Faculty governance committee.
Seeks to effect reform

by RoseEllen Sanfilippo

Last spring the Ad Hoc Committee on Faculty Governance was formed in response to a faculty request for a more effective governing structure. This week the committee chairman, David A. Smalley, who is a professor of art, submitted a proposal at a special meeting of the faculty on Wednesday, Nov. 19. The proposal is aimed at remedying the present committee system which is viewed as "overlarge and confusing."

The proposal allows for the establishing of four new, or revised committees while eliminating seven previously engendered committees. The creation of a Faculty Steering and Conference Committee is the major change proposed.

This steering committee would serve several functions: it would provide "leadership for the faculty as a whole on all matters of college policy"; it would coordinate and direct all committees which deal with "the faculty's business"; and it would represent "the faculty in conference with the Board of Trustees, Students, and the Administration."

If approved, the new committee would not be too daunting, but rather it would be responsible to the faculty and subject to instruction from it. In all faculty matters, the committee would have the power to recommend—not decide; it will meet with the faculty at the beginning of every semester to discuss concerns and priorities.

The six members of the committee will be elected annually, and at a maximum of two consecutive terms will be allowed. Twelve nominations for the positions will be obtained from individual caucuses of the ranks of professor, associate professor, assistant professor, instructor, and from the faculty at large.

An Academic and Administrative Procedures Committee has also been proposed. This committee would consider any modifications in the college's course offerings, including the Summer and Evening Session program: alternative degree programs; changes in administrative procedures, and class meetings and hours; and the faculty voting list which is compiled by the President's Office.

In addition, the committee would review all requirement revisions for Individual Study, Honors Study, and Graduatlon Honors; as well as the grading system; the academic program of Summer and Evening Sessions; and admissions requirements for undergraduates, and return-to-college students.

It will also consider the standards and requirements for courses not taken at Conn.; for receiving financial aid; and for scheduling courses and exams. In all these matters the committee would submit its recommendations to the faculty.

Knight explains how he decides When to stretch the budget

By Mimi Glnott

Because some departments tend to overspend, and this contributed to last year's budget deficit, an all campus spending freeze was recently implemented. In the case of the infirmary renovation, Mr. Knight said, "There's literally nothing we can enforce budget compliance. I am not an enforcing officer; I am a reporting officer," he said.

Mr. Knight said that because the budget is balanced out by trading one dollar off against another, his job as treasurer is to spend and remove the spend daily. Some departments tend to overspend while others underspend, and, "I never know where the saving is going to occur if it's going to occur," the treasurer said.

He explained that his decisions regarding requests to overspend in any one area are contingent upon the possibility of unearthing less expensive alternatives. In the case of the infirmary renovation, Mr. Knight said, there was no choice available; but in the case of the suggested readjustments for room 292C in the Alpha Complex, a less costly plan was developed.

One of Mr. Knight's policies for tightening the budget is to deal with emergencies when they occur, rather than bracketing for them in advance. Although he said, "There's absolutely nothing we can enforce budget compliance. There's absolutely nothing that's going to save a situation which is in advance or $5.50 and $6.50 at the door. There is limited seating available and box office hours are 2:30 to 5:00 p.m. today, and all day tomorrow."

Consolidation of dining rooms Being considered by Dev.Cmtte.

Conrad B. Knight explains how he decides When to stretch the budget

by RoseEllen Sanfilippo

During, the past year the Development Committee has been reviewing all areas of the college budget in an effort to determine what cuts can be made to avoid an imminent deficit. Although the committee, which is chaired by Associate Professor of German Janis V. Gallinek and Bernie McMullen '76, has not yet reached a decision, they have been concentrating on the consolidation of dining areas.

The committee, which has been discussing cutting alternative areas such as the college maintenance plan, academic programs, and student services, has been attempting to weigh "monetary and psychological considerations." Realizing that the present system with its separate kitchens fits the college's attractive features, the committee is reluctant to close these kitchens.

President Ames, however, who is an ex officer member of the committee, favors the construction of the present system is too costly to maintain at the present room and board rate of campus life that this would not be feasible for at least three years. Among the other possibilities that the committee has been considering is to renovate Harris so that it would be able to accommodate the entire campus eat at Harris; however, the college's 1,440 residents. He feels that the college will have to compensate for the deficiencies - continuing the present dining system with approximately $100 added onto room and board rates, building a new facility, or having the entire campus eat at Harris or Smith-Burke.

The possibility of a meal plan has also been brought up, while left in my budget for emergencies freeze, the College and Assistant to the President has stated that centralization has been reviewed, and that with a raise in room and board of $100 per student, the committee has been considering the cuts every dining halls as possible. This statement is consistent with the committee's intention to continue investigating as many alternatives as possible.

In a recent interview, Ames stated that the impact on the quality of campus life that this measure would have, should not be judged too quickly. He added that the academic programs would bring about a reduction in interest in this case. Further, he asserted to cut Physical Plant, which has been taking budget cuts every year since 1973, would result in an obvious deterioration of the campus's upkeep. The Development Committee and the committee believe that the lead long run solution to the problem is to renovate a central dining hall — perhaps on the green across from Larrus — and to close only two dining halls, Katharine Blunt-Larrusée and Jane Addams-Freeman, are also being considered. As one student member of the committee stated at a meeting last week, he would rather see the dining cuts close the budget deficit than cut academic programs; he stated that he was beginning to lean towards closing and being able to cut academic programs.
Save us from centralized dining: meals are more than food

Who says that centralized dining is inevitable? The decision to keep our present dining facilities or to switch to a centralized dining system has not been made yet. The misconception about the inevitability of centralized dining is a result of the Administration's and the Development Committee's emphasis on cutting services to balance the budget. Avoiding a deficit is a valid priority. We certainly do not want to have to deal with another budget deficit.

But there is another concern that is just as valid. And this is the nature of our present dining system. The program of separate dining halls has traditionally contributed to the college's distinct social personality. To eliminate it would be to destroy one of the last unique qualities of this campus.

Maintaining the present system at the college treasurer's projected cost of approximately 100 dollars per student increase in room and board - i.e., three cents a day - is insignificant when compared to the disadvantages of centralized dining.

We cannot provide a viable central dining program with our present facilities which are unable to comfortably and sensibly accommodate the entire student body. And there is no possibility within the next three years, at least, for an expansion of these facilities.

Pundit urges the administration to consider maintaining the present dining system with the minimal increase in room and board. They must recognize the nature of dining on this campus as one of the last means for maintaining community identity in the face of institutionalization.

We also implore the student body to exercise its decision-making role. If the administration is not provided with a clear and cohesive student proposal, they will make this decision without us.

Lazrus doesn't belong in lottery

In April, the dorm selection process and room lottery for school year 1976-77 is expected to include S. Ralph Lazrus House. Lazrus should not be included in the selection system. Its facilities are neither equal nor comparable to those of other dorms on campus.

Formerly one of two cooperative houses on campus, Lazrus was removed from the co-op system last summer because there were not enough students who wanted to live there. Lazrus is a very small dorm, housing only 29 students. The rooms are correspondingly smaller.

Complaints about the size of the rooms and the excessive noise in the dorm are abundant. Regular conversation or the playing of music at normal tones is heard in adjacent rooms. This is due to a minimum of insulation between walls. Privacy is difficult, if not impossible, to achieve.

The small size of the rooms and the lack of privacy make it unrealistic for students to choose Lazrus as their primary residence preference. The assignment of students to Lazrus will become mandatory, in order to fill the dorm. The concept of giving the student an opportunity to express his preferences is ridiculed and made worthless by the inclusion of Lazrus in the dorm choice system, and should not be allowed.

The following positions are now open on the Pundit Editorial Staff:

Contributing Editor

Production Editor

All interested applicants must attend tonight's Pundit meeting in Crozier-Williams, room 212, at 6:30 p.m. All applicants must bring a typewritten statement explaining the reason for their interest, past experience, and any other information they believe is pertinent.

Faculty raises a unified Voice at last

Connecticut College is made up of four separate groups: the students, the faculty, the trustees, and the administration. Communications between these groups are often staggered and incomplete. Seldom does each group make its position fully and unequivocally known on issues involving the entire community. Instead, the information is often hard to come by and contradictory.

The student body has effectively used College Council as a vehicle by which it makes its views and concerns known. This has been possible because the Student Government Association is a highly organized and representative governing structure, which provides for an executive board to present the student views to the other members of the college community.

In the past, the faculty has been unable to use the forum of College Council because it has had no such representation. Pundit endorses the faculty's Steering and Conference Committee proposal to the extent that it creates a conference committee which would effectively present the faculty's concerns and priorities to the rest of the community. They have recognized this problem in communication and have responsibly attempted to remedy the situation, and to encourage the flow of information which is vital to the college community as a whole.
The Lazrus doll house is unfit to Be in the dorm lottery system

by Dave Jordano
The editorial on the preceding page contends that Lazrus House should not be included in the spring dorm lottery system. The reasons stated in the editorial include a lack of privacy in the dorm and facilities that do not compare to those of other dorms on campus. In an effort to explain further the reasons for the complaint, I would like to present some observations and opinions about Lazrus House.

In viewing with the students who live in Lazrus, two major complaints emerge: "the rooms are too small," and "it's hard to achieve any privacy." After visiting Lazrus, I agree that conditions are uncomfortable, to say the least.

Both singles and doubles are smaller than other rooms on campus. In some cases, Lazrus doubles have been made into singles by constructing a wall which divides the room in half. These new "walls" are actually portions of thin wood and plaster. Although the barracks and the closets are equal in size to units throughout the campus, they detract from floor space and make the rooms seem even smaller.

Furthermore, the personal comfort and privacy of the students is an important concern. I can see many of you sitting at the canteen, having a conversation amongst yourselves. By doing this, you are disturbing the peace and privacy of the other dorms. Lazrus House is an extremely deem-safe environment and we require a lot more security than the other dorms.

The slip in the dorm lottery system seems to be a result of Lazrus students demanding more security. These students do not want to take any chances of having a security issue coming from their dorm. Therefore, they are demanding that Lazrus House be kept separate from the rest of the dorms on campus. Lazrus students have a very high security rating and are willing to pay for it.

The lack of privacy in the dorm is incredible. Standing in one room I could hear the normal conversations going on in the room next door. The smallness of the rooms make gatherings of more than three people impossible. In order to get some people get together, the Lazrus student must hope that the living room or the dorm will be used. This is an awkward, uncomfortable situation at best.

I hope that the dorm lottery can be improved for the Lazrus students. Lazrus is an excellent dorm and has a high rating in the building. It needs more security, but it is definitely not an unfair system. The slip needs to be fixed and the dorm lottery needs to be implemented.

A.F.S.C. argues that it is good for industry only in that the three above mentioned corporations share in the profits that are reaped from the building of the B-1 system. Economists say that dollars spent for civilian use could have provided 20% of the money spent for military systems. In fact, the B-1 system can be said to have increased the amount of money in the economy without providing goods that are essential to human survival.

The slide show gave evidence, that the three corporations entwined in the campaign "against the B-1" were also involved with their respective companies. The slide show Thursday evening on this subject. Approximately 30 people attended the event.

General Electric, Boeing Co., and Rockwell International, the defenders of the B-1 which also have major contracts to build B-1 prototypes, claimed that their campaign was necessary for "national security" and that it was "good for the industry," they feel no responsibility for the existence of the B-1 and say that they are only doing their job.

A.F.S.C. pamphlet states that "the U.S. is not alone in its long-range, final goal of world peace."

Frank Halpern of the American Friends Service Committee and chair of the Friends Service Committee and chair of the "Campaign against the B-1" in Connecticut, gave The slide show Thursday evening on this subject, April 19, 1975. 10 people attended the event.

General Electric, Boeing Co., and Rockwell International, the defenders of the B-1 which also have major contracts to build B-1 prototypes, claimed that their campaign was necessary for "national security" and that it was "good for the industry," they feel no responsibility for the existence of the B-1 and say that they are only doing their job.

A.F.S.C. pamphlet states that "the U.S. is not alone in its long-range, final goal of world peace."

Today, room to store things that normally go in a three-drawer desk is severely limited. The most unusual feature of the desks is that they are permanently attached to the surface of the desk. The curious part is that the shelf itself requires only half the space used in the B-1 system. This forms the structure. In other words, there is an extreme emphasis on making the rooms seem even smaller.

The Lazrus rooms are the strangest phenomenon. The second floor, houses a second floor, houses a smallness of the rooms, which are the smallest of the dorms. Lazrus students are living in a three-drawer desk with a sliding shelf. Lazrus students are living in a three-drawer desk with a sliding shelf. The desks are designed to be used for the all-city campus lottery system. The desks are designed to be used for the all-city campus lottery system.

The desk is a three-drawer desk with a sliding shelf. The desks are designed to be used for the all-city campus lottery system. The desks are designed to be used for the all-city campus lottery system. The desks are designed to be used for the all-city campus lottery system.

The Lazrus dorm house is unfit to be in the dorm lottery system.

The miseries and joys of exams Are peeking around the corner

by Bonnie Greenwald
Though it is not yet Thanksgiving, all too soon, memories of Thanksgiving dinner or at least a short break from the daily routine will be soon in the past and chaos of exam time.

For those who have never experienced the end of a semester at this college, let us briefly explain some things that indicate that exam period, which had been feared for months, is now upon us.

Meal times will suddenly be stretched out as long as possible — anything to avoid returning to the inevitable. But in addition to longer meal times, there will be the breaks. Evenings snacks which appear every night in order to satisfy the administration's concern with our wellbeing. How long has it been since our minds have worked this hard?

Exam time is a great time to meet your neighbors. At unplanned intervals doors will suddenly swing open with the whole hall appearing for an informal get together. On the other hand, some students who used to see everyone, who used to say to one another, who used to talk about it. This is a breach of the honor code. In order to keep self-scheduled exams it is important to be aware of your own responsibilities in upholding the honor code.

In February of 1942, three trial blackouts occurred in the city of New London: two of them were sectional, and the third was an all-city. The students were informed of the procedures for blackout practices and were advised of the "safest place" to go on any part of the campus. In a four-story building, the "safest place" is the second floor; in any other building it is the first floor. The students were to open all of the windows and stools and bring warm clothing with them to the "safest place." The students were to open all of the windows and stools and bring warm clothing with them to the "safest place." The students were to open all of the windows and stools and bring warm clothing with them to the "safest place." The students were to open all of the windows and stools and bring warm clothing with them to the "safest place." The students were to open all of the windows and stools and bring warm clothing with them to the "safest place." Picketing cause contractor to leave
Local 30 caused the contractor who was hired to clear a site for Unified Hospital to leave the job fearing that the chemical substance being used might harm his workers. The picketing has requested that the contractor not pay its workers the prevailing wage.

Security Log

On Nov. 15, there was electric fire in the basement of Palmer. There is no hint as to how the fire got started.

On the 11th, the glass in the front door of Lambdin was broken. There were no suspects and the incident is believed to have occurred between 9:30 - 9:57 p.m.

On the 12th, as a result of students playing football on the second floor of Larabee, a window was shattered.

At the 17th, the coin box on the machines in the laundry room at Burdick were pryed open. There are no known suspects.

On the 13th, at about 10:30 a.m., a prowler was seen hanging around Lambdin. Even with the aid of the dorm's students and housefellow, security could not find the suspect.

The bike rack at Lazrus. The actual theft occurred several days before it was reported to Security.

EB strike in fifth month; Pollution laws violated

EBVIates Air Pollution Rules

In a related matter, Electric Boat was notified by the U.S. Environmental Protection Agency that, among many of the paints it uses in submarine construction increase the smog or ozone levels in the atmosphere. The EPA has charged the company with violating state and federal air pollution standards, and will present it with a compulsory schedule aimed at stopping these violations.

The EPA is asking the company to eliminate its use of highly photchemical reactive paints; for any paints that are used, there must be a rigorous test for the interaction between the paint's organic solvents and oxides of nitrogen, and ultraviolet rays found in sunlight.

Use of this variety of paints is spectacally designated in EBVI's submarine contracts. The Navy must first approve all substitutes for the paints. These alternates must then undergo specific tests for their use on the submarine's exterior and interior.

A spokesman for the agency was quoted in The Day as saying, "We're concerned about the impact on human health and the environment. We want to ensure that the paints used on our submarines are safe and environmentally friendly."
Tuition breakdown: where all that money goes

by Bonnie Greenwald

Though 75 percent of the operating budget of the school comes directly from student tuition, few students know where their money is actually spent. Leroy Knight, treasurer, has helped Pundit to break down the $8,000 tuition and board figures in relation to the school's budget.

The budget has two main divisions: General Fund and General Expenses and Student Aid and Auxiliary Expenses. The education and general expenses of the college to which the student pays $3,580 include: instruction, organized activities (i.e. children's school, evening and summer school), sponsored research, other sponsored programs, extra public service, library, student services, physical plant, general administration, and general institution.

Student tuition money does not go to organized activities, sponsored research, other sponsored programs, or extra public service.

In addition to the money paid towards this area of the budget, $1,420 goes towards auxiliary enterprises. This is basically room and board.

The tuition budget, which will be re-examined in the graph but some of the areas need explanation. Each student pays $1,871.76 towards instruction. This includes teachers' salaries and departmental expenditures. The $248.86 for the library services includes library expenses but not upkeep. The upkeep is covered by physical plant.

Physical plant assumes the largest part of the student's tuition aside from instruction and board. Five hundred dollars is spent in this area.

The individual tuition money spent by physical plant can be broken down into the following categories: general services (including maintenance and repair) $70.17; building repairs (including replacement of broken equipment and repainting) $35.08. This debt service, $35.08. This debt is applied primarily to Cunningham for which one million dollars was borrowed to complete the building.

The power house, fuel and electricity, $104.44, is the largest part of the physical plant budget and includes the cost of light, heating and water. The power house needs a constant labor to keep the boilers going, which amounts to $80.10. Campus care, keeping the grounds in good condition, is $84.32.

General administration includes salaries and expenses of the administrative departments. General institutional expenses includes a number of miscellaneous items such as: P.O., duplicating, Security, telephone and intercom.

The only way that the college can become less dependent on student tuition and thereby more flexible is to accept changed enrollment. According to President Ames, the school is working toward this goal, but does not want to get in a situation in which the school would come to rely on the uncertain conditions of the stock market.

Fight over room 225C continues;
WCNI's need for wire service disputed

No decision has been reached on the issue to give Room 225C a tenant, according to Mr. William Churchill, Secretary of the College.

In an interview held yesterday, Mr. Churchill concluded that until some points are cleared up, there can be no decision to allocate the vacant room upstairs in Crozier-Williams Center.

A proposal submitted by the Crozier-William Committee to construct two new offices in the outer hallway has been shelved by the Administration, due to the freeze currently imposed on new construction and maintenance.

The proposal, which will be re-submitted in the spring with other deferred maintenance expenditures, entails a cost of $2,700. This figure would be increased if the need arose to install additional heating and ventilating outlets.

The proposal included room switching by the Dance Department, Career Counselling and Placement Service, and WCNI in order to accommodate their needs for additional space.

However, in recent days, negotiations have developed in the system to allocate the rooms. These difficulties arise in Career Counselling and WCNI's request.

Career Counselling feels that their proposed room, 225D, will be inadequate for its needs because it is too small to be of any practical value.

WCNI's request for additional space was based partly on a supposed need to acquire a wire service teletype, in compliance with a recent FCC ruling. However, Student Government feels that WCNI cannot fully justify their interpretation of this ruling and therefore have rejected WCNI's request for additional funds to purchase the wire service.

"There has been no decision made yet," said Mr. Churchill, "due to the delay in establishing the proposition in the system you can get some concrete proof that the wire service is required for continued operation, then that would greatly influence the decision to allocate 225C, since we don't want to jeopardize WCNI's prospects in the future, we won't use the space they request." On the other hand, if the wire service is not made available within a month, then WCNI's request for the extra room may be delayed, he added.

Mr. Churchill's main concern with WCNI, with an extra studio (225C) and a wire service teletype, is that the "... station may not be compatible with another activity. The noise generated may be unsuitable for other occupants on the floor."

Justice Douglas Resigns
Justice William O. Douglas tendered his resignation to President Ford after 26 years of service on the United States Supreme Court. He stated in his resignation that "incessant and demanding pain" made it hard for him to "shoulder my full share of the burden."

Douglas has been a staunch liberal on the Court, always seeking to protect the individual, the eccentric, and the provocative. He was a defender of the individual in all his court opinions.

Eldridge Cleaver Returns
Eldridge Cleaver returned to the United States on Nov. 18 after seven years of self-imposed exile. He flew to New York in order to give himself up to the authorities.

He had announced his plans at a news conference in Paris on the preceding day.

Cleaver is a former leader of the Black Panthers and faces charges of murder in connection with a shootout between the Panthers and Oakland Calif. police in April, 1968. He jumped $50,000 bail rather than return to jail and has since been in Cuba, Guinea, Algeria, North Korea, and France.

Cleaver explained his reasons for returning in an Op-ed article in the Nov. 18 issue of the New York Times. He stated that a new creative era had opened up for American democracy and that "with all its faults, the American political system is the freest and most democratic in the world."

He also stated that he hoped to make a positive contribution to improving the system by using the established institutions.

Quinlan Family Appeals
The parents of Karen Quinlan filed an appeal of the court decision that denied their request to have the respirator that sustained their daughter's life turned off. Upon the filing of their appeal in the Appellate Division of Superior Court the Supreme Court of New Jersey scheduled it for a hearing because of the presumption that all such women are unable to work.

The Supreme Court decided to hear the case as quickly as possible.

On Nov. 17 the United States Supreme Court ruled that states may not refuse unemployment benefits to women in the last three months of pregnancy and in the six weeks following delivery because of the presumption that all such women are unable to work.

The Court stated that this presumption was inaccurate noting that many women are fully capable of working during their last trimester of pregnancy and in the six weeks following delivery. The further stated that this presumption was a violation of the 14th amendment and more individualized means for determining a woman's ability to work must be used.

The decision is a reversal of the Utah Supreme Court's decision that stated Mary Ann Turner should work for the reimbursement of biological laws rather than contesting Utah's employment law. The decision casts serious doubt on the legality of the unemployment laws in 19 other states.

Rumsfeld Confirmed
Donald H. Rumsfeld was confirmed as Secretary of Defense on Nov. 18, following a brief debate in the Senate. The vote was 95-2.

Those voting against the nomination were Jesse Helms, R-N.C., and Richard Stone, D-Fla. They stated that they wanted to protest the "scenario" which brought Rumsfeld the nomination.

The confirmation hearings lasted two days. Rumsfeld assured Congress that he was "dedicated to a strong defense posture for the United States."

Rumsfeld is replacing James R. Schlesinger, who was fired by President Ford, charged with his failure to rule himself out as a Republican vice-presidential candidate but stated that he was not seeking any position beyond the Pentagon post.

National Shorts

On Nov. 16 the United States Supreme Court ruled that states must refuse unemployment benefits to women in the last three months of pregnancy and in the six weeks following delivery because of the presumption that all women are unable to work.

The Court stated that this presumption was inaccurate noting that many women are fully capable of working during their last trimester of pregnancy and in the six weeks following delivery. The further stated that this presumption was a violation of the 14th amendment and more individualized means for determining a woman's ability to work must be used.

Intense Albee drama set for December in Palmer Aud.

by R.C. Rose

Edward Albee's The Zoo Story will be performed December 7th through the 11th, at 8:00 p.m. in the Palmer Auditorium. The story, a return to serious drama, is the perfect setting for the constructive action of the play. Audiences will therefore be limited to show off at each performance, one of the reasons for the extensive run of the play.

As Kaplan commented, "It is a perfectly constructed production for the stars, but it needs to be seen in its physical limitations. If nothing else, The Zoo Story should make us re-examine our own values and ideals in terms of their contribution to the good of humanity."

Tickets for the production go on sale December 1st at the Box Office. Prices are $1.00 with a student I.D., $1.50 for all others.

Intense Albee drama set for December in Palmer Aud.

Two good movies coming

Sunday, November 23, "On the Waterfront" will be shown in Dana Hall. The Knack and Indian Wants the Eagle are New York Sun articles about labor conditions along the New York docks. The author of these articles won the Pulitzer Prize for his work. The script for the movie, though startlingly realistic and harsh, was actually a gentle depiction of what really was happening. Under the direction of Elia Kazan, this 1954 film vividly illustrates a way of life where murder evolves more slowly than a parking violation. Shot entirely on location along the New York docks, the movie has a uniformly hard, cast made by Marlon Brando, Eva Marie Saint, Karl Malden, Rod Steiger and Lee J. Cobb.

"Seven Samurai" (The Magnificent Seven), is considered one of the greatest epic films ever produced. With no stars, but the American western at its best (John Ford's classics), the Japan film evolves, around a small farming village in the year 1567. After year after year, the bandits raid the community, blundering, burning and stealing with the women, being captured, seven samurai are hired to protect the people.

For a long and bitter struggle the town is successfully defended. As the seven samurai ride away, there is the strong feeling that it was the farmers and not these hired men who were the real victors. This epic was directed by Akira Kurosawa and was hailed by Pauline Kael as "the greatest epic since Birth of a Nation." It will be shown in Dana Hall on Sunday, November 30.

"Looking at Dance", a lecture-demonstration and performance sponsored by the Dance Department, will be presented on Thursday, November 20th at Connecticut College. Martha Myers, chairman of the Dance Department, will discuss various elements of the choreographic process at the lecture-demonstration, "Poems of all styles and on any subject are welcome," according to contest director, Joseph Mellon.

Don't forget

POETRY CONTEST OFFERS $1500 PRIZE

A $1500 grand prize will be awarded in the current Poetry Contest sponsored by World of Poetry, a monthly newsletter for poets.

Poems of all styles and on any subject are eligible to compete for the grand prize or for 49 other cash or merchandise awards. Second place is $500.

According to contest director, Joseph Mellon, "We are encouraging poetic talent of every kind, and expect our contest to produce exciting discoveries."

Rules and official entry forms are available by writing to: World of Poetry, 801 Portola Dr., Dept. 211, San Francisco 94127.
NTI students rehearse “Zen Play”.

NTI production will be at Conn in Dec.
Two part evening planned to set mood

The National Theatre Institute of the Eugene O'Neill Theater Center in Waterford, Connecticut, will bring its eleventh Bus Company production, ZEN PLAY, to Conn on Monday, December 1. ZEN PLAY is a unique theatrical production, based on the Zen poems and plays of Paul Reps. Reps’ works are explorations of Zen philosophy. The Bus Company’s production is not treated as a philosophical piece: it is the culmination of the Company’s responses to the life, the humor, and the theatricality of the pieces.

This semester, four Conn students have studied at the Institute and will appear in the production: Carmen Brown, Peter Guttmacher, Nancy Katz and Jeremiah Williamson.

The evening will be composed of two parts: a workshop led by members of the company, and the performance of ZEN PLAY. The Company regards the workshop as an integral part of the production. However, in this initial part of the evening, to generate some of the energy, spirit, and excitement of what will follow when ZEN PLAY begins.

Developed through the use of gymnastics, improvisation, music, and dance, ZEN PLAY is a series of short pieces packed with energy, drama, and imagination. The wit, the touches of irreverence, and the sensitivity of the company are clearly reflected in the work.

ZEN PLAY evolved under the direction of Michael Posnick, directed by the Yale Repertory Theatre, such productions as Brecht-Well’s THE HAPPY END, Isaac Singer’s THE MURDER, and Eric Bentley’s ARE YOU NOW OR HAVE YOU BEEN. His most recent project was THEATER MUSIC OF DUKE ELLINGTON at the Theater At Noon. He is a faculty member of the Lincoln Center Institute, through which he works with teachers in the educational system. He participated for two summers in the Eugene O’Neill National Playwrights Conference, composing the music for WARREN HARDING in 1972, and MARCO POLO during the 1973 season.

The National Theatre Institute offers a college-accredited workshop program of intensive theater training primarily funded by the Rockefeller and the Palmer Foundation.

Ms. Benton feels, however, that she has strengthened the human being transcending its rigidity and weight through the welding torch. The show is very imaginatively costumed, with the viewer can walk completely around the standing pieces.

One-woman metal sculpture exhibit:
Visitors can explore and try on pieces

by Jonathan Krum

A new show has opened at the Lyman-Allyn Museum, just behind the campus. Ms. Benton, who describes herself as a “metal artist,” has developed her skills in acting, directing, dancing, tumbling, voice, design, and management. The 5,000 mile tour will open here at Conn and will continue at colleges, prep schools and universities, culminating in New York for two invitational performances at the Manhattan Theater Club.

One of the most interesting aspects of the show is the way in which the artist interacts with the audience. Visitors can explore different types of metal sculptural forms, such as masks and freestanding sculptures. The artist encourages the audience to touch and handle the pieces, allowing them to feel the texture and weight of the metal.

The show is open to visitors of all ages and backgrounds and is designed to be educational and interactive. Visitors are encouraged to ask questions and engage with the artist, who is always available to provide guidance and insight into her work.

One day, Ms. Benton was presented with a commission to create a mask for a performance at the State Theater. She was thrilled with the opportunity and went to work immediately. The mask took several weeks to complete, and Ms. Benton was pleased with the final result. She was eager to see it in action and was delighted when she saw it worn by the performer.

Ms. Benton believes that her work is a form of meditation, and she encourages visitors to take their time and observe the sculptures closely. She likes to see people become engrossed in her work and to feel a sense of connection to the artist's creative process.

One of the most popular pieces in the show is a series of masks called "Meditation Mask." These masks are designed to be worn during meditation exercises and are intended to help people achieve a state of deep relaxation. Ms. Benton believes that these masks are a powerful tool for individuals who are seeking ways to reduce stress and improve their overall well-being.

Ms. Benton's work is a unique blend of art and meditation, and she is passionate about sharing her creations with others. She hopes that visitors to the show will leave with a sense of inspiration and a newfound appreciation for the power of art to heal and transform.

It may seem paradoxical that the artist should choose metal, a harsh, unyielding medium, as her art material. Ms. Benton feels, however, that she has gained strength as a human being through mastering metal, transcending its rigidity and weight through the welding torch. The show is very imaginatively costumed, with the visitor can walk completely around the standing pieces.

For the masks, their mountings on wall hooks and tables makes it easy to explore them and put them on. And a mirror at one end of the gallery allows visitors to see themselves as they take on the new characters through the masks.

This exhibit runs through December 14th. The museum is open Tuesday through Saturday, 10 to 4 p.m. and on Sunday, 2 to 5 p.m.
Portuguese socialists, and economists to Speak about politics in Portugal

Joao Ferreira Souza, a Portuguese economist and member of MES (Left Socialist Movement of the Portuguese Revolution Front), will speak on the political situation in Portugal, November 21, at 4:20 p.m. in Oliva.

Contrary to what is widely believed in the United States, Portugal is in the midst of a repressive and authoritarian "Third World" dictatorship. In order to keep repressed wage and salary workers, and a little over half of these are proletarians in the strict sense, production workers in factories, shops, and farm.

At the other end of the class structure, a monopoli bourgeoisie which controlled most of Portugal's industry, banking, communications, tourism, etc. Nurtured during the long years of the Falaz dictatorship (1926-74), four major conglomerates (CUF, Quina, Espirito Santo, Uniao de Banca) have acquired expansive holdings in Portugal's African colonies and developed a vast web of joint ventures with European and US multinationals.

On April 25, 1974 a group of students, following the call of the Armed Forces Movement (MFA) overrode the leftist regime in a bloodless coup d'etat. The enormous social upheaval which took place immediately after this coup was precipitated by the fact that the class struggles generated during the period in which the Portuguese working class was taking shape had been brutally repressed by the fascist dictatorship. But, a historic period opened with the wages law the regime had banned independent unions, suppressed strikes, and deported, tortured and killed militant workers. After the April coup workers staged hundreds of higher wages and working conditions until their demands were met.

The political situation of the Portuguese people has improved since 1974, but the country is still ruled by a government which is committed to a policy of nationalization. The "Third World" dictatorship has not been toppled, nor has reparations to workers been made regarding the state's responsibility for the social, political and economic suffering they endured during the dictatorship.

The Goncalves government fell, last November 19, in a shift to the right, Admiral Jose Pinheiro de Azevedo became Prime Minister, and the Popular Democratic Party (PCP) took power.

The PCP has so far tried successfully to eliminate the Left from the armed forces and the media. There are now preparations on behalf of a military putsch and a civil war in Portugal.

The Left is likely to appear to be winning, the United Nations is planning to intervene, as it did in the Dominican Republic in 1965. But US intervention could have unforeseen consequences in Europe, especially in France, Italy, and Spain.

Chris Christian Fellowship hosts weekend by Byrle Bomberg

Empty classrooms in Thames Hall, excitement for building activity last weekend, when over 40 students from nine colleges, including Conn., built a model of the Thames Hall dorm during the weekend.

The students were trained in small groups, in five conference sessions on church and community, and were supervised by church leaders from the area.

The conference was organized by VCF, an interdenominational student movement. The "courses" are scheduled during the academic year, and are open to students near the campus of the host school. Although the program has been in existence since 1964, last weekend's conference was the first to be held at Conn. Eleven other Level I conferences took place during the same weekend, including courses at the University of Maryland, at the General Motors Institute in Michigan, and at Stanford University in California.

A few of the delegates to the Conn. weekend were: an elderly retired priest from Southern Massachusetts University, nursing students from the University of Maine, marine biology major from the University of Rhode Island, and six students from Conn. College itself. They met with other students in whole-group sessions on "Morning came early," and "What the infirmary's billing want to deal directly with " and "Psalm 23." The committee would like to thank the Student Assembly and Council for approval.

Students on uninsured: Ctme: willing to listen

The Advisory Committee of Students to the uninsured will soon be hearing the response to a number of proposals submitted to the Health Services Staff. However, one of the students on the committee stated that they could have made suggestions, the students have no power to see that their suggestions are instituted.

Karen Durkin, Elizabeth Hopkins, Jesse Abbott, Pete Clauson, Mike Langford, and Kate Powerson submitted a series of questions earlier in the semester to the uninsured. These questions were directed to what the uninsured's billing procedures are to the uninsured's policy on the treatment of alcoholism and birth control.

At this time, they also submitted several suggestions. They noted that the uninsured consider acquiring a staff car.

Ped mall--continued from page four

"We might be talking years before this massive project is complete." In the meantime, the shipbuilder continues its use of the pollutants which cause eye and respiratory irritations.

$33,500,000 Unclaimed Scholarship

Over $33,500,000 unclaimed scholarships, grants, aids, and fellowships, ranging from $50 to $10,000. Current list of these sources researched and compiled as of Sept. 15, 1976.

UNCLAIMED SCHOLARSHIPS

11175 Massachusetts Ave., Los Angeles, CA 90025

I am enclosing $9.95 plus $1.00 for postage and handling.

THANKS

To the Connecticut College Community: The Admissions staff wishes to express our appreciation for the warm welcome extended to the prospective students who visited the campus this weekend.

The number attending exceeded our expectations that with your great response our visitors were housed, fed, and entertained.

Thanks for your hospitality and for your assistance.

P.S. PLEASE RUSH YOUR CURRENT LIST OF UNCLAIMED SCHOLARSHIPS SOURCES.

In general, the work of diplomats has been far from exciting. One would only hope that his new album is better than his live performances.
Basketball team reads itself first
For a tough season of hoop

By Saul Rubin
The soccer season has ended. Now, instead of trying to put white and black balls into a large rectangular net, they turn our brown basketball through a smaller round rim. And to be successful, this means we must take a look at the 1975-76 edition of the Conn. College basketball team. The hoop season is upon us.

At this point, it is hard to say how successful the team will be. Coach Charles Luce is attempting to fill a void left by the departure of two key players from last year’s (19-4) team. One of those players, Kevin Copeland, is back, but only in a coaching role. Key returning players include seniors guard Steve Brunetti and forward, Mike Franklin. Both back for their fourth year are Jeff Sinopoli, Jim Litwin, and Delroy Trips, all seniors out for their third year.

Franklin, both back for their third year. "Lionel" is to end the deadline, and Delroy Trips, all litWIn, and Delroy Trips, all

Although many women expressed an interest to play in an exclusively women’s league last year, women will not be allowed to participate in the men’s league as of now. The boys’ ed. department is in the process of formulating that league. If for some reason this league does not get off the ground this year, however, then women will be allowed to play in the men’s league.

The men will have two leagues this year as “A” and “B” league. The purpose of this is to separate those interested in playing with other men and possibly competing with teams, from those who simply enjoy running up and down the court and playing basketball. The rules will vary slightly from league to league, but the program will try to appeal to as many interested students as possible.

The A league will be comprised of approximately ten people. As for the “A” league, it will be interesting to see the final results. Dean claiming that half of the freshman class was six feet tall. They should add some excellence to the league. An early glimpse indicates K.B. has the team to beat with two excellent players having signed million dollar contracts. Right behind them are a cluster of teams including Harkness, Lambdin, whatever the quad can produce, and that omnipotent group of no names from Larrabee, Freeman, J.A., Park, Marshall, and Windham have not yet been squired, but Hamilton and Madison high school will be counted on to upset anyone.

If your dorm has not yet submitted the roster, it must in no time be toward November, 2.

As for the "A" league, it will be important to see if the situation demands it. Although all plans are to have at least one team Coach Luce is positively sure about is the Whaler City Tournament on 11/2 and 5 Conn. College. This is the first basketball tournament of its kind at Conn, and Coach Luce organized this contest that will involve three other local schools.

What kind of season will it be for the Camels? It is too early to tell, but the team does have a height problem that could spell trouble for taller opponents. Because of this, Steve Brunetti thinks the team will have to play a man to man defense, which they will stick to as long as performance. In order for Conn. to be able to be better, they will have to include more players, and a lot of mistakes.

Conn. will play just that much harder to win each game coming up. Young Lea Harsaint especially shown in routines that combined athletic stunts with grace and precision. The girls performed tumbling passes, and gave routines on the balance beam.

Conn. College women’s team performed floor exercise, balance beam, and uneven bars. Composed primarily of freshmen and sophomores, and captained by Kyle Bradley and Ann Droulhet, they look like the strongest competitive team ever. Still only a token few, the Conn. College men performed on the pommel horse and high bar. Coach Jeff Zimmern brought a fine routine on the pommel horse and still rings. His ring still performance, which included a Russian Cross, was met with enthusiastic shouts of coach Sheryl Luce. The Conn. College men’s team was represented by three performers, who displayed fine routines on the side horse, still rings, and high bar.

The evening was consistent in the high quality of gymnastics and balance displayed.

Gymnasts thrill a packed house
On Saturday, November 14, Connecticut College hosted the Southeastern Connecticut Gymnastics Festival to a standing-room-only crowd.

The Connecticut College gymnastics team combined forces with the Mystic 5 gymnastics Center gymnasts and several guests from the Coast Guard Academy gymnasium to bombard the audience with a two hour extravaganza.

The program consisted of tumbling, routines on all pieces of men’s and women’s apparatus, and culminated in a quadruple dance and tumbling routine performed by Marcy, Ann Droulhet, Marti Gawitz, and Sue Pollock, all from Conn. -- College.

The Mystic Community Center team, coached by Nicky Checker, is nearly fifty strong, with boys and girls ranging from primary school to high school age. From the start, they captured the audience with their vivacity, enthusiasm, and superior skills.

The Conn. College women’s team performed floor exercise, balance beam, and uneven bars. The evening was consistent in the high quality of gymnastics and balance displayed.

SQUASH LADDER -- PARTICIPANTS -- There will be a meeting of all those who signed up for the squash ladder on Monday, November 24, at 4:30 p.m. in Cro Main Lounge.

Fencing clinic -- Monday, Nov. 24, 1975, 1:15-3:30 p.m. at gymnasium, Crozier-Williams Conducted by Mr. Edward Richards; fencing master, Academy of Fencing, Watertown, Mass; fencing coach, MIT; former men’s National Fencing Champion.

Participants -- current members of the College fencing class, gave two fine routines in the squash ladder. No one, however, was allowed to sign up more than once.

To include: instruction in bouting and individual coaching. Demonstrations of electrical scoring in bouting.

Camel icemen are hot
With the puck shot

by Chris Abbott
Connecticut College ice hockey started out in impressive fashion this year winning their first two games against the University of Connecticut. Conn. fell in both of last-pasted games, however, but once again, the Conn. College men displayed excellent skating and proved to be too strong for the Camels.

The starting lineup was the same as in the Brown game, but with fewer substitutions. Junior Steve Farwell has been left out on the first line because of shin splints, faithfully kept score for both games. The team’s record now stands 1-1-1.
Mrs. Wagner: a woman with Amazing energy and enthusiasm

by Debbie Pendleton

Top superpower, along with being the mother of nine children all older than college age except for two, is Water Safety Trainer for Southeastern Red Cross at Connecticut College. Along with this job, Mrs. Wagner's interests branch out to other fields of the physical education department, including archery and folk dancing. As pool director, Coach of the Women's Swim Team, and director of an upcoming Summer Program for Children, including swimming, tennis, music and drama, as pool director, Mrs. Wagner's responsibilities include setting up the lifeguard schedule and planning a program of swimming lessons. Students are encouraged to call the P.E. office. If they are interested in taking lessons or improving their swimming skills.

The swim team is another activity that Mrs. Wagner hopes more people will experience. Archery is a favorite that this semester the team has been practicing, aiming toward a coed swim meet with Fairfield University second semester.

With ten years of involvement with Connecticut College behind her, Mrs. Wagner remembers when physical education was required and stresses how much she has enjoyed classes with students, especially the first class she taught, for which eighty students signed up. First Aid classes continue to be popular with students since very often it is necessary for those who have Will to be qualified in First Aid also.

A challenging sport that has not taken place at Conn. for awhile is archery. Mrs. Wagner hopes to have students form a club to get this sport started again. The equipment is available in a supervised situation. Any responsible students with experience in archery are more than welcome to start a club. Another available job for swimmers is to teach at a Saturday Swim Class for children and adults. You may inquire about this job if interested at the P.E. office.

Flag football title game
To take place this Saturday

by Steve Price

In a fitting conclusion to the 1975 flag football season, Lambdin and Morrison will meet in the Super Bowl this Saturday at 1:30. Both teams have not lost a game this year. Morrison has tied two games and Lambdin one. The title game will be a rematch of last year's 14-14 tie during the early weeks of the season. In the event of a tie after 4 quarters on Saturday, sudden death will determine the victor of this North Division rivalry.

Morrison eliminated Harkness 56-28 in the first semifinal game, a contest which did not exactly showcase the intricacies of flag football defensive play. Peter Gale ran wild, scoring for touchdowns for Morrison. The key play of the game, however, occurred late in the first half. With less than two minutes remaining in the half, Jim Briggs, who played an outstanding game for Harkness' momentum by returning the kickoff for a touchdown and a 28-14 halftime lead. The Morrison offense took charge in the second half, and Harkness a chance to get back in the game.

In the other semifinal, Lambdin defeated a stubborn Quartz team 25-13. The victors methodically built up a 38-0 lead after 3 quarters, led by the backfield of Bob House and Tom Deedy, who both scored two touchdowns in the game. Robbie Roberts led a fourth quarter rally to cut the lead to 28-21 with a few minutes left in the game. House then ended the Quads' hopes by breaking free for his second touchdown to clinch the victory for Lambdin.

Soccer ends first NCAA season

by Bear Kobac

Soccer, what can you compare to soccer? "I know something," said Dave, "I do it, and you won't need cleats," said Clarke Miller, Anyway, as Owen Prang.exclaims, "The action this fall was fast and furious, but not much scoring," and it was pretty much the same for the soccer team.

The season ended with a 4-1 record, very respectable for first season NCAA play. As coach Lesagheff stated, "we lost a lot of close games to some very fine ball clubs. I was impressed with how much we have improved since last season, really!" When asked about the season, Dave Kelley added, "It's a tough question," and fellow graduating senior David "Dave Kelley" Kelley added, "I think John has a good point there." But besides these two, the team possessed a variety of talent.

Awards presented were:

Keepimg limber when the cold wind blows

by Andy Rodwin

Large amounts of rich food are consumed by young hardy bodies over the winter months in order to stave off the aggressive malady of bacterial viruses known to pounce upon a body not sufficiently shored up to foster a healthy resistance. Yet, there is no natural outlet to release the quantities of fats and carbohydrates, teeming with calories, because the bitter cold of winter inhibits the carefree romping of the students around the campus greens: frisbees have long since been hidden away in bureaus, cobwebs adorn the soccer goalposts, there are thick layers of dust on the crew shelves, and flag football is at halfmast. Clearly, there is a need for an outlet to avoid campus-wide obesity and in order to trim the portly physique down to its natural shape, in order to keep a network of athletic activities is needed as an outlet for frustrated energies. The facilities are available at Connecticut College.

Few people are aware of the Universal weight machine, continued on page twelve

Quarterback Dick Kazdis leads Morrison into the finals against Lambdin.

So the soccer. It's clear, College soccer. And as coach Lesagheff says, "Bullwinkle may be a moose, but nobody is going to call me dumb and live to kick a soccer ball off the astro turf and into the net, not on a Thursday, at least."
Winter sports: keeping limber

continued from page eleven

When inebriated, bowling proves extremely rewarding. Although the sober competitor enjoys rolling a high scoring string, his happy-go-lucky opponent usually prefers setting up the pins, often amidst pin sharpening and rocketing bowling balls.

The pool in Crosier-Williams will be a refuge for those who favor aquatic sports. There is little structure (laps may be swum in either direction). Although water polo and other water games are allowed, canoes and sailboats have not yet been proven to be safe and convenient, and consequently must be left in the locker room.

The gymnasium continues to be popular all season long. Provided you can handle a basketball, a number of exciting variations are possible: one-on-one, Pig, Around the World, two-on-two, layup drills, three-on-three, passing drills, foul shooting, four-on-four, and standard full court five-on-five with Pro-Keds, whistles, and referees.

In the face of all these choices, there will be a clan of physical disciplinarians who balk at the comfort and shelter of winter sports and who will long for the uninhibited romance of outdoor weather activity. For these, there is the inevitable cold-weather jogging. The sport is structurally rigid, but, insulated against the cold and wet environment, the runner runs anywhere anytime. Unlike the bush leaguer facetiously hacking away at Foosball or bowling, the winter runner sharpens his image as the true Romantic hero.

Stretching budget dollars

continued from page one

Mr. Knight further stated that the school cannot afford to budget departments for possible equipment breakdowns. Since there is always the chance that no breakdown will occur, he prefers to deal with the situation when and if it arises.

When questioned about alternative administrative solutions for limiting spending and affording a more accurate conception of where the budget stands at any given time, Mr. Knight said that the choice is between the present casual accounting system, and a regimented one. He explained that an organization which is small can normally run more efficiently than a large one. In the past, he continued, we have avoided a rigid system, which would involve the institution of purchase rigid system, which would involve the institution of purchase orders. These orders, made out by department heads, would have to be signed by Mr. Knight before any purchase could be done. The rigid system, furthermore, would involve overhead costs, since it would require the school to hire extra personnel and buy new equipment. Since Conn's staff is limited, compared to other small colleges, it would be impossible to handle the purchasing and record-keeping efficiently. Mr. Knight said that a very limited amount of money is presently being spent on administrative functions. To switch to a regimented accounting system, we would "need to spend money to do things better administratively."

Dining rooms

continued from page one

The President has said that he expects an all campus forum to discuss the dining situation would be scheduled in the future, while maintaining that its purpose would not be to present the student body with alternatives on the matter. When commenting on what the student's emotional reaction to regimented dining might be, he concluded that he walked a long way to get his meals when he was a freshman at Harvard—at least as far as J.A. to the complex.

Faculty governance

continued from page one

According to the proposal, a Faculty Budget Committee would "develop a faculty recommendation on Budget matters to be presented to the president and the Board of Trustees." This recommendation would be formulated after the committee met with the Treasurer, and perhaps "joinly with a Student Budget Committee."

One other committee—a Exceptions Committee—which would issue decisions on all petitions from faculty and students that involve a deviation from normal academic policies and programs, has also been proposed. This committee would also "administer academic discipline."

Among those committees to be eliminated by the establishment of the new, or revised committees are: Academic Policy, Administration, Student-Faculty Academic, Development, Trustee-Faculty Liaison, Admission, and Schedule Committee.

Christian Weekend

continued from page eight

Weekend training received well the loss of sleep, the busy schedule, and the registration fee of ten dollars.

Why do college students such as those who attended Level I consider studying the Bible worth their investment of time, money, and energy? One member of the Conn. fellowship summed up her answer: "The Bible is the only place to start to know what God has already said, what God's will is, and what God wants us to do with our lives."

The next Level I weekend in this area will be held in Amherst, Massachusetts, from March 5 through 7, 1976. The Level II weekend, available to those who have attended Level I, will be held in Kingston, Rhode Island (U.R.I. campus), from February 20 through 22, 1976. For more details and registration materials, students should contact Nancy Cahoon in Warren, Conn.
