George Gamow Will Interpret Our Atomic Age

Because we are living in an age of atomic physics, Dr. Gamow was chosen to speak on the subject in the spring of the Intercollegiate Pardalites at the next Convocation, which will be held from 8:00 p.m. in Palmer Auditorium.

Mr. Gamow is, at the present time, professor of physics at George Washington University in Washington, D. C. He was born in Odessa, Russia, on March 4, 1904, attended normal school in Odessa and then gained a fellowship at the University of Göttingen in Germany. He was an assistant at the physics department of that university from 1930 to 1931 and gained his Master's Degree in theoretical physics at the University of Leiden in 1933.

Has Many Interests

He has been a professor at the University of Wisconsin since 1934. He has written a number of books on physics, many of which have been translated into other languages. He has written a number of scientific articles that have appeared in scientific journals. He has also written a number of popular articles for newspapers and magazines. He has been a consultant to the space program of the United States government.

Mr. Gamow has attended the Solvay Congress in Brussels and the International Physics Congress in Paris. He has been a member of the editorial board of the International Astronomers Union since 1934.

In addition to his work in physics, Mr. Gamow has written a number of books on literature, art, and music. He has also written a number of articles for newspapers and magazines on these subjects.

In addition to his work in physics, Mr. Gamow has written a number of books on literature, art, and music. He has also written a number of articles for newspapers and magazines on these subjects.

String Quartet Provides Rich, Varied Program

Palmer Auditorium will be the scene of the second of the Chamber Music Series sponsored by the Department of Music of the University of New Haven. The New Haven String Quartet will make its appearance on Thursday evening, March 10, at 8:30 p.m. This is an all-American quartet and has appeared here several times before.

The program will be performed in several centuries, constituting itself, if not a traditional interpretation, one of the most interesting events of the season. The program is as follows:

I. Schubert: String Quartet, D minor, Opus 151. (First Movement)
II. Beethoven: String Quartet, G major, Opus 18. (First Movement)
III. Mendelssohn: String Quartet, A major, Opus 12. (First Movement)

The members of the quartet are: Richard B. E. Partch, violin; Matthew B. M. Kamm, viola; Walter Tripp, cello; and David Sayer, violoncello.

Tickets to the concert are $1.50 per person. Members of the college and faculty may obtain tickets through Mr. Quimby by placing orders in his box.

Frosh Choose Millay

Six-year-old Anne Faust Millay has been elected to the senior class of the Connecticut College. The election was held on the campus of the college.

Hislop College, Nagpur, India.

Dr. David G. Moses Speaks at Vesper Services

Speaking at the vesper services on Sunday will be Dr. David Gamow, professor of physics at the University of New Haven, in Connecticut College. The service will be held at 7:30 p.m. in the Faculty Lounge.

Dr. Moses is a graduate of the Massachusetts Institute of Technology and holds degrees from the University of Chicago and the University of California. He is the author of a number of books on physics and has contributed articles to scientific journals.

His work has been recognized with a number of awards, including the American Physical Society's Award for Distinguished Service to the Profession, the American Institute of Physics Medal, and the National Academy of Sciences Medal.

He is a member of the American Physical Society, the American Association for the Advancement of Science, and the American Institute of Physics.

Free Speech
A Forum of Opinion from On and Off the Campus

Relatively little has been known about the student movement in New Haven, but it would seem that the Connecticut College community at large of the doings of the Pennsylvania Society, a dedicated group of political radicals committed to the cause of free speech. The society was founded in 1914 by a group of students from various colleges in the area, including students from Connecticut College.

To the Editor of the CC News:

Yale Daily News

Established 1916

Publisher: The Daily News, Inc.

In the midst of the continual flurry of campus activities and events, it is easy to overlook the importance of individual choices and decisions. One of the most crucial choices an individual can make is their profession after graduation. As a member of the editorial board of the Yale Daily News, I have had the opportunity to observe the thought processes and decisions of my peers as they face the challenge of choosing their career paths.

The choices made by individuals can have a significant impact on their future and the communities they eventually serve. For some, the decision to pursue a career in law or medicine is driven by a desire to make a positive impact on society and improve the lives of others. Others may be drawn to the creative fields of art, music, or writing, finding inspiration in the power of expression and communication.

As an editor, I have had the privilege of working with talented and dedicated individuals who have dedicated their lives to their respective fields. Witnessing the passion and commitment of those around me has reinforced my belief in the importance of individual choices and the potential for positive change that can result from them.

In conclusion, the choices we make as individuals are not only personal decisions but also have the potential to shape our society and the world in which we live. As we make our career choices, we should consider the impact of our decisions and strive to make choices that align with our values and contribute to the greater good.

Question of the Week

What one improvement would you make at Conn College?

The question of the week is in response to a recent editorial in the Yale Daily News that discussed the need for improvements at Conn College. The question aims to engage the campus community in a conversation about what changes they would like to see at the institution.

Quilan Finds Teaching New Experience
by Helen Quinlan

Ed Note: The following article has been written for the Connecticut...
Paul Riley Speaks
On Father's Role
Mr. Paul Riley stressed the impor-
tance of the role of the father in raising children at a meeting of
the Home Ec-Child Development
Club on February 22. Dr. Riley is
Professor of Family Development
and Director of the Child Study
Center at the University of Con-
necticut.
Dr. Riley spoke of the great de-
mand for good nursery school
teachers who are capable of
training youngsters for their im-
p ortant school years. He also men-
tioned that new methods of child
rearing are now being used which
are not practiced a generation
ago. He said that there is much
current research in the rapidly
expanding field of child develop-
ment.
Dr. Riley concluded his talk by
saying that “there is no business
like baby business.”

Buyer Club Awards
Retail Scholarship To Winning Senior

Miss Margaret J. Deen, President of the American Women Buyers Club, announced today that the Club is awarding its second annual scholarship to a graduating woman student for one year of study leading to the degree of Bachelor of Science in Retailing in the New York University School of Retailing. Dr. Deen expressed her appreciation and gratitude to all women students who applied for the award. The selection was made solely on the basis of a written application. The scholarship is open to women students who are graduates of accredited colleges and have a minimum grade point average of 3.0. The recipient of the scholarship is Miss Marjorie A. Brown, a junior at Barnard College, New York City. Miss Brown was selected from a pool of 15 applicants who met the qualifications. The selection was made by a panel of judges who included Dr. Deen, Miss Brown, and two other members of the American Women Buyers Club. The scholarship will be used to support Miss Brown's studies at New York University. The scholarship is renewable for up to three years.

Teaching (Continued from Page Three)

had not been resting in the Eng-
lish grammar class. I wouldn't
have felt so bad. Yet other times
the class was so cooperative and
friendly, I knew that I had chos-
en the right profession.

Although at times I found the
routine of going to RIES to be
tedious and dull, on the whole I
thoroughly enjoyed it. Perhaps I
can sum up the entire experience
by this statement. No matter
how hard I found getting dressed
and getting to school, as soon as
I entered the classroom my out-
look on life completely changed.

Walking into the classroom in
the morning to face the eager
pupils gave my day a lift un-
equalled by any other experience.

The-Collegiate Code suggests
that the outside of the hood
should match the gown material.

The hoop is bordered with velvet,
and the lining of the degree,
rather than the department in
which the major work was done,
governs the proper color of the
border. An example is that a
"Bachelor of Science in Engineer-
ing" requires the gold yellow of
American hood marks the college
which the degree was obtained.
The hoods must be of the same
shape and size of the institution
conferring the degree, and the
colored lining inside of the
hood is the official color or colors
of the institution conferring the
degree. Some hoods have a solid
color lining, as those of N.Y.U.,
Chicago U., while others, as those
of Columbia U., have a chevron,
a wide stripe of another color,
against the background col-
our. Some institutions use a dou-
ble, triple, or reverse chevron as
variations.

In assigning the colors to signi-
ify the respective faculties, the
Inter-collegiate Commission re-
tained as far as possible historical
associations.
