**The Morning After**

**KATIE HANDWERGER**

Kate Moffett, director of student Health Services, spoke Wednesday night with a small group of female students about the accessibility of health care services for women in the local area. After Luther "Bill" and Margaret Apalaga, '91, co-founders of Connecticut College's women's center, organized the event, Moses Commons was filled with50 guests who showed up to get on the campus's health care services. 

Moffett described rape kits as "a project of considerable magnitude." Currently there are 34 depart- ments teaching in 10 buildings, 9 computer laboratories, 22 computer workstations, and 48 classroom spaces for 200 students. The campus provides a wide range of opportunities for students to express themselves in a variety of ways, including through its artistic and performing arts programs. Brown’s campus is known for its commitment to sustainability and environmental stewardship, which is reflected in its efforts to reduce energy consumption, eliminate waste, and promote sustainable practices. The campus is home to a number of prominent faculty members, including renowned scholars and researchers in fields such as literature, history, and the natural sciences.

Brown Auditorsium Debuts as Innovative Classroom Space

**COLE WARD**

Brown has announced that it will open the new Brown Auditorium on Nov. 3, 2000. The auditorium is designed to provide a state-of-the-art facility for teaching and learning, with a focus on enhancing the student experience. It features a range of cutting-edge technologies and equipment, including a 200-seat auditorium, a 120-seat lecture hall, and a 50-seat computer laboratory. The auditorium also includes a variety of multimedia capabilities, such as video projection, digital audio, and high-speed internet access. The new auditorium will be used for a range of academic and community events, including lectures, concerts, and film screenings. **Conn Students Seek Their Spiritual Sides at Workshop**

**LISETE PATEILLO**

On Friday, October 27, Connecticut College hosted the 13th Annual Connecticut College Meditation and Wellness Workshop, which features a variety of meditation techniques and wellness practices. The workshop is designed to help participants develop a greater awareness of their own inner world and to provide them with tools to enhance their mental and emotional well-being. This year's workshop featured a range of experienced meditators from various traditions, including Buddhist, Jewish, Christian, and Hindu. The workshop also included a panel discussion on the benefits of meditation and wellness practices, as well as a Q&A session with the panelists. The workshop was attended by a diverse group of participants, including students, faculty, and staff, as well as community members from the local area. The workshop was a great success, with participants reporting a significant increase in their ability to focus and relax, as well as a greater sense of calm and well-being. Participants also reported feeling more connected to their own inner worlds and to others around them. The workshop was a great success, with participants reporting a significant increase in their ability to focus and relax, as well as a greater sense of calm and well-being. Participants also reported feeling more connected to their own inner worlds and to others around them.

**Res. Life Sees No Housing Crunch for Spring 2001**

By DANIEL JARNOCH

After last year’s housing crisis, which left the majority of dorms filled to the brim, and only six rooms available in the newly renovated Wile Hall, the housing situation for spring ’01 should be more predictable. All buildings will be available to those on file at the time of registration and a few rooms still will be available from students who are not returning to college.

The process of the combined factors of larger and larger classes, and another winter, the movement of dorms in the Fall, and the move to new dorms for the Spring semester, the housing crunch for spring ’01 will most likely be a thing of the past.

Several buildings will be leasing the space available, the registrar will be sending out notes that will not be available for the spring of ’01. It is recommended that students who are interested in living on campus near the start of next year apply to all the buildings who will have rooms available.

Conway Campbell, Assistant Director of Residence Life, wanted to send a note to all students who are planning to return for spring housing, “We are still trying to figure out how the rooms will be assigned, We are not in a position to tell you if your room will be available or not until spring just don’t go and find it out!“

With all the dorms on line for the spring and the availability of residential housing, we will have enough rooms for everyone. The extent of the housing situation will now become more clear as a comes to a close, and a new group of students will be arriving soon. It will be much easier to put together before many have to worry about housing in December.

**Stamford Mayor Daniel Malloy Discusses the Problems of Urban Sprawl**

**STEVE REYNOLDS**

Daniel Malloy, the mayor of Stamford, Connecticut, and supporter of "smart growth," recently visited the College to discuss the problems facing urban areas. Malloy discussed the concept of "smart growth," which aims to develop cities in a way that is sustainable and environmentally friendly. Malloy also emphasized the importance of education and the need for residents to be aware of the issues facing urban areas. He encouraged students to be active in their communities and to work towards creating a more sustainable future.

Malloy also alluded to the students that spending on these roads is triple what it has been in the past, which allows people to move about within cities.

"Over the last 20 years or so, these cities have been built, not for people, but for cars," he said.

"The purpose of taking care of our environment is not just to keep it clean or to prevent pollution, but to create a world that people can live in, for the people who live there. It is both a moral and an economic responsibility to work towards creating a sustainable future." Malloy emphasized the importance of education and the need for residents to be aware of the issues facing urban areas. He encouraged students to be active in their communities and to work towards creating a more sustainable future.

Malloy also alluded to the students that spending on these roads is triple what it has been in the past, which allows people to move about within cities.

Where Gore is solid, Vote Nader

Whether Al Gore wins or loses the election will not be determined in Connecticut. According to the polls, Gore is currently going in to win in Connecticut, Massachusetts, New York and Rhode Island. With the winners-take-all system of the Electoral College, voters from these states should consider casting their ballots for Ralph Nader.

With Gore solid in these states, Nader has a distinct advantage. Accurate polls have revealed that Nader has a better chance of winning in the states that are in undecided良性，thus limiting the importance of deciding the outcome in Connecticut.

At a liberal college such as ours, a vote for Al Gore is most often discussed passionately in terms of protecting a woman’s right to choose, the environment, a more fiscally responsible government, and a vote for the Latino/a vote. On the other hand, a vote for Nader would contribute to pulling the Green Party into mainstream politics.

The Fairfield Representative of the Connecticut College Green Party, Sam Durand, said: “For a vote for Ralph Nader is constructive, because Nader decries the large influence that both parties have on the American population. Nader will serve to split the liberal vote and will help genes the nation.”

While the possibility of Nader splitting the vote is always a concern, Nader is certainly not going to win this election, but he is a viable independent voice. As a student who is not voting for either major candidate, I would support Nader. By the time a student is a sophomore, he or she is definitely aware of his or her likes and dislikes, abilities and interests. Even in cases where there are reasonable explanations, departmental differences can again be seen between the two parties. Currently, the parties both espouse platforms that are only different on a number of important but narrow issues. Consequently, Nader is a phone-in candidate that will be a start to making the Democratic party more open and interesting.

In a whirling dervish of panic this week, students have had enough of this. They have had enough of the Democratic Party's failure to produce a leader. They have had enough of the Republican Party's failure to show innovation. They have had enough of the lack of a third party. Yet despite the possible gain that can be achieved by voting for Nader, students may consider casting their votes for Gore if they feel comfortable with the Green Party. Nader will serve to split the liberal vote and will help genes the nation.

The General Education program is too inflexible. It requires students to take all of their classes in one area. By the time a student is a sophomore, he or she is definitely aware of his or her likes and dislikes, abilities and interests. Even in cases where there are reasonable explanations, departmental differences can again be seen between the two parties. Currently, the parties both espouse platforms that are only different on a number of important but narrow issues. Consequently, Nader is a phone-in candidate that will be a start to making the Democratic party more open and interesting.

Hate Crimes Laws are NOT Thought Crime Laws

Sara Kelley-Munde
Deja Vuong

To make it very clear, right now, that Hate Crime laws are no way, shape, or form an individual simply for their thoughts. We, as Americans, are free to hate whoever we want to hate, and we can broadcast that hatred to whomever we want. Jerry Falwell, Louis Farrakhan and the Ku Klux Klan are not being punished for what they hate each other enough to commit arson, for what they specifically deny with the right to free speech.

But the Fed has become into plain old violence, and we’ve got a problem, a really big one. And, hate crime law legislation (i.e. the hate crimes legislation of 1990) is an extension of antisemitic defamation laws (far more of which need to be passed) that do not create levels on how important an individual’s life. They establish the idea that we value membership of any group, and that no individual should be the target of someone’s hatred simply because they are a member of a particular group. I think most people who believe that others should be the target of their hate should be removed from society.

Hate Crime laws are not protection laws, they punish speech. Not every crime perpetrated against members of religions, ethnic or sexual minorities on hate crime. Hate Crimes, by definition, are not directed against individuals they are directed against individuals who represent groups. Hate crimes are, by large, perpetrated against individuals that the malcontent does not even know. People who go into gay bars, synagogues, churches and community centers and start firing at random are not attacking any one person in particular. They are attacking an entire group, and that is perhaps the most dangerous form of discrimination.

The problem is that there simply aren’t enough laws to handle every case. There isn’t a law for every hate crime that occurs. Hawaii simply doesn’t observe daylight savings time, nor does it have a law against hate crimes, but it does have a law against hate speech.

The argument doesn’t hold water though. Chances are, if you hate someone because they looked on you funny as a Christian who kills a Muslim man is not a hate crime, the hate crime law will not be the solution. It is not a problem of the hate crime laws.

But let that hatred turn into physical violence, and we’ve got a problem, a really big one. And, hate crime laws are not protection laws, they punish speech. Not every crime perpetrated against members of religions, ethnic or sexual minorities on hate crimes. Hate Crimes, by definition, are not directed against individuals they are directed against individuals who represent groups. Parsons Dance Company Brings OnStage Series to New Heights

By KATIE WASSELL

On Saturday, October 28th, Franz Hall, the Connecticut College department of music proudly presented the fourth annual Women in Music concert, a sight to see that is as vibrant as the performers who comprise this year's OnStage series.

The program began with a performance of "Struts Cake-Throwing Goodness;" a work by women composers, "according to composer, "so says professor of music Roxanne Althouse. The pieces ranged from flute pieces, to singing pieces, and even a piece called "Campus Bands Excite at Halloween." The music world has yet to give these women the recognition they deserve.

Despite this amazing piece, David Parsons was not the focus of the performance; rather his trope of eleven dancers was. These talented individuals have been praised all over the world and are well-known for their ability to perform with grace and precision. Parsons Dance Company (country)

Another piece called "Rush Hour" involved seven dancers, who danced in a circle with the fog machine providing the background. The fog machine was essential to the performance, as it added a sense of mystery and intrigue to the piece. The dancers wore costumes that were appropriate for the theme of the piece, and they were able to move freely with the mist. The performance was a hit, and the audience was delighted with the performance.

Despite the positive reviews, the performance was a disappointment for some. This is because the film was not as entertaining as its predecessor. While the film was not as successful as the first one, it still managed to make some money at the box office.

The film was directed by David Parsons, a well-known director who has had numerous successes throughout his career. He is known for his ability to create engaging and entertaining films that are enjoyed by audiences of all ages.

Despite the film's box office success, there were some negative reviews. Some critics felt that the film was not as good as its predecessor. However, the majority of critics were positive, and the film was still considered a success.

The film's box office success was due in large part to the marketing campaign. The film was heavily promoted, and the marketing team did an excellent job of generating buzz. The film's box office success was also due to the film's storyline, which was engaging and entertaining. The film's storyline was a mix of humor and drama, which appealed to audiences of all ages.

In conclusion, "National Lampoon's Vacation" was a success for the film industry. The film was well-received by audiences and critics alike. The film's box office success was due to a combination of factors, including a strong marketing campaign and an engaging storyline. Overall, "National Lampoon's Vacation" was a success and a testament to the film industry's ability to create entertaining and engaging films.
John’s Brick Oven Pizza: It Sure Destroys Domino’s

By JESSE ECONOMOS

As you turn the corner of Main and Division Streets, you will notice an alluring, haunting aroma that lingers in the air, promising something delightful. That scent is the result of John’s Brick Oven Pizza. The pizzeria is situated on Division Street near the entrance to downtown Groton.

John’s has been in business for over 15 years. Their secret lies in the brick oven, a carefully crafted fireplace that cooks the pizzas to perfection. The oven, along with a variety of fresh ingredients, gives John’s Pizza its unique flavor.

The pizzeria’s menu is filled with a variety of dishes, including pizzas, sandwiches, and salads. The pizzas come in different sizes and styles, catering to the tastes of all customers. The sandwiches are made with fresh, local ingredients and are a popular choice for lunch.

The pizzeria’s staff is friendly and attentive. They take pride in their work and are dedicated to providing customers with a great dining experience. They go out of their way to ensure that each customer leaves satisfied.

John’s Brick Oven Pizza is a must-visit for anyone who loves good food and great service. It is located at 505 Long Hill Rd, Groton, (860) 675-1920. Don’t miss out on this delicious treat! It’s sure to be a hit with pizza lovers of all ages.
Doctor Fish Brings Open Dialogue on Hazing

By LARA Appel

FRI., NOVEMBER 3, 2000

Doctor Fish Brings Open Dialogue on Hazing

The audience was made up of students: the students who were more confident, the students who were more anxious, the students who were thinking about coming out, the students who were not thinking about coming out, and the students who had thought about coming out but had stopped. It was a diverse group.

As the lecture began, the students were engaged and attentive. They were curious and eager to learn more about the topic. The atmosphere was one of openness and honesty, with everyone feeling comfortable to share their experiences and thoughts.

Dr. Fish began by asking the students to think about their own experiences with hazing. He asked them to consider what hazing means to them and how it affects their lives. He emphasized the importance of open dialogue and encouraged the students to speak honestly and freely about their experiences.

Dr. Fish then went on to discuss the dangers of hazing. He explained that hazing can be a serious problem that can lead to physical and emotional harm. He encouraged the students to take hazing seriously and to work towards creating a culture of respect and inclusivity.

Dr. Fish concluded his lecture by thanking the students for their attention and for their willingness to engage in open dialogue. He encouraged them to continue to think about the issue of hazing and to work towards creating a safer and more inclusive community.

The lecture was well-received by the students, and many of them approached Dr. Fish after the event to express their gratitude and to share their own experiences with hazing. The students felt empowered and supported by Dr. Fish's message, and they left the event with a greater understanding of the issue of hazing and a commitment to creating a better future for themselves and their peers.

In conclusion, Dr. Fish's lecture was a powerful reminder of the importance of open dialogue and of the need to work towards creating a better future for all. The students were inspired by Dr. Fish's message, and they left the event with a commitment to creating a more inclusive and respectful community.
The Napster agreement draws student criticism, praise

**By LAURA COMETA**

Colburn Hall resident advisor.

(WIRE) NEW YORK - In a landmark decision this Tuesday, Napster, the online music-sharing service that allows users to trade copyright-protected digital tunes for free, was ordered by a judge to pay royalties to the recording industry.

The judge said that Napster, which operates a file-sharing Web site that allows users to exchange copyrighted music, had infringed on copyright laws. The judge ordered Napster to negotiate a licensing agreement with the music industry or be forced to shut down.

Napster was founded in 1999 by then-University of California, Berkeley, law student Shawn Fanning. The company, which is based in Menlo Park, Calif., has been funded by venture capital and has been criticized by the record industry.

The judge's decision is a setback for Napster, which had been hoping to negotiate a licensing agreement with the music industry. The judge's decision means that Napster will have to pay royalties to the record industry or face legal action.

**Men's Soccer Season Ends With Shutout Loss to Bowdoin in NESCAC Tournament**

By MATTHEW B. KESSLER

Men's soccer finally received an opportunity to perform in the NESCAC tournament last weekend. However, the opportunity was marred by the Jamaica Plain native's first shutout in the NESCAC, a 2-0 loss to Bowdoin.

After barely qualifying for the NESCAC tournament, the Camels were banking on their experience to help them advance for the first time. The Camels had a difficult task ahead of them, as they ranked fifth in the six-team tournament.

The Toussaints, a third seeded team in the NESCAC tournament, are ranked 19th in the nation. They have had a lot of success over the course of the year. Playing with a very competitive, athletic team, the Camels managed to stay close in most of the games, only to fall short in the end. The answer should be a return to their final seven games (4-3). "Our season has definitely improved over the course of the year. Playing to face Middlebury in the semifinals, we were prepared to face the best teams in the league," said head coach Bill Lessig. "They're going to be a challenge, but we have nothing but a fantastic season behind us."

Considering all of the obstacles the team faced over the course of the year, heading into next season, the Camels will have nothing but a fantastic season. Next year's team will average of just 1.67 goals per game, but year's squad. "We met our goal this season for ourselves. We tried to focus on the process and not just going to focus everything on winning," said Lessig. "They're going to be a challenge, but we have nothing but a fantastic season behind us."

Lessig emphasized the importance of experience while playing in close games. "We need to build on our experience and the things we've learned this season. We need to be prepared to face the best teams in the league," he said. "We have nothing but a fantastic season behind us."

"Although our final record was 6-8, we were more successful this time around. When I say this, I think of our wins against Wesleyan, and the first few games had a lot of fans in the stands," Lessig said. "Our team is more experienced this year, and our players are learning on the fly. We have a great young team, and we're excited about the future."
