**Students Urged To Consider New Year As Another of War**

The proper attitude toward the war in which we are now engaged is the only reasonable one. The attitude is one of quiet confidence in the ability of our people to win the war and the knowledge that the role of every person is important in the successful prosecution of the war.

Miss Schaffer stressed the fact that 1945 is going to be another of war, but it does hold prospects of being a very hopeful year. She said therefore, that it is our duty to be unswerving in the attitude we must make and to appreciate both the things we are working for and the sacrifices we are making to achieve the end of the war, which is the peace of the world.

We were an integral part of the process with Senator Claude Pepper of Florida, member of the Foreign Relations, Education and Labor, and Public Welfare committees.
