CT Government Honors Men's B-Ball

B. KATIE STEPHENSON

For many members of the Conn College community, the men's basketball team is the only sports team that truly matters. The team's accomplishments over the past year have been impressive, and the team's members have shown a strong commitment to their sport and to their community. The team has won several games, including a 62-53 victory over Trinity College in the first round of the NCAA tournament. The team's success has been the result of hard work, dedication, and teamwork. The team's players have demonstrated their ability to work together to achieve common goals, and they have shown great sportsmanship in their games. The team's accomplishments have been recognized by the Conn College administration, which has invited the team to a special day of recognition. The team's accomplishments have been celebrated by the Conn College community, which has shown its support for the team in a variety of ways. The team's success has been the result of the efforts of all of its members, and the team's accomplishments have been a source of pride for the Conn College community.
Naturally Born Killers?

Apparently the suspects had been planning the...
The Things We Take for Granted

To the Editor:

Most of the time, I think it’s pretty good to be living in a country that boasts extraordinary commercial developmental levels. The upper and lower echelons of the country are the beneficiaries of a strong history of colonial advancement.

With a hunger for independence for centuries, my country and other “more developed countries” have built cities and developed technologies, made people’s lives easier, and perhaps have been meaningful. We have deeply rooted systems in place, and we have all sorts of new-fashioned forms of nature for the sake of human safety and comfort.

The development of technology has increased the importance of these advantages and freedoms from un- and unconsciousness.

To be honest, it seems like there is a gap of dependency in our generation regarding the things we take for granted.

I would like to propose a more thorough investigation of our own lives and very real dependency on the Earth. I would further suggest that the clouding of this dependency is connected with the rise of social and environmental issues. The chance of a basic human rights is required to keep our environment clean.

Let’s take a good look around the planet. We have to take a walk around and watch our actions. What we are doing with our lives is often to be observed.

Perhaps a quick, new idea will hit you. Take for instance the idea of a solar car. This includes all wood furniture, all wood floors, all wood doors, all wood windows, all wood appliances, all wood buildings, construction, and many more.

One step further with the wood product paper. Yes, the world is good by being affordable, yet the reality is that it is made from forests and trees and paper is made from plants, yet the result is much easier to dump toxic waste or build a chemical factory in poor areas because the legal blocks are not of severe social or political importance. To be honest, it seems like there is a gap of dependency in our generation regarding the things we take for granted.

We all are interested in a sort of non-political nature that is changing our political and social behaviors. In the future, human rights are not guaranteed to everyone and are violated with the frequency they are. It becomes relevant for us to have more control of our environment. The potential to live in the United States is to become a “factor big money” or buy almost anything. We are free to take care of the Earth and air, then we should be able to do it.

The Eroica Tria Ends the Mostly Music Series on a High Note

By Peter Gross

On Friday, April 23rd, the Eroica Trio performed at Connecticut College's North Concert Hall in the Mostly Music Series. The trio ended the series on a high note, with an excellent selection of music and technical performance. The Eroica Trio, which takes its name from Beethoven's Fourth Symphony, is composed of pianist Yulianna Avdeeva, Adela Pena on the violin, and Sara Sant' Ambrogio on the cello.

The performance started with Haydn's Piano Trio in E-flat major, Op. 43, No. 1. The trio began with a polished and well-planned opening movement, which was followed by a slow and expressive middle section. The finale was bright and energetic, with a strong presence of Haydn's signature rhythmic patterns.

The second movement was Beethoven's Piano Trio in F minor, Op. 70, No. 2. The trio showcased their technical abilities, with Adela Pena performing a difficult cello solo flawlessly. The trio's chemistry was evident, with each musician complementing the other's style.

The third movement was Sant' Ambrogio's own composition, a piece that highlighted her talent for composition. The trio's ability to capture the mood of a piece and instill it in the audience was evident. They demonstrated their versatility, alternating between great strides and calm.

The final movement was Schumann's Piano Trio in A minor, Op. 67. The trio's ability to maintain a consistent tempo throughout the piece was impressive. The trio's musicianship was evident, with each musician contributing to the overall success of the performance.

In conclusion, the Eroica Trio's performance was a testament to their musical talent and technical skill. Their ability to capture the mood of a piece and instill it in the audience was evident. They demonstrated their versatility, alternating between great strides and calm. The final movement was Schumann's Piano Trio in A minor, Op. 67. The trio's ability to maintain a consistent tempo throughout the piece was impressive. The trio's musicianship was evident, with each musician contributing to the overall success of the performance.

The exhibition also displays Re-creation of the watchers of forged works, but rich pieces of art are identified in forgeries. As work of an extremely rare, to deceive spectators to be placed in museums under false pretenses is not a forgery.}

Clever Forgeries Pose as Authentic Ancient Art in Battle of Authenticity

By PETER GROSS

The Lyman Allyn Museum entitled Fun in the Sun: Forgeries in Art, is open through June 13, features 20th century works to museums. The exhibition is a mosaic supposedly created by the Arizona Friends of Chamber Music, and commenced performing at nine. There was an intermission, during which there were no other musical performances. When the trio left the stage for the intermission, it seemed as if the performance had come to an end. However, the audience was left spellbound. Every movement in the same room, they realized that they had done an impressive job.

In the same music festival, the trio continued playing to relate to the audience. Indeed, the rapidity of their playing was so fast-paced, and well played by the ensemble. The trio started playing the Haydn's Piano Trio in E-flat major, Op. 43, No. 1. The trio began with a polished and well-planned opening movement, which was followed by a slow and expressive middle section. The finale was bright and energetic, with a strong presence of Haydn's signature rhythmic patterns.

**Dining Out**

When Harris Won't Cure Your Simple Cravings

**B. CARA CUTLER**

When disaster strikes, Harris is very, very unappealing. The most you can say about "Tortillas is a Cure & all you need is a glass of milk," as suffering as it sounds, is that you could just throw the thing at someone. I would need a magic wand to get you out of that one. And don't even get me started on the sauce. bee bee dairy could be just the thing, though. It's an old idea, but new again when you're stuck and can't go to "Susie's or even just the peanut butter and jelly sandwich made with homemeade ice cream and jam.

The claim shoofer, which was served piping hot, was good, though it could have had more protein in it. The grilled cheese, with a whole lot of mayonnaise and warm; while the hot dog, served with aside of sauerkraut, was grall and full of flavor. But Bee Dairy is absolutely Connection-based diners. If you want the best of the Bee Beef's, you have to offer you should definitely check on fried chicken. The old many well prepared combinations of flavors, taste and fun, but expect a wait on Saturday mornings. The whole bowl of baked beans, served under twenty. It's a good place to hang out. And though the hour of last call, you should expect a wait on most occasions. The biggest problem with Bee Beef's is service. It seems they are just too busy for your type and time. As an average server is a requirement for many diners. The Bee Dairy. But, if you want I reasonable prices and has a very friendly staff. Of course, it is not cheap.

1999 Reinfield Memorial Lecture

By LORRAINE STRONG

Before Reinfield's ethereal chanting, students could imagine the Native American, Slavic, German, and Eastern European in Reinfield's music. Lalanne came to Reinfield's memorial lecture to celebrate his life and the music it left behind. The idea was to bring the audience into the Reinfield's work and his music through current and current-generation music. It was a great way to experience the music of Reinfield and to connect it with his life and times.

The lecture began with a brief overview of Reinfield's life, including his experiences as a child and his apprenticeship with Reinfield. Lalanne then spoke about Reinfield's music and its influence on modern music. Lalanne discussed Reinfield's use of the violin in his music and how it helped to create a sense of spirituality and mysticism. Lalanne also spoke about Reinfield's influence on modern music and how his music continues to be relevant today.

The lecture was followed by a performance of Reinfield's music, which was performed by a group of student musicians led by Lalanne. The performance was a moving tribute to Reinfield and his music, and it showed how his music continues to be relevant today.

In closing, Lalanne thanked everyone for attending the lecture and for their support of the memorial. Lalanne also expressed his hope that the lecture would help to bring more people to Reinfield's music and to the memory of its composer.
Campus Gears Up For FloriaI Weekend Fun

By TOM HOLT

The campus is abuzz with activity this weekend as it gears up for FloriaI weekend fun. This weekend, Friday through Sunday, the campus will be bustling with events and activities for students to enjoy.

FloriaI is one of the largest and most anticipated events on campus, with a variety of activities planned for students to participate in. On Friday, the campus will host a Groooe Clinic, where students can learn new dance moves and improve their skills. On Saturday, advanced country dance lessons will be offered, providing an opportunity for students to refine their dance technique. On Sunday, beginners country dance lessons will be available, allowing new students to join the fun.

In addition to the dance lessons, the campus will also host a variety of other events, including music performances, outdoor activities, and food trucks. These events are designed to provide a fun and engaging atmosphere for students to enjoy.

FloriaI weekend is a time for students to come together and celebrate their college community. Whether you're a dance enthusiast or simply looking for a fun weekend, FloriaI has something for everyone.
J-Board Effectively Dissolved as Seven Members Step Down

In light of events that have recently occurred, I have reached the decision that I am resigning from my position on J-Board. This is a decision I have thought about for some time and I am disappointed that it had to come to this. However, I believe that this decision is in the best interest of J-Board and the College.

In making this decision, I have taken into account a great many factors. One of the most important is that I feel that the board has lost a great deal of trust over the past two weeks and has discussed in detail with my board. I have had enough of this and decide that the only way to move forward is to resign. Said Mueller, "I think that the time has more than passed for the administration and the Board to effectively dissolve the J-Board. This could be the best way for us to do it...

The fact that there were some major decisions was very disappointing. I believe that the decisions were made in a very hasty way and were not fully discussed by the entire board. Any appeal or other necessary steps have been taken.

For those who have participated in J-Board, this decision has been a very difficult one. There are of course those that are upset by this decision. I have thought a great deal about this and I agree with the administration.

I understand that there will be some disappointment with this decision. I hope that the board will move forward and make an effort to heal the board.

In reaching my decision, I have discussed in detail with my board. I feel there was another way this could have been done.

I hope that the board will make a decision that is in the best interest of J-Board and the College.

I have thought a great deal about this and I agree with the administration.

I hope that the board will make a decision that is in the best interest of J-Board and the College.

I have thought a great deal about this and I agree with the administration.

I understand that there will be some disappointment with this decision. I hope that the board will move forward and make an effort to heal the board.

In reaching my decision, I have discussed in detail with my board. I feel there was another way this could have been done.

**Conn to Combat Global Warming with Ambitious Project in Costa Rica**

MICHAEL TENOFSKY

Since humans began documenting climatic history, they have noted the ten warmest years on record, which have all occurred since 1980. This trend, combined with the increase in atmospheric concentrations of carbon dioxide and other greenhouse gases, suggests a global warming phenomenon.

Students should not be intimidated by what they see. The mood of many of the students, including those of us who are a part of the College's environmental movement, is one of love beads and flower power, this generation is ready to stand up and be counted. Students can and must become involved in their community, in their efforts to combat the greenhouse effect. It is time for us as the generation of the 1990s to take a leadership role in combating this threat to the planet.

Earth House Calls to Campus for Social Awareness and Action

The Danger of a Boys Will Be Boys Attitude

(continued from page 2)
and has ceased to discriminate between the sexes.
Many news publications have mentioned the fact that in these incidents have reported being continually taunted with gay epithets. An example of Lesbian survivors referred to the trenches with as much regularity as the hazards of the front lines, and that Michael Caron, the boy convicted of the December 1997 shooting at Heath High School in West Paducah, Kentucky, "suffered from the perception that he was gay, as he was also "quite thin, the jocks and the cheerleaders were horrified with violence." He added that his father had threatened his peers with the gun, he decided to go further when he started "thinking about all the things done to me... all the names they called me.

Taunting in school has existed as long as school itself, but what are we to think when being perceived as gay is so horrendous that it warrants murdering your accusers? When masculinity equals violence, as the violent patterns of the "normal" boys indicate, violence will be the means when proving one's masculinity is the goal.

Many of these boys have been emasculated by their classmates and by their teachers who have not intervened. Our society has constructed homosexuality as so antithetical to manliness and violence as so intrinsic to manliness that these boys are being allowed to commit violent acts when they should be stopped and are being made to commit violence because they believe that the accusations made against them warrant it. Not all the shooters in the past few years have had violent pasts and have taunted classmates, but almost all of them have had at least one or the other. Unchecked violence will lead to more violence. Boys who believe that being perceived as un-masculine is unbearable need to be taught that current constructions of masculinity are not ultimately desirable. Until we start to redefine our construction of masculinity, the generations that follow will continue to turn their internal emotional turmoil outward—with disastrous consequences.

DIRECTIONS TO MYSTIC LOCATION:
Take 95 to North to Exit 88. At the bottom of the exit ramp turn left. At the light take a right onto Rt.184. At the next light take a right on Flanders Rd. U STORE IT is about 1 mile down at the bottom of the hill on the left.
Swim Team Earns Accolades

COURTESY SPORTS INFORMATION DIRECTOR

Conn's men's and women's swim squads were both awarded College Swimming Coaches Association of America Academic All-American Team award for the fall semester. Each team as a whole must maintain an average of at least 2.8 on a 4.0 scale in order to qualify for the honor. The men's squad earned a 2.89 and the women garnered a 3.19. In addition, the team also awarded its own accolades to individual team members. Shana Davis '99, a former NCAA All-American on the one and three meter boards, was named Most Outstanding Team Member along with Jordan Kaplan '00. Kaplan set a school record at the New England Division III Championship with a 2:12.88 in the 200-yard fly. Most Improved Athlete honors went to April Talia '99 and Mike Keaney '01. This year Talia qualified for New England in the 400-meter individual medley and仰ney placed among the top 24 in the one and three-meter diving competitions. Mike Muller '00 and Corrie Pelcazar '02 each received the Coach's Award for their commitment and dedication to the program. Kamar Martin '02 was awarded the John Merrill Spirit Award.

NESCAC Track Results

COURTESY SPORTS INFORMATION DIRECTOR
