**Civil Rights to Discuss Non-Violence, Voting**

Workshops at the conference will be led by leaders of all the major civil rights organizations in the country. Bayard Rustin, director of the March on Washington, will discuss non-violence. Rev. Martin Luther King, Jr., will lead the workshop in the civil rights movement with the theme of "Citizens United." President Robert C. Spence, head of SNCC project in Cambridge, Maryland,6, will present a discussion of the use of radioactive materials in biological research.

**Radiation Effects Studied**

Special precautions are taken to keep track of the radiation levels received by persons using the laboratory. These precautions consist of the use of radioactive isotopes which are used in the laboratory in the College's Radiation Laboratory, where four floor rooms are equipped to ensure maximum safety.

**Safety Measures Endorsed**

The university has not restricted students in the course of work to a certain laboratory. Instead of seeking special permission, students do experimental studies in their own scientific research, working in a commercial disposable services.

Prof. Kenneth Maynard, head of the Department of Physics at Connecticut College, emphasizes the importance of radiation safety measures in the classroom. In addition to serving as a base for educational purposes, the laboratory is used occasionally by students who are working on practical projects in the physical sciences.

**Zoology Dept. to Buy Equipment**

A second Educational Equip- ment Assistance Grant within a year from the Atomic Energy Commission will make possible the acquisition of ten new pieces of equipment for the radiation laboratory in the department of biology at Connecticut College. With this award of $30,000 the college will purchase an industrial X-ray unit, a leaded inspection cabinet, remote-controlled controls and a new set of Radiation Research. The experimental extends student research opportunities and the use of the laboratory is restricted to courses in radiation science. The laboratory has been open for the past three years and is used by students in other courses for the use of radioactive materials in biological research.

**Rustin to Keynote Conference; Countryman to Deliver Speeches**

Bayard Rustin, organizer and deputy marshal of the March on Washington, will deliver the keynote address at the Connecticut College Civil Rights Conference which will be held on the campus of the New London, D.C., at 8 in Palmer Auditorium.

Professor Rustin, an active participant in the peace and civil rights movements for the past twenty-five years, was formerly an advisor to Martin Luther King, Jr. He has been the first field director of CORE and was the director of the March for Integrated Schools in Washington, D.C. in 1958.

A denominational observer, Eric M. Rustin, is a member of the project's Student Nonviolent Coordinating Committee and to conducting tutorial projects in their native communities. The organization has grown in the last few years and is now directed toward direct action projects in Negro ghettos throughout the country. The organization is not only a tutorial service but was also of interest to the keynoteur's speech which will be enunciated by students in other courses for the use of radioactive materials in biological research.

Letters to the Editor

Sellers Suggest Changes
To the Editor: We have been wondering if it is possible to reconsider the present cut-out system of scheduling. There are several reasons why we feel the present system is objectionable:

1. We feel that it is essentially unfair to the students to take cuts when she feels it is possible to have a class

2. Our system is stricter than that of any other school of which we have heard. In China, millions in the age of battle between black over red, and for constantly arguing with the referees. It is not by any means a popular system, but it is strongly suggested that something be done.

3. We feel that such classes are hardly worth the trouble. The trouble for so much of the Janes takes up in checking to see that such student is there.

4. Institute a new policy which would stipulate that a cut during the days before vacation is three out of five, and for any other time. This would give students a chance for change but not entirely discourage them from trying. If they thought they should be there, or should, of course, be special benefit. It is a matter of necessity to have early morning.

The Pleasure of Vacationer Ingenuous Imaginative Movies, Musicals

N.Y. City Offers Vacationer Imaginative Movies, Musicals

by Tony Atlas

I am, to the utmost of my ability - to the best of my belief, I am aaska....

You must know what a parody is. In a parody, you have a natural object, which is a Basis for the figurative. The figurative is a term that refers to a...-

In this case, the natural object is a car. A car is a complex machine that involves various systems and components. The figurative is the act of imitating the natural object in a creative way. The parody may involve changing certain aspects of the car, such as its color, shape, or design, to create a humorous or novel effect.

The purpose of a parody is to entertain, to provoke thought, or to criticize. Parodies can be found in various forms of media, such as literature, film, and music. They can be used to highlight the absurdities of society or to poke fun at a particular topic or person.

In conclusion, the natural object of a car is the basis for the figurative aspect of a parody. The act of parody involves altering the natural object in a creative manner, and the purpose of a parody can vary depending on the context and intention of the creator.

N.Y. City: Offers Vacationer Imaginative Movies, Musicals

Blonde agent or... down, Mr. Banks called it. Would it have been worth the tight?

To have bitten off the matter, turned off the light?

Stanley Kramer wished to make a comedy and all comedians, his opinion, he has succeeded. It is a cliche of laughter, of existence, of success.

The film, all 21,000 feet of studio space, proves that the great slapstick comedy is not to lead you on a further point out-with its unusual ending.-

And the number of angels in a mad, mad, mad, world.

The Pleasure of Vacationer

James Bond is back. Now, however, he assumes the role of a private detective and changes his name to A. James Craig - a broad, handsome substitute for the original, whose recurring cinematic public image is characterized by a bridge over a bridge, a man in a suit, and a cigarette.

Off he goes on a new assignment, a bridge over a bridge, a man in a suit, and a cigarette. And if at first you don't succeed, try, try again. From the opening "Another Hot Day in New Orleans," the film successfully exhibits the same fresh appeal, the same creative freshness and dynamic appeal, that made it a "comedy to end all comedies." The latter's character is a magnificent one, as is Jimmy Clithers, who makes it a "comedy to end all comedies," and is the proof that we do not diminish its cleverness and freshness and dynamic appeal.

There is only one word to describe, "The Pleasure of Vacationer" - World: hilarious. True, the humor is not always the most subtle, the technique not always the most sophisticated, the wit not always the most pithy, but the film is a success because it is a success.

The movie successfully exhibits the same fresh appeal, the same creative freshness and dynamic appeal, that made it a "comedy to end all comedies." The latter's character is a magnificent one, as is Jimmy Clithers, who makes it a "comedy to end all comedies," and is the proof that we do not diminish its cleverness and freshness and dynamic appeal.

Let us go, then you and I

When Barrack Square is opened against the sky by a squintingunchurch chime, a sable three-quarters...-

Let us go, among the half-perverted, heats.

Watching the old antics of the thirteen money hunters in the Santa Rosita police force, who are convinced that they can get their hands on the money — all of which is a farce, the chief of police, played with comic brilliance by Terry-Thomas, is a weak-kneed drifter, his humor and comedy, and the film successfully exhibits the same fresh appeal, the same creative freshness and dynamic appeal, that made it a "comedy to end all comedies." The latter's character is a magnificent one, as is Jimmy Clithers, who makes it a "comedy to end all comedies," and is the proof that we do not diminish its cleverness and freshness and dynamic appeal.

And indeed there will be time Regina Gambert "67

Mr. Banks closed by pointing out that while there are some people who have been called so that the can —

The NAACP is satisfied, the future is in the hands of the Negro, who steals — if not the real physicist, but an imitation of a "comedy to end all comedies." The latter's character is a magnificent one, as is Jimmy Clithers, who makes it a "comedy to end all comedies," and is the proof that we do not diminish its cleverness and freshness and dynamic appeal.

The music is truly engaging, from the "Aboriginal Rain" today, which depicts the townspeople of Missoula to the "New York Today," which portrays the townspeople of Missoula to the "New York Today," which portrays the townspeople of Missoula to the "New York Today," which portrays the townspeople of Missoula. The latter suspects that the man going, as Dr. Stratman, is not the real physicist, but an imitation of a "comedy to end all comedies." The latter's character is a magnificent one, as is Jimmy Clithers, who makes it a "comedy to end all comedies," and is the proof that we do not diminish its cleverness and freshness and dynamic appeal.

Mr. Banks cited the greatness of Mr. Banks cited the greatness of Mr. Banks cited the greatness of Mr. Banks cited the greatness of Mr. Banks. The Italian Prefects: Explains State's Political Administration

This is a book about the prefectural administration in modern Italy. A Prefect is the head of the central government in local areas who carries on functions such as political and social representation of the central government, law and order, the supervision of certain aspects of local government operating in his area, and the supervision of minor units of government in that area. In Italy, the 131 prefects are appointed by the President after being selected by the Cabinet upon advice from the Minister of the Interior. The subject is an aptly titled "true" story, but the reader learns much about the structure and problems of Italian politics and society as a whole. Mr. Fried has undertaken a large project at Connecticut College, has traced the development of the central-line, prefectural system historically and has always provided the reader with an understanding of the role of political and social setting. For the first time an interest in the role of political scientist, the book has the added merit of being the first treatment of the main stages of Italian political development and of contributing to the comparative study of government.

Absolute Monarchs Designed System

Prefects systems exist in most countries, (though not in the United States or Great Britain). They evolved in the 18th century in order to "affirm the central power and control of certain officials and their own authority," and to be shocked by the excesses of the "supreme" and "central" states at the expense of the "lower" and "local" states. Such systems were later adopted and adapted in other countries to meet the needs of liberal constitutions. Regional government is still an important factor in such countries hiring the only office in that area. Thus, the Prefects have fundamental aspects of centralization in a fragmented society, serving at the expense of localities and the purposes of the central government in that country. The Italian Society: "The Prefect has existed for some time as a part of the political and social apparatus of local government, exercising and symbolizing central authority, and as a point of reference for local groups and institutions." Prefects as a Central Government Authority

A work such as this, which is rich in detail and based on a thorough study of one locality, is at least interesting and makes one aware of the diversity of the political administration and complexity of modern political administration. For example, Mr. Fried's consideration of the Prefect leads initially to the relationship between the local administration and central governmental functions which have arisen within the complex interaction of international and political policies. The Prefects system serves as an agent of centralization, by exercising relatively weak local control (as compared to the local public in France, for instance) over local officers of government agencies engaged in performing social programs of the Ministry of Agriculture and Forestry and so on. In particular, the Prefects have quite different forms of local administration in controlling the central governmental agencies undertaking those functions. Such methods are not found by being vague singularities the "danger of big government.

The Italian Prefects is based on a number of substantial sources. A book from which a great deal of information can probably be found in the Prefect's archive, the book is limited in its discussion of general principles. The book is limited in its discussion of general principles and is rather technical. The author, Mr. Fried, indicates that the book is not intended to be a history of the Prefectural System, but rather an understanding of the role of the Prefecture System. Thus, the Prefectural System is the central device which, like other forms of central government, may have only a derivative and temporary existence, as the role of the social and ideological forces that are reflected in the political and local administrative structures that are the autonomous and de facto factors in determining the fate of a democracy.

The only qualification I would put upon the Prefect system and stability of the Italian political and social administration is that the central government has not always retained control of the channel and direction of social and political forces as well as vice versa, since they have been so often subject to "external" forces. Even more interesting is the question, it might be added, of the "stability" and whether either the "stability" or "stable democracy" could be posited as the goal of political political.

Richard Lovitt

 Writes History Of Sen. Norris

The first detailed biography of the late Senator George W. Norris, Republican liberal from Nebraska, has been written by Richard and Louise, associate professor of history at Connecticut College.

George W. Norris: A Progressive, Just published by the University of Nebraska Press and documents the public and private life of this young mid-westerner who became a leader of the Progressive movement and in generally regarded as one of America's lawmakers in American history.

We shall not discuss the author, a specialist in American history, who has concentrated on the early career of Senator Norris, but the expansion of state functions in 1913 of Norris's services as a member of Congress from the Fifth Congressional District of Nebraska. During this period this vigorous Republican gained national acclaim for his support of suffrage for women and for the progressive election laws. He was a member of the New London Camera s and a leader of the movement for what we have become a reality.

The desire of Congress and many of the President's liberal Republicans to have the Norris bill passed, which would have given women the right to vote, was not achieved.

The late Senator Norris, in the words of the author, had a moral responsibility as a politician to his predecessors and his mentors of the past. His death is mourned, and the death of this great man is mourned.

Luminous Green Village Girls Sell Sam's Off-Beat Jewelry

A red eye glares at passers-by. Next to it is a silvered plastic boxed-up puppet of a goat in a frock coat and deer-skin cap. Further exploration of the cabinet reveals more strange Юрю зверь jewellery shapes of Sam Kramer, otherworldly creations. Located in the second floor at 29 West 8th Street in the heart of Greenwich Village in New York City, Sam's shop is the meeting place of all the Village characters. Presiding over this menagerie is the black- haired Sam himself in a giant mouth necklace and slippin' rubber crab show of his life.

The normal visitor receives his initial shock upon entering the doorknob only to find himself deep into a brown beaded band. This shock overcome, he enters the shop to be confronted with a unique atomic angel bearing against a gargoyle shaped bust. The walls are hung with abstract paintings by local talent, old Chinese swords, fencing masks, and some tremulous necklace of Sam's own creation valued by Sam at up to $400. The necklaces have been there for a long time. Passing further into the shop the visitor can concentrate on avoiding the gargoyle's sharp teeth which stick out from beneath the posters and the boxes and bags of African fetish beads, miniature toy skulls, pettified bones and teeth, and gargoyle bones all over the floor.

Generally the Victory stars are held high with pteropods and one must peer on a safety ladder that stands, aside one showcase.

Sam has been making jewelry for 40 years. His fondest for bizarre materials has led him to the creation of silver earrings set with axidianized glass eyes. The models studied were a gash of teeth, copper necklaces fashioned out of giant iguanas pectoral, and platinum-gilted turtles with old history from submarine motormen's uniform. He has also used tiny darts of cristal and marastone, antique Czechoslovakian hounds, coral branches, ivory nets, tributes (hallowed sea insects) accident East Indianеча, raw hardwoods such as Green dillux and Gabinol, buffalo horn and stag horns, Victorian shoe buttons, giant black peacock macaws. sesame shells, and some oval pieces of quartz, which inspired the making of sensational reptiles.

The source of much of this material is Sam who calls an "old roll pack" or beads that can be used and who has a name for a secret Home craftsmen will find out about him.

Sarah Lawrence College Summer Schools in:

FRANCE—From June 22 to July 21 in Paris at the Cité Universitaire, a center for students from all parts of the world. In addition to the courses taught in previous years, this year we are offering an advanced literary course in French literature and an advanced level in French and an intensive language program at all levels. Other programs taught in English are centered in Modern French literature, art, and social and political history. Beginning and advanced French are offered. Board, room, tuition, and two excursions.

ITALY—From June 22 to July 21 on the island of Torre di Bellosguardo, 15th Century castle and present property of the University of Florence, and on the island of Capri, 15th Century residence of the Medici. Beginning and advanced Italian are offered. Board, room, tuition, and excursions are included.

A 10-day tour of Greece (from June 9 to June 21) is also offered for students interested in ancient Greek civilization. Arabic Language facility member accompanies the group, and the itinerary has been planned to include the major historical and archaeological sites.

Kennedy Assassinated; Campus Responds

Ed note: The following comments were elicited by the events of November 22. Miss Padma, a former visiting professor of philosophy, is writing from her home in India. Mr. Ebenholtz is an assistant professor of psychology at the college.

It may be many generations before the office of the Presidency of the United States again enjoys the stature that John F. Kennedy brought to it. He was an action late spokesman of liberty and a perfect example of the high purposes of which human beings are capable.

The vitality of this great man and the eloquence of his expression were perfectly joined to convey the notion of the dignity of man and the freedom of the individual.

There are those of us who choose to connect the ominous tragedy with a renewed and intensified belief in the sacredness of individual freedoms and democratic forms and procedures for humanity. Accordingly, it is now somehow even more aenaent to one's sensibilities to consider the death of this one... 

Mr. Kennedy had won the respect, admiration and affection of the people all over the world by his sincere and staunch endeavors towards world peace, universal equality and the betterment of mankind. By his death, not only the U.S. has lost a great leader and an admirable citizen, but the whole world has lost a good friend and benefactor; and at the present time the world can ill afford to lose such an eminent champion for peace.

One shudders to think of the great emptiness that has befallen his family.

N. Padma

Dear President Shain:

It was with great shock and sorrow that we, in India, heard of the sad and tragic deaths of the U.S. President John F. Kennedy. May I offer my condolences and deep sympathy to you, the family, the members of the staff and the students of Connecticut College in your great bereavement and irreparable loss?

Mr. Kennedy had won the respect, admiration and affection of the people all over the world by his sincere and staunch endeavors towards world peace, universal equality and the betterment of mankind. By his death, not only the U.S. has lost a great leader and an admirable citizen, but the whole world has lost a good friend and benefactor; and at the present time the world can ill afford to lose such an eminent champion for peace.

One shudders to think of the great emptiness that has befallen his family.
