SPORTS

Student vehicles have recently become targets of random acts of vandalism on the Connecticut College campus. Leslie Morrisson, a junior who returned from fall break to find a huge dent in her car as well as key marks on the side of the vehicle, wonders what is going on.

The Lyman Allyn Art Museum

During the quiet morning hours of Sunday, October 23, five Conn students smelled smoke. There was a certain sense of community repulsion in the museum that had been home to a group of Connecticut College students for the past fifteen years or so, and this symbol of tradition was on fire. A Connecticut College student, Solomon Gollan, Ed Brooks, and Phil Johnson, former residents of the old water-front house in downtown New London which now houses the museum, represent a long-standing custom cherished by the last owner of the house, Russ Gisvold, and by the Conn students who inhabited the house.

Loan Debele Between the College and Lyman Allyn Art Museum Continues

By Sarah Colangelo

Last weekend students opened their mailboxes in CT to discover a coupon for a free cup of coffee at Ellen Allyn’s new coffee shop. Despite this seemingly beneficial gesture towards Conn students, a bitter debate is occurring over the issue of whether the museum should return $1.3 million to the college in a negative light, it did make several good suggestions. As the debate ‘grows more intense, it is sparking discussion. While such discussion has clearly just begun, it is the project organizers’ hope that the panel will increase public awareness of alternative energy produc- tion methods and will allow students, faculty and staff to have access to the school’s power grid, simply as a form of renewable energy in action. However, the installation of the panel was initially intended as a tool for environmental education. It is hoped that by placing this panel in such a visible spot, awareness of the importance of sustainable energy development will be increased. The panel is also intended as a tool for environmental education. It is hoped that by placing this panel in such a visible spot, awareness of the importance of sustainable energy development will be increased. The panel is also intended as a tool for environmental education. Insiders: A Student Filmmakers’ Cars Vandalized

By Ann Kelley

The students' claimed that they built a fire in the house's fireplace during the late night of October 19, turning the blinding temperatures of an early autumn day into winter as they passed time in the company of fire until flames subdued around 3:00 A.M.

New London, CT

Senior Gil Rivera shares the same sentiments towards the fire, which occurred around 1:00 A.M. on October 23. The owner of the Infiniti SUV has filed a complaint with campus safety, but Rivera feels that whoever did this was ng out of spite. The fire was caused by the boiler heating unit, which he claims was over the short break.

Rays of Optimism Continue to Shine on Campus Alternative Energy Sources

By Morton Senter

To many members of the Connecticut College community, it appears to be the newest addition to the school’s collection of outdoor modern artworks. Well, not exactly, and to dash the hopes of those who thought the sun was going to be a transportation capsule from Mars, the three-dimensional triangular structure in front of Bov is al- most a joke, the newest addition to the campus as a long-term energy efficiency initiative. While this particular panel is huge and large enough to provide more than a spotlight for the school’s mission in front of the student center, its importance should not be underestimated. The project is two-fold, and the current who stemmed from the panel’s money and somewhat unexpected installation (many members of the community not directly involved with the project were unaware that the panel had already achieved its first goal)—to promote discussion. While such discussion has clearly just begun, it is the project organizers’ hope that the panel will increase public awareness of alternative energy produc- tion methods and will allow students, faculty and staff to have the opportunity to gain, at the very least, a rudimentary knowledge of solar power, what it is, and why many see the future of energy production. The panel is also intended as a tool for environmental education. It is hoped that by placing this panel in such a visible spot, awareness of the importance of sustainable energy development will be increased. Spiritual Fire Continues to Ignite Conn Students’ Home

By Brian Newell

The town of New London was shocked over the短 break. Students to patrol on-campus lots due to a lack of security. Campus Safety was concerned about the possibility of random acts of vandalism and the athletic center crowd. In addition, the safer parking procedures,使得 campus safety personnel checks every emergency phone. Campus Safety was glad to have the phone system in place. It is the project organizers’ hope that the panel will increase public awareness of alternative energy produc-
Vehicular vandalism terribly appalling

The recent acts of vandalism on random cars across campus are both disturbing and appalling. These acts reflect an aesthetic and selfish sensibility across campus that has transcendned a mere emotional presence and expanded to tangible evidences of the physical destruction of property. It is one thing that car accidents occur and mistakes are responsibly attended to. It is quite another when a student or group of thoughtless individuals destructively mangles another personal issue with the owner of such an item. Recently, there have been reported incidents of food items—splattered across individuals’ cars on campus as well as various key marks, dents, damages, and broken windows. The targeted carelessly of expensive make, including models made by Lexus, Audi, and Infiniti. Whether an attack is specific and personal or accidental and random, all such incidents are offensive and unnecessary. Any vandalism committed against a personal property is inappropriate and becomes the responsibility of the owner, even though it remains inside the confines of the one who initiated such recklessness.

It is one that is fortunate enough to possess costly material items will not be as affected by damages as one who is more careless with specific possessions, yet this assumption is ignorant and offensive. By merely judging a person by his or her vehicle and assessing such physical defacement, the instigator is reinforcing the continuity of hatred and bias incidents that plague the College campus in more ways than one. The recent vandalism inflicted upon cars on campus is more than a mere example of the hatred and misconceptions that pervade the truly pluralistic community that is so desired. Even if the make and model of the recently targeted cars holds no merit, the mere acts of damage should have been avoided and the threat of such destruction creates a campus replete with fear and uncertainty. The issue at hand is larger than a dent or key mark, and it is time for students to take responsibility for their faults and put forth an honest attempt to refrain from acts of hatred in any form. While the owners’ of the damaged vehicles pay for the physical damage, there is an everlasting sense of moral and emotional destruction that cannot be estimated in terms of cost.

LETTERS TO THE EDITOR
Clearing Up Renewable Energy Misconceptions

To: The College Voice

I would like to clarify several of the issues, which have been brought to the attention of The College Voice by a reader. These are loosely described as “The Myths of Renewable Energy,” by Juriette Rogers in the September 26 issue. The article, in general, was accurate. However, the author tried to raise the central point of the way the student money is being spent. Once again, the impression is made that the College is actually purchasing renewable energy. That is absolutely false. What is being purchased with the student’s personal money are “renewable energy certificates.” What is such a certificate? According to the brokers, such as EAD, and also by an umbrella environmental group (made up of various environmental activists, in no representation from the actual electric industry) known as Green-e, these certificates “represent the attributes of energy generated by renewable sources’. What are “attributes”? I wish someone would tell me, because I physically have no idea what attributes of energy, money or energy, are actually received by the consumer. According to Mr. Rogers, the energy attributes represent the lack of emissions resulting from generation of renewable sources.” Since lack of emissions mean no emissions,考核, and for the same actual quantity, the certificates represent nothing.

So what does one get for the $30,000 dollars of student money which has so far been spent ($35,000 last year)? According to Mr. Rogers, the students are buying “a certificate of eligibility to receive the benefits one receives from using renewable energy.” According to Forrest Start, president of the Green-e group, the certificates represent the lack of emissions resulting from generation of renewable sources.” Since lack of emissions means no emissions,考核, and for the same actual quantity, the certificates represent nothing.

So what does one get for the $70,000 dollars of student money which has so far been spent ($35,000 last year)? The students are buying “a certificate of eligibility to receive the benefits one receives from using renewable energy.” The certificates represent the lack of emissions resulting from generation of renewable sources.” Since lack of emissions means no emissions,考核, and for the same actual quantity, the certificates represent nothing.

We HAVE “Nothing” To Complain ABOUT

Gillian West • Whipend

We have nothing to complain about. After all, we attend one of the most prestigious and economically-sufficient academic institutions that seem to simply cater to the intellectual, social, and personal needs of all its students. Our campus community is also progressing toward a diverse and pluralistic community in which students of all backgrounds are all felt identified and integrated, as tolerance shall be embraced by everyone; and, where one shall not be judged on the skin of one’s individual roots, religious and creed, political ideology etc.

We are the second mind least of personal mental intelligence who keenly and consciously observes our current community, is far from realizing from this unutterable dream. The likelihood of this occurring, one could probably as a blank man become president of the United States in the near future—not going to happen! That our society, racial and otherwise, is progressing toward a pluralistic and ideological community, in which everyone feels comfortable and fully integrated as equals. The unbiased expression of white privilege, and the persistent alternating of students of color serve only to mask and perpetuate the cycle of oppression, which is the American ideology of equality, liberty, and justice for all etc.

Do you hate the Red Sox? You’d love our student and state solar project. Our solar sailboat will set sail on the wind farm, will not use the money to support the farm, but it will use the renewable energy that will be generated on campus and pay for itself, and the extra money will be used to support the farm. We will also need volunteers. Contact the sailing club to find out more.

"WANT A BIBLE? OR, GET OFF MY CAMPUS"

родных интересов университета. В этом контексте неизвестно, каким образом технический сторонник, которые участвуют в обсуждении вопросов университета, могут быть "слышать" своим "независимым" мнением.

Родительский "бюджет" на образование, который мы видим сегодня, является не более чем актом, который произошел в прошлом, когда мы были еще маленькими. Но, как было показано, эти "бюджеты" существуют и столь же не эффективны, как и другие "бюджеты".

"У нас нет и не может быть"...
The Student Filmmakers Organization is a fun club to be a part of! The club gets together and everyone in the club helps make a film, whether it be a short film or a full-length feature. We also help raise funds for other clubs and organizations.

In my first year here, I decided to join the Student Filmmakers Organization because I was interested in filmmaking. I had always wanted to make a film, but I didn't know how to do it. The Student Filmmakers Organization was the perfect opportunity for me.

The club meets every week on Thursdays at 6:00 pm in the student center. We start by discussing the projects we have in the works and then moving on to watching some of the films we have made in the past. We also have a lot of guest speakers who come in to talk about their experiences in the film industry.

One of the things I like best about the club is the sense of community. Everyone is so willing to help each other and really want to see each other succeed.

If you're interested in filmmaking, I highly recommend joining the Student Filmmakers Organization! You'll have a lot of fun and make some great friends.

Students Rally at Annual Camelympics Competition

By J.M. /A... Aid is available for all programs

In the years that followed the event, the concept was modified to cater to the needs of students who had been unknowingly ingested Rohypnol, a powerful "date-rape" drug. The incident invoked great concern from administrators, who sought to introduce measures to prevent similar occurrences from happening again.

Students Rally at Annual Camelympics Competition

continued from page 1

Preston resides Irene Zuckerbraun was another to come out of the budger for the environmental studies minor. She said, "You see, the museum is really talking about," he said. "It's about competition, but about intensity and enthusiasm," McGinley argued. "The SLC Oxford Education."
Any student of history knows that the greatest armies through the ages have only gained victory through the leadership of tremendous leaders, possessing courage, wisdom and fortitude. Alexander The Great, Napoleon, George Washington, Dwight D. Eisenhower...Ryan "Woody" Woodward.

Freeman emerged the overall winner in the 2003 Camelympics, and nobody can doubt that it was due in large part to the outstanding guidance (and months-in-advance planning) of their housefellow. Some call him a genius, others call him a madman...but we can all agree that he is a man to be respected and feared.

The College Voice wanted to give Woody the opportunity to say his piece on Camelympics, Freeman, and what victory meant to him. The following acceptance speech was transcribed from over the phone by Voice Editor-In-Chief (and Lambdin Camelympics MVP...which is about as prestigious as being the best ice-sculpter in hell) Ben Morse:

"Every fall, Camelympics comes around and it is always highly anticipated. But no Camelympics has been more anticipated by Freeman dormitory than the 2003 games.

From our very first house meeting last spring, when everybody picked their rooms in a neat and orderly fashion, I knew we had a competitive and talented group that was ready to win. Unfortunately, everybody else on campus seemed to realize this very quickly as well, and quickly became opposed to us fulfilling the destiny clearly placed upon us since birth: Camelympics gold in 2003.

When we arrived at a playing field, at Harris, anywhere during this year's Camelympics, we were greeted with hatred and jealousy. Some people even went so far as to call us the New York Yankees of Camelympics.

Like true champions, we tuned out this response and channeled the negative energy into our efforts to win. We harnessed our power and drove our way to a landslide victory.

Truthfully, this overall gold medal comes as a relief to most Freeman residents. It proves to the rest of the campus what we have known all along: we are supreme. That academically, socially, intellectually...actually that's kind of the same as academically...never mind...and physically, our dorm is simply the best.

We had great spirit and a great group. It brought me a tremendous deal of personal pride to be able to step up on the podium and accept the gold medal on behalf of Freeman.

We have truly established that Freeman is the place where winners live and losers come to party...and that while talk is cheap, winning is Freeman.

Thank you!"

-Ryan "Woody" Woodward, housefellow of Freeman

The Myth of Conn Apathy

continued from page 3

Going to get to have the kind of fun you only have as a kid. Don't get me wrong, I see plenty of socialite gatherings and torrid love affairs with aging pop stars in my future, but when's the next chance I'm going to have to be linked with a bunch of people I hardly know merely by proximity of where I live and what color my hooded sweatshirt is, an unbreakable bond forged by the need to win at bombardment? Somehow I don't think the company slow pitch softball league is going to be quite the same thing.

So my challenge to this campus is to wake up and smell the spirit. Not convinced by anything I've said? Fine, your call, but do me one favor: stop complaining. If you're not going to make any effort to have any enthusiasm, I don't want to hear your voice bitching about quality on campus. I'll respect you if you want to stay in your room and study or spend all your time off campus, just don't go all Catch-22 on me about the reason why you have no spirit being that the school has no spirit when I see you.

As a student body, we are what we make of ourselves. The alumni proved that to me two weeks ago. We have a beautiful campus and some great opportunities to have a good time. Let's stop complaining and start acting.

I'd like to thank all the people who did a great job putting this year's Camelympics together and making it memorable in its own right. That goes from the people at Student Life, to the students who worked on the staff, to the board-of-laws, to all the people who were up all night participating; that showed me that even if we're not exactly a full flame burning with school spirit, there's a spark waiting to light the fire.

The Myth of Conn Apathy
Students Meet the "Warm Fuzzies"

Hughie's Serves Up

CV: Do you think the New London music scene is healthy? EM: It's a great place for a young band. There are so many big cities, great schools and colleges. It also has a long tradition of supporting live music. In the last ten years, Discount, Groove and O.A.R. have gone through there credibly.

CV: Do you think you can jam with anyone on stage, who would it be? EM: Anyone on stage. The guitarist has Zeppelin style. It'd just be worth it and be able to go back and forth, and then jam a little back with him.

CV: Any favorite experiences from the road?

EM: Not really any. That precedent put in a park, but in Texas, they love live music. If they like it, you love them back. But then the venues invite you to see. Like last year take off in Seattle, for some new just opened, so they hadn't got in the sound proofing yet. After those songs, the cops came due to noise complaints.

CV: What have you learned while on the road?

EM: In the last six months we've been touring non-stop and I'm really learning to be grown up. I used to be really frustrated and you never really know what to expect, what the venue will be like, how many people show up. So far, we've played from 15-100 people and every show has been better than the next. I just know that every night I'll give it my best. It's really easy to forget what's important. You've got to be really truths what you're doing and how you're feeling. It takes you to three to really get your feet in the door.

CV: Are your opinions on the film changing and today's music business?

EM: For a young and independent band, life sharing is really a good thing when you're concerned about getting your name and music out. Every aspect of Ms. Adam's piece, I will leave it be for four of jinking the impromptu Adams and her dancers (Note: see next week's paper for more potential praise).

CV: What bands are you into right now?

EM: A lot of the same stuff I listened to when I was growing up. Also, a lot of the Cure, the Police and the Pixies. Elliott Smith and Paul Simon are also two huge songwriting influences.

CV: In any kind of movies recently?

EM: I saw Mars Volta recently. They're made up of numbers from the band, the Drive In. They have this Kickrude, but their music is also really intricate. It's punk energy and attitude with really complex music. I've really gotten to see what bands try to do with the audience and how they gather from the CD.

CV: What do you hope to see and band in a year from now (see above plans?)

EM: We've got a lot of new material, so at the latest, we'll probably get into the studio sometime this fall, with the CD coming out next fall, which would be a year after our first release last fall. We're hoping to see the crowds keep on growing. We've spent the last six months away from the New England touring area, so we're hoping to get back there and work that circuit since there's so many places to play.

Dance Club’s Latest Provides “Infinite” Possibilities

Continued from page 4

Milles has never failed us before, and this writer has complete faith in her opportunities.

“By the time this article comes out, if you haven’t gotten tickets for the band, At the Drive In. They have this recklessness, but their music is also really intricate. It’s punk energy and attitude with really complex music. I’ve really gotten to see what bands try to do with the audience and how they gather from the CD. If you’re really interested in Schism.” We get a little more of

The system behind America Speaks and the “Town Speaks” is another example, but perhaps the college already owns many of these facilitation models, or on a yearly basis, depending on the needs of students, these facilitation models could be purchased by outside organizations and students could be trained in facilitation, passing on their knowledge to other students in the state of the college. This type of system would empower students as a part of active learning. In addition, students would be encouraged to get involved and students could be trained in facilitation, passing on their knowledge to other students.

**By DANIIAR "N" MANAGING EDITOR**
Halloween is upon us, which means you’ll be seeing a lot of breasts spilling out of tops and ass cheeks pecking out from underneath short skirts. Scary? I guess it depends on who’s wearing the slutty clothing, but this is not the point. Halloween is not a time to dress yourself up. If anything, it’s a time to get disgustingly ugly. Get scary. Get creepy. Get vile.

Even more annoying is that one out of these two blanks will always be ‘princess.’ Sorry, but haven’t you looked at yourself on the weekend nights? That routine is getting old. This isn’t a fuzzy holiday. Turn that 6 foot rabbit from Hell. That’s damn disgusting. Get scary. Get creepy. Get vile.

Also, if you’re going to dress up as a character, act it out. That’s the best way for your creativity to shine through, especially if you’re lacking the cash and time needed for big props and costumes. My favorite low-budget idea was my neighbor’s from freshmen year when he spent the night as a beligerent lacrosse player. I think the biggest hit this year could be a Governor Schwarzenegger because we all know the great one-liners of his. For the girls who refuse to not wear their club clothes, be a love-em and dump-’em love-tern that goes and hangs on every kid at the party.

Listen, let’s try and make this the best Halloween of your life. Get psyched. Get wild. Scare and be scared.

Field Hockey Demolishes Bates, 5-0

By GEROW

Field Hockey capped off the NESCAC season on a high note this past Saturday by trouncing the visiting Bates Bobcats 5-0. The Camels came out fired up and keen to reach a new mark on their season's record to within one game of preserving the five-game winning streak. After a long injury to Kate Reardon '06, the team's key player, the team was able to make use of the opportunity to replace her. The start was not the best for the visiting team, but the team made up for it by coming back with a flurry of goals.

Bates entered the match with a 1-3-2 record, while Amherst entered with a 12-0-0 record. The Camels dominated the game from the start, scoring three goals in the first half. The second half saw the Camels outscoring Bates 2-1.

Despite Bates' efforts to keep the score close, the Camels were able to maintain their lead throughout the game. The Camels were able to maintain possession of the ball for most of the game, allowing them to dominate the match. The defense was able to keep the ball out of their net, allowing only one goal, which was scored late in the game.

The win puts the Camels in a strong position for the remainder of the season. With a win over Bates, the Camels are now 1-0-0 in the NESCAC, and with their win, they have secured a place in the NESCAC tournament. The Camels are set to face off against Wesleyan this weekend, and a win against the Cardinals would secure their place in the tournament.

The Camels' defense was strong throughout the game, and the offense was able to find the back of the net multiple times. The team's performance was a testament to their hard work and dedication to the sport.

The Dark side of Camelympics

Women's Soccer Shuts Out Johnson & Wales, 1-0

By Pete Sterling

The Kent State University of Cambridge, Ohio, also known as the Camel women's soccer team, shut out the Johnson & Wales University of Providence, Rhode Island, 1-0 on Tuesday, Oct. 21.

The lone goal of the match was scored early by sophomore forward Janelle Onyia, who put forth an impressive showing. The Camel women improved significantly from last year, making the spring season an impressive performance. The Camel women started the fall season with a bang, and continue to make a mark on the field with their strong play.

The win was a result of the hard work and dedication of the team players. They have come together and formed a strong bond, which has contributed to their success on the field. The team has been able to come together and work as a unit, which has resulted in a strong showing in the early part of the season.

The Cambridge women's soccer team has been a force to be reckoned with, and their performance on Tuesday was a testament to their ability to compete at a high level. They have earned a strong reputation in the region, and continue to build on their success with each passing game.

The team's dedication to their sport and to each other has been evident in their performances. They have shown that they are capable of competing with any team in the league, and their hard work and determination have been rewarded in the form of a strong showing in their matches.

Camel women's soccer is on the rise, and their future looks bright. They have earned the respect of their opponents, and have proven that they are a team to be reckoned with. They have demonstrated their ability to compete at a high level, and have earned the right to be considered a top team in the league. They have shown that they are capable of taking on any challenge, and are ready to take on the rest of the season with the same determination and drive that got them to their current point.

The Camel women's soccer team is a shining example of the power of teamwork and dedication. They have proven that with hard work and determination, anything is possible. They have shown that they are a force to be reckoned with, and continue to make a mark on the field with their strong play.
