promote real scholarship and real international understanding. President Blunt said, and for this purpose offers fellowships for study in different countries, at present there are over five thousand students in all over the globe, with a membership of about fifty-five thousand women. It aims to promote real scholarship and real international understanding.

The Federation is a branch of the Disarmament Committee of the Women's International Organization at Geneva, of which Mary Louise Berg '23 was chairman. Emma Howe ranked number one, and Edith Richman ranked tenth.

NEWS TRY-OUTS

The following people are trying out for News. Each week the names of those who are still being retained as "heelers" will be published. Those names that have been dropped from the list will be the ones that have failed in the necessary requirements.

Aileen Gattinger, Bobbi Hall, Caroline Hildreth, Elizabeth Keep, Elizabeth Kintrip, Selma Leavitt, Mary MacMam, Amy McNutt, Alma Nichols, MaryLouise O'Connor, Margaret Prendergast, Lydia Rice, Jean Rotheschild, Elizabeth Ruiter, Allison Rush, Ethel Ruthhu, Lois Ryckman, Selma Schwan, Elsie Staedele, Jeanette Stahl, Peggy Thoman, Marion Warren, Margaret Waterman.

Dr. Chancy to Make College Health Survey

A survey of the health habits of the students at the college has been undertaken by Prof. Margaret W. Stahl, and the Home Economics Department and a committee, in an effort to determine the relationship between the health of the students and their habits of living, and whether those habits are improved at college. President Blunt and Dr. Scoville both feel that if Dr. Chancy can determine to what extent and in what way college affects the health habits of its students, a definite step forward will have been taken in raising the general standard of health on the campus.

Tests have been given the freshmen at the beginning of the academic year, and will be repeated at the end of the year and the results tabulated. Similar tests will be given every year for several years to see whether changes may be drawn from statistics provided by these classes during their freshman and senior years.

The first test showed the age, height, and weight of the student, his health history, and his general physical condition. It indicated the general health of the students of her college course when she had just come from the protection and supervision of her home, and her usual habits of eating, sleeping and exercise at this time. Questions were asked regarding the frequency of colds and flu, the headaches, digestive disturbances and colds; about the regularity of bodily functions; about the condition and care of the teeth; about the student's hours of sleep obtained; the amount of outdoor exercise customarily taken; and by what means the student was required to state whether or not she smoked and how long ago she acquired the habit. She was asked whether she does her study-

STUDENT TOURS RUSSIA AS CONN. DELEGATE

Reviews Impressions

To anyone who has ever thought, however vaguely, about our present economic muddle, Soviet Russia stands as a challenge that cannot be ignored. Founded on a basis of idealism which has proved most emphatically to be practical, Socialism in Soviet Russia today is working. The marvelous things that have been accomplished since 1917, and, more particularly, since 1928, have been the incredible things one considers the terrible drawbacks of Russian ignorance and inefficiency. The radicalism of the basis of its strength, opinion to the contrary. By definition, a "radical" method is one which will be the ones that have failed in the necessary requirements.

The University, especially the First State University of Moscow, and the students working there, are the best. They are not only badly handicapped by lack of space and lack of equipment, but despite this fact are in many ways ahead of other universities. The

Measures Taken Against Possible Typhoid

On Wednesday morning President Blunt again addressed the students, this time on the subject of inoculations against typhoid fever. Professor Doyle was scheduled to speak, but both President Blunt and Dr. Scoville felt that they should allay the rumors which always arise at a time like this. Due to the fact that the President's chapel was not announced, President Blunt requested that the students present give their opinions on the subject of inoculations. Briefly she said that Elizabeth Carver '33, and Priscilla Spalding '36 had both been taken ill, and that this had caused the fear that they do have typhoid fever, the college is taking the precaution of having all girls in Blackstone and Ditigood houses inoculated, and urges that all girls should come in contact with either of them, or who desire to be inoculated have it done at once. There is no real cause for alarm, however, because the germ can be transmitted only by swallowing something infected not by mere contact. Both girls have been removed from college. Elizabeth Carver is at home, and Priscilla Spalding is in the New London hospital. Both the girls seem to come from the same city, and there is a mild epidemic of typhoid there. It seems evident that the girls contracted the disease there, and that as the incubation period is three weeks, it has only now developed.
Since school began this fall there has been a great deal of discussion among the students on the question of four years of compulsory gym work. This question is one that has been debated on and discussed for several years, without any appreciable results. Though petitions against this practice have, in former years, been presented to the Administration, we still go on with the same required gym work. The lack of results favorable to the students has not been due to lack of effort on their part or lack of interest on the part of the Faculty. Much red tape must of necessity exist in such a case. Yet even red tape can be cut finally when necessity demands. After considering the question in such a light, does it not seem that there must be other reasons besides these apparent reasons, for change? Perhaps some who are the leaders in this dissension have not been due to lack of effort on their part, or lack of interest on our part, but rather whether we shall have it or not. Everyone of intelligence realizes the need of exercise and relaxation. Are we too busy to have it in our last year? And at the University of Maryland it was the first visiting Vespers speaker of the year. Dr. Phelps has spoken here several times in the past and has been one of the most popular speakers.

The topic of his address this year was "Great Poets as Religious Teachers." This subject took the audience into the highest plane of thought and they listened to the great teachings of Dante in his Divine Comedy, and Virgil in his Aeneid. Dr. Phelps dwelt most upon his two unequalled epics, the Iliad and the Odyssey. He showed that the words of these great Greek poets were as true today as the day that they were written because they spoke of human interests. Dr. Phelps also showed a comparison between two of America's great poets, Emerson and Poe. That he knows these poets cannot be denied. When he was asked to discuss many general reasons have been proffered, but no definite, concrete answers. And these general ones, after investigation into the matter, can be easily parried. Our spirit of democracy and equality. Also, it is true that other students below. All these senior privileges are something, too. Have you written home for your cap and gown for the first time, or do you still have to get it from the store. Two heads are better than one.

From Mills College comes word that students at Budapest, Hungary, in order to defray college expenses, are doing for the job of public hangman. We thought it was a truism that one of the great benefits of a college education lies in the opportunity to meet and associate with rich personalities. But when all such association must take place across a desk or a lecture stand, it must lose much, and my brain more or less stereotyped. Yet how few members of our faculty are approachable, and how few of us try to approach them. How many faculty members do you really know? I have often wondered what will happen if one day someone broke a faculty lion in the stronghold of his or her home. Personally I have never given any further thought as to necessitate individual, continuous application along individual lines of result? Everyone of intelligence realizes the need of exercise and relaxation. Are we too busy to have it in our last year: And at the University of Maryland it was the first visiting Vespers speaker of the year. Dr. Phelps has spoken here several times in the past and has been one of the most popular speakers.

NEW FACULTY AND STAFF
(Concluded from last issue)

From 1921 to 1929 she did medical work in the factories of Brooklyn, N. Y., and the following year organized and directed the Red Cross Ambulance Department. In 1934 Dr. Scoville went to Vienna for a special course of study and on her return associated with the Department of Medicine of the University of Vienna. She is a member of Alpha Omega Alpha, honorary medical society, and of the Dallas County Medical Society of New York.

Dr. Kelly, who also comes to Connecticut College from Vassar, received her B. A. degree at Mount Holyoke in 1919 and her M. A. and Ph. D. degrees from the University of Chicago in 1921 and 1923 respectively. From 1909 until 1918 she was a teacher in the high schools of Pittsburgh and was a research associate at the University of Columbia from 1920 to 1924 and 1925-1928. She was a member of the faculty of the Mount Holyoke College Department of History from 1925-1928, going from there to Vassar where she remained until this year. Dr. Kelly is a member of Phi Beta Kappa, Sigma XI, American Chemical Society and American Association for the Advancement of Science.

Miss Wentzell graduated from Pennsylvania State College with the degree of Bachelor of Science in 1931. She was graduated in the first honor group. Miss Wentzell received her degree of Master of Science in 1933. She is a member of Kappa Delta Pi, Phi Kappa Phi and Sigma XI.

Miss Tomkins graduated from Barnard College last year. During last summer and the summer preceding she did laboratory and field work under the direction of Professor Joseph Bard of the Botanical Gardens.

Miss Goodsell graduated from the University of Vermont in 1931 with her B. A. degree at Teachers College, Columbia University, last June. She has been a teacher in Conneautville and Ariel, Pennsylvania, and in Proctor, Vt.

Miss Hersey received her Bachelor of Arts degree from the University of Maine in 1923 and her Bachelor of Science degree from Columbia University in 1932.

Miss Holt attended Kenka College, Keuka Park, N. Y., graduating in 1939 and was a student at Pratt Institute Library last year.

Miss Davis graduated from Wellesley College last June, receiving her Bachelor of Arts degree.

Mlle. de Bouvrie was educated at the University of Caen, France. She received her degree in Latin-language-philosophie in Paris in 1929; her Licence es Lettres, University of Caen in 1927 and her first certificate toward the Licence d'Anglais at the Université de Paris.

MUSIC AND ART

Music

It has probably been noticed that there has been a great increase in the size of choir this year. It now boasts 75 members and is growing every week. This year choir will play a larger part in the activities of the campus than it has done in the past. During the months of October and November, the choir will sing at the musical chapel services on the 3rd Friday of each month. On November 20th, December 4th, November, and December, Mr. Baer will take charge of the programs, and on the 2nd Fridays, Dr. R. will conduct a musical service.

On December 7th, in commemoration of the centenary of Haydn's birthday, a part of Haydn's Creation will be given. In presenting this oratorio, the choir will be assisted by members of the faculty and people from town.

A recital series has been planned, the numbers of which will be announced later. These recitals will be given to admission to concerts for these admissions.

The Music Club is planning an active year, with certain monthly meetings which are open to all students and members of the faculty.

The Victorla hour, which was established last year, will be continued this year every weekday afternoon from 5 to 6 in Room 7, and we hope that you will all come and hear your favorite records.

Art

In a college where the art department plays an important part in the curriculum, and where its instructors are actively engaged in art, it is entirely fitting that the students be given accounts of its activity. Nearby is the beautiful Lyman Allyn Museum which contains many charming exhibits, varied as to their content. To those who are interested in knowing what is going on in this field, this column is dedicated with the sincere hope that it will keep you informed about your pet objects d'art.

During the summer Mr. Henry B. Selden exhibited a group of water colors made in Britain. This group of paintings on exhibit at the Old Lyme Art Galleries received first prize. Mr. Robinson who is a member of the National Academy of Design had a few of his oil paintings exhibited this summer, including a lovely large canvas called "autumn." Miss Hanson continued her work on the "painting as a form of design." Have you been down to the Museum lately? If you have, you must surely have seen those metal masks on the wall on the first floor. There are three exquisite models which seem to be made of gossamer. They are made on a scale of 5/6" to one and in the scale of 5/6" to 1. These models were made by Col. H. R. Stiles. A beautiful model of a GRISWOLD GIVES SKETCH OF "JUNIOR MONTH" (Concluded from page 8)

GRISWOLD gives sketch of "Junior Month" (Concluded from page 8)

JULIUS CUCULIUS, 4

The character is still thrilling it is to be able to help such an individual maintain a decent living and not lose his self-respect, or joy of living.

Such a contact as the above is just what is needed today. This kind of work could be cited from the experiences of the twelve college Juniors, from twelve eastern colleges who were on a special grant of weeks of July in New York studying Social Work. Actual case work was supplemented by visits to workers, reading, and visiting practically every phase of social welfare work, from feeding, clothing, health care of child life, as child placing and adoption, work with underprivileged children, handicapped men and women, crime prevention, tuberculosis, the social control of the feeble-minded, immigration problems, housing, mental hygiene and accumulation education.

Such a new store of knowledge and such experiences as "Junior Month" offered all of us a feel of "worlds of good" to be accomplished by our generation. We are all anxious to do something to aid humanity in this art of living.

In the words of Miss Tousley, "or "Fuge" as we know her, is expressed our culminating emotion: "These girls will never be content to sit back in their colleges and homes, but will, in my opinion, exert a leadership which every community should have from its returning college graduate."

Viking ship was made by Dr. R. H. Keeler, which simply exudes the tantalizing fragrance of adventure with its mellow wood color, decorated with brilliant shield-shapes, and heads of griffins. His "Yarmouth Pinky" is more fanciful and taking to sailing boat. On the second floor Mr. Selden has a lovely model of the Seminole. These models are excellent in craftsmanship, and are truly fine pieces.

You will also see the exhibition of Modern American prints assembled by the College Art Association. There are the usual confused and confounding impressionistic works, but very few of these are very, very, very nice etchings, lithographs and woodcuts. Rockwell Kent has a very striking piece which has a powerful and quiet strength. Among the other figure pieces there is a gripping figure by Robert Henri, and a "Rodeo" by Thomas Handforth is executed in that careless simplicity which exudes the scale of 5/6" to 1. These models were made by Col. H. R. Stiles. A beautiful model of the treatment of the cotton plant. "Development of the cotton plant at such a rate, which is out of the scale of 5/6" to 1. These models were made by Col. H. R. Stiles. A beautiful model of the

FACULTY VACATIONS
(Concluded from last issue)

Miss Catherine Oakes, assistant professor of Economics at the University of Oregon, was giving a course at Leland Stanford, Jr., University at Palo Alto. They made the trip west over the southern route and returned by way of the northern route, stopping at Yellowstone National Park.

Dr. Frank E. Morris, professor of philosophy and psychology, spent his vacation reading, studying, and writing at Elm Lake, Pennsylvania.

Miss Ruth Stanwood, professor of physical education, enjoyed a quiet holiday in the Catskill mountains, resting, studying and playing golf.

Dr. Garabed K. Daghlian, professor of physics, was in the International Conference of Social Work at Frankfurt, Germany, and later to Russia where she spent four weeks. At the conference she attended especially the meetings of Commission VII, dealing with the international aspects of migration. In Russia she visited the large industrial centers, went down the Volga river, and saw more of the conditions of life for the peasant, and into Ukraine. Her special interest was in studying the treatment of minority groups in Russia.

M. Robert Coblentz, who returns to college after a year's sojourn in Youngstown, O., with his and Mrs. Coblentz's parents, devoted the summer primarily to visiting during his year of strenuous study at Yale University.

Dr. Pauline H. Deeter, professor of Chemistry, was associated with the college in research on the effects of x-rays on the tissues of certain moths during the first part of the summer. In August she attended the meetings of the Third International Congress of Entomology held in New York at the American Philosophical Society.

Dr. Margaret S. Chaney, professor of Home Economics, attended a meeting of the American Home Economics Association at Atlanta, Ga., early in the summer. At this meeting she made a report for the Political Practices committee of which she is chairman. The greater part of the summer Dr. Chaney spent in Manhattan, Kansas, and also went to Berkeley, Calif., for a visit with her family.

Miss Mildred Burdett, assistant professor of Romance Languages, was at Camp Whiston, a camp for girls at Cape Cod Bay, as assistant director and dietitian.

Dr. J. Lawrence S. Sutton, professor of music, and Mrs. Erb went by automobile to the Pacific coast where they were the guests of their son, Donald M. Erb, professors of Romance Languages at the University of Oregon, who was giving a course at Leland Stanford, Jr., University at Palo Alto. They made the trip west over the southern route and returned by way of the northern route, stopping at Yellowstone National Park.
SPORTS

On Monday, September 27, A. A. council met with the Physical Education Department to discuss a change in the conduct of sports at Connecticut. No decisions were made but the department presented ideas involving clubs rather than inter-class teams and games. This would not necessarily eliminate any class competition which the students might desire, but it would give everyone a chance to play her favorite game whether or not she was taking the activity for credit. The views of the student body on such a change are greatly desired and everyone is urged to discuss the matter with members of council or the Physical Ed. Dept.

C. C. O. C. board for this year has been appointed and met for the first time Friday, September 31. The board consists of Dorothy Hamilton, chairman, Esther White '33, Alison Rush '34, and Esther Martin '35. A member from the freshman class has not yet been chosen. Miss Wood is the faculty advisor for the board. Plans for the year were discussed and many events are anticipated. Among others, a hay ride in the near future, roller skating at the rink and possibly bowling in the winter, and deep sea fishing in the spring. Any suggestions for outings would be appreciated. All students are advised to watch the bulletin board for notices. It is hoped that freshmen will take an active interest in the organization.

The Bates tennis tournament is under way and should prove very interesting as the freshman class contains some very promising tennis material. All matches must be played off promptly and it is advisable to take advantage of the good weather.

About twenty-five Outing Club enthusiasts opened the fall season for the club with breakfast at the inland last Sunday morning. The appetites produced by a before-breakfast hike were well satisfied with bacon and coffee cooked in the open, as well as rolls and fruit. The trip was very successful but it was hoped that more freshmen would come out for it. Outing Club is planning several activities this fall, all of which should prove very enjoyable to both freshmen and upperclassmen.

SENIOR-SOPH. PICNIC

Just to prove the Seniors haven't forgotten them, Sophomores were given a picnic in Bollwesdale on Friday night. There were two bonfires over which to roast the hot dogs and incidentally to keep off the blackness. There was plenty more to eat—rolls, pickles, coffee, cream potatoes, ears, and chocolate bars. After supper the group gathered around the fire and sang.

STUDENT TOURS RUSSIA AS CONNECTICUT DELEGATE

(Concluded from page 1, column 6) Five students in general range in age from sixteen to twenty, but they are at least five years in advance of the American youth of those ages. An interesting fact about the Russian university system is that the students are actually paid to go to school, the average wage is equal to about $35 a month. The Soviet government considers that the student is doing as much for the state as if he were actually working.

The emphasis of all education in the Soviet Union is on political economy; although everyone has a knowledge of literature, art and music— practically a liberal arts education. The desire for knowledge, moreover, is not confined to the students, but is widespread among the mass of the people. The museums, art galleries and theatres are always filled with crowds of workers and peasants intent on acquiring a little culture.

Even if one does not agree with the theory of Socialism as exemplified in Russia today, one cannot help admiring the social reforms there. There are recreation centers, clinics free to workers, homes for children, and thousands of new schools.

Probably the most wide-spread notion prevalent in the United States today is that Soviet Russia is the most immoral country in the world. Family life goes on in Russia today much as it always has, with the exception that the children are being brought up in more healthful surroundings and with better care than was possible in pre-revolutionary days. Nor is there anything immoral in the Soviet idea of marriage; the Russians are simply looking at things from a very sane, healthy point of view.

It would be impossible in one article to attempt a discussion of the present industrial condition in the U. S. S. R. In general opinion industry is going on in such a way as to justify the Russian's cry of 'the five-year plan in four.'

Qtractorstroi, the great tractor factory outside of Stalingrad, the new Ford factory at Nishni-Novgorod, the mighty Dnieper-stroi dam, the huge state farm at Verhild, are some of the most marvelous sights to be seen anywhere in the Soviet Union. They seem even more impressive when one considers the lack of equipment, and the Russian's ignorance of machinery. Perhaps most important of all, the difficulties attending the process of collectivization are continually disrupting the Soviet machinery of organization. All this heavy industry is the backbone of the Socialist organization.

The exciting part of the whole affair was finding the way back. Somehow the old path had gathered a good many pitfalls that weren't there before!
HISTORY CLUB

Ernestine Hermann will speak on her experiences in Russia this summer, at the first meeting of the History and Social Science Club at 7:30 p.m., Thursday evening, Oct. 13, in the Commuter's Room. Everybody come!

POETRY GROUP

The Original Poetry Group held a re-organization meeting, Wednesday at Chapel Hour. From the great numbers of those present it would seem that poetry is going to flourish at Connecticut College this year. It was decided to hold meetings from five to six on alternate Fridays. Because of the informal nature of the group there are no regular officers excepting a secretary, Muriel Schlosberg '33, is to hold this position.

The purpose of the Group is to offer constructive criticism upon the poems read anonymously at each meeting. This necessarily limits it to a small number. If its popularity continues, some method of elimination will be necessary. The first regular meeting will be held on Friday, October 14th. The place of meeting will be announced later.

many week-ends visiting parts of Switzerland. Other students spent their time in Munich and taking trips down the Rhine. Then, too, as you know, Switzerland is the best place for mountain climbing so we did our bit of that. I never will forget one night when we had a farewell celebration—we started the evening by dancing until two, and finished it by riding our bicycles to the foot of a mountain, climbing it, arriving at the top at about seven, eating a little breakfast, and getting down just in time to attend a meeting at the International Labor Office. Another time, a crowd of us took an eighty mile bicycle trip to Annecy in southern France. On the way we rode, or rather pushed, our bicycles up an eighteen mile grade; but coming back it was great fun when we came down those same eighteen miles in thirty-six minutes.

It was fun every day to pack our lunches and swimming suits on our bicycles and go out for a few hours swimming and sun-bathing, and then, in the evenings we would get all dressed up and ride our bicycles to where we were going dancing—it did take a little time getting used to see

THE FALL OF
CONSTANTINOPLE

"Nature in the Raw," as portrayed by Thomas Webb, inspired by the savage slaughter of 5000 Christian defenders at the hands of the vengeful, barbaric horde of 250,000 men under the rackless Mohammed II—1453!

"Nature in the Raw is seldom Mild"—and raw tobaccos have no place in cigarettes

They are not present in Luckies ... the mildest cigarette you ever smoked

We buy the finest, the very finest tobaccos in all the world—but that does not explain why folks everywhere regard Lucky Strike as the mildest cigarette. The fact is, we never overlook the truth that "Nature in the Raw is Seldom Mild"—so these fine tobaccos, after proper aging and mellowing, are then given the benefit of that Lucky Strike purifying process, described by the words—"It's toasted". That's why folks in every city, town and hamlet say that Luckies are such mild cigarettes.

"It's toasted"
That package of mild Luckies

"If a man write a better book, preach a better sermon, or make a better musical-trump than his neighbor, he builds his house in the woods, the world will make a beaten path to his door."—RALPH WALDO EMERSON.

Does not this explain the world-wide acceptance and approval of Lucky Strike?
We thought at first that the college had taken to selling apples but it seems they are in the library and the student bookstore. Write for bibliography of the publishers. Free specimen pages if you should ask me what I got out these days. People poured from Branford when the alarm rang for about ten minutes straight. It has yet to be discovered who put in the false alarm.

FACTORIES
(Continued from page 5, column 1)
ing girls in their best evening dresses and boys in their tuxedos starting out on bicycles for a big party. Really, bicycles were most essential; they took one on good American breakfast picnics when scrambled eggs appealed more than French bread, they took one starting out on bicycles for a big skating going on behind scenes before the seniors make their debut. It is rodeo in the heart that we have been saving a couple of gallons of soda. If both are free of charge we prefer apples, thank you.

The refec. is certainly stepping out these days. It is right in line to start a tea house what with pewter water pitchers and blue soup tureens.

Maybe the class of '33 hasn't put its foot down hard. We expect to see them armed with Kleenex and busy doctoring all "painted Jezabels".

After three years of abstinence, it must be hard for the seniors to maintain their balances on the curbstones.

We haven't seen any roller skating going on as yet but probably a great deal of practising is going on behind scenes before the seniors make their debut. Skill in the art ought to prevent any accident.

It sounded like Fire Prevention Week in these parts the last few days. People poured from Branford when the alarm rang for about ten minutes straight. It has yet to be discovered who put in the false alarm.

RAINCOATS
A raincoat must possess several qualities. It must, of course, be waterproof; but it must possess a certain swagger appearance in both material and tailoring.

Student Tours Russia as Connecticut Delegate
(Concluded from page 5, column 1)

One could not say that Soviet Russia today is an ideal place. The condition of the whole transportation system is deplorable, and in the less populated regions, the sanitary conditions are bad. There is an enormous amount of red tape connected with even the smallest transaction. It is very true, however, that much that is bad in Soviet Russia is a product of the Czarist regime, rather than the Soviet regime. The Soviet government has made mistakes, but, for the most part, it has recognized them and is profiting by them.

For me, however, the spirit of the people, their marvelous enthusiasm, seems far more important than the temporary lack of material comforts; the spectacle of it gives one a new vigor, a new faith in humanity. And as one looks to the Russian of tomorrow, the more perfect Socialist state that will unquestionably come, a new idealism comes to one with an overwhelming strength and power.

Student Tours Russia as Connecticut Delegate
(Concluded from page 5, column 2)

fact that Russia finds it necessary to expend every effort in the attempt to industrialize quickly, life there would be comfortable and enjoyable. There is plenty of money, but the government cannot produce enough to meet the demand.
