Captain Innes-Taylor Tells Of Last Byrd Expedition

An expedition that uncovered vast, undiscovered territory.

It took five years to make preparations for Byrd's latest expedition, whose prime object was to fly to the South Pole. There are many problems to solve in connection with such a trip. The diet must have a securary preventive and most of the foods are taken in a dehydrated and dried form. Water is gotten at the Pole by melting snow and adding iron and other minerals when used for drinking purposes. The equipment in the instrument carefully tested. 137 sledge dogs from all parts of Canada were taken and those had to be immunized. The engines of the planes had to be special tests for cold weather flying. Many scientific instruments were needed. There were two ships for the trip, the "Old Bear," formerly in Coast Guard Service in Alaska and now to be used to break through the ice, and an old wartime transport lent by the government. From the 8000 men and 3000 women who volunteered 53 were chosen, among them being 100 trained scientists, 600 fortunate adventurers, aviators, dog drivers. Great care was taken in choosing the most mentally and physically fit, but there is always a gamble as to how well they will stand up under the strain of the adventure.

On October 11, 1933 the expedition left Boston for Little America by way of the Panama Canal and New Zealand. Between the latter island and the mainland, the most of 2000 miles of icebergs and bad storms but the privately finally con- cected the coast on January 17, 1934. The expedition arrived 4/5 of the way.

Sir Norman Angell Addressed Large Convocation Audience

The distinguished English statesman gave his opinion of "why a world wanting peace wants war?"

War, the speaker stressed, is not brought about by evil men, but by good men who believe they are doing right—often, due to a mistaken method, the policies they believe in unintentionally lead to war.

We all want peace, but also want things that are compatible with peace. From the very fact that nations keep navies we may conclude that under certain circumstances—in defense—there will fight. When we say we want defense, or peace, we often misimagine that we want the right of superior power to be denied someone. Thus the meaning of defense is not at all clear; each country wants to be the sole judge of who is right.

What is wrong with the whole matter? Instead of using coercion the instrument of dispute, we should use law, put "power behind the law of peace and stay together." We can find means of making the road of the trans- port harder; with relation to this, the speaker approved of our recent legislation with regard to Italy. The ultimate cause of war is failure to see where force belongs; the best way to defend one's country is to use arbitration; and if the League of Nations is the arbiter of the world, we must invest something else to keep from entanglement. We must look at things coldly; the obstacle to the freedom of the world is the difficulty of material things, but in the minds and hearts of men.

Dr. Eichelberger Speaks to College on "Neutrality"

"Are you, along with Germany and Austria, going to supply Italy with the goods of the world, against the efforts of the League of Nations to prevent war?" asked Dr. Clark Eichelberger, National Director of the League of Nations, in a talk before the International Relations Club in Wind- sor salon, Wednesday night, Octo- ber 16. Since the Presidential em- burgh forbade only the shipment of "munitions" to either of the war- rings, American traders are able and willing to supply Italy with other necessities of war such as nic- gromat. In 1914 international war was a means of the settlement of disputes, and "peace and war were the only inter- national law. There were no public opinions against war, no machinery for avoiding war." After four years of war, the nations accepted the Kellogg Pact and the League of Nations Covenant in 1928. The United States was not concerned with right or wrong. Peace and war were the only interna- tional law. There were no public opinions against war, no machinery for avoiding war. After four years of war, the nations accepted the Kellogg Pact and the League of Nations Covenant in 1928. The United States was not concerned with right or wrong.

In 1928 there had been no American representa- tive on the UN. The latter saw the British explorer, the first to penetrate the ice pack. The latter saw the British explorer, the first to penetrate the ice pack.

M. Webb, A. Ford Attend Silver Bay Conference in June

Two delegates from Connecticut, Ann Ford and Marjorie Webb, atten- ded the Silver Bay Student Con- ference held for the exchange of views on "The European Roundtable Discussions and Addresses Make Up Associated Collegiate Press Program"

The last of these meetings for everyone was the address by Leland Stowe, professor of the New York Herald Tribune, whose subject was "The American Press". An interesting contrast was made up of the English and the American reporters' method of describing events. While our foreign correspondents try to make a story as vivid as possible, often creating some trouble with the censors, the British have developed such a fine technique in writing that they scarcely ever offend the country in which they are working. At the same time, of course, their articles are not so startling because of the restraint used.

There were many other meetings held for business managers, and for editors, of newspapers as well as separate sessions for year book and magazine delegates. The main meet- ings attended by the News Editor were under the "newspaper round- table". These were conducted by Charles A. Wright, director of public- ities at University of Pennsylvania. On Friday morning Cornell Binder of the foreign staff of the Chicago Daily News gave an ac- count of the world news as seen from a European view point.

At 1:30 Friday all the delegates will meet again to talk on "Thorn- oughness in Editing and Publishing" by Grant Olsen, advertising mana- ger of the Sheaffer Pen Company. Among other points of his address throughout the country. Each of these meetings was under a different subject, special features and departments were discussed in some length by the various delegates.

The value gained from attending this conference was the opportunity to meet and hear the experiences of representatives from the many colleges and universities throughout the country. Each indi- vidual problem was in some way tied up with the publishing field as a whole, and therefore such a uniting of interests was beneficial to all.
Dramatic Club Plans Many New Activities

It is gratifying to note the increasing interest directed by students at our college. Perhaps it is the enthusiasm and ability of our present officers and the club that has finally succeeded in putting a pulse behind the act. We have talent—a lot of it—and I'm sure everyone is being aroused sufficiently to take a deeper interest than has been shown in previous years.

The policy of the club in sponsoring House Plays to ensure everyone is being aroused sufficiently to take a deeper interest than has been shown in previous years. Our Dramatic Association can go on beyond graduate work.

Rhoda Perle '35 is secretary to a professor at Harvard College.

Miss Uley '30 is teaching chemistry at the University of Tuscan.

A daughter, Beverly Vahlteich, was born to Ella McCullum Vahlteich '31 on September 23. Mrs. Vahlteich and her husband both have a Ph.D. in Chemistry.

Ruth Howell '35 is assistant to the personnel manager in the Bank of America, New York.

Lois Latimer '29 is a dietician at the Free Hospital for Women in Brookline, Mass.

Ruth Fairfield '35 is studying in the Columbia Nursing School.

ALUMNI NOTES

Frances Bush '35 is at Columbia doing graduate work. Valtich and her husband both have a Ph.D. in Chemistry.

Ruth Howell '35 is assistant to the personnel manager in the Bank of America, New York.

Lois Latimer '29 is a dietician at the Free Hospital for Women in Brookline, Mass.

Ruth Fairfield '35 is studying in the Columbia Nursing School.

We all sympathize with Dr. Hunt in his keen disappointment upon finding his extraordinary feat with pickle bottle and biscuit repeated by an enterprising member of his Psychology class.

What Brown man and Senior spent Saturday in just looking for Mulberry bushes! And just what they were looking for, I wonder.

Strange things have been brought back to college as souvenirs, but just why the life preserver, "Bye!"

Such a weird sight in front of Mary Hardness last Saturday night! The little circles made wonderful merry-go-rounds, we would judge.

The curbs DO seem to get in the way, but we can always lunge over them.

FLOWERS AND COLORS

We arrived at Florence on a drowsy Sunday afternoon. The lovely Medieval town seemed fast asleep; the Arno flowed along quietly and peacefully; the blinds of all the centuries-old stone houses were shut; the quaint silver and leather shops were closed while their proprietors indulged in their daily siesta; only the chiming of church bells across the river broke the sleepy silence.

Here was the Tuscan town Dante had loved, with its Medieval atmosphere still clinging to it unspoiled by a practical, modern world. Our hotel overlooked the dreamy Arno River and while the town slept, we sat at our windows looking out on the bridge that knows of the meeting of Dante and Beatrice and it seemed that at any minute the little statue would appear clad in red just as she had appeared to the poet to inspire the greatest work of the Middle Ages.

Everywhere we went we were reminded of Dante. Little wooden plaques containing quotations from his Divine Comedy are placed on posts along the streets. Monuments to him appear everywhere. His bust is seen in all the shop windows. His famous sad face, as revealed by Bapstia, forms the motif on leather goods of all kinds sold in the interesting shops. The Florentine university students, who were our guides, knew by heart almost the whole Divine Comedy, and did delight in reciting its most beautiful passages to any listener.

We spent most of our spare moments in the lovely town. Browsing around the fascinating jewellers' shops on the Ponte Vecchio, known the world over as the 'jewellers' bridge.' It was fun to recognize the lily of Florence and the famous cost-of-arms of the Medici as most of the silverware. But, above all, it was thrill- ing to listen to the shopkeepers speak Dante with that enviable Tuscan accent that makes the Italian language sound exactly like music.

We visited Dante's house one morning along a narrow, cobblestoned street, and found that the Medieval looking as we had always pictured it. Its imposing tower looking down on us filled us with thoughts of the Ghibellines fighting for supremacy during those trying days of Florence and reminded us once more of the reason for Dante's tragic exile.

The gracious Florentines are certainly proud of their Dante, but the pride is spread over the whole of Tuscany, their Cimabue, their Leonardo, their Donatello, their Machiavelli, their Cellini, their Cimabue, their Leonardo, their Donatello, their Dante, but they are also proud of their Giotto, their Dante. Little wooden plaques containing quotations at nearly every corner. We remember very clearly the dreamy River Arno and while the town slept, we sat at our windows looking out on the bridge that knew the poet to inspire the greatest work of the Middle Ages.

We could not walk down a street in Florence without coming face to face with a wealth of artistic treasures at nearly every corner. We remember very clearly our embarrassment at inquiring about a lovely bronzino in an open square that we thought "looked very much like Cellini's "Penseroso"" and were informed that it was the original. The famous "Rape of the Sabines" by Giambologna also faced us in the same square. Imagine, we thought, passing masterpieces like these every day on the way to work! It is no wonder the Florentines are artistic in everything they do and the most slightly impractical people with whom we have ever come in contact.

We would pass the Baptistry every day too with its remarkable bronze doors by Ghiberti which were called by Michaelangelo worthy of being the Gates of Paradise. From there all we had to do was turn to our eyes across the street and we would see Giotto's celebrated classical flowering aloft with its rich, multi-colored marble facade, to the beautiful Tuscan-Gothic Cathedral of Santa Maria del Fiore.

Beauty of the Middle Ages and of the Renaissance everywhere! We found so many masterpieces right along the streets that we had almost forgotten there were more indoors. But we had still to see the renowned galleries of the Pitti, of the Strozzi Palaces.

Ray Ballard In Piano Recital

On Thursday evening, October 2, a piano recital by Ray Ballard was held in the College Gymnasium. The program was as follows:

Caprice from Alcide Gluck-Saint-Saëns Fantasia, Op. 15
Intermezzo, Op. 117, No. 1 Brahms
Intermezzi, Op. 119, No. 3 Chopin
Nocturne, Op. 27, No. 2
Nocturne, Op. 33, No. 1 Faure
Voiles
Waltz, Op. 39, No. 18
Gartenmusk
Feux Follies

123 STUDENTS STUDY 112 PROFISSIONS

Mr. Joe E. Moore, of North Carolina State College, is an enterprising fellow, and an authority on parts of the psychological field. He has recently published, in the Journal of Abnormal and Social Psychology, a treating the desire of a student to read after he leaves school by the manner in which they cram the classics after he leaves school by the manner

"ATOM-SMASHER" NEARLY FINISHED

Rochester, N. Y.—Construction of the University of Rochester's $10,000 cyclotron, or "atom-smasher," is rapidly nearing completion here under the direction of Dr. Leo A. DuBridge of the department of physics, as is the huge atom "gun" being made at California Institute of Technology.

The Rochester cyclotron will contain 100,000 watts of electricity and will break atoms with a force of 40,000 volts. It includes an electro-magneto containing 14 tons of high purity iron and windings made from nearly four miles of heavy copper wire.

The California Tech device makes use of a 19-foot porcelain vacuum tube designed to operate at more than 10,000 volts. The formation of new atoms and the artificial creation of various radio-active substances are among the ends expected to result from the use of the new machine.

DEFINITE GAINS IN ENROLLMENTS

New York—(ACP)—Definite and substantial enrollment gains in colleges and universities throughout the country are the order of the day this fall, with almost every college able to report at least a slight increase in registration over last year. The gain is most marked in the Mid-West, where student ranks are apparently increasing three times as fast as they are on the Atlantic seaboard. Colleges polled beyond the states of the greater part of the country, according to the testimony of 76 students, was "rattling in lectures." Then came "Twisting mouth into odd shapes," with 63 earnest young psychologists recording their averien to this pleasantry, "Frowning" came next, with 55 votes, then "Playing or tinkering with objects"—type of object unspecified—and next, "Cooking head"—pulled an even 50 votes. The list runs on like that for quite a little while, various arguments increasing being listed.

There are those professors who did not know, perhaps, that "standing up" is not regarded as especially painful or students, and definitely retard their concentration. Similar to your careful pedagogue will not "walk around too much," will he effect "cold color combinations in clothing." And it is de rigueur for "complete statements" and not scratch the head nor "talk too loud."

"COLLEGES SHOW DROP IN LITERACY" SAYS BARNARD DEAN

The Colleges, of all places, are showing a drop in literacy, says Barnard's Dean Virginia G. Gildersleeve. One wonders. There is little question about illiteracy, one wonders merely if it is on the increase. It seems to us that collegiate society, like any other, is divided into literate and illiterate, has always been so, and probably always will be. There is in any college a certain fixed proportion of students who have never read anything if there was any possible avenue of escape, and there is always a contingent of oblivious and intelligent readers.

Instead of taking things in the eye and becoming familiar with the aspect of English words," says Dean Gildersleeve, "they take them in through the ear, by the radio and the movies. This has a lamentable effect on their spelling and on some other aspects of their writing."

"Are we right in feeling that the present student is rather more illiterate than were the students of the past," Dean Gildersleeve continues, "Has this condition, if it exists, much to do with college requirements, or does it grow out of the amount of reading done by our young people?"

The Yales and Harvards still find themselves playing their rivalry. A classical bird, Yale Daily News man, was kidnapped by three Harvard men the other day.

"Cleaners for Fancy Folks" CROWN Cleaners & Diers, Inc.
On Saturday, October 19th, the Commonwealth Hockey Team from Boston played an exciting game against the Columbia College team. The game was held at the Commuters' Room, and the final score was Commonwealth 4, Columbia 3. Everyone was thrilled with the outcome.

Following the game, tea was served at the Commuters' Room. The game featured a variety of exciting moments, including impressive shots and saves by both teams. The fans were on their feet, cheering and shouting for their favorite players. It was a great night for hockey fans, and everyone who attended had a fantastic time.
CLARK Eichelberger was guest speaker, Wednesday night, October 16, at a meeting of the International Relations Club, held in Windham salon. Coffee was served before the informal meeting began. Dr. Eichelberger who is National Director of the League of Nations Association discussed the timely and much disputed subject of "American Neutrality as an Aid to Peace."

Plans for a visit to the horse show to be held November 6-12 at Madison Square Garden in New York were discussed at the meeting of the Riding Club, Thursday night, October 17. The President of the club, Jane Hutchinson, invites anyone who is interested in making the trip to see her for details.

The club also invites anyone who enjoys playing games on horseback to attend their Jynkhans in the ring next Tuesday.

Plans for an open horse show to be held on campus in the spring were also discussed. The proceeds of this event will be used to build a new stable.

Gatekeepers at Ohio State University have a novel method for deciding whether you're sober enough to enter the stadium. If you can wiggle your thumbs in unison, you're O.K. Otherwise you can watch the game from a telegraph pole.

The depression has had at least one beneficial effect in the belief of Pres. Lotus D. Coffman of the University of Minnesota. He attributes the attainment of a ten-year high in scholarship last year to the fact that students had less money, more time for study.

There is actually one girl student at Lindsay College, Lindsay, Ont., Can., whose ambition is to become "a good wife for some man." The others, a survey revealed, would like to become teachers, nurses, stenographers, dictation, writers or interior decorators. Would-be teachers led the list.

GRASS ALWAYS MUCH GREENER ON OTHER FRONT'S YARD

New York (ACP) — Charles R. Kluge, recently chosen president of the New York stock exchange to succeed Richard Whitney, admits that occasionally, when he has time, he enlists his brother, Robert Malcolm, Gay, professor of English and dean of the graduate division of Simmons College, Boston.

"My brother leads a life exactly contrary to mine," Gay says plaintively. "He spends his time quietly, under no pressure. He visits his friends of the intellectual circles of Boston, goes to the Boston symphony concerts, and studies."

Gay has been a member of the stock exchange since 1911, and is known as a strictly commission broker. He never speculate.

GASOLINE AND LIQUOR CAUSE CRASH

Raleigh, N. C. (ACP) —If you're driving between 7 and 8 o'clock in the evening of a clear day, preferably Saturday or Sunday, during the month of December, in a passenger car, on a straight dry, well-paved road in the country AND have a couple of drinks—watch it, because you're heading for a crash!

So says Prof. Harry Tucker, director of the North Carolina Engineering Experiment Station and head of the highway engineering department. He draws the picture from statistics gathered during his long experience as a highway authority.

In addition to the setting for the ideal fatality depicted above, the car must be in good condition, with four-wheel brakes and balloon tires, the driver between 25 and 54 years of age, and with one or more years of driving experience.

Williamstown, Mass.—For the first time in over a century, Williams college students are not being routed out of bed by 7:30 a.m. chapel bells.

As a result of a twenty-year war between undergraduates and the administration, the board of trustees finally abolished compulsory daily attendance at religious service.

Williamstown, Mass.—For the first time in over a century, Williams college students are not being routed out of bed by 7:30 a.m. chapel bells.

As a result of a twenty-year war between undergraduates and the administration, the board of trustees finally abolished compulsory daily attendance at religious service.

COLLEGE MAN TURNS PRIVATE DETECTIVE

New York (ACP) — John W. Kluge, 37, Columbia University, was walking down a dark street in Detroit last summer. There was a man following him, two black touring cars with New York license plates were parked at the curb, and a third was cruising back and forth in the street.

Kluge, who was working as a private detective, decided he was on somewhat of a spot.

"I recognized the man as someone whom I had seen walking behind me several minutes previously, when I had happened to look around," he said.

"I'd been working all summer but this was the first time the shadowing had been done on me instead of by me."

Kluge finally got out of that scrape, but it took some fast thinking. He yelled, "Here come the police!"

Kluge turned private detective after being a student at Lindsay College, Lindsay, Ont., Can., whose ambition is to become "a good wife for some man." The others, a survey revealed, would like to become teachers, nurses, stenographers, dictation, writers or interior decorators. Would-be teachers led the list.

Among the Horses

Since many students take riding and participate in the riding activities it has been suggested that we all would be interested in knowing something about where the horses showed this summer.

Late in August, Forest Elf was entered in the "Open Jumping Class" and also "Jumping for Gentlemen Riders" at the Hamburg, Connecticut Horse Show. He placed third in both events.

September 28, Forest Elf and Spook placed first and second respectively in the "Handy Hunter Class" of the horse show at Great Barrington, Mass. There were several requirements made for the entries to the show. Jumping ability was tested, also the ability to stand while a rider mounted and dismounted, and to allow the rider to open and close a standard bridle path gate while still mounted.

Eight year old Jerry Theue of Norwich rode Forest Elf in the "Children's Horsemanship Class" placing second.

Of great interest were the jumping classes. Spook and Forest Elf entered in the "Open Jumping Class", placed second and third respectively. The jumps were four feet high consisting of a brush jump, timber fence and "in-and-out" pen jumps.

Forest Elf was also entered in the lightweight hunter class, where she performed perfectly. However, judgment was based 60% on performance and 40% on conformation. She placed second due to the fact that her conformation as a hunter counted against her.

The latest showing was October 6, where Spook was shown in the "Open Jumping" and "Touch-and-Out" jumping classes at the horse show in Middletown.

Miss Patricia Hubbard of the class of '39 rode him in both, placing second in the "Touch-and-Out" class.

This year Miss Martin has organized several lunch and breakfast rides along with various long cross-country rides.

On October 17, a group of luncheon riders starting at about 11 o'clock rode to the Douglas Morgan farm. Friday, October 18, another luncheon expedition was made to Miller's Pond and Saturday there was a ride and barbecue dinner at the same place.

There will be a Gynkhana shortly to which everyone is invited. Fun is guaranteed to all.

LA. STATE UNIV.
TO CARRY OUT SEN. LONG'S PLANS

Baton Rouge, La. (ACP)—When Sen. Huey Long, dying, asked, "My university boys, what will become of them?" he was referring, according to Dr. James Monroe Smith, president of Louisiana State University, to his plan to send 1,000 needy youths to the university this year.

Every effort will be made to carry out Long's plan, Dr. Smith says.

Winter Is Coming!

Big Rapids, Mich.—Add winter is-coming notes:

The rabbits—all eight of them—used for experimental purposes by the biology department of Ferris Institute here have been brought inside to their cold-weather quarters.

Two of the bunnies died during recent cold spells.

MEDICAL SCHOOL STANDARDS LOWERED

Chicago, Ill. (ACP)—The standards of the medical schools, once among the highest, have been lowered in recent years, asserted The Journal of the American Medical Association in this year's review of educational conditions in the United States and Canada.

Undermanned faculties, overcrowded laboratories and the acceptance of students of below-par qualities for the money they bring in have lowered standards. The Journal says that larger numbers of students have been accepted for the money they bring in, pointing out that in most cases the teaching staff has not been correspondingly strengthened or the physical plant commensurately enlarged.

A Colorado University student sought drinking is forced to attend Sunday school for three years. Yes, every Sunday.

MANKIND ON ROAD TO DESTRUCTION?

Honolulu, N. Y. (ACP)—"Mankind is marching the road to destruction," said Dr. George Barton Cutten, president of Colgate, in a recent speech.

"A civilization which removes natural checks more rapidly than it fosters high controls commits suicide," Dr. Cutten declared.

"The greatest sinners are probably the philanthropists and the doctors. They have done everything they could to preserve the unfit. If anything happens to protect the race it is doomed."

"Man has always had to be kicked upstairs," concluded Dr. Cutten.

"A civilization which removes natural checks more rapidly than it fosters high controls commits suicide," Dr. Cutten declared.
