The United States is standing on the brink of war. Although we have moved a step back from the edge in comparison to our former position, the current situation is far from certain, and a sudden vacuum may send us irrevocably over the side. What is the controversy? How have we gotten into this precarious position? And above all, what are the implications of the Berlin crisis—to ourselves, to the Western world, and to the future of communism in Eastern Europe?

Berlin is located 110 miles inside the borders of Communist East Germany. The West has access to the city by means of one highway, two air routes, and one railroad line. This is the immediate center of the controversy. In November, Soviet Premier Khrushchev put forth a plan to remove the occupation forces in Berlin, and make West Berlin (the Allied Sector) a "free area"—free from what remains a moot question. If the Allies did not remove their forces, he continued, the Russians would turn control of the access routes to the East Germans, a move with representatives of a country they do not recognize. Furthermore, by stating their intentions of moving occupation forces out of East Germany, the Russians assume the pose of leader in the journey toward German reunification, leaving the West, whose major aim is a united Germany, one step behind and supposedly the obstacle to any plans along this line.

As developments turned up, the West realized that it was left with three alternatives: to move out of Germany; to resort to war, and to negotiate. The issue of negotiations has been tangled from the start: Khrushchev has vetoed the suggestion of a foreign ministers meeting unless on his own terms, and has promised a summit meeting instead. The Allies, on the other hand, are definitely in favor of a foreign ministers meeting, but they refuse to accept Khrushchev's proposals, and will resort to a summit meeting only in the last hope for settlement. Unfortunately the chances of any real decision even at that level are debatable, for both Russia and the Allies have made it a point to affirm and re-affirm the strength of their positions. A compromise perhaps will be the result, but what can a compromise accomplish? Further partition of an already divided country? Re-allocation of Europe? Marvelous training. In this way, a consensus of the European nations, and the Scandinavians, can be formed. A country they do not recognize. Furthermore, by stating their intentions of moving occupation forces out of East Germany, the Russians assume the pose of leader in the journey toward German reunification, leaving the West, whose major aim is a united Germany, one step behind and supposedly the obstacle to any plans along this line.

It would not be in order to judge Miss Pons’ performance on the basis of contemporary concert standards for vocalists. Her performance would suffer greatly. Without question Miss Pons’ voice is the boldest and most generous of any we have seen. Although Miss Pons is not a perfect stylist, she is a firecracker. She is a vital and exciting performer. Her unique talent was obvious. It was pleasant to be exposed to her lovely voice. The best pieces performed by Miss Pons were Dell’Aqua’s Villanelle and Vacher’s “La Pieta Enchantée”
